(a) *Overview.* This section provides special rules to determine whether arrangements for purchases of output from an output facility cause an issue of bonds to meet the private business tests. For this purpose, unless otherwise stated, water facilities are treated as output facilities. Section 1.141–3 generally applies to determine whether other types of arrangements for use of an output facility cause an issue to meet the private business tests.

(b) *Definitions.* For purposes of this section and § 1.141–8T, the following definitions and rules apply:

(1) *Available output.* The available output of a facility financed by an issue is determined by multiplying the number of units produced or to be produced by the facility in one year by the number of years in the measurement period of that facility for that issue.

(i) *Generating facilities.* The number of units produced or to be produced by a generating facility in one year is determined by reference to its nameplate capacity or the equivalent (or where there is no nameplate capacity or the equivalent, its maximum capacity), which is not reduced for reserves or other unutilized capacity.

(ii) *Transmission and other output facilities.* (A) *In general.* For transmission, cogeneration, and other output facilities, available output must be measured in a reasonable manner to reflect capacity.

(B) *Electric transmission facilities.* Measurement of the available output of all or a portion of electric transmission facilities may be determined in a manner consistent with the reporting rules and requirements for transmission networks promulgated by the Federal Energy Regulatory Commission (FERC). For example, for a transmission network, the use of aggregate load and load share ratios in a manner consistent with the requirements of the FERC may be reasonable. In addition, depending on the facts and circumstances, measurement of the available output of transmission facilities using thermal capacity or transfer capacity may be reasonable.

(iii) *Special rule for facilities acquired or constructed primarily for use by private business users.* If an issuer reasonably expects on the issue date that persons that are treated as private business users will purchase more than 30 percent of the actual output of the facility financed with the issue, the Commissioner may determine the number of units produced or to be produced by the facility in one year on a reasonable basis other than by reference to nameplate capacity, such as the average expected annual output of the facility. For example, the Commissioner may treat the reasonably expected annual output of a financed peaking electric generating unit as the available output of that unit if the issuer reasonably expects, on the issue date of bonds that finance the unit, that an investor-owned utility will purchase 30 percent of the actual output of the facility under a take or pay contract, even if the amount of output purchased is less than 10 percent of the available output determined by reference to nameplate capacity. The reasonably expected annual output of the generating facility must be consistent with the capacity reported for prudent reliability purposes.

(iv) *Special rule for facilities with a limited source of supply.* If a limited source of supply constrains the output of an output facility, the number of units produced or to be produced by the facility must be determined by reasonably taking into account those constraints. For example, the available output of a hydroelectric unit must be determined by reference to the reasonably expected annual flow of water through the unit.

(2) *Measurement period.* The measurement period of an output facility financed by an issue is determined under § 1.141–3(g).

(3) *Sale at wholesale.* For purposes of this section, a sale at wholesale means a sale of output to any person for resale.

(4) *Stranded costs.* For purposes of this section, *stranded costs* means stranded costs as defined in 18 CFR 35.26 and costs that an issuer incurred to provide service to a wholesale or retail customer that subsequently becomes, in whole or in part, an unbundled transmission customer and that an issuer is authorized to recover by the FERC or a state regulatory authority.

(5) *Take contract and take or pay contract.* A *take contract* is an output contract under which a purchaser agrees to pay for the output under the contract if the output facility is capable of providing the output. A take or pay contract is an output contract under which a purchaser agrees to pay for the output under the contract, whether or not the output facility is capable of providing the output.

(6) *Transmission facilities. Transmission facilities* are facilities for the transmission or distribution of output. Transmission facilities include facilities necessary to provide ancillary services required to be offered as part of open access transmission tariffs under rules promulgated by the FERC under sections 205 and 206 of the Federal Power Act (16 U.S.C. 824d and 824e). Thus, if a facility also serves another function (for example, a facility that provides for operating reserves for transmission and also provides generation) an allocable portion of the facility is treated as a transmission facility.

(7) *Nonqualified amount.* The nonqualified amount with respect to an issue is determined under section 141(b)(8).

(c) *Output contracts*—(1) *General rule.* The purchase by a nongovernmental person of the available output of an output facility (output contract) financed with the proceeds of an issue is taken into account under the private business tests if the purchase has the effect of transferring substantial benefits of owning the facility and substantial burdens of paying the debt service on bonds used (directly or indirectly) to finance the facility (the benefits and burdens test). See paragraph (c)(5) of this section for other output contract arrangements that are taken into account under the private business tests. See also § 1.141–8T for rules for when an issue that finances an output facility (other than a water facility) meets the private business tests because the nonqualified amount of the issue exceeds $15 million.

(2) *Benefits and burdens test*—(i) *Benefits of ownership.* An output contract transfers substantial benefits of owning a facility if the contract gives the purchaser (directly or indirectly) rights to capacity of the facility on a basis that is preferential to the rights of the general public.

(ii) *Burdens of paying debt service.* An output contract transfers substantial burdens of paying debt service on an issue to the extent that the issuer reasonably expects that it is substantially certain that payments will be made under the terms of the contract (disregarding default, insolvency, or other similar circumstances). For example, an output contract is treated as transferring burdens of paying debt service on an issue if payments must be made upon contract termination.

(iii) *Payments pursuant to pledged contract.* Payments made or to be made under the terms of an output contract that is pledged as security for an issue are taken into account under the private business tests even if the issuer reasonably expects that it is not substantially certain that payments will be made under the contract (disregarding default, insolvency, or other similar circumstances). For this purpose, an output contract is pledged as security only if the bond documents provide that the pledged contract cannot be substantially amended without the consent of bondholders or a trustee for the bondholders.

(3) *Take contract or take or pay contract*—(i) *In general.* The benefits and burdens test is met if a nongovernmental person agrees pursuant to a take contract or a take or pay contract to purchase the available output of a facility. See paragraphs (d) and (e) of this section for rules regarding measuring the use of, and payments on debt service for, an output facility for determining whether the private business tests are met.

(ii) *Transmission contracts.* In the case of a transmission facility, an agreement to provide firm or priority transmission services is generally treated as a take contract or a take or pay contract. The extent to which transmission services are interruptible is an important factor indicating that a contract for transmission services is not treated as a take contract or a take or pay contract.

(4) *Requirements contracts*—(i) *In general.* A requirements contract under which a nongovernmental person agrees to purchase all or part of its output requirements is taken into account under the private business tests only to the extent that, based on all the facts and circumstances, the contract meets the benefits and burdens test. See § 1.141–15T(f)(3) for special effective dates for the application of this paragraph (c)(4) to issues financing facilities subject to requirements contracts.

(ii) *Significant factors.* Significant factors that tend to establish that the benefits and burdens test is met under the rule set forth in paragraph (c)(4)(i) of this section include—

(A) The purchaser's customer base has significant indicators of stability, such as large size, diverse composition, and a substantial residential component;

(B) The contract covers historical requirements of the purchaser, rather than only projected requirements that are in addition to historical requirements; and

(C) The purchaser agrees not to construct or acquire other power resources to meet the requirements covered by the contract.

(iii) *Special rule for retail requirements contracts.* In general, a requirements contract that is not a sale at wholesale does not meet the benefits and burdens test because the obligation to make payments on the contract is contingent on the output requirements of a single user. Such a requirements contract in general meets the benefits and burdens test, however, to the extent that it contains contractual terms that obligate the purchaser to make payments that are not contingent on the output requirements of the purchaser (such as significant termination payments) or that obligate the purchaser to have output requirements. For example, a requirements contract with an industrial purchaser meets the benefits and burdens test if the purchaser enters into additional contractual obligations with the issuer or another governmental unit not to cease operations.

(5) *Contract with specific performance rights.* An output contract that provides the purchaser with specific rights to control the output of a facility or with other specific performance rights to the use of output of a facility is generally taken into account under the private business tests, even if the benefits and burdens test is not met. Payments made and to be made under such a contract are generally taken into account under the private payment test, even if the issuer does not reasonably expect that it is substantially certain that payments will be made under the contract (disregarding default, insolvency, or other similar circumstances). A customer's normal entitlement to receive utility service (for example, an entitlement to reasonable protection against blackouts in times of high demand through rotating the effects of blackouts) is not treated as a specific performance right for this purpose.

(d) *Measurement of private business use.* If an output contract results in private business use under this section, the amount of private business use generally is the capacity that must be reserved for the nongovernmental person under prudent reliability standards. For example, in the case of a take contract for a peaking electric generating unit, under which a nongovernmental person has priority rights to use capacity at any time for the entire term of the bonds, but under which the total energy purchases are limited in any one year to 10 percent of annual available output (determined by reference to nameplate capacity), the amount of private business use is the amount of capacity that must be reserved for that nongovernmental person under prudent reliability standards, which may be as much as 100 percent.

(e) *Measurement of private security or payment.* The measurement of payments made or to be made by nongovernmental persons under output contracts as a percent of the debt service of an issue is determined under the rules provided in § 1.141–4.

(f) *Exceptions for certain contracts*—(1) *Small purchases of output.* An

VOL 63 ISS 14 JA 22 1998 UMI

output contract is not taken into account under the private business tests if the purchaser is not required under the contract to make a payment that is substantially certain to be made under paragraph (c)(2)(ii) of this section in any year greater than 0.5 percent of the average annual debt service on an issue that finances the output facility.

(2) *Swapping and pooling arrangements.* An agreement that provides for swapping or pooling of output by one or more governmental persons and one or more nongovernmental persons does not result in private business use of the output facility owned by the governmental person to the extent that—

(i) The swapped output is reasonably expected to be approximately equal in value (determined over periods of one year or less); and

(ii) The purpose of the agreement is to enable each of the parties to satisfy different peak load demands, to accommodate temporary outages, to diversify supply, or to enhance reliability in accordance with prudent reliability standards.

(3) *Short-term output contracts.* The exceptions for short-term arrangements provided in § 1.141–3 (c) and (d)(3) apply to output contracts. For example, a spot sale for use for a period of 90 days on the basis of rates that are generally applicable and uniformly applied generally does not result in private business use, and a spot sale for use for a period of 30 days on the basis of rates that are specially negotiated generally does not result in private business use.

(4) *Special 3-year exception for sales of output attributable to excess generating capacity resulting from participation in open access.* The purchase of output of an output facility (not including a water facility) by a nongovernmental person is not treated as private business use if all of the following requirements are met:

(i) The term of the contract is not longer than 3 years, including all renewal options.

(ii) The issuer does not make expenditures to increase the generating capacity of its system during the term of the contract that are, or will be, financed with proceeds of tax-exempt bonds.

(iii) The governmental owner offers non-discriminatory, open access transmission tariffs for use of its transmission system pursuant to rules promulgated by the FERC under sections 205 and 206 of the Federal Power Act (16 U.S.C. 824d and 824e) (or comparable provisions of state law pursuant to a plan approved by the FERC).

(iv) All of the output sold under the contract is attributable to excess capacity resulting from the offer of the non-discriminatory, open access transmission tariffs referred to in paragraph (f)(5)(ii) of this section.

(v) The contract mitigates stranded costs of the governmental owner that are attributable to the offer of the non-discriminatory, open access transmission tariffs referred to in paragraph (f)(5)(ii) of this section.

(vi) Any stranded costs recovered by the governmental owner (including amounts recovered under the contract) with respect to the output facility under rules promulgated by the FERC under the Federal Power Act (or comparable provisions of state law) are applied as promptly as is reasonably practical to redeem tax-exempt bonds that financed that facility in a manner consistent with § 1.141–12.

(5) *Special exceptions for transmission facilities*—(i) *Mandated wheeling.* Entering into a contract for the use of transmission facilities financed by an issue is not treated as a deliberate action under § 1.141–2(d) if—

(A) The contract is entered into in response to (or in anticipation of) an order by the United States under sections 211 and 212 of the Federal Power Act (16 U.S.C. 824j and 824k) (or a state regulatory authority under comparable provisions of state law pursuant to a plan approved by the FERC); and

(B) The terms of the contract are bona fide and arm's length, and the consideration paid is consistent with the provisions of section 212(a) of the Federal Power Act.

(ii) *Actions taken to implement non-discriminatory, open access.* An action is not treated as a deliberate action under § 1.141–2(d) if it is taken to implement the offering of non-discriminatory, open access tariffs for the use of transmission facilities financed by an issue in a manner consistent with rules promulgated by the FERC under sections 205 and 206 of the Federal Power Act (16 U.S.C. 824d and 824e) (or by a state regulatory authority under comparable provisions of state law pursuant to a plan approved by the FERC). This paragraph (f)(5)(ii) does not apply, however, to the sale, exchange, or other disposition of transmission facilities to a nongovernmental person.

(iii) *Application to reasonable expectations test to certain current refunding bonds.* An action taken or to be taken with respect to transmission facilities refinanced by an issue is not taken into account under the reasonable expectations test of § 1.141–2(d) if—

(A) The action is described in paragraph (f)(5) (i) or (ii) of this section;

(B) The bonds of the issue are current refunding bonds that, directly or indirectly, refund bonds issued before July 9, 1996; and

(C) The weighted average maturity of the refunding bonds is not greater than the remaining weighted average maturity of those prior bonds.

(6) *Certain conduit parties disregarded.* A nongovernmental person acting solely as a conduit for the exchange of output among governmentally owned and operated utilities is disregarded in determining whether the private business tests are met with respect to financed facilities owned by a governmental person. Use of property by a power marketer in the trade or business of purchasing and reselling power, however, is taken into account under the private business tests.

(g) *Allocations of output facilities and systems*—(1) *Facts and circumstances analysis.* Whether output sold under an output contract is allocated to a particular facility (for example, a generating unit), to the entire system of the seller of that output (net of any uses of that system output allocated to a particular facility), or to a portion of a facility is based on all the facts and circumstances. Significant factors to be considered in determining the allocation of an output contract to financed property are the following:

(i) The extent to which it is physically possible to deliver output to or from a particular facility or system.

(ii) The terms of a contract relating to the delivery of output (such as delivery limitations and options or obligations to deliver power from additional sources).

(iii) Whether a contract is entered into as part of a common plan of financing for a facility.

(iv) The method of pricing output under the contract, such as the use of market rates rather than rates designed to pay debt service of tax-exempt bonds used to finance a particular facility.

(2) *Illustrations.* The following illustrate the factors set forth in paragraph (g)(1) of this section:

(i) *Physical possibility.* Output from a generating unit that is fed directly into a low voltage distribution system of the owner of that unit and that cannot physically leave that distribution system generally must be allocated to those receiving electricity through that distribution system. Output may be allocated without regard to physical limitations, however, if exchange or similar agreements provide output to a purchaser where, but for the exchange agreements, it would not be possible for the seller to provide output to that purchaser.

(ii) *Contract terms relating to performance.* A contract to provide a specified amount of electricity from a system, but only when at least that amount of electricity is being generated by a particular unit, is allocated to that unit. For example, a contract to buy 20 MW of system power with a right to take up to 40 percent of the actual output of a specific 50 MW facility whenever total system output is insufficient to meet all of the seller's obligations generally is allocated to the specific facility rather than to the system.

(iii) *Common plan of financing.* A contract entered into as part of a common plan of financing for a facility generally is allocated to the facility if debt service for the issue of bonds is reasonably expected to be paid, directly or indirectly, from payments substantially certain to be made under the contract (disregarding default, insolvency, or other similar circumstances).

(iv) *Pricing method.* Pricing based on the capital and generating costs of a particular turbine tends to indicate that output under the contract is properly allocated to that turbine.

(3) *Transmission contracts.* Whether use under an output contract for transmission is allocated to a particular facility or to a transmission network is based on all the facts and circumstances, in a manner similar to paragraphs (g) (1) and (2) of this section. In general, the method used to determine payments under a contract is a more significant contract term for this purpose than nominal contract path. In general, if reasonable and consistently applied, the determination of use of transmission facilities under an output contract may be based on a method used by third parties, such as reliability councils.

(4) *Allocation of payments.* Payments for output provided by an output facility financed with two or more sources of funding are generally allocated under the rules in § 1.141–4(c).

(h) *Examples.* The following examples illustrate the application of this section:

Example 1. Joint ownership. Z, an investor-owned electric utility, and City H agree to construct an electric generating facility of a size sufficient to take advantage of the economies of scale. H will issue $50 million of its 25-year bonds, and Z will use $100 million of its funds for construction of a facility they will jointly own as tenants in common. Each of the participants will share in the ownership, output, and operating expenses of the facility in proportion to its contribution to the cost of the facility, that is, one-third by H and two-thirds by Z. H's bonds will be secured by H's ownership interest in the facility and by revenues to be derived from its share of the annual output of the facility. H will need only 50 percent of its share of the annual output of the facility during the first 20 years of operations. It agrees to sell 10 percent of its share of the annual output to Z for a period of 20 years pursuant to a contract under which Z agrees to take that power if available. The facility will begin operation, and Z will begin to receive power, 4 years after the H bonds are issued. The measurement period for the property financed by the issue is 21 years. H also will sell the remaining 40 percent of its share of the annual output to numerous other private utilities under contracts of 90 days or less entered into under a prevailing rate schedule, including demand charges. No contracts will be executed obligating any person other than Z to purchase any specified amount of the power for any specified period of time. No person (other than Z) will make payments substantially certain to be made (disregarding default, insolvency, or other similar circumstances) under paragraph (c)(2) of this section that will result in a transfer of substantial burdens of paying debt service on bonds used directly or indirectly to provide H's share of the facilities. The bonds are not private activity bonds, because H's one-third interest in the facility is not treated as used by the other owners of the facility. Although 10 percent of H's share of the annual output of the facility will be used in the trade or business of Z, a non-governmental person, under the rule in paragraph (c) of this section, that portion constitutes not more than 10 percent of the available output of H's ownership interest in the facility.

Example 2. Requirements contract treated as take contract. (i) City J issues 20-year bonds to acquire an electric generating facility having a reasonably expected economic life substantially greater than 20 years and a nameplate capacity of 100 MW. The available output of the facility under paragraphs (b)(1) of this section is approximately 17,520,000 MWh. On the issue date, J enters into a contract with T, an investor-owned utility, to provide T with all of its power requirements for a period of 10 years, commencing on the issue date. J reasonably expects that T will actually purchase an average of 20 MW over the 10-year period. Based on all of the facts and circumstances, including the size, diversity, and composition of T's customer base, J reasonably expects that it is substantially certain (disregarding default, insolvency, or other similar circumstances) that T will actually purchase only an average of 16 MW over the 10-year period. The contract is a requirements contract that must be taken into account under the private business tests pursuant to paragraph (c)(4) of this section because it provides T with substantial benefits of ownership (rights to capacity) and obligates T with substantial burdens of making payments that the issuer reasonably expects are substantially certain.

(ii) J is required to reserve for T's use 40 MW of capacity in accordance with prudent reliability standards. Under paragraph (d) of this section, the amount of private business use under this contract, therefore, is approximately 20 percent (40 MW × 24 hours × 365 days × 10 years, or 3,504,000 MWh) of the available output. Accordingly, the issue meets the private business use test. J reasonably expects that the amount to be paid for an average of 16 MW of power (less the operation and maintenance costs directly attributable to generating that 16 MW of power), will be more than 10 percent of debt service on the issue on a present-value basis. The payment for 16 MW of power is an amount that J reasonably expects is substantially certain to be made under paragraph (c)(2) of this section. Accordingly, the issue meets the private security or payment test because J reasonably expects that it is substantially certain that payment of more than 10 percent of the debt service will be indirectly derived from payments by T. The bonds are private activity bonds under paragraph (c) of this section. Further, if 20 percent of the sale proceeds of the issue is greater than $15 million and the issue meets the private security or payment test with respect to the $15 million output limitation, the bonds are also private activity bonds under section 141(b)(4). See § 1.141–8T.

Example 3. Allocation of existing contracts to new facilities. Power Authority K, a political subdivision created by the legislature in State X to own and operate certain power generating facilities, sells all of the power from its existing facilities to four private utility systems under contracts executed in 1999, under which the four systems are required to take or pay for specified portions of the total power output until the year 2029. Existing facilities supply all of the present needs of the four utility systems, but their future power requirements are expected to increase substantially beyond the capacity of K's current generating system. K issues 20-year bonds in 2004 to construct a large generating facility. As part of the financing plan for the bonds, a fifth private utility system contracts with K to take or pay for 15 percent of the available output of the new facility. The balance of the output of the new facility will be available for sale as required, but initially it is not anticipated that there will be any need for that power. The revenues from the contract with the fifth private utility system will be sufficient to pay less than 10 percent of the debt service on the bonds (determined on a present value basis). The balance, which will exceed 10 percent of the debt service on the bonds, will be paid from revenues derived from the contracts with the four systems initially from sale of power produced by the old facilities. The output contracts with all the private utilities are allocated to K's entire generating system. See paragraphs (g)(1) and (2) of this section. Thus, the bonds meet the private business use test because more than 10 percent of the proceeds will be used in the trade or business of a nongovernmental person. In addition, the bonds meet the private payment or security test because payment of more than 10 percent of the debt service, pursuant to underlying arrangements, will be derived from payments in respect of property used for a private business use.

VOL 63 ISS 14 JA 22 1998 UMI

Example 4. Allocation to displaced resource. Municipal utility MU, a political subdivision, purchases all of the electricity required to meet the needs of its customers (1,000 MW) from B, an investor-owned utility that operates its own electric generating facilities, under a 50-year take or pay contract. MU does not anticipate that it will require additional electric resources, and any new resources would produce electricity at a higher cost to MU than its cost under its contract with B. Nevertheless, B encourages MU to construct a new generating plant sufficient to meet MU's requirements. MU issues obligations to construct facilities that will produce 1,000 MW of electricity. MU, B, and I, another investor-owned utility, enter into an agreement under which MU assigns to I its rights under MU's take or pay contract with B. Under this arrangement, I will pay MU, and MU will continue to pay B, for the 1,000 MW. I's payments to MU will at least equal the amounts required to pay debt service on MU's bonds. In addition, under paragraph (g)(1)(iii) of this section, the contract among MU, B, and I is entered into as part of a common plan of financing of the MU facilities. Under all the facts and circumstances, MU's assignment to I of its rights under the original take or pay contract is allocable to MU's new facilities under paragraph (g) of this section. Because I is a nongovernmental person, MU's bonds are private activity bonds.

Example 5. Transmission facilities transferred to independent system operator. (i) In 1998, the public utilities commission of State C adopts a plan for restructuring its electric power industry. The plan fosters competition by providing both wholesale and retail customers with non-discriminatory access to transmission facilities within the State. The plan provides that investor-owned utilities will transfer operating control over all of their transmission assets to an independent system operator (ISO), which is a nongovernmental person that will operate those combined assets as a single, state-wide system. Municipally-owned utilities are eligible for, but are not required to participate in, the open access system implemented by the ISO. The functions of the ISO include control of transmission access and pricing, scheduling transmission, control area operations, and settlements and billing. In addition, under certain circumstances the ISO may order the transmission owners to construct additional transmission facilities. The restructuring plan is approved by the FERC pursuant to sections 205 and 206 of the Federal Power Act.

(ii) In 1994 City D had issued bonds to finance improvements to its transmission system. In 1998, D transfers operating control of its transmission system to the ISO pursuant to the restructuring plan. At the same time, D chooses to apply the private activity bond regulations of §§ 1.141–0 through 1.141–15 to the 1994 bonds. The operation of the financed facilities by the ISO does not meet the exception for management contracts that do not give rise to private business use under § 1.141–3(b)(4)(iii)(C) because it is not a contract solely for the operation of a facility under that exception. Under the special exception in paragraph (f)(5) of this section, however, the transfer of control is not treated as a deliberate action. Accordingly, the transfer of control does not cause the 1994 bonds to meet the private activity bond tests.

Example 6. Current refunding. The facts are the same as in *Example 5* of this paragraph (h), and in addition D issues bonds in 1999 to currently refund the 1994 bonds. The weighted average maturity of the 1999 bonds is not greater than the remaining weighted average maturity of the 1994 bonds. D chooses to apply the private activity bond regulations of §§ 1.141–0 through 1.141-15 to the refunding bonds. In general, reasonable expectations must be separately tested on the date that refunding bonds are issued under § 1.141–2(d). Under the special exception in paragraph (f)(5) of this section, however, the transfer of the financed facilities to the ISO need not be taken into account in applying the reasonable expectations test to the refunding bonds.

§ 1.141–6T $15 million limitation for output facilities (temporary).

(a) *In general*—(1) *General rule.* Section 141(b)(4) provides a special private activity bond limitation (the $15 million output limitation) for issues 5 percent or more of the proceeds of which are to be used to finance output facilities (other than a facility for the furnishing of water). Under this rule, a bond is a private activity bond under the private business tests of section 141(b)(1) and (2) if the nonqualified amount with respect to output facilities financed by the proceeds of the issue exceeds $15 million. The $15 million output limitation applies in addition to the private business tests of section 141(b)(1) and (2). Under section 141(b)(4) and paragraph (a)(2) of this section, the $15 million output limitation is reduced in certain cases. Specifically, an issue meets the test in section 141(b)(4) if both of the following tests are met:

(i) More than $15 million of the proceeds of the issue to be used with respect to an output facility are to be used for a private business use. Investment proceeds are disregarded for this purpose if they are not allocated disproportionately to the private business use portion of the issue.

(ii) The payment of the principal of, or the interest on, more than $15 million of the sales proceeds of the portion of the issue used with respect to an output facility is (under the terms of the issue or any underlying arrangement) directly or indirectly—

(A) Secured by any interest in an output facility used or to be used for a private business use (or payments in respect of such an output facility); or

(B) To be derived from payments (whether or not to the issuer) in respect of an output facility used or to be used for a private business use.

(2) *Reduction in $15 million output limitation for outstanding issues*—(i) *General rule.* In determining whether an issue more than 5 percent of the proceeds of which are to be used with respect to an output facility consists of private activity bonds under the $15 million output limitation, the $15 million limitation on private business use and private security or payments is applied by taking into account the aggregate nonqualified amounts of any outstanding bonds of other issues 5 percent or more of the proceeds of which are or will be used with respect to that output facility or any other output facility that is part of the same project.

(ii) *Bonds taken into account.* For purposes of this paragraph (a)(2), in applying the $15 million output limitation to an issue (the later issue), a tax-exempt bond of another issue (the earlier issue) is taken into account if—

(A) That bond is outstanding on the issue date of the later issue;

(B) That bond will not be redeemed within 90 days of the issue date of the later issue in connection with the refunding of that bond by the later issue; and

(C) More than 5 percent of the sale proceeds of the earlier issue financed an output facility that is part of the same project as the output facility that is financed by more than 5 percent of the sale proceeds of the later issue.

(3) *Benefits and burdens test applicable*—(i) *In general.* In applying the $15 million output limitation, the benefits and burdens test of § 1.141–7T applies, except that "$15 million" is substituted for "10 percent", or "5 percent" as appropriate.

(ii) *Earlier issues for the project.* If bonds of an earlier issue are outstanding and must be taken into account under paragraph (a)(2) of this section, the nonqualified amount for that earlier issue is multiplied by a fraction, the numerator of which is the adjusted issue price of the earlier issue as of the issue date of the later issue, and the denominator of which is the issue price of the earlier issue. Pre-issuance accrued interest as defined in § 1.148–1(b) is disregarded for this purpose.

(b) *Definition of project*—(1) *General rule.* For purposes of paragraph (a)(2) of this section, *project* has the meaning provided in this paragraph. Facilities that are functionally related and subordinate to a project are treated as part of that same project. Facilities having different purposes or serving different customer bases are not ordinarily part of the same project. For example, the following are generally not part of the same project—

(i) Generation and transmission facilities;

(ii) Separate facilities designed to serve wholesale customers and retail customers; and

(iii) A peaking unit and a baseload unit.

(2) *Separate ownership.* Except as otherwise provided in this paragraph (b)(2), facilities that are not owned by the same person are not part of the same project. If different governmental persons act in concert to finance a project, however (for example as participants in a joint powers authority), their interests are aggregated with respect to that project to determine whether the $15 million output limitation is met. In the case of undivided ownership interests in a single output facility, property that is not owned by different persons is treated as separate projects only if the separate interests are financed—

(i) With bonds of different issuers; and

(ii) Without a principal purpose of avoiding the limitation in this section.

(3) *Generating property*—(i) *Property on same site.* In the case of generation and related facilities, *project* means property located at the same site.

(ii) *Special rule for generating units.* Separate generating units are not part of the same project, if one unit is reasonably expected, on the date of each issue that finances the project, to be placed in service more than 3 years before the other. Common facilities or property that will be functionally related to more than one generating unit must be allocated on a reasonable basis. If a generating unit already is constructed or is under construction (the first unit) and bonds are to be issued to finance an additional generating unit (the second unit), all costs for any common facilities paid or incurred before the earlier of the issue date of bonds to finance the second unit or the commencement of construction of the second unit are allocated to the first unit. At the time that bonds are issued to finance the second unit (or, if earlier, upon commencement of construction of that unit), any remaining costs of the common facilities may be allocated among the first and second units so that in the aggregate the allocation is reasonable.

(4) *Transmission.* In the case of transmission facilities, *project* means functionally related or contiguous property and property for ancillary services, such as property required to be included in open access transmission tariffs under rules of the FERC. Separate transmission facilities are not part of the same project if one facility is reasonably expected, on the issue date of each issue that finances the project, to be placed in service more than 2 years before the other.

(5) *Subsequent improvements*—(i) *In general.* An improvement to generating or transmission facilities that is not part of the original design of those facilities (the original project) is not part of the same project as the original project if the construction, reconstruction, or acquisition of that improvement commences more than 3 years after the original project was placed in service and the bonds issued to finance that improvement are issued more than 3 years after the original project was placed in service.

(ii) *Special rule for transmission facilities.* An improvement to transmission facilities that is not part of the original design of that property is not part of the same project as the original project if the issuer did not reasonably expect the need to make that improvement when it commenced construction of the original project and the construction, reconstruction, or acquisition of that improvement is mandated by the federal government or a state regulatory authority to accommodate requests for wheeling.

(6) *Replacement property.* For purposes of this section, property that replaces existing property of an output facility is treated as part of the same project as the replaced property unless—

(i) The need to replace the property was not reasonably expected on the issue date or the need to replace the property occurred more than 3 years before the issuer reasonably expected (determined on the issue date of the bonds financing the property) that it would need to replace the property; and

(ii) The bonds that finance (and refinance) the replaced property have a weighted average maturity that is not greater than 120 percent of the reasonably expected economic life of the replaced property.

(c) *Example.* The application of the provisions of this section is illustrated by the following example:

Example. (i) Power Authority K, a political subdivision, intends to issue a single issue of tax-exempt bonds at par with a stated principal amount and sales proceeds of $500 million to finance the acquisition of an electric generating facility. No portion of the facility will be used for a private business use, except that L, an investor-owned utility, will purchase 10 percent of the output of the facility under a take contract and will pay 10 percent of the debt service on the bonds. The nonqualified amount with respect to the bonds is $50 million.

(ii) The maximum amount of tax-exempt bonds that may be issued for the acquisition of an interest in the facility in paragraph (i) of this *Example* is $465 million (that is, $450 million for the 90 percent of the facility that is governmentally owned and used plus a nonqualified amount of $15 million).

Par. 5. Section 1.141–15 is revised to read as follows:

§ 1.141–15 Effective dates.

(a) *Scope.* The effective dates of this section apply for purposes of §§ 1.141–1 through 1.141–6(a), 1.141–9 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b).

(b) *Effective dates.* Except as otherwise provided in this section, §§ 1.141–1 through 1.141–6(a), 1.141–9 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b) apply to bonds issued on or after May 16, 1997, that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(c) *Refunding bonds.* Sections 1.141–1 through 1.141–6(a), 1.141–9 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b) do not apply to any bonds issued on or after May 16, 1997, to refund a bond to which those sections do not apply unless—

(1) The weighted average maturity of the refunding bonds is longer than—

(i) The weighted average maturity of the refunded bonds; or

(ii) In the case of a short-term obligation that the issuer reasonably expects to refund with a long-term financing (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(2) A principal purpose for the issuance of the refunding bonds is to make one or more new conduit loans.

(d) *Permissive application of regulations.* Except as provided in paragraph (e) of this section, §§ 1.141–1 through 1.141–6(a), 1.141–9 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b) may be applied in whole, but not in part, to actions taken before February 23, 1998 with respect to—

(1) Bonds that are outstanding on May 16, 1997, and subject to section 141; or

(2) Refunding bonds issued on or after May 16, 1997.

(e) *Permissive retroactive application of certain sections.* The following sections may each be applied to any bonds issued before May 16, 1997—

(1) Section 1.141–3(b)(4);

(2) Section 1.141–3(b)(6); and

(3) Section 1.141–12.

VOL 63 ISS 14 JA 22 1998 UMI

Par. 6. Section 1.141–15T is added to read as follows:

§ 1.141–15T Effective dates (temporary).

(a) through (e) [Reserved]. For guidance see § 1.141–15.

(f) *Effective dates for certain regulations relating to output facilities*—(1) *General rule.* Except as otherwise provided in this section, §§ 1.141–7T and 1.141–8T apply to bonds issued on or after February 23, 1998 that are subject to section 1301 of the Tax Reform Act of 1986 (100 Stat. 2602).

(2) *Transition rule for requirements contracts.* Section 1.141–7T(c)(4) applies to output contracts entered into on or after February 23, 1998. An output contract is treated as entered into on or after that date if its term is extended, the parties to the contract change, or other material terms are amended on or after that date.

(g) *Refunding bonds in general.* Except as otherwise provided in paragraph (h) or (i) of this section, §§ 1.141–7T and 1.141–8T do not apply to bonds issued on or after February 23, 1998, to refund a bond to which the §§ 1.141–7T and 1.141–8T do not apply unless—

(1) The weighted average maturity of the refunding bonds is longer than—

(i) The weighted average maturity of the refunded bonds; or

(ii) In the case of a short-term financings (such as a bond anticipation note), 120 percent of the weighted average reasonably expected economic life of the facilities financed; or

(2) A principal purpose of the issuance of the refunding bonds is to make one or more new conduit loans.

(h) *Permissive retroactive application.* Except as provided in § 1.141–15 (d) or (e) or paragraph (i) of this section, §1.141–1 through 1.141–6, 1.141–7T through 1.141–8T, 1.141–9 through 1.141–14, 1.145–1 through 1.145–2, 1.150–1(a)(3) and the definition of bond documents contained in § 1.150–1(b) may be applied in whole, but not in part to—

(1) Bonds that are outstanding on May 16, 1997, and subject to section 141; or

(2) Refunding bonds issued on or after May 16, 1997.

(i) *Permissive retroactive application of certain regulations pertaining to output contracts.* Section 1.141–7T(f) (4) and (5) may be applied to any bonds issued before February 23, 1998.

Par. 7. Section 1.142(f)(4)–1T is added to read as follows:

§ 1.142(f)(4)–1T Manner of making election to terminate tax-exempt bond financing (temporary).

(a) *Overview.* Section 142(f)(4) permits a person engaged in the local furnishing of electric energy or gas (a local furnisher) that uses facilities financed with exempt facility bonds under section 142(a)(8) and that expands its service area in a manner inconsistent with the requirements of sections 142(a)(8) and 142(f) to make an election to ensure that those bonds will continue to be treated as exempt facility bonds. The election must meet the requirements of paragraphs (b) and (c) of this section.

(b) *Time for making election*—(1) *In general.* An election under section 142(f)(4)(B) must be filed with the Internal Revenue Service on or before 90 days after the later of—

(i) The date of the service area expansion that causes bonds to cease to meet the requirements of sections 142(a)(8) and 142(f); or

(ii) February 23, 1998.

(2) *Date of service area expansion.* For the purposes of this section, the date of the service area expansion is the first date on which the local furnisher is authorized to collect revenue for the provision of service in the expanded area.

(c) *Manner of making election.* An election under section 142(f)(4)(B) must be captioned "ELECTION TO TERMINATE TAX-EXEMPT BOND FINANCING", must be signed under penalties of perjury by a person who has authority to sign on behalf of the local furnisher, and must contain the following information—

(1) The name of the local furnisher;

(2) The tax identification number of the local furnisher;

(3) The complete address of the local furnisher;

(4) The date of the service area expansion;

(5) Identification of each bond issue subject to the election, including the complete name of each issue, the tax identification number of each issuer, the issue date of each issue, the issue price of each issue, the adjusted issue price of each issue as of the date of the election, the earliest date on which the bonds of each issue may be redeemed, and the principal amount of bonds of each issue to be redeemed on the earliest redemption date;

(6) A statement that the local furnisher making the election agrees to the conditions stated in section 142(f)(4)(B); and

(7) A statement that each issuer of the bonds subject to the election has received written notice of the election.

(d) *Effect on section 150(b).* Except as provided in paragraph (e) of this section, if a local furnisher files an election within the period specified in paragraph (b) of this section, section 150(b) does not apply to bonds identified in the election during and after that period.

(e) *Effect of failure to meet agreements.* If a local furnisher fails to meet any of the conditions stated in an election pursuant to paragraph (c)(6) of this section, the election is invalid.

(f) *Corresponding provisions of the Internal Revenue Code of 1954.* Section 103(b)(4)(E) of the Internal Revenue Code of 1954 set forth corresponding requirements for the exclusion from gross income of the interest on bonds issued for facilities for the local furnishing of electric energy or gas. For the purposes of this section any reference to sections 142(a)(8) and (f) of the Internal Revenue Code of 1986 includes a reference to the corresponding portion of section 103(b)(4)(E) of the Internal Revenue Code of 1954.

(g) *Effective dates.* Section 1.142(f)(4)–1 applies to elections made on or after February 23, 1998.

Par. 8. Section 1.150–5T is added to read as follows:

§ 1.150–5T Filing notices and elections (temporary).

(a) *In general.* Notices and elections under the following sections must be filed with the Chief, Employee Plans and Exempt Organizations) of the appropriate key district office—

(1) Section 1.141–12(d)(3); and

(2) Section 1.142(f)(4)–1T.

(b) *Effective dates.* This section applies to notices and elections filed on or after February 23, 1998.

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

Approved: December 23, 1997.

Jonathan Talisman,

Deputy Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

Proposed Rules

Federal Register
Vol. 63, No. 14
Thursday, January 22, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NORTHEAST DAIRY COMPACT COMMISSION

7 CFR Part 1301

Notice of Meeting

AGENCY: Northeast Dairy Compact Commission.

ACTION: Notice of meeting.

SUMMARY: The Compact Commission will hold its monthly meeting to consider whether to adopt as a Final Rule the Proposed Rule to exempt from the compact over-order price regulation fluid milk utilized for child nutrition programs and distributed by handlers during the 1998–1999 contract year. The Commission will also deliberate and make a final ruling on a handler petition for exemption from the price regulation. Certain matters relating to administration will also be considered and acted upon. This is a rescheduling of a previously noticed meeting (63 FR 1396, Jan. 9, 1998) for January 16, 1998, cancelled due to a winter storm in the Northeast.

DATES: The meeting is scheduled for January 26, 1998 commencing at 10:00 a.m. to adjournment.

ADDRESSES: The meeting will be held at the Holiday Inn, Capitol Room, 172 North Main Street, Concord, NH (exit 14 off Interstate 93).

FOR FURTHER INFORMATION CONTACT: Daniel Smith, Executive Director, Northeast Dairy Compact Commission, 43 State Street, PO Box 1058, Montpelier, VT 05601. Telephone (802) 229–1941.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Northeast Dairy Compact Commission will hold its regularly scheduled monthly meeting. The Compact Commission will deliberate and act upon whether to adopt as a Final Rule the Proposed Rule to exempt from the regulation fluid milk distributed by handlers during the 1998–1999 contract year under competitive bid contracts with School Food Authorities in New England for Child Nutrition Programs qualified for reimbursement under the National School Lunch Act of 1946 and the Child Nutrition Act. See 62 F.R. 65226. The Commission will also deliberate and make a final ruling on Horizon Organic Dairy's petition for exemption from the price regulation. Docket # HEP–97–009. Certain matters relating to administration, including final approval of the contract with participating universities to conduct the market impact study required by the price regulation, will also be considered and acted upon.

(Authority: (a) Article V, Section 11 of the Northeast Interstate Dairy Compact, and all other applicable Articles and Sections, as approved by Section 147, of the Federal Agriculture Improvement and Reform Act (FAIR ACT), Pub. L. 104–127, and as thereby set forth in S.J. Res. 28(1)(b) of the 104th Congress; Finding of Compelling Public Interest by United States Department of Agriculture Secretary Dan Glickman, August 8, 1996 and March 20, 1997. (b) Bylaws of the Northeast Dairy Compact Commission, adopted November 21, 1996.)

Daniel Smith,

Executive Director.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–14–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –30, and –40 Series

Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–10–10, –30, and –40 series airplanes. This proposal would require replacement of certain taper-lok attachments and forward trunnion bolts with new components that attach the left and right main landing gear (MLG) to each wing. This proposal is prompted by a report indicating that, due to overstrength of the forward trunnion bolt, an MLG broke away and ruptured a wing fuel tank while an airplane was being operated off the runway. The actions specified by the proposed AD are intended to ensure that the MLG separates from the wing when it is subjected to unpredictable overloads during abnormal operations, and to prevent consequent primary structural damage to the airplane.

DATES: Comments must be received by March 9, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–14–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Ronald Atmur, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (562) 627–5224; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be

VOL 63 ISS 14 JA 22 1998 UMI

considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–14–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–14–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received a report indicating that, while a McDonnell Douglas Model DC–10–10 series airplane was being operated off the runway, a main landing gear (MLG) broke away and ruptured the wing fuel tank. The results of analysis and testing conducted by the manufacturer revealed that certain fasteners (e.g., the forward trunnion bolt and the bolts for the attach fitting), which attach the MLG to the rear spar of the wing, are overstrength. Consequently, the MLG may not separate from the airplane, as designed, when unpredictable overloads are placed on the MLG during abnormal operations. This condition, if not corrected, could result in primary structural damage to the airplane.

Explanation of Relevant Service Information

The FAA has reviewed and approved McDonnell Douglas DC–10 Service Bulletin 57–78, Revision 1, dated August 26, 1986 (for Model DC–10–10 series airplanes), which describes procedures for replacing 24 TL taper-lok attachments that attach the left and right MLG attach fitting assemblies on each wing with heat-treat TLH taper-lok attachments. This service bulletin also describes procedures for replacing the forward trunnion bolts on the left and right MLG of each wing with "zero margin" trunnion bolts.

The FAA also has reviewed and approved McDonnell Douglas DC–10 Service Bulletin 57–79, Revision 1, dated September 21, 1979, as revised by McDonnell Douglas DC–10 Service Bulletin 57–79, Service Bulletin Change Notification, dated January 23, 1980 (for Model DC–10–10 series airplanes). This service bulletin describes procedures for replacing the 1½-inch-diameter bolts that attach the left and right MLG attach fitting and rear spar of each wing with 1¼-inch-diameter bolts and bushings, and installing bolt retainers.

In addition, the FAA has reviewed and approved McDonnell Douglas DC–10 Service Bulletin 57–82, dated February 19, 1980 (for Model DC–10–30 and –40 series airplanes). This service bulletin describes procedures for replacing the forward trunnion bolts of the left and right MLG of each wing with "zero margin" trunnion bolts. For certain groups of airplanes, the service bulletin also describes procedures for replacing the 1½-inch-diameter bolts that attach the left and right MLG attach fitting and rear spar of each wing with 1¼-inch-diameter bolts and bushings, and installing bolt retainers.

Accomplishment of the replacement of all of these fasteners will allow the MLG to separate from the wing. This separation is intended to minimize the possibility of primary structural damage to the airplane when the MLG is subjected to unpredictable overloads during abnormal operations.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type of design, the proposed AD would require accomplishment of the actions specified in the service bulletins described previously in accordance with the procedures specified in those service bulletins.

Cost Impact

For McDonnell Douglas Model DC–10–10 Series Airplanes

There are approximately 119 Model DC–10–10 series airplanes of the affected design in the worldwide fleet, and 108 airplanes of U.S. registry that would be affected by the proposed requirements for replacement of taper-lok attachments and forward trunnion bolts. The FAA estimates that it would take approximately 462 work hours per airplane to accomplish these proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $47,000 per airplane. Based on these figures, the cost impact of these proposed actions on U.S. operators is estimated to be $8,069,760, or $74,720 per airplane.

There are approximately 111 Model DC–10–10 series airplanes of the affected design in the worldwide fleet, and 82 airplanes of U.S. registry that would be affected by the proposed requirements for replacement of larger attach bolts and installation of bolt retainers. The FAA estimates that it would take approximately 500 work hours per airplane to accomplish these proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $11,734 per airplane. Based on these figures, the cost impact of these proposed actions on U.S. operators is estimated to be $3,422,188, or $41,734 per airplane.

For McDonnell Douglas Model DC–10–30 and DC–10–40 Series Airplanes

There are approximately 168 Model DC–10–30 and DC–10–40 series airplanes of the affected design in the worldwide fleet, and 82 airplanes of U.S. registry that are identified as Groups I and II airplanes in the relevant service bulletins and that would be affected by the proposed requirements for replacement of larger attach bolts, installation of bolt retainers, and replacement of forward trunnion bolts. The FAA estimates that it would take approximately 576 work hours per airplane to accomplish these proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $20,000 per airplane. Based on these figures, the cost impact of these proposed actions on U.S. operators is estimated to be $4,473,920, or $54,560 per airplane.

There are approximately 20 Model DC–10–30 and DC–10–40 series airplanes of the affected design in the worldwide fleet, and 6 airplanes of U.S. registry that are identified as Group III airplanes in the relevant service bulletins and that would be affected by the proposed requirements for replacement of forward trunnion bolts. The FAA estimates that it would take approximately 76 work hours per airplane to accomplish this proposed action, and that the average labor rate is $60 per work hour. Required parts would cost approximately $15,800 per airplane. Based on these figures, the cost impact of this proposed action on U.S. operators is estimated to be $122,160, or $20,360 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished the proposed action, and that no operator would accomplish that action in the future if this AD were not adopted.

However, the FAA has been advised that the following actions have been accomplished on Model DC–10–10 series airplanes in accordance with the requirements of this proposed AD:

- Taper-lok attachments and forward trunnion bolts have been replaced on 77 U.S.-registered airplanes. Therefore, the future economic cost impact of those proposed actions on U.S. operators is now only $2,316,320.
- Larger attach bolts have been replaced and bolt retainers have been installed on 77 U.S.-registered airplanes. Therefore, the future economic cost impact of those proposed actions on U.S. operators is now only $208,670.
- The FAA also has been advised that the following actions have been accomplished on Model DC–10–30 and DC–10–40 series airplanes in accordance with the requirements of this proposed AD:
- Forward trunnion bolts and larger attach bolts have been replaced and bolt retainers have been installed on 40 U.S.-registered airplanes identified as Groups I and II airplanes in the relevant service bulletins. Therefore, the future economic cost impact of those proposed actions on U.S. operators is now only $2,291,520.
- Forward trunnion bolts have been replaced on 3 U.S.-registered airplanes identified as Group III airplanes in the relevant service bulletins. Therefore, the future economic cost impact of this proposed action on U.S. operators is now only $61,080.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Docket 97–NM–14–AD.

Applicability: Model DC–10–10, DC–10–30, and DC–10–40 series airplanes; certificated in any category; as listed in the following McDonnell Douglas service bulletins:

- McDonnell Douglas DC–10 Service Bulletin 57–78, Revision 1, dated August 26, 1986;
- McDonnell Douglas DC–10 Service Bulletin 57–79, Revision 1, dated September 21, 1979, as revised by McDonnell Douglas DC–10 Service Bulletin Change Notification 57–79, dated January 23, 1980; and
- McDonnell Douglas DC–10 Service Bulletin 57–82, dated February 19, 1980.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To ensure that the main landing gear (MLG) separates from the wing when it is subjected to unpredictable overloads during abnormal operations, and to prevent consequent primary structural damage to the airplane, accomplish the following:

(a) For Model DC–10–10 series airplanes, as listed in McDonnell Douglas DC–10 Service Bulletin 57–78, Revision 1, dated August 26, 1986: Within 5 years after the effective date of this AD, accomplish the requirements of paragraphs (a)(1) and (a)(2) of this AD, in accordance with the service bulletin.

(1) Replace 24 TL taper-lok attachments that attach the left and right MLG attach fitting assemblies on each wing with heat-treat TLH taper-lok attachments in accordance with the service bulletin. And

(2) Replace each forward trunnion bolt on the left and right MLG of each wing with a "zero margin" trunnion bolt in accordance with the service bulletin.

Note 2: Replacement of taper-lok attachments and forward trunnion bolts accomplished prior to the effective date of this AD in accordance with McDonnell Douglas DC–10 Service Bulletin 57–78, dated February 19, 1980, is considered acceptable for compliance with the requirements of paragraphs (a)(1) and (a)(2) of this AD.

(b) For Model DC–10–10 series airplanes, as listed in McDonnell Douglas DC–10 Service Bulletin 57–79, Revision 1, dated September 21, 1979, as revised by McDonnell Douglas DC–10 Service Bulletin Change Notification 57–79, dated January 23, 1980: Within 5 years after the effective date of this AD, replace each 1½-inch-diameter bolt and bushing that attach the left and right MLG attach fitting and rear spar of each wing with a 1¼-inch-diameter bolt, and install bolt retainers, in accordance with the service bulletin and service bulletin change notification.

Note 3: Replacement of 1½-inch-diameter bolts and installation of bolt retainers prior to the effective date of this AD in accordance with McDonnell Douglas DC–10 Service Bulletin 57–79, dated June 5, 1979, are considered acceptable for compliance with the requirements of paragraph (b) of this AD.

(c) For Model DC–10–30 and DC–10–40 series airplanes: Except as provided by paragraph (d) of this AD, within 5 years after the effective date of this AD, accomplish the requirements of paragraph (c)(1) or (c)(2) of this AD, as applicable, in accordance with McDonnell Douglas DC–10 Service Bulletin 57–82, dated February 19, 1980.

(1) For airplanes identified as Groups I and II in the service bulletin: Replace each forward trunnion bolt on the left and right MLG of each wing with a "zero margin" forward trunnion bolt; replace each 1½-inch-diameter bolt and bushing that attach the left and right MLG attach fitting and rear spar of each wing with a 1¼-inch-diameter bolt, and install bolt retainers, in accordance with the service bulletin.

(2) For airplanes identified as Group III in the service bulletin: Replace each forward trunnion bolt on the left and right MLG of each wing with a "zero margin" trunnion bolt in accordance with the service bulletin.

(d) For Model DC–10–30 and DC–10–40 airplanes: Installation of a trunnion bolt having part number (P/N) ARG7558–501 or P/N ARG7558–507 on the MLG, in accordance with AD 96–03–05, amendment 39–9502, constitutes terminating action for the requirement to replace the trunnion bolts for that landing gear, as required in paragraph (c)(1) or (c)(2) of this AD.

VOL 63 ISS 14 JA 22 1998 UMI

(e) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(f) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on January 14, 1998.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 97–NM–108–AD]

RIN 2120–AA64

Airworthiness Directives; Dornier Model 328–100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Dornier Model 328–100 series airplanes. This proposal would require a one-time inspection for discrepancies of certain engine control cables, and replacement of the cables with new or serviceable control cables, if necessary. It also would require modification of the cable fairleads on the nose rib firewall. Additionally, this proposal would require modification of the mounting brackets of the control cable pulleys in the pulley box. This proposal is prompted by issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent chafing of engine control cables, which could cause the cables to break and result in loss of engine control and consequent reduced controllability of the airplane.

DATES: Comments must be received by February 23, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–108–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Fairchild Dornier, Dornier Luftfahrt GmbH, P.O. Box 1103, D–82230 Wessling, Germany. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4556, telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–108–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–108–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Luftfahrt-Bundesamt (LBA), which is the airworthiness authority for Germany, notified the FAA that an unsafe condition may exist on certain Dornier Model 328–100 series airplanes. The LBA advises that it received a report indicating that, during routine inspection, engine control cables were found to be chafed in the area of the cable fairleads on the nose rib firewall, and in the area of the cable fairleads in the fuselage. Such chafing, if not corrected, could cause the cables to break and result in loss of engine control and consequent reduced controllability of the airplane.

Explanation of Relevant Service Information

Dornier has issued Service Bulletin SB–328–76–152, dated May 6, 1996, which describes procedures for a one-time inspection for chafing or discrepancies of the engine control cables in the area of the cable fairleads on the nose rib firewall, and replacement of the cables with new or serviceable cables, if necessary. Additionally, that service bulletin describes procedures for modification of these cable fairleads, which entails removing the fairleads, enlarging the bolt holes, and reworking the firewall.

In addition, Dornier also has issued Service Bulletin SB–328–76–168, dated May 6, 1996, which describes procedures for a one-time inspection for chafing or discrepancies of the engine control cables in the area of the cable fairleads in the fuselage, and replacement of the cables with new or serviceable cables, if necessary. Additionally, that service bulletin describes procedures for modification of the mounting brackets of the control cable pulleys in the pulley box, in order to improve alignment of the control cables in the area of the cable fairleads in the fuselage.

Accomplishment of the actions specified in the service bulletins is intended to adequately address the identified unsafe condition. The LBA classified these service bulletins as mandatory and issued German airworthiness directives 96–288 and 96–290, both dated October 10, 1996, in order to assure the continued airworthiness of these airplanes in Germany.

FAA's Conclusions

This airplane model is manufactured in Germany and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LBA has kept the FAA informed of the situation described above. The FAA has examined the findings of the LBA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletins described previously.

Cost Impact

The FAA estimates that 59 Dornier Model 328–100 series airplanes of U.S. registry would be affected by this proposed AD.

The actions specified in Service Bulletin SB–328–76–152 would be required to be accomplished on 56 Dornier Model 328–100 series airplanes of U.S. registry. It would take approximately 4 work hours per airplane to accomplish that action, at an average labor rate of $60 per work hour. Required parts would be provided by the manufacturer at no cost to operators. Based on these figures, the cost impact of this action on the 56 affected U.S.-registered airplanes is estimated to be $13,440, or $240 per airplane.

The actions specified in Service Bulletin SB–328–76–168 would be required to be accomplished on 29 Dornier Model 328–100 series airplanes of U.S. registry. It would take approximately 12 work hours per airplane to accomplish that action, at an average labor rate of $60 per work hour. Required parts would be provided by the manufacturer at no cost to operators. Based on these figures, the cost impact of this action on the 29 affected U.S.-registered airplanes is estimated to be $20,880, or $720 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Dornier: Docket 97–NM–108–AD.

Applicability: Model 328–100 series airplanes; as listed in Dornier Service Bulletins SB–328–76–152 and SB–328–76–168, both dated May 6, 1996; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent chafing of engine control cables, which could cause the control cables to break and result in loss of engine control and consequent reduced controllability of the airplane, accomplish the following:

(a) Within 90 days after the effective date of this AD, perform a one-time inspection to detect chafing or discrepancies of the engine control cables in the areas of the cable fairleads on the nose rib firewall, and the cable fairleads in the fuselage; in accordance with Dornier Service Bulletins SB–328–76–152 and SB–328–76–168, both dated May 6, 1996; respectively. If any discrepancy or chafing is found, prior to further flight, replace the damaged cables with new or serviceable cables in accordance with the applicable service bulletin.

(b) For airplanes listed in Dornier Service Bulletin SB–328–76–152, dated May 6, 1996: Prior to further flight following the inspection required in paragraph (a) of this AD, modify the cable fairleads on the nose rib firewall in accordance with the service bulletin.

(c) For airplanes listed in Dornier Service Bulletin SB–328–76–168, dated May 6, 1996: Prior to further flight following the inspection required in paragraph (a) of this AD, modify the mounting brackets of the control cable pulleys in the pulley box in accordance with the service bulletin.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in German airworthiness directives 96–288 and 96–290, both dated October 10, 1996.

Issued in Renton, Washington, on January 14, 1998.

Gilbert L. Thompson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Saab Model SAAB 2000 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Saab Model SAAB 2000 series airplanes. This proposal would require replacement of the main landing gear (MLG) trunnion fittings with reinforced trunnion fittings. This proposal is prompted by the issuance of mandatory continuing airworthiness information by a foreign civil airworthiness authority. The actions specified by the proposed AD are intended to prevent collapse of the MLG due to fatigue cracking of the MLG trunnion fittings.

DATES: Comments must be received by February 23, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–306–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from SAAB Aircraft AB, SAAB Aircraft Product Support, S–581.88, Linköping, Sweden. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Norman B. Martenson, Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2110; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–306–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97-NM–306-AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Luftfartsverket (LFV), which is the airworthiness authority for Sweden, notified the FAA that an unsafe condition may exist on certain Saab Model SAAB 2000 series airplanes. The LFV advises that, during fatigue testing, fatigue cracks developed in the main landing gear (MLG) trunnion fitting. This fatigue cracking, if not detected and corrected in a timely manner, could result in the collapse of the MLG.

Explanation of Relevant Service Information

Saab has issued Service Bulletin 2000–57–010, dated February 25, 1997, which describes procedures for replacement of the MLG trunnion fittings with reinforced fittings. Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition. The LFV classified this service bulletin as mandatory and issued Swedish airworthiness directive SAD No. 1–108, dated February 27, 1997, in order to assure the continued airworthiness of these airplanes in Sweden.

FAA's Conclusions

This airplane model is manufactured in Sweden and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the LFV has kept the FAA informed of the situation described above. The FAA has examined the findings of the LFV, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require accomplishment of the actions specified in the service bulletin described previously.

Cost Impact

The FAA estimates that 3 Saab Model SAAB 2000 series airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 80 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would be provided by the manufacturer at no cost to the operator. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $14,400 or $4,800 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

SAAB aircraft AB: Docket 97–NM–306–AD.

Applicability: Model SAAB 2000 series airplanes having serial numbers -003 through -040 inclusive, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent collapse of the main landing gear (MLG) due to fatigue cracking of the MLG trunnion fittings, accomplish the following:

(a) Prior to the accumulation of 12,000 total flight cycles, or within 100 flight cycles after the effective date of this AD, whichever occurs later, replace the MLG trunnion fittings with reinforced trunnion fittings in accordance with Saab Service Bulletin 2000–57–010, dated February 25, 1997.

(b) As of the effective date of this AD, no person shall install any MLG trunnion fitting having part number 7357451–503 or –504 on any airplane.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in Swedish airworthiness directive SAD No. 1–108, dated February 27, 1997.

Issued in Renton, Washington, on January 14, 1998.

Gilbert L. Thompson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 97–SW–07–AD]

Airworthiness Directives; Eurocopter France Model SA 330F, G, and J Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to Eurocopter France Model SA 330F, G, and J helicopters. This proposal would require visually inspecting the intermediate gearbox (IGB) fairing safety stop (safety stop) for cracks, crazing, or edge wear, and if cracks, crazing, or edge wear exceeds the established limits, replacing the safety stop; and, inspecting to ensure that the inclined drive shaft fairing hinge pin is properly locked. A terminating action is provided in the AD by installing an additional safety stop on the IGB fairing. This proposal is prompted by one report of an accident involving the loss of the inclined drive shaft fairing. The actions specified by the proposed AD are intended to prevent loss of the inclined drive shaft fairing and impact with the tail rotor, and subsequent loss of control of the helicopter.

DATES: Comments must be received by March 23, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 97–SW–07–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053–4005. This information may be examined at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas.

must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–SW–07–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of the Regional Counsel, Southwest Region, Attention: Rules Docket No. 97–SW–07–AD, 2601 Meacham Blvd., Room 663, Fort Worth, Texas 76137.

Discussion

The Direction Generale De L'Aviation Civile (DGAC) which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on Eurocopter France SA 330F, G, and J helicopters. The DGAC advises that there was one reported accident that was caused by the loss of the inclined drive shaft fairing.

Eurocopter France has issued Eurocopter France SA 330 Service Bulletin No. 54.20, Revision 1, dated February 27, 1996, which specifies visually inspecting the safety stop for wear, cracks or crazing, and determining if the edge has ruptured locally, and replacing the safety stop. The DGAC classified this service bulletin as mandatory and issued DGAC AD 96–095–076(B), dated April 24, 1996, in order to assure the continued airworthiness of these helicopters in France.

This helicopter model is manufactured in France and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other Eurocopter France Model SA 330F, G, and J helicopters of the same type design registered in the United States, the proposed AD would require visually inspecting the safety stop for cracks, crazing, or edge wear that exceeds the limits stated in Note II of the Accomplishment Instructions of Eurocopter France SA 330 Service Bulletin No. 54.20, Revision 1, dated February 27, 1996, and if cracks, crazing, or edge wear exceeds the established limits, replacing the safety stop; and, inspecting to ensure that the inclined drive shaft fairing hinge pin is properly locked. Both inspections are required within 7 calendar days after the effective date of the AD, and upon completion of the last flight of each day. Installing an additional safety stop (right-angle clip) on the IGB fairing within 60 calendar days after the effective date of the AD is terminating action for the requirements of this AD. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 1 helicopter of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour to perform the inspection, and two work hours to install the safety stop, and that the average labor rate is $60 per work hour. Required parts would cost approximately $50 per helicopter. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $230.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39 AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive to read as follows:

Eurocopter France: Docket No. 97–SW–07–AD.

Applicability: Model SA 330 F, G, and J helicopters, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any helicopter from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of the inclined drive shaft fairing hinge pin (hinge pin), that could result in loss of the inclined drive shaft fairing, impact with the tail rotor, and subsequent loss of control of the helicopter, accomplish the following:

(a) Within 7 calendar days after the effective date of this AD, and thereafter, upon the completion of the last flight of each day, visually inspect the intermediate gearbox (IGB) fairing safety stop (safety stop) and the hinge pin in accordance with the Accomplishment Instructions of Eurocopter France SA 330 Service Bulletin No. 54.20, Revision 1, dated February 27, 1996.

(1) Inspect the IGB fairing safety stop, part number (P/N) 330A24–2086–20, for cracks or crazing, and edge wear that exceeds the limits stated in Note II of the Accomplishment Instructions of Eurocopter France SA 330 Service Bulletin No. 54.20, Revision 1, dated February 27, 1996, and if cracks, crazing, or edge wear that exceeds the established limits is detected, remove the safety stop and replace it with an airworthy safety stop; and,

(2) Inspect the hinge pin to ensure it is properly locked.

(b) Within 60 calendar days after the effective date of this AD, install an additional safety stop, P/N 330A24–2119–21, to prevent the hinge pin from backing out of its hole in case of a locking arm failure, in accordance with Accomplishment Instructions of Eurocopter France SA 330 Service Bulletin No. 54.20, Revision 1, dated February 27, 1996.

(c) Installation of an airworthy additional safety stop, P/N 330A24–2119–21, constitutes terminating action for the requirements of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Rotorcraft Standards Staff, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Rotorcraft Standards Staff.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Rotorcraft Standards Staff.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the helicopter to a location where the requirements of this AD can be accomplished.

Note 3: The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD 96–095–076(B), dated April 24, 1996.

Issued in Fort Worth, Texas, on January 14, 1998.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 97–ANE–46–AD]

RIN 2120–AA64

Airworthiness Directives; CFM International CFM56–2, –2A, –2B, –3, –3B, and –3C Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to CFM International (CFMI) CFM56–2, –2A, –2B, –3, –3B, and –3C series turbofan engines. This proposal would require a one-time eddy current inspection (ECI) for cracks or gouges in certain high pressure turbine rotor (HPTR) disks. This proposal is prompted by a report of a HPTR disk found to have a crack in a rim bolt hole during a routine shop manual ECI. The actions specified by the proposed AD are intended to prevent the potential for an uncontained failure of the HPTR disk, which could result in an inflight engine shutdown, aborted takeoff, or damage to the aircraft.

DATES: Comments must be received by March 23, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 97–ANE–46–AD, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may be inspected at this location between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from CFM International, Technical Publications Department, 1 Neumann Way, Cincinnati, OH 45215; telephone (513) 552–2981, fax (513) 552–2816. This information may be examined at the FAA, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, MA.

FOR FURTHER INFORMATION CONTACT: Glorianne Messemer, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (781) 238–7132; fax (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–ANE–46–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 97–ANE–46–AD, 12 New England Executive Park, Burlington, MA 01803–5299.

Discussion

This proposed airworthiness directive (AD) is applicable to CFM International (CFMI) CFM56–2, –2A, –2B, –3, –3B, and –3C series turbofan engines. The Federal Aviation Administration (FAA) received a report of a high pressure turbine rotor (HPTR) disk found to have a crack in a rim bolt hole during a routine shop manual eddy current inspection (ECI). Investigation revealed that the crack initiated from a gouge in the bolt hole. The gouge is the result of a drill break that occurred when the rim bolt hole was being manufactured. A review of manufacturing records indicates that a total of 276 HPTR disks have documented drill breaks that occurred during manufacture of the HPTR disk. This condition, if not corrected, could result in an uncontained failure of the HPTR disk, which could result in an inflight engine shutdown, aborted takeoff, or damage to the aircraft.

The FAA has reviewed and approved the technical contents of CFM56–2 Service Bulletin (SB) No. 72–817, dated January 14, 1997, CFM56–2A SB No. 72–419, Revision 1, dated January 31, 1997, CFM56–2B SB No. 72–561, Revision 1, dated January 31, 1997, and CFM56–3/–3B/–3C SB No. 72–843, dated January 14, 1997, that describe procedures for ECI for cracks or gouges in HPTR disks.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require a one-time ECI for cracks or gouges in certain HPTR disks. The calendar end-dates listed in the compliance section of this AD were based upon risk analysis. The actions would be required to be accomplished in accordance with the SBs described previously.

There are approximately 276 engines of the affected design in the worldwide

VOL
63
ISS
14
JA
22
1998
UMI

fleet. The FAA estimates that 100 engines on aircraft of U.S. registry would be affected by the proposed AD, that it would take approximately 300 work hours per engine to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Replacement parts, if required, would cost approximately $86,000 per engine. Based on these figures, and assuming that 16 of the inspected HPTR disks will require replacement, the total cost impact of the proposed AD on U.S. operators is estimated to be $3,176,000. The manufacturer has advised the FAA that certain costs incurred from the inspection and replacement of parts affected by this AD may be borne by the manufacturer, therefore, the total cost impact of this AD to U.S. operators may be less than estimated by the FAA.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

CFM International: Docket No. 97–ANE–46–AD.

Applicability: CFM International (CFMI) CFM56–2, –2A, –2B, –3, –3B, and –3C series turbofan engines installed on, but not limited to McDonnell Douglas DC–8 series, Boeing 737 series, as well as Boeing E–3, E–6, and KC–135 (military) series aircraft.

Note 1: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent the potential for an uncontained failure of the high pressure turbine rotor (HPTR) disk, which could result in an inflight engine shutdown, aborted takeoff, or damage to the aircraft, accomplish the following:

(a) Eddy current inspect for cracks or gouges in HPTR disks, Part Numbers 1475M29P01, 1475M29P02, 9514M69P01, 9514M69P04, 9514M69P05, 9514M69P06, and 9514M69P09, with Serial Numbers listed in Table 1 of the applicable Service Bulletin (SB), as follows:

(1) For CFM56–2 engines, in accordance with CFM56–2 SB No. 72–817, dated January 14, 1997, prior to June 30, 1998.

(2) For CFM56–2A engines, in accordance with CFM56–2A SB No. 72–419, Revision 1, dated January 31, 1997, within 500 cycles in service (CIS) after the effective date of this AD, or by December 31, 1999, whichever occurs first.

(3) For CFM56–2B engines, in accordance with CFM56–2B SB No. 72–561, Revision 1, dated January 31, 1997, within 500 CIS after the effective date of this AD, or by December 31, 1999, whichever occurs first.

(4) For CFM56–3, –3B, and –3C engines, in accordance with CFM56–3/–3B/–3C SB No. 72–843, dated January 14, 1997, prior to June 30, 1998.

(b) Remove from service HPTR disks found cracked or gouged, and replace with serviceable parts.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. Operators shall submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(d) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the inspection requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on January 8, 1998.

James C. Jones,

Assistant Manager, Engine and Propeller Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Pilatus Aircraft Ltd. Models PC–12 and PC–12/45 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to certain Pilatus Aircraft Ltd. (Pilatus) Models PC–12 and PC–12/45 airplanes. The proposed AD would require replacing certain propeller de-icing controllers with ones that are not susceptible to electromagnetic interference (EMI). The proposed AD is the result of mandatory continuing airworthiness information (MCAI) issued by the airworthiness authority for Switzerland. The actions specified by the proposed AD are intended to prevent improper operation of the propeller de-icing controller caused by EMI, which could result in ice build-up on the propeller with possible airplane controllability problems.

DATES: Comments must be received on or before February 27, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–CE–119–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Pilatus Aircraft Ltd., Marketing Support Department, CH–6370 Stans, Switzerland; telephone: +41 41–6196 233; facsimile: +41 41–6103 351. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Roman T. Gabrys, Aerospace Engineer, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; telephone: (816) 426–6932; facsimile: (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–CE–119–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–CE–119–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Federal Office for Civil Aviation (FOCA), which is the airworthiness authority for Switzerland, notified the FAA that an unsafe condition may exist on certain Pilatus Models PC–12 and PC–12/45 airplanes. The FOCA of Switzerland reports that part number (P/N) 968.29.13.223 (BFG 4E3163–1) propeller de-icing controllers are susceptible to electromagnetic interference (EMI). This condition was identified during component qualification testing at the factory.

This condition, if not corrected in a timely manner, could result in improper operation of the de-icing controller, leading to ice-buildup on the propeller with possible airplane controllability problems.

Relevant Service Information

Pilatus has issued Service Bulletin No. 30–002, dated August 19, 1996, which specifies procedures for identifying an affected propeller de-icing controller, P/N 968.29.13.223 (BFG 4E3163–1); serial number U999 or lower that does not have "SB30–1" marked on it, and replacing this controller with one that is not susceptible to EMI.

The FOCA of Switzerland classified this service bulletin as mandatory and issued Swiss AD HB 96–416, dated September 30, 1996, in order to assure the continued airworthiness of these airplanes in Switzerland.

The FAA's Determination

This airplane model is manufactured in Switzerland and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the FOCA of Switzerland has kept the FAA informed of the situation described above.

The FAA has examined the findings of the FOCA of Switzerland; reviewed all available information, including the service information referenced above; and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Explanation of the Provisions of the Proposed AD

Since an unsafe condition has been identified that is likely to exist or develop in other Pilatus Models PC–12 and PC–12/45 airplanes of the same type design registered in the United States, the proposed AD would require replacing certain propeller de-icing controllers with ones that are not susceptible to EMI. Accomplishment of the proposed installation would be in accordance with the service information previously referenced.

Cost Impact

The FAA estimates that 53 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 2 workhours per airplane to accomplish the proposed replacement, and that the average labor rate is approximately $60 an hour. Parts will be provided by the manufacturer free of charge. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $6,360.

Compliance Time of the Proposed AD

While the condition described in this proposed AD is unsafe while the airplane is in operation, it is not a direct result of airplane operation. For example, the unsafe condition exists or could develop on an airplane with 500 hours time-in-service (TIS) the same as one with 10 hours TIS. For this reason, the FAA has determined that a compliance based on calendar time should be utilized in the proposed AD in order to assure that the unsafe condition is addressed on all airplanes in a reasonable time period.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

VOL 63 ISS 14 JA 22 1998 UMI

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Pilatus Aircraft Ltd: Docket No. 97–CE–119–AD.

Applicability: Models PC–12 and PC–12/45 airplanes, serial numbers MSN 101 through MSN 153, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated in the body of this AD, unless already accomplished.

To prevent improper operation of the propeller de-icing controller caused by electromagnetic interference (EMI), which could result in ice build-up on the propeller with possible airplane controllability problems, accomplish the following:

(a) Within the next 9 calendar months after the effective date of this AD, accomplish the following in accordance with the instructions in Pilatus Service Bulletin No. 30–002, dated August 19, 1996:

(1) Identify the serial number of the affected propeller de-icing controller, part number (P/N) 968.29.13.223 (BFG 4E3163–1) (or FAA-approved equivalent part number);

(2) For those airplanes with a propeller de-icing controller, P/N 968.29.13.223 (BFG 4E3163–1) (or FAA-approved equivalent part number), with a serial number of U999 or lower that does not have "SB30–1" marked on it, replace it with a P/N 500.50.1.109 (BFG SB4E3163–1–30–1) (or FAA-approved equivalent part number) propeller de-icing controller.

Note 2: The airplanes affected by this AD could have propeller de-icing controllers installed that have Parts Manufacturer Approval (PMA). For those airplanes having PMA parts that are equivalent (PMA by equivalency) to those referenced in this AD, the phrase "or FAA-approved equivalent part number" means that this AD applies to airplanes with PMA by equivalency propeller de-icing controllers installed.

(b) As of the effective date of this AD, no person may install, on any affected airplane, a propeller de-icing controller, P/N 968.29.13.223 (BFG 4E3163–1) (or FAA-approved equivalent part number), with a serial number of U999 or lower that does not have "SB30–1" marked on it.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Small Airplane Directorate, 1201 Walnut, suite 900, Kansas City, Missouri 64106. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Small Airplane Directorate.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Small Airplane Directorate.

(e) Questions or technical information related to Pilatus Service Bulletin No. 30–002 dated August 19, 1996, should be directed to Pilatus Aircraft Ltd., Marketing Support Department, CH–6370 Stans, Switzerland; telephone: +41 41–6196 233; facsimile: +41 41–6103 351. This service information may be examined at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Note 4: The subject of this AD is addressed in Swiss AD HB–96–416, dated September 30, 1996.

Issued in Kansas City, Missouri, on January 14, 1998.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[Docket No. 97–CE–68–AD]

RIN 2120–AA64

Airworthiness Directives; Raytheon Aircraft Company Model 1900D Airplane (Formerly Known as Beech Aircraft Corporation Model 1900D Airplane)

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would apply to Raytheon Aircraft Company (Raytheon) Models 1900D airplanes (formerly known as Beech Aircraft Corporation Models 1900D airplanes). The proposed action would require inspecting and repairing the radio switching panel relay printed circuit board (PCB) and the nose avionics wire harnesses, and replacing the existing A017 component PCB with a new A017 component PCB that has internal overcurrent protection fuses. Several reported incidents of lost pilot/co-pilot intercom ability, VHF communication ability, and public address system ability while in flight prompted the proposed action. The actions specified by the proposed AD are intended to prevent the loss of the pilot and co-pilot intercom, VHF communications, and passenger address system, which could result in loss of all communication during critical phases of flight.

DATES: Comments must be received on or before March 14, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–CE–68–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Raytheon Aircraft Company, P. O. Box 85, Wichita, Kansas 67201–0085; telephone (800) 625–7043. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Harvey Nero, Aerospace Engineer, Wichita Aircraft Certification Office, Room 100, 1801 Airport Rd., Wichita, Kansas 67209; telephone (316) 946–4137; facsimile (316) 946–4407.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–CE–68–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–CE–68–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The FAA has received several incident reports in which an in-flight overcurrent condition occurred in the avionics/communications equipment resulting in a loss of certain Raytheon Model 1900D airplanes' pilot and co-pilot intercom, VHF communication, and passenger address systems. Investigation of these incidents found that one of the avionics wire harnesses had become chafed by rubbing against the PCB rack in the forward avionics bay. Investigators also found overcurrent conditions opening PCB traces in Collins CTL–22 communication control heads.

These events are occurring because the manufacturer made a change in the configuration design and installation of the avionics/communication equipment and the wire harnesses on the Model 1900D airplanes. The new configuration reduced the space between the equipment and made the proper installation of the wire harnesses a more critical issue. Also, the communication control heads are not internally protected by fuses to prevent a short circuit on any of the distribution circuits from affecting the entire communication system. This design makes it possible for an electrical short in the radio switching panel relay PCB's or in the avionics harnesses to create an overcurrent condition in the CTL–22 communication control heads.

This condition could cause the pilot and co-pilot circuit breaker to open, resulting in the pilot and co-pilot intercom system, VHF communications, and the passenger address system not operating, resulting in the loss of communication during critical phases of flight.

Relevant Service Information

Raytheon has issued service bulletin (SB) No. 2643, dated August, 1996, which specifies procedures for:

- inspecting the electrical connectors, the radio switching panel, and this panel's relay PCB's for moisture and corrosion;
- if moisture is found, cleaning and drying the components;
- if corrosion is found, either cleaning or replacing the component, depending on the severity;
- if moisture or corrosion is found, locating and eliminating the source;
- inspecting the nose avionics wire harnesses for proper installation, and if any wire harness is not installed properly, securing it with cable ties; and
- removing the A017 component PCB, part number (P/N) 101–342536–1, and replacing it with a new A017 component PCB, P/N 101–342536–5 (or an approved FAA-equivalent part number).

The FAA's Determination

After examining the circumstances and reviewing all available information related to the incidents described above including the referenced service information above, the FAA has determined that AD action should be taken to prevent the loss of the pilot and co-pilot intercom, VHF communications, and passenger address system during critical flight, which could result in loss of all communication during critical phases of flight.

Explanation of the Provisions of the Proposed AD

Since an unsafe condition has been identified that is likely to exist or develop in other Raytheon Model 1900D airplanes of the same type design, the proposed AD would require: (1) Inspecting the radio switching panel and nose avionics wire harnesses for moisture and corrosion; (2) removing the corrosion; (3) locating and correcting the source of the moisture that is causing the corrosion; (4) repairing or replacing the corroded part; and, (5) replacing the A017 component PCB with a new A017 component PCB that has internal overcurrent protection fuses. Accomplishment of the proposed AD would be in accordance with Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

Cost Impact

The FAA estimates that 160 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 4 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $370 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $97,600 or $610 per airplane.

Raytheon has informed the FAA that they have shipped approximately 127 A017 component PCB's to the owners/operators of the affected airplanes. With this information in mind, the FAA would presume that 127 of the airplanes have already accomplished the proposed action, thereby reducing the total cost impact of the proposed AD on U.S. operators by $77,470 from $97,600 to $20,130.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant

VOL 63 ISS 14 JA 22 1998 UMI

economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Raytheon Aircraft Company: Docket No. 97–CE–68–AD.

Applicability: Model 1900D airplanes (serial numbers UE–1 through UE–160), certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 1,000 hours time-in-service (TIS) after the effective date of this AD, unless already accomplished.

To prevent the loss of the pilot and co-pilot intercom, VHF communications, and passenger address system, which could result in loss of all communication during critical phases of flight, accomplish the following:

(a) Inspect the electrical connectors, the radio switching panel and its relay printed circuit boards (PCB's) for moisture and corrosion in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(1) If moisture is found, prior to further flight, clean and dry the component in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(2) If corrosion is found, prior to further flight, either clean or replace the component, depending on the severity, in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(3) If moisture or corrosion is found, prior to further flight, locate and eliminate the source (i.e., crack, hole, leak) in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(b) Inspect the nose avionics wire harnesses for proper installation, and if any wire harness is not installed properly, prior to further flight, secure it with cable ties in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(c) Remove the A017 component PCB, part number (P/N) 101–342536–1, and replace the PCB with a new A017 component PCB (P/N 101–342536–5 or an FAA-approved equivalent part number) in accordance with the Accomplishment Instructions in Raytheon Service Bulletin (SB) No. 2643, dated August, 1996.

(d) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, Room 100, 1801 Airport Rd., Wichita, Kansas 67209. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita Aircraft Certification Office.

(f) All persons affected by this directive may obtain copies of the document referred to herein upon request to Raytheon Aircraft Company, P.O. Box 85, Wichita, Kansas 67201–0085; or may examine this document at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on January 14, 1998.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Chapter II

Bunk Beds; Advance Notice of Proposed Rulemaking; Request for Comments and Information

AGENCY: Consumer Product Safety Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Commission has reason to believe that unreasonable risks of injury and death may be associated with bunk beds constructed so that children can become entrapped in the beds' structure or become wedged between the bed and a wall.

This advance notice of proposed rulemaking ("ANPR") initiates a rulemaking proceeding that could result in a rule mandating bunk bed performance requirements to reduce this hazard. This rule could be issued under either the Federal Hazardous Substances Act ("FHSA") or the Consumer Product Safety Act ("CPSA"), or separate rules might be issued under the FHSA and CPSA addressing bunk beds intended for use by children or adults, respectively.

The Commission solicits written comments from interested persons concerning the risks of injury and death associated with bunk beds, the regulatory alternatives discussed in this ANPR, other possible ways to address these risks, and the economic impacts of the various regulatory alternatives. The Commission also invites interested persons to submit an existing standard, or a statement of intent to modify or develop a voluntary standard, to address the risks of injury and death described in this ANPR.

DATES: Written comments and submissions in response to this ANPR must be received by the Commission by April 7, 1998.

ADDRESSES: Comments should be mailed, preferably in five copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207–0001, or delivered to the Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East-West Highway, Bethesda, Maryland; telephone (301) 504–0800. Comments also may be filed by telefacsimile to (301) 504–0127 or by email to cpsc-os@cpsc.gov. Comments should be captioned "ANPR for Bunk Beds." [1]

[1] This ANPR was approved by a 2–1 vote of the Commission. Chairman Ann Brown and Commissioner Thomas H. Moore voted to approve this ANPR; Commissioner Mary S. Gall voted not to publish the ANPR.

FOR FURTHER INFORMATION CONTACT: John Preston, Directorate for Engineering Sciences, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504–0494, ext. 1315.

SUPPLEMENTARY INFORMATION:

A. Background; History of Voluntary Standards Activities

Bunk beds have been long recognized as a potential source of serious injury to children. In 1978, an Inter-Industry Bunk Bed Safety Task Group developed a Bunk Bed Safety Guideline for voluntary use by manufacturers and retailers of bunk beds intended for home use. Members of this group included the National Association of Bedding Manufacturers, the National Association of Furniture Manufacturers, the Southern Furniture Manufacturers Association, and the National Home Furnishings Association. The guideline became effective on January 1, 1979.

In February 1981, an American National Standard for Bedding Products and Components (ANSI Z357.1) was published. For the most part, this standard contained dimensional requirements for mattresses and foundations for all beds. However, it also incorporated the requirements of the January 1, 1979, industry safety guideline for bunk beds. In May 1986, the American Furniture Manufacturer's Association ("AFMA") published Voluntary Bunk Bed Safety Guidelines developed by the Inter-Industry Bunk Bed Committee ("IIBBC").

On August 26, 1986, the Consumer Federation of America ("CFA") filed a petition with CPSC requesting the promulgation of a mandatory safety regulation for bunk beds. In its petition, CFA cited three different risks of injury posed by bunk beds: Inadequate mattress supports that can allow the mattress to fall to the bunk below or to the floor, entrapment in the space between the guardrails and the mattress, and entrapment between the bed and the wall. CFA alleged that the voluntary industry guidelines did not fully address the hazards posed to consumers.

In July 1988, AFMA published Revised Voluntary Bunk Bed Safety Guidelines, with an effective date of April 1989. A majority of the revisions were made as a result of CPSC staff comments on the May 1986 guidelines, which included comments that the requirements addressing entrapment in openings in guardrails were not adequate and that bunk beds should be required to be sold with two guardrails. To prevent entrapment, the 1989 revised guidelines did require two guardrails to accompany a bunk bed, and required that any opening in the structure of the upper bunk be less than 3½ inches.

On July 21, 1988, the Commission voted to deny the petition filed by the CFA, but directed its staff to prepare a letter to AFMA and IIBBC urging that AFMA reconsider the CPSC staff comments that had not been included in the Revised Voluntary Bunk Bed Safety Guidelines. That letter was sent in August 1988. It also requested (a) that AFMA consider additional staff recommendations, (b) that AFMA submit the revised guidelines to a voluntary standards organization such as ANSI or ASTM for development as a voluntary safety standard, and (c) that AFMA develop, and provide to the Commission, a plan and proposed implementation date for a certification program to ensure that bunk beds complied with the guidelines. AFMA responded that a certification program would be established upon publication of an ASTM bunk bed standard.

In October 1992, ASTM published the Standard Consumer Safety Specification for Bunk Beds, ASTM F1427–92, in response to the Commission's August 1988 request. The performance requirements in that standard primarily addressed falls from the upper bunk, entrapment in the upper bunk structure or between the upper bunk and a wall, and security of the foundation support system. The standard also had a requirement for a warning label and for instructions to accompany the bed. In June 1994, the ASTM bunk bed standard was republished with additional provisions (requested by CPSC staff) to address collapse of tubular metal bunk beds. The most current version of the ASTM bunk bed standard was published in September 1996 and contains additional revisions suggested by CPSC staff. These address entrapment in lower bunk end structures; mattress size information on the warning label and carton; and the name and address of the manufacturer, distributor, or seller on the bed.

Because of continued reports of deaths and other incidents associated with bunk beds, and because of indications that there is inadequate compliance with the voluntary ASTM standard, the CPSC staff prepared a briefing package that summarized the available information. Copies of this briefing package can be obtained from the Commission's Office of the Secretary. After considering the available information, the Commission decided to publish this advance notice of proposed rulemaking to begin a rulemaking proceeding that could result in performance or other standards to address the risk of entrapment associated with bunk beds.

B. Incident Data

From January 1990 through September 1997, CPSC received reports of 85 bunk-bed-related deaths of children under age 15. As shown below, 54 (64 percent) were caused by entrapment. An additional 23 children died when they were inadvertently hanged from the bed by such items as belts, ropes, clothing, and bedding. Eight children died in falls from bunk beds during this period. Almost all (96 percent) of the entrapment victims were ages 3 and younger, whereas hanging and fall victims tended to be older than 3 years. The Commission continues to receive reports of incidents and other information concerning bunk bed entrapment hazards.

Available data indicate that the number of bunk-bed-related deaths has not decreased in recent years and that the majority of fatal incidents continue to involve entrapment. To better evaluate the extent of the entrapment problem, the Commission's staff also developed national estimates of the total number of entrapment deaths that occurred each year, using statistical methodology that examined the extent of overlap between data-reporting sources. These estimates projected that about 10 bunk bed entrapment deaths have occurred each year in the United States since 1990.

1997	7	5	2	
Total	85	54	23	8

Source: CPSC Data Files, January 1990–September 1997, U.S. Consumer Product Safety Commission/EHHA.

CPSC staff reviewed available information on entrapment-related incidents, which accounted for the majority of deaths, to obtain additional detail about the circumstances involved. In all, CPSC received reports of 103 entrapment incidents from January 1990 through September 1997, including 54 that involved deaths and 49 that involved "near-misses" (where a child was entrapped, but usually with no or minor injury, often because another person intervened). Most reported incidents involved wooden bunk beds, and entrapment occurred most often on the top bunk. Common areas of entrapment were under the guardrail, within the end structures of the bed, and between the bed and the wall.

With three exceptions, almost all of the incidents involving fatal entrapment in the structure of bunk beds occurred in areas of the beds that apparently did not conform to the entrapment provisions in the current voluntary standard. Two of the three exceptions involved entrapment on the upper bunk. These beds had guardrails that did not run the entire length of the bed and, in each of the two incidents, a child slipped through the space between the end of the guardrail and the bed's end structure and became wedged between the bed and a wall. (The current standard permits guardrails that terminate before reaching the bed's end structure, provided there is no more than 15 inches between either end of the guardrail and the bed's closest end structure.)

The third death involving a conforming bunk bed occurred when a 22-month-old child was playing with an older sibling on a bunk bed and placed his head into a tapered opening between the underside of the upper bunk foundation and a structural member. This child is believed to have been standing on the lower bunk mattress, and, when his feet slipped off the mattress, he was suspended by his head. (The current standard only addresses openings in lower bunk end structures that are within 9 inches above the sleeping surface of the mattress.)

C. Market Information

Industry sources estimate that about 500,000 bunk beds are sold each year for residential use (excluding institutional sales), and that sales have been relatively stable over time. The annual retail value of sales has been estimated by AFMA at about $150 million. Industry sources estimate the average retail price of bunk beds to be about $300, but prices range from about $100 to $700. Bunk beds are marketed in specialty stores, furniture stores, department stores, and by mail order. There is also a market for used bunk beds in thrift shops, garage sales, and classified advertising.

Trade sources estimate the expected useful life of bunk beds to be 13–17 years. Based on available information, there are about 7–9 million bunk beds available for use, including bunk beds that are not currently used for sleeping, and those that are now used as two separate beds.

CPSC staff is aware of at least 106 bunk bed manufacturers, which are believed to produce the bulk of annual sales. Of the 106 identified firms, 40 are either members of AFMA or are members of the ASTM subcommittee that developed the existing voluntary standard for bunk beds. According to AFMA, these 40 firms represent 75–80 percent of the total annual shipments of bunk beds. While there are likely many other small regional manufacturers or importers of bunk beds in addition to the 106 identified firms, these are not likely to account for a significant share of the U.S. market.

D. Compliance With the Existing Voluntary Standard

There has been a continuing pattern of nonconformance to the voluntary standard. From June through August 1994, the Commission's Office of Compliance (Compliance) identified and sent letters of inquiry to 85 bunk bed manufacturers/importers, as part of a voluntary standard conformance monitoring project. Responses to these letters revealed that 17 companies were marketing bunk bed designs that presented potential entrapment hazards. Based on these responses, as well as on retail inspections, consumer complaints, and reported incidents, 41 manufacturers have, since November 1994, recalled wooden and metal bunk beds that did not conform to the entrapment requirements in the ASTM standard. The recalls involve over one-half million bunk beds.

In February 1997, Compliance assigned 45 inspections of bunk bed retailers nationwide. Examination of 77 beds from 35 different manufacturers by staff from CPSC's regional offices revealed that 12 bunk bed designs, each from a different manufacturer, did not conform with the entrapment requirements of the ASTM voluntary standard. Problems identified through these inspections resulted both in voluntary recalls of already produced beds and in corrections of future production. The most recent recall, in September 1997, involved five companies and pertained to 16,500 beds. One of these beds was involved in a fatal entrapment incident.

As noted above, CPSC's staff identified 106 manufacturers and importers of wooden and metal bunk beds. The Commission believes that the actual number of manufacturers and importers could be much higher. Because of the relative ease of constructing bunk beds, many small companies are formed each year. These may quickly go in and out of the business of making bunk beds. These companies are normally not associated with industry organizations, and are often unaware of the voluntary standard or misinterpret its requirements. Accordingly, the Commission preliminarily concludes that it is very likely that there will continue to be serious conformance problems with the voluntary standard.

E. The Potential Need for a Mandatory Standard

Although the voluntary standard improves the safety of bunk beds, companies are not required to comply with it. Some manufacturers contacted by Compliance did not see an urgency to comply with a "voluntary" standard, and they did not recognize the hazards associated with noncompliance. As a result, entrapment hazards will continue to exist on beds in use and for sale. Currently, all 106 manufacturers identified by CPSC staff appear to be producing beds that conform to the entrapment requirements in the ASTM F1427 bunk bed standard. However, small regional manufacturers that periodically enter the marketplace may not be aware of the voluntary standard, or of the hazards that are associated with bunk beds.

The Commission believes that a mandatory entrapment standard may be needed for the following reasons:

1. The adoption of a mandatory standard could increase the awareness and sense of urgency of manufacturers regarding compliance with the entrapment provisions, thereby increasing the degree of conformance to those provisions.

2. A mandatory standard would allow the Commission to seek penalties for violations. Publicizing fines for noncompliance with a mandatory standard would deter other manufacturers from making noncomplying beds.

3. A mandatory standard would allow state and local officials to assist CPSC staff in identifying noncomplying bunk beds and take action to prevent the sale of these beds.

4. Under a mandatory standard, retailers, and distributors would violate the law if they sold noncomplying bunk beds. Retailers and retail associations would then insist that manufacturers and importers provide complying bunk beds.

5. The bunk bed industry is extremely competitive. Manufacturers who now conform with the ASTM standard have expressed concern about those firms that do not. Nonconforming beds can undercut the cost of conforming beds. A mandatory standard would establish a level playing field and take away any competitive cost advantage for unsafe beds.

6. A mandatory standard would help prevent noncomplying beds made by foreign manufacturers from entering the United States. CPSC could use the resources of U.S. Customs to assist in stopping hazardous beds at the docks.

7. The absence of manufacturer identification on many beds has resulted in extremely low recall effectiveness rates. A mandatory standard could require companies to include identification on the beds.

8. Although the Commission currently believes that the ASTM voluntary standard for bunk beds adequately addresses the most common entrapment hazards associated with these products, the Commission is aware of three entrapment fatalities that occurred in conforming beds. A mandatory standard could modify the provisions in the voluntary standard so as to address the deaths that can occur on beds that comply with the voluntary standard.

Therefore, the Commission decided to issue an ANPR to begin a rulemaking proceeding and to seek public comment on all aspects of this proceeding, including (a) the need for a mandatory standard and (b) any additional requirements that may be needed to address fatalities known to have occurred on bunk beds conforming to the current voluntary standard.

However, the available information does not support a conclusion that changes to currently produced bunk beds would significantly reduce the number of fatalities due to falls and hangings. Thus, although information on these hazards is welcome, the Commission does not at this time intend to propose performance requirements to address falls or hangings from bunk beds.

F. Cost/Benefit Considerations

To provide some preliminary information on additional costs to conform to the entrapment requirements of the existing voluntary standard, CPSC's Economics staff contacted four manufacturers who had modified their production for that reason. The most expensive modification was the addition of a second guardrail to the top bunk. Two firms estimated that the additional guardrail would add $15–20 to the retail price of these products. The other two manufacturers, who market beds in the "mid to upper" price range, estimated a $30–40 increase in the retail price of their products. This increased cost would be incurred only by those firms that do not now conform to the voluntary standard.

CPSC estimates that the costs to society of bunk bed entrapment deaths is about $174–346 per bed over its expected useful life. The costs of bringing bunk beds into conformance with entrapment requirements range from $15–40 per bed. If the measures taken to address bunk-bed-related entrapment deaths were only about 4 to 23 percent effective in reducing these deaths, the costs and the benefits of such an activity would be about equal. In fact, the Commission expects that a mandatory standard would be substantially more effective than this.

G. Statutory Authorities for This Proceeding

What statute is appropriate for regulating bunk beds? CPSA section 3(a)(1), 15 U.S.C. 2052(a)(1). The Federal Hazardous Substances Act ("FHSA") authorizes the regulation of unreasonable risks of injury associated with articles intended for use by children that present mechanical (or electrical or thermal) hazards. FHSA section 2(f)(D), 15 U.S.C. 1261(f)(D). The hazards associated with bunk beds that are described above are mechanical. See FHSA section 2(s), 15 U.S.C. 1261(s). The Consumer Product Safety Act ("CPSA") authorizes the regulation of unreasonable risks of injury associated with "consumer products," which include bunk beds—whether intended for the use of children or adults. CPSA section 3(a)(1), 15 U.S.C. 2052(a)(1). Thus, bunk beds intended for the use of adults can be regulated only under the CPSA, while bunk beds intended for the use of children potentially could be regulated under either the FHSA or the CPSA. Bunk beds probably would be considered as intended for use by children only if they have smaller than twin-size mattresses or incorporate styling or other features especially intended for use or enjoyment by children.

Section 30(d) of the CPSA, however, provides that a risk associated with a consumer product that can be reduced to a sufficient extent by action under the FHSA can be regulated under the CPSA only if the Commission, by rule, finds that it is in the public interest to do so. 15 U.S.C. 2079(d). Accordingly, children's bunk beds could be regulated only under the FHSA, unless the Commission finds that it is in the public interest to regulate them under the CPSA. Thus, assuming that "adult" and "children's" bunk beds each present an unreasonable risk of injury, the Commission could:

1. Issue a rule for children's bunk beds under the FHSA and a rule for adult bunk beds under the CPSA; or

2. Issue a rule under the CPSA for both adult and children's bunk beds, and issue a rule under CPSA § 30(d) that it is in the public interest to do so.

A possible reason for finding that it is in the public interest to regulate both adult and children's bunk beds under the CPSA would be to avoid confusion as to which act applied to a particular bunk bed. The Commission will make a decision on which act(s) should be used

1998
UMI

if and when it decides to issue a proposed rule addressing the hazards of bunk beds. As discussed below, the procedure and statutory findings required to issue a rule for bunk beds are essentially identical under either act. Accordingly, any final rule may be issued under the CPSA, the FHSA, or a combination of the two acts.

What effect will the existence of the voluntary standard have on the rulemaking? The Commission may not issue a standard under either the CPSA or the FHSA if industry has adopted and implemented a voluntary standard to address the risk, unless the Commission finds that "(i) compliance with such voluntary * * * standard is not likely to result in the elimination or adequate reduction of such risk of injury; or (ii) it is unlikely that there will be substantial compliance with such voluntary * * * standard." In this case, it appears that a high percentage of bunk beds comply with ASTM F1427–92. Accordingly, the Commission has addressed the issue of whether the relatively high degree of compliance with the ASTM standard (possibly 90 percent or more) constitutes "substantial compliance" that would prevent the Commission from issuing a mandatory standard for bunk beds.

Neither statute defines the term "substantial compliance." However, guidance is provided by the legislative history of the CPSA:

> In determining whether or not it is likely that there will be substantial compliance with such voluntary * * * standard, the Commission should determine whether or not there will be sufficient compliance to eliminate or adequately reduce an unreasonable risk of injury in a timely fashion. Therefore, compliance generally should be measured in terms of the number of complying products rather than in terms of complying manufacturers.

H.R. Conf. Rep. No. 208, 97th Cong., 1st Sess. 873 (1981): "Adequately reduce" means to reduce the risk "to a sufficient extent that there will no longer exist an unreasonable risk of injury." *Id.* This legislative history suggests that substantial compliance means that there will be sufficient compliance with the voluntary standard to reduce the product's risk to the point that the risk is no longer "unreasonable."

Factors that are relevant both to a determination of unreasonable risk and to whether there is substantial compliance are the severity of the remaining injuries and the vulnerability of the injured population. The CPSC staff's analysis shows that issuing a mandatory rule could save a significant number of children's lives. Thus, the injuries are severe, and the affected population is extremely vulnerable. The cost/benefit information discussed above indicates a likelihood that the benefits of a rule for bunk beds would bear a reasonable relationship to its costs, and the remaining risks from bunk beds are thus "unreasonable." *See* 15 U.S.C. 1262(i)(2)(B), 2058(f)(3)(E). Accordingly, the Commission preliminarily concludes that there currently is not substantial compliance with the ASTM standard.

Rulemaking procedure. Before adopting a CPSA standard or FHSA rule, the Commission first must issue an ANPR as provided in section 3(f) of the FHSA or section 9(a) of the CPSA. 15 U.S.C. 1262(f), 2058(a). If the Commission decides to continue the rulemaking proceeding after considering responses to the ANPR, the Commission must then publish the text of the proposed rule, along with a preliminary regulatory analysis, in accordance with section 3(h) of the FHSA or section 9(c) of the CPSA. 15 U.S.C. 1262(h), 2058(c). If the Commission then wishes to issue a final rule, it must publish the text of the final rule and a final regulatory analysis that includes the elements stated in 3(i)(1) of the FHSA or section 9(f)(2) of the CPSA. 15 U.S.C. 1262(i)(1), 2058(f)(2). And before issuing a final regulation, the Commission must make certain statutory findings concerning voluntary standards, the relationship of the costs and benefits of the rule, and the burden imposed by the regulation. FHSA section 3(i)(2), CPSC section 9(f)(3), 15 U.S.C. 2058(f)(3).

H. Regulatory Alternatives Under Consideration

The Commission is considering alternatives to reduce the number of injuries and deaths associated with bunk beds. In addition to possible performance standards similar to the current ASTM standard, additional performance standards may be developed to supplement the entrapment provisions of the ASTM standard. Further, the potential for labeling or instructions requirements and information and education campaigns to reduce the risk will be considered, either instead of or in addition to a mandatory standard.

It is also possible that a voluntary standard could be developed that would adequately reduce the risks of entrapment, falls, and hanging. The Commission is not aware of any voluntary standard in effect that applies to the identified risks of bunk beds other than ASTM F1427–96. As noted above, the Commission has preliminarily concluded that the degree of compliance with this ASTM standard may be insufficient and some fatalities have occurred that are not adequately addressed by that standard. However, if improved voluntary standards are developed and implemented, the Commission would take that into account in deciding whether a mandatory standard is necessary.

I. Solicitation of Information and Comments

This ANPR is the first step of a proceeding which could result in a mandatory performance, labeling, or instructions standard for bunk beds to address the risk of entrapment. All interested persons are invited to submit to the Commission their comments on any aspect of the alternatives discussed above. In particular, CPSC solicits the following additional information:

1. The models and numbers of bunk beds produced for sale in the U.S. each year from 1990 to the present;
2. The names and addresses of manufacturers and distributors of bunk beds;
3. The number of persons injured or killed by the hazards associated with bunk beds;
4. The circumstances under which these injuries and deaths occur, including the ages of the victims;
5. An explanation of designs that could be adapted to bunk beds to reduce the risk of entrapment;
6. Characteristics of the product that could or should not be used to define which products might be subject to the requested rule, and which products, if any, are intended for use by children, and which for adults;
7. Other information on the potential costs and benefits of potential rules;
8. Steps that have been taken by industry or others to reduce the risk of injuries from the product;
9. The likelihood and nature of any significant economic impact of a rule on small entities;
10. The costs and benefits of mandating a labeling or instructions requirement.

Also, in accordance with section 3(f) of the FHSA and section 9(a) of the CPSA, the Commission solicits:

1. Written comments with respect to the risk of injury identified by the Commission, the regulatory alternatives being considered, and other possible alternatives for addressing the risk.
2. Any existing standard or portion of a standard which could be issued as a proposed regulation.
3. A statement of intention to modify or develop a voluntary standard to address the risk of injury discussed in this notice, along with a description of a plan (including a schedule) to do so.

Comments should be mailed, preferably in five copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207–0001, or delivered to the Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East-West Highway, Bethesda, Maryland 20814; telephone (301) 504–0800. Comments also may be filed by telefacsimile to (301) 504–0127 or by email to cpsc-os@cpsc.gov. Comments should be captioned "ANPR for Bunk Beds." All comments and submissions should be received no later than April 7, 1998.

Dated: January 15, 1998.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 98–1457 Filed 1–21–98; 8:45 am]

BILLING CODE 6355–01–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 140

Requests for Exemptive, No-Action and Interpretative Letters

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is proposing new regulations to establish procedures for the filing of requests for the issuance of exemptive, no-action and interpretative letters from the Commission's staff.

DATES: Comments on the proposed rule must be received on or before March 23, 1998.

ADDRESSES: Comments on the proposed rule should be sent to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Center, 1155 21st Street, N.W., Washington, D.C. 20581. Comments may be sent by facsimile transmission to (202) 418–5528, or by e-mail to secretary@cftc.gov. Reference should be made to "Rule Proposal Re: Requests for Exemptive, No-Action, and Interpretative Letters."

FOR FURTHER INFORMATION CONTACT: Christopher W. Cummings, Special Counsel, or Helene D. Schroeder, Attorney-Adviser, Division of Trading and Markets, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C., 20581. Telephone: (202) 418–5450.

SUPPLEMENTARY INFORMATION:

I. Requests for Exemptive, No-Action and Interpretative Letters

A. Background

In the course of administering the Commodity Exchange Act ("Act")[1] and the rules, regulations and orders promulgated thereunder by the Commission,[2] Commission staff receive written requests for advice on or interpretation of particular provisions of the Act or Commission rules to proposed conduct or transactions. If appropriate, Commission staff provide the advice or guidance sought through the issuance of exemptive, no-action or interpretative letters ("Letters").[3] Currently, there are no Commission rules setting forth procedures for requests for Letters.[4]

The Commission is of the view that establishment of uniform procedural rules governing these requests will significantly assist the Commission and its staff by assuring a focused presentation of the guidance sought, the issues raised thereby, and relevant precedent. The Commission is therefore now proposing uniform procedures for the filing of requests for exemptive, no-action or interpretative letters. These procedures are intended to elicit from the outset the information that staff will need to evaluate a request, and to minimize staff resources expended in seeking additional information.

Letters generally should be requested from (and, if appropriate, issued by) Commission staff in instances where the need for guidance or clarification of a rule's applicability arises from relatively routine circumstances. The Commission believes that the best mechanism for handling novel or complex issues, significant gaps in regulatory coverage, relief from regulatory requirements or initiatives for regulatory reform generally is the notice and comment rulemaking process or, where appropriate, exemptive action by the Commission itself after notice and public comment. This is especially true where a perceived issue is likely to affect a large number of persons or entities. Accordingly, the Commission reminds registrants, counsel and the public that it is receptive to public and industry input (including, for example, petitions for rulemaking actions and petitions for Commission exemptive action or other orders) in the continuing process of adapting its regulatory framework to changing market circumstances. The Commission also notes that, notwithstanding the requirements for Letters set forth herein, registrants, other industry participants, counsel and members of the public should feel free to seek information from Commission staff in those situations where they do not require no-action relief, or a formal interpretation of statutory or regulatory provisions.

Although not required to do so (see II. Related Matters, below), the Commission invites public comment on this proposal.

B. The Proposed Rule

1. Definitions

Paragraph (a) of the proposed rule sets forth definitions for exemptive, no-action and interpretative letters. The term "exemptive" letter is defined as a written grant of relief to a specified person from the applicability of a specific provision of the Act or a Commission rule, regulation or order. Exemptive letters may be issued by Commission staff only in those situations where: (a) the Commission itself has exemptive authority; and (b) that authority has been delegated to staff.[5]

A "no-action" letter is defined as a written statement that staff of a specific division will not recommend enforcement action to the Commission if a proposed transaction is undertaken or a proposed activity is conducted. A no-action letter represents the position of only the division issuing it and is binding only upon that division and not

[1] 7 U.S.C. § 1 *et seq.* (1994).

[2] Commission regulations are found at 17 C.F.R. Ch. I *et seq.*

[3] These types of letters are proposed to be defined in Rule 140.99 (a)(1), (a)(2), and (a)(3), respectively, and each is discussed in Part b, below.

[4] By contrast, since 1971, the Securities and Exchange Commission ("SEC") has required conformity with certain procedures by persons submitting requests for no-action or interpretative letters. *See* Securities Act Release No. 5127, 36 FR 2600 (Jan. 25, 1971) (prescribed procedures for requests under the Securities Act of 1933, Securities Exchange Act of 1934, Public Utility Holding Company Act of 1935, Trust Indenture Act of 1939, Investment Company Act of 1940 and Investment Advisers Act of 1940). Some of these procedures have been modified or supplemented by SEC staff. *See, e.g.*, Securities Act Release No. 6253, 45 FR 72644 (Oct. 28, 1980) (institution of abbreviated response procedures by Division of Corporation Finance); and Securities Act Release No. 6269 (Dec. 5, 1980) (institution of seven-copy requirement for requests to Division of Corporation Finance).

[5] The proposed rule governs requests submitted to and processed by Commission staff. In certain circumstances, however, requests must be submitted to and processed by the Commission itself. For example, where exemptive authority has not been delegated to the staff, exemptive relief must be granted by Commission order (*e.g.*, under Section 4(c) of the Act, 7 U.S.C. § 6(c) (1994)). The Commission intends that persons making exemption requests of it should comply with the requirements of the applicable section of the Act or Commission rules, regulations or orders, although paragraphs (b), (c), (f) and (h) of the proposed rule provide some useful guidance for such requests.

VOL 63 ISS 14 JA 22 1998 UMI

on the Commission or other divisions. Further, a no-action letter is only effective with respect to the person or persons to whom it was issued.

An "interpretative" letter refers to written advice or guidance with respect to the interpretation of a specific provision of the Act or a specific Commission rule, regulation or order, which advice or guidance is provided in the context of a proposed transaction or activity. These letters are usually issued by the staff of a particular division of the Commission or the Office of the General Counsel and, unless otherwise noted, reflect only the views of the division or the Office of the General Counsel.[6] Unlike no-action letters (or exemptive letters), an interpretative letter can be relied upon by persons other than those to whom the letter was issued, but it is binding only upon the Commission staff unit issuing it, and not upon the Commission itself.

Issuance of Letters is entirely within the discretion of Commission staff. A request may be denied, or staff may refuse to consider a request, without explanation. See paragraph (b)(1) of the proposed rule.

2. General Requirements

Paragraph (b) of the proposed rule sets forth the general requirements for requests for Letters. All requests must relate to a specific proposed activity or transaction and must set forth as completely as possible the particular facts and circumstances giving rise to the request.[7] The proposed rule codifies the policy adhered to by Commission staff of not providing responses to requests based on hypothetical situations. The request may be submitted by the person seeking a Letter or by that person's authorized representative. In any case, the person on whose behalf a Letter is sought must be identified. Consistent with current practice, Commission staff will not respond to requests submitted on behalf of unnamed persons.

If the Commission were to adopt the proposed rule, Commission staff would expect all requests for Letters to comply with the rule's requirements. A request that does not comply with the rule as adopted may be rejected by Commission staff without further analysis.[8]

3. Information Requirements

Requests for Letters should contain the information set forth in paragraph (c). Specifically, each request should identify the requester's name, main business address, telephone number, and if applicable, National Futures Association registration identification number as well as corresponding information concerning any other persons on whose behalf the Letter is being sought. The request must also provide the name, address and telephone number of a contact person from whom Commission staff may obtain additional information if necessary.

Paragraph (c)(2) of the proposed rule requires that the specific section number of the Act and/or Commission rule, regulation or order to which the request relates be set forth in the upper right-hand corner of the first page of the request. This requirement will facilitate the proper routing of the request within the Commission.

Paragraph (c)(3) requires that all requests for exemptive, no-action or interpretative letters be accompanied by a certification that the representations contained in the request are true and accurate, along with an undertaking to supplement the request in the event any material fact changes or ceases to be true. The requester must make a complete and reliable presentation of the facts relevant to a request. A certification requirement is intended to assure that requesters fully review the facts and keep Commission staff advised of changed circumstances, without the need for repeated requests by staff for supplemental information.

Paragraph (c)(4) of the proposed rule requires that each request specify the particular type of Letter being sought along with a discussion of the reasons why the requester needs a Letter. In this regard, the request should identify not only the specific concerns underlying the proposed transaction or activity giving rise to the request, but also the legal or public policy reasons for granting the request. Failure to frame an identifiable issue or problem and a reasonable justification for the relief or interpretation sought will be grounds for rejection of a request.

Paragraph (c)(5) of the proposed rule requires that requests make reference to all relevant authority, including the Act, Commission rules, regulations and orders, relevant case law, and any administrative decisions on the issue. In this regard, the request must identify and distinguish all adverse authority.

If Commission staff have previously issued a Letter in circumstances similar to those set forth in the request, paragraph (c)(6) requires that the request identify the prior Letter along with the conditions, if any, that were imposed by the division issuing the Letter. Requesters and their counsel must exercise due diligence in identifying and assembling the relevant authorities, including prior Letters of Commission staff.

Under paragraph (c)(7) of the proposed rule, it would be appropriate in a request Letter to ask for alternative relief if the primary relief requested is denied.

4. Filing Requirements

Paragraph (d) of the proposed rule establishes the procedures for filing requests for Letters. Specifically, paragraph (d)(1) requires that each request be made in writing and signed. "Draft" requests for Letters will not be considered.

Pursuant to paragraph (d)(2), the request must be filed with the Director of the Division of Trading and Markets, who will then forward the request to the appropriate division within the Commission. Under ordinary circumstances the Division of Trading and Markets and the Division of Economic Analysis will issue no-action letters, and the Office of the General Counsel will issue statutory interpretations. Interpretative letters concerning rules or regulations will be referred either to one of the Divisions or to the Office of the General Counsel depending upon the issue to be addressed.

The requirement that all requests be in writing codifies current agency practice. Oral requests for Letters will not be recognized.

Commenters specifically are requested to address whether the rule should permit requests to be filed electronically.

5. Form of Staff Response

Paragraph (e) of the proposed rule provides Commission staff with flexibility as to the level of detail necessary for a staff response to a request for a Letter. Paragraph (e) affords Commission staff the option of providing a responsive letter in an abbreviated or endorsement format that merely sets forth the staff's position and does not contain a detailed recitation of the facts. In such cases, the Letter would provide that it is based on the facts and representations set forth in the request and thus would incorporate by reference those facts and representations. Use of this abbreviated format, where appropriate, may lessen the burden on Commission staff in responding to requests for Letters.[9] The Commission requests public comment on whether and in what circumstances it should utilize this abbreviated procedure.

As set forth in paragraph (e), no grant of any request governed by the proposed rule shall be effective unless it is in writing signed by responsible Commission staff and has been transmitted in final form to the requester. Oral indications from staff are not binding and should not be relied on.[10] Likewise, it is highly inappropriate for a requester to state in a request letter that the requester will assume relief has been granted and will proceed with the proposed transaction if the requester does not receive a negative response from Commission staff by a certain date. Failure by staff to respond to a request for a Letter does not constitute staff approval of the request.[11]

6. Withdrawal of Requests

Paragraph (f) of the proposed rule makes clear that any withdrawal of a request for a Letter may be accomplished only if: (1) the requester certifies in writing that the person making the request or on whose behalf the request has been made has determined not to proceed with the contemplated transaction or that intervening events have rendered the request moot; [12] or (2) the requester has sought confidential treatment in accordance with Rule 140.98 and Commission staff has determined that confidential treatment should not be granted (in which case Rule 140.98 permits the requester to withdraw within 30 days of being so notified). The proposed rule is not intended to modify or affect the provisions of Rule 140.98.

In permitting withdrawal in limited circumstances only, the proposed rule is intended to eliminate the past practice of certain requesters of submitting requests (often in draft form) and then withdrawing them if it appeared likely that an adverse response would be received.[13]

Although the goal of the proposed rule is that initial requests will be as complete and thorough as possible, Commission staff from time to time will need to seek additional information from requesters in order to process a request. Where Commission staff asks for supplemental information or analysis, the requester should respond as quickly as practicable. Paragraph (g) of the proposed rule provides that an adverse response generally will be issued where the requester fails to provide additional information or analysis within 30 days of receiving a request for the same from Commission staff, unless an extension is granted by Commission staff considering the request.

7. Confidential Treatment

Paragraph (h) of the proposed rule makes clear that where confidential treatment is sought, it must be requested separately, in conformity with Rule 140.98 or Rule 145.9 as applicable. These sections pertain, respectively, to requests for confidential treatment of: (a) the request for a Letter as well as the Letter issued in response; and (b) information submitted to the Commission which may be sought under the Freedom of Information Act, 5 U.S.C. 552.

8. Applicability to Other Sections

Paragraph (i) of the proposed rule makes clear that the rule would not alter existing provisions of the Act or Commission rules, regulations or orders (such as Rules 4.5, 4.7 and 4.12(b)) under which specified exemptive relief is available upon the filing of a notice of claim of (or eligibility for) the particular exemption.

II. Related Matters

A. Administrative Procedure Act

The Administrative Procedure Act, 5 U.S.C. 553(b), sets forth an exemption from the generally applicable notice-and-comment requirement for informal rulemaking where the rules at issue concern agency organization, procedure or practice. Although the rule proposed herein pertains exclusively to agency procedures and practice, the Commission is interested in receiving comment from the public on the proposal and, accordingly, is publishing the proposal for notice and public comment.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 *et seq.*, requires each federal agency to consider in the course of proposing substantive rules, the effect of those rules on small entities. The proposed rule makes clear that requests may be made by any person, including those that would constitute "small entities" within the meaning of the RFA. The uniformity mandated by the rule will provide greater certainty to requesters as to the procedures to follow in seeking relief or advice and, to this extent, the rule removes a burden on all requesters, regardless of their size.

Additionally, the Commission has built maximum flexibility into the operation of the rule by making it clear that Commission staff "may," but are not required to, decline to respond to a request that does not meet the requirements of the rule. See paragraph (b)(2). When a non-conforming request is submitted by a person who lacks adequate financial resources to retain counsel (or in other circumstances where strict application of the rule would be inequitable), Commission staff may accommodate the requester by accepting the non-conforming request, by providing guidance to the requester in the proper formulation and filing of the request, or by other means.

The Chairperson, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. § 605(b), that the action taken herein will not have a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

When publishing proposed rules, the Paperwork Reduction Act of 1995 (Pub. L. 104–13 (May 13, 1995)) imposes certain requirements on federal agencies (including the Commission) in connection with conducting or sponsoring any collection of information as defined by the Paperwork Reduction Act. In compliance with the Act, the Commission, through this rule proposal, solicits comments to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including the validity of the methodology and

[6] Statutory interpretations are issued by staff of the Office of the General Counsel. Requests for interpretations of rule provisions will be assigned on a case-by-case basis to staff of the Division of Trading and Markets, the Division of Economic Analysis or the Office of the General Counsel.

[7] Where charts or diagrams are likely to facilitate the staff's understanding of the relevant facts, requesters are encouraged to submit such materials with their initial correspondence.

[8] In proposing to codify the authority of its staff to reject non-conforming requests, the Commission is not proposing to alter the staff's current practice of declining to respond to requests in other circumstances, such as when legal, policy or practical considerations make it inappropriate to respond to the merits of a request. See paragraph (b)(1).

[9] This procedure is followed by the SEC's Divisions of Corporation Finance and Investment Management. The abbreviated procedure as adopted by the Division of Corporation Finance is set forth in Securities Act Release No. 6253, *supra* note 4.

[10] Commission staff field numerous telephone inquiries from the public and provide information and guidance as appropriate. These proposed rules are not intended to alter this practice. However, while statements made during those conversations are intended to be helpful, they are not binding on the staff or the Commission.

[11] *See Precious Metals Associates, Inc. v. CFTC*, 620 F.2d 900 (1st Cir. 1980).

[12] For example, a request for relief under Rule 4.7(a) notwithstanding participation by a person who is not a qualified eligible participant ("QEP") may become moot if the proposed participation becomes able to meet the QEP criteria.

[13] It is hoped that the provision in paragraph (c)(7) allowing for requests for relief in the alternatives should eliminate any perceived need for this practice.

VOL 63 ISS 14 JA 22 1998 UMI

assumptions used; (2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) enhance the quality, utility and clarity of the information to be collected; and (4) minimize the burden of the collection of the information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology; *e.g.*, permitting electronic submission of responses.

The Commission has submitted this proposed rule and its associated information collection requirements to the Office of Management and Budget.

The burden associated with this proposed rule, is as follows:

Average burden hours per response: 7.
Number of respondents: 215.
Frequency of response: 1.3.

Persons wishing to comment on the information that would be required by this proposed/amended rule should contact the Desk Officer, CFTC, Office of Management and Budget, Room 10202, NEOB, Washington, DC 20503 (202) 395–7340. Copies of the information collection submission to OMB are available from the CFTC Clearance Officer, 1155 21st Street, NW., Washington, DC 20581 (202) 418–5160.

List of Subjects in 7 CFR Part 140

Authority delegations (Government agencies), Organization and functions (Government agencies).

In consideration of the foregoing and pursuant to the authority contained in the Commodity Exchange Act and in particular section 8(a) of the Act, as amended, 7 U.S.C. 12(a), the Commission hereby proposes to amend Chapter I of title 17 of the Code of Federal Regulations as follows:

PART 140—ORGANIZATION, FUNCTIONS, AND PROCEDURES OF THE COMMISSION

1. The authority citation for part 140 continues to read as follows:

Authority: 7 U.S.C. 7a(j) and 12a.

2. Section 140.99 is proposed to be added to read as follows:

§ 140.99 Requests for Exemptive, No-Action and Interpretative Letters.

(a) *Definitions.* For the purpose of this section:

(1) *Exemptive letter* means a written grant of relief from the staff of a Division of the Commission from the applicability of a specific provision of the Act or of a rule, regulation or order issued thereunder by the Commission. An exemptive letter may only be issued by Commission staff when the Commission itself has exemptive authority and that authority has been delegated by the Commission to the Division in question.

(2) *No-action letter* means a written statement from the staff of a Division of the Commission that it will not recommend enforcement action to the Commission for failure to comply with a specific provision of the Act or of a Commission rule, regulation or order if a proposed transaction is completed or a proposed activity is conducted by the person or persons who requested such letter. A no-action letter represents the position of only the Division that issued it and is applicable only with respect to the particular circumstances and binding only with respect to parties addressed by the letter. A no-action letter does not bind the Commission itself or any other division thereof.

(3) *Interpretative letter* means written advice or guidance from Commission staff (binding only upon the staff unit providing the advice or guidance and not upon the Commission itself) and may take the form of:

(i) Written advice or guidance from the staff of a particular Division of the Commission or the staff of the Office of the General Counsel with respect to the interpretation of a specific provision of a Commission rule, regulation or order in the context of a proposed transaction or a proposed activity; or

(ii) Written advice or guidance from the staff of the Office of the General Counsel with respect to the interpretation of a specific provision of the Act.

(4) *Letter* means an exemptive, no-action or interpretative letter.

(5) *Division* as used in this section means the Division of Trading and Markets or the Division of Economic Analysis.

(b) *General requirements*—(1) Issuance of Letters is entirely within the discretion of Commission staff. A request may be denied, or staff may refuse to consider or respond to a request without explanation.

(2) Each request for a Letter must comply with the requirements of this section. Commission staff may reject or decline to respond to a request that does not comply with the requirements of this section.

(3) The request must relate to a proposed activity or a proposed transaction. Absent extraordinary circumstances, Commission staff will not issue a Letter based upon past transactions or activities.

(4) The request may be made by a person seeking a Letter or by an authorized representative of such person. Commission staff will not respond to a request for a Letter that is made by or on behalf of an unidentified person.

(5)(i) The request must set forth as completely as possible the particular facts and circumstances giving rise to the request.

(ii) Commission staff will not respond to a request based on a hypothetical situation.

(c) *Information requirements.* Each request for a Letter must comply with the following information requirements:

(1)(i) A request made by the person seeking a Letter must contain:

(A) The name, main business address, main telephone number and, as applicable, the National Futures Association registration identification number of such person; and

(B) The name and, as applicable, the National Futures Association registration identification number of each other person for whom the requester is seeking the Letter.

(ii) When made by an authorized representative of the person seeking a Letter, the request must contain:

(A) The name, main business address and main business telephone number of the representative;

(B) The name and, as applicable, the National Futures Association registration identification number of the person seeking a Letter; and

(C) The name, and as applicable, the National Futures Association registration identification number of each other person for whom the requester is seeking the Letter.

(iii) The request must provide the name, address and telephone number of a contact person from whom Commission staff may obtain additional information if necessary.

(2) The section numbers of the particular provisions of the Act and/or Commission rules, regulations in this chapter, or orders to which the request relates must be set forth in the upper right-hand corner of the first page of the request.

(3) The request must be accompanied by:

(i) A certification by a person with knowledge of the facts that the representations made in the request are accurate and complete. The following form of certification is sufficient for this purpose:

I hereby certify that the statements contained in the attached letter dated _____ are true and complete to the best of my knowledge.

_____
(Name and Title)

and

(ii) An undertaking by such person on behalf of the person seeking a Letter that at such time as any material representation made in the request ceases to be accurate and complete, the person who has made the request or received the Letter will promptly submit a written supplement reflecting all material changed circumstances.

(4) The request must identify the type of relief requested and Letter sought and must clearly state why a Letter is needed. The request must identify all relevant legal and factual issues and must discuss the legal and public policy bases supporting issuance of the Letter.

(5) The request must contain references to all relevant authorities, including the Act, Commission rules, regulations in this chapter, and orders, judicial decisions, administrative decisions, relevant statutory interpretations and policy statements. Adverse authority must be cited and discussed.

(6) The request must identify prior Letters issued by Commission staff in response to circumstances similar to those surrounding the request (including adverse Letters), and must identify any conditions imposed by prior Letters as prerequisites for the issuance of those Letters.

(7) Requests may ask that, if the primary relief is denied, alternative relief be granted.

(d) *Filing requirements.* Each request for a Letter must comply with the following filing requirements:

(1) The request must be made in writing and signed.

(2) The request must be filed with the Director, Division of Trading and Markets, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581. The Director will route the request to the appropriate division.

(e) *Form of staff response.* No grant of any request governed by this section is effective unless it is in writing signed by responsible Commission staff and has been transmitted in final form to the requester. Failure by Commission staff to respond to a request for a Letter does not constitute approval of the request. Nothing in this section shall preclude Commission staff from responding to a request for a Letter by way of endorsement or any other abbreviated, written form of response.

(f) *Withdrawal of requests.* Once filed, a request for a Letter may only be withdrawn if:

(1) A request for withdrawal is made in writing and makes the following representations, as applicable, together with a certification that such representations are true:

(i) The person on whose behalf the request was made has determined not to proceed with the proposed transaction or activity, or

(ii) Intervening events have rendered the request moot; or

(2) The request is the subject of a request for confidential treatment pursuant to § 140.98 and Commission staff has notified the requester that the request for confidential treat-ment will be denied, in which event the requester may withdraw the letter within 30 days after such notification, as provided in § 140.98.

(g) *Failure to pursue a request.* If a requester fails to respond within 30 calendar days of the date of a request from Commission staff for additional information or analysis, Commission staff generally will issue an adverse response, unless an extension of time has been granted.

(h) *Confidential treatment.* If a requester seeks confidential treatment of a request for a Letter that it has filed, such treatment must be separately requested in accordance with § 140.98 or § 145.9 of this chapter, as applicable.

(i) *Applicability to other sections.* The provisions of this section shall not affect the requirements of, or otherwise be applicable to, notice filings required to be made to claim relief from the Act or from a Commission rule, regulation or order including, without limitation, §§ 4.5, 4.7(a), 4.7(b), 4.12(b), 4.13(b) and 4.14(a)(8) of this chapter.

Issued in Washington, D.C. on January 13, 1998 by the Commission.

Catherine D. Dixon,

Assistant Secretary of the Commission.

[FR Doc. 98–1138 Filed 1–21–98; 8:45 am]

BILLING CODE 6351–01–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 291

RIN 1076–AD87

Class III Gaming Procedures

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Proposed rule.

SUMMARY: The Department has concluded that it has the authority to prescribe procedures permitting Class III gaming when a State interposes its immunity from suit by an Indian Tribe. The proposed rule announces the Department's determination that the Secretary may promulgate Class III gaming procedures under certain specified circumstances. It also sets forth the process and standards pursuant to which any procedures would be adopted.

DATES: Written comments must be submitted on or before April 22, 1998 to be considered.

ADDRESSES: Mail comments to Paula L. Hart, Indian Gaming Management Staff, Bureau of Indian Affairs (BIA), Department of the Interior, MS 2070–MIB, 1849 C Street, NW, Washington, DC 20240. Comments may be hand-delivered to the same address from 9:00 a.m. to 4:00 p.m. Monday through Friday or sent by facsimile to (202) 273–3153. Comments will be made available for public inspection at this address from 9:00 a.m. to 4:00 p.m. Monday through Friday beginning approximately two weeks after publication of the proposed rule.

FOR FURTHER INFORMATION CONTACT: Paula L. Hart, Indian Gaming Management Staff, Bureau of Indian Affairs, Department of the Interior, MS 2070–MIB, 1849 C Street, NW, Washington, DC 20240, Telephone (202) 219–4066.

SUPPLEMENTARY INFORMATION:

Introduction

Congress enacted the Indian Gaming Regulatory Act (IGRA), 25 U.S.C. 2701–2721, to provide a statutory basis for the operation and regulation of Indian gaming and to protect Indian gaming as a means of generating revenue for tribal governments. Prior to the enactment of IGRA, states generally were precluded from any regulation of gaming on Indian reservations. *See California* v. *Cabazon Band of Mission Indians,* 480 U.S. 202 (1987). IGRA, by offering States an opportunity to participate with Indian Tribes in developing regulations for Indian gaming, "extends to States a power withheld from them by the Constitution." *Seminole Tribe of Florida* v. *State of Florida,* 116 S. Ct. 1114, 1124 (1996).

Since IGRA's passage in 1988, more than 150 compacts in more than 20 States have been successfully negotiated by Tribes and States, and approved by the Secretary. Today, Indian gaming generates significant revenue for Indian Tribes. As required by IGRA, gaming revenues are being devoted primarily to providing essential government services such as roads, schools, and hospitals, as well as economic development.

IGRA divides Indian gaming into three categories. This proposed rule addresses only the conduct of Class III

VOL 63 ISS 14 JA 22 1998 UMI

gaming, which primarily includes slot machines, casino games, banking card games, dog racing, horse racing, and lotteries. 25 U.S.C. 2703(8); 25 CFR § 502.4. Under IGRA, the conduct of "Class III gaming activities" is lawful on Indian lands only if such activities (1) are authorized by an ordinance adopted by the governing body of the Tribe and approved by the Chairman of the National Indian Gaming Commission (NIGC), (2) are located in a State that permits such gaming for any purpose by any person, organization, or entity, and (3) are conducted in conformance with a Tribal-State compact. 25 U.S.C. 2710(d)(1)(B). The proposed regulations which follow relate primarily to this third requirement, i.e., the Tribal-State compact.

Under IGRA, a Tribe interested in operating Class III gaming initiates the compacting process by requesting the State to enter into negotiations. 25 U.S.C. 2710(d)(3)(A). Upon receiving such a request, the State is obliged "to negotiate with the Indian Tribe in good faith to enter into such a compact." *Id.* If the State fails to negotiate in good faith, the Tribe may initiate an action against the State in Federal district court. 25 U.S.C. 2710(d)(7)(A)(I). If the court finds that the State has failed to negotiate in good faith, it must order the State and the Tribe to conclude a compact within 60 days. 25 U.S.C. 2710(d)(7)(B)(iii). If the State and Tribe fail to conclude a compact within that period, each side must submit their last best offer to a court-appointed mediator, who selects one of the proposals. 25 U.S.C. 2710(d)(7)(B)(iv). If the State consents to that proposal, it is treated as a Tribal-State compact. 25 U.S.C. 2710(d)(7)(B)(vi). If the State does not consent, the Secretary of the Interior shall prescribe procedures (1) which are consistent with the proposed compact selected by the mediator, the provisions of IGRA, and the relevant provisions of State laws, and (2) under which Class III gaming may be conducted on the Indian lands over which the Indian Tribe has jurisdiction. 25 U.S.C. 2710(d)(7)(B)(vii).

In *Seminole Tribe of Florida* v. *Florida*, the Supreme Court held that a State may assert an Eleventh Amendment immunity defense to avoid a lawsuit brought by a Tribe alleging that the State did not negotiate in good faith. After the *Seminole* decision, some States have signaled their intention to assert immunity to suit in Federal court. Claiming immunity will, if no further action is taken, create an effective State veto over IGRA's dispute resolution system and therefore will stalemate the compacting process. The proposed rulemaking contemplates that the Secretary would prescribe Class III gaming procedures to end the stalemate.

Secretarial Authority to Prescribe Procedures

On May 10, 1996, the BIA published an "Advance Notice of Proposed Rulemaking" (hereafter, ANPR) in response to the United States Supreme Court's decision in *Seminole Tribe of Florida* v. *State of Florida*, 116 S. Ct. 1114 (1996). 61 FR 21394 (May 10, 1996). In that ANPR, the Department posed, among others, the question of "[w]hether and under what circumstances, the Secretary of the Interior is empowered to prescribe 'procedures' for the conduct of Class III gaming when a State interposes an Eleventh Amendment defense to an action pursuant to 25 U.S.C. 2710(d)(7)(B)." The Secretary of the Interior, in consultation with the Solicitor, has determined that he possesses legal authority to promulgate procedures setting out the terms under which Class III gaming may take place when a State asserts its immunity from suit.

The Secretary's authority arises from the statutory delegation of powers contained in 25 U.S.C. 2710 (d)(7)(B)(vii) of IGRA and 25 U.S.C. 2 and 9. As the Eleventh Circuit Court of Appeals explained, in the case where the Supreme Court ultimately found the States could assert Eleventh amendment immunity:

> We are left with the question as to what procedure is left for an Indian Tribe faced with a State that not only will not negotiate in good faith, but also will not consent to suit. The answer, gleaned from the statute, is simple. One hundred and eighty days after the Tribe first requests negotiations with the State, the Tribe may file suit in district court. If the State pleads an Eleventh Amendment defense, the suit is dismissed, and the Tribe pursuant to 25 U.S.C. § 2710(d)(7)(B)(vii), then may notify the Secretary of the Interior of the Tribe's failure to negotiate a compact with the State. The Secretary may then prescribe regulations governing Class III gaming on the Tribe's lands. This solution conforms with IGRA and serves to achieve Congress' goals, as delineated in §§ 2701–02.

Seminole Tribe of Florida v. *State of Florida*, 11 F.3d 1016, 1029 (11th Cir. 1994) (*dictum*), *aff'd on other grounds*, 116 S.Ct. 1114 (1996).

Although Congress likely did not foresee the States' refusal to participate in the court-ordered mediation process, it plainly authorized the Secretary to permit Class III gaming in the event that the court-supervised process failed to produce a joint compact. The power of an agency to administer a congressional mandate like this one is not restricted to circumstances explicitly described by Congress; the agency's power also extends to circumstances that Congress, for a variety of reasons, may not have anticipated or articulated in the statute. When Congress has not "directly spoken to the precise question at issue," courts "must sustain the Secretary's approach so long as it is based on a reasonable construction of the statute." *Auer* v. *Robbins*, 117 S.Ct. 905, 909 (1997), *quoting Chevron U.S.A., Inc.* v. *Natural Resources Defense Council*, 467 U.S. 837, 842–43 (1984); *Morton* v. *Ruiz*, 415 U.S. 199 (1974); Kenneth Culp Davis & Richard J. Pierce Jr., *Administrative Law Treatise* § 3.3 (3d ed. 1994). As explained in the proposed rule, the Secretary will provide procedures only when a State has successfully asserted its immunity from an Indian Tribe's good faith lawsuit. Moreover, the proposed rule generally mirrors the mediation scheme provided in IGRA to the maximum practicable extent.

Along with the specific authority under section 2701(d)(7)(B)(vii), Congress has delegated to the Executive under 25 U.S.C. 2 and 9 broad authority to issue regulations necessary to manage Indian affairs and carry into effect legislation relating to such affairs.[1] The courts on many occasions have upheld the exercise of this authority. In *Washington* v. *Washington State Commercial Passenger Fishing Vessel Association*, 443 U.S. 658, 691 (1979), for example, the Court noted with approval regulations protective of off-reservation Indian fishing rights. Although there was no explicit delegation of authority to adopt fishing regulations in the Treaty reserving the right, the Supreme Court recognized that the Secretary's "general Indian powers" embodied in 25 U.S.C. 2 and 9 gave him the authority to adopt regulations over Indian affairs. *See also United States* v. *Eberhardt*, 789 F.2d 1354, 1360–61 (9th Cir. 1986); *Parravano* v. *Masten*, 70 F.3d 539 (9th Cir. 1995), *cert. denied*, __ U.S. __, 116 S. Ct. 2546 (1996); *United States* v. *Michigan*, 623 F.2d 448, 450 (6th Cir. 1980); *James* v. *U.S. Dep't. of Health and Human Services*, 824 F.2d 1132, 1137 (D.C. Cir. 1987). Such cases fully support the exercise of Secretarial

[1] "The Commissioner of Indian Affairs shall, under the direction of the Secretary of the Interior, and agreeably to such regulations as the President may prescribe, have the management of all Indian affairs and all matters arising out of Indian relations." 25 U.S.C. 2." The President may prescribe such regulations as he may think fit for carrying into effect the various provisions of any act relating to Indian affairs, and for the settlement of the accounts of Indian affairs." 25 U.S.C. 9; *see also* 43 U.S.C. 1457 (charging Secretary of Interior with administration of "public business" related to Indians).

authority to promulgate regulations governing and protecting Indian rights, such as the right to engage in gaming activities, that are rooted in Federal law.

In comments on the ANPR, some States have suggested that the Supreme Court's decision in *Organized Village of Kake* v. *Egan*, 369 U.S. 60 (1962), may preclude the Secretary's exercise of rule-making authority for gaming procedures. See Comments of Florida, et al., *supra*, at 9. In *Organized Village of Kake*, the Secretary purported to authorize off-reservation fisheries in Alaska pursuant to his general authority over Indian affairs and the White Act, 48 U.S.C. 221–228. However, no treaty, executive order, statute, or Federal common law established tribal fishing rights. Accordingly, the Court struck down the Secretary's regulations authorizing the use of fish traps in violation of State law because the Tribe had *no* "fishing rights derived from Federal laws." Id. at 76. *See McClanahan* v. *Arizona State Tax Com'n.*, 411 U.S. 164, 176 n.15 (1973) (distinguishing *Organized Village of Kake* as limited to situations involving non-reservation Indians without Federally-protected rights); see also Clinton, et al., *American Indian Law* at 593 (3d ed. 1991).

Here, in contrast, the Tribes' Federal common law right to engage in gaming activities free of most State regulation on Indian land was recognized in *California* v. *Cabazon Band of Mission Indians*, 480 U.S. 202 (1987) and pre-existed adoption of IGRA. Because tribal gaming rights are rooted in Federal law, 25 U.S.C. 2 and 9 give the Secretary the authority to adopt regulations to carry into effect those rights.

The Ninth Circuit, in a case vacated after the Supreme Court's decision in *Seminole*, expressed concern that the Secretary would undermine congressional intent if he imposed regulations for Class III gaming when a State asserted immunity. *Spokane Tribe of Indians* v. *Washington*, 28 F.3d. 991, 997 (9th Cir. 1994) (*dictum*), vacated and remanded, ____ U.S. ____, 116 S. Ct. 1410 (1996). The court relied on the provision in IGRA that the Secretary act only after a State is provided the opportunity to participate in negotiations and mediation.[2]

In our view, Congress had at least three purposes in enacting IGRA: to recognize and give a statutory structure for gaming as a means of promoting tribal economic development, self sufficiency and strong tribal government; to provide a basis for regulating Indian gaming to ensure that it is conducted fairly and that the Indian Tribe is the primary beneficiary of the activity; and finally, to afford an opportunity for States to participate in the establishment and conduct of Indian gaming through Tribal-State compacts, but also to make a Federal backstop available should a consensual Tribal-State compact not be reached. If the Secretary were unable to issue procedures to permit gaming when a State refused to submit to a Federal court the issue of whether it was bargaining in good faith, that State would effectively be awarded a veto over all Class III Indian gaming within its borders. Congress did not contemplate or authorize such a State veto in IGRA.

The proposed rules are faithful to Congress' intent that States be able to participate in the establishment and regulation of Class III gaming, through negotiation and mediation, and that Indian gaming will be protected from the influence of organized crime. Thus, contrary to the concern expressed by the Ninth Circuit, the approach of the proposed regulations is not to undermine congressional intent; instead, the regulations provide the tools necessary to fulfill congressional intent in the wake of *Seminole*.[3]

Faced with the "problem of defining the bounds of its regulatory authority, an agency may appropriately look to the * * * underlying policies of its statutory grants of authority." *United States* v. *Riverside Bayview Homes, Inc.*, 474 U.S. 121, 132 (1985). In this case, IGRA's underlying policies strongly support the issuance of the proposed rule. In addition, it is a well-settled principle of Indian law that Indian affairs statutes be construed where possible to benefit Tribes, not in a way that results in the backhanded deprivation of tribal rights. *Bryan* v. *Itasca County*, 426 U.S. 373, 379 (1976); C. Wilkinson, *American Indians, Time, and the Law* 46–52 (1987). For these reasons, the Secretary concludes that he has the authority to prescribe the following rule.

The Department invites comment on the legal analysis set forth above and in the other sections of this document.

Summary of the Proposed Rule

The proposed rule tracks IGRA's negotiation and mediation process, adjusted only to the extent necessary to reflect the unavailability of tribal access to Federal court where a State refuses to waive sovereign immunity. The proposed rule applies only where a Tribe asserts that a State is not negotiating in good faith, files suit against the State in Federal court in accordance with IGRA, but cannot proceed in Federal court because the State refuses to waive its sovereign immunity from suit. In cases in which a State chooses not to assert a sovereign immunity defense, these proposed rules would not apply. Instead, the negotiation and mediation process set forth in Section 2710(d)(7) of IGRA would continue under the supervision of the court.

In those cases in which a State interposes a sovereign immunity defense to a tribal lawsuit in Federal court, the proposed regulations establish a process for obtaining State participation in the compacting process, prior to the Secretary's identification of procedures. It is important to emphasize that, under the proposed rules, the Secretary will not adopt procedures in any specific situation unless he first determines that the State has failed to bargain in good faith. The Department expects that, in most cases, this will require addressing the applicable scope of gaming under State law and IGRA. Scope of gaming is discussed further below.

The steps set forth in the proposed rule include:

1. Following dismissal on grounds of sovereign immunity of a Tribe's suit brought pursuant to 25 U.S.C. 2710(d)(7) against a State, the Tribe would have the opportunity to submit a request to the Department to establish gaming procedures. The procedures submitted by the Tribe would be required to address all of the issues identified in the proposed rule, including the scope of the gaming activities being requested by the Tribe; the Tribe's position regarding whether the State has negotiated with the Tribe in good faith within the meaning of IGRA; and detailed mechanisms for regulation of the gaming, including assurances that games will be conducted fairly and that the financial integrity of the entire operation will be safeguarded. Because the good faith bargaining issue often turns on the question of the appropriate scope of gaming, the Tribe will be asked to provide a legal analysis

[2] The Supreme Court in *Seminole* did not resolve the Ninth and Eleventh Circuits' conflicting *dicta*, stating, "[w]e do not consider, and express no opinion upon, that portion of the position of the decision below that provides a substitute remedy for a Tribe bringing suit. *See* 11 F.3d 1016, 1029 (C.A. 11)(case below)." 116 S. Ct. at 1133 n.18.

[3] Twenty-two States filed joint comments on the ANPR indicating their "view that the Court in *Seminole* did not invalidate any portion of IGRA, but that it left the Act intact. The decision merely revitalized a jurisdictional defense of the States. If a State consents to suit in Federal court, then the complete remedial scheme envisioned by Congress can be played out." Comments of Florida, et al., at 8 (June 28, 1996). We agree that no part of the statute need be invalidated, or "severed" from the statute. We note that IGRA does, however, contain a severability provision, 25 U.S.C. 2721. *See generally Alaska Airlines* v. *Brock*, 480 U.S. 678, 686 (1987).

VOL 63 ISS 14 JA 22 1998 UMI

supporting the proposed scope of gaming in view of State prohibitions and other policies on specific types of gaming.

2. The Department would notify the Tribe within 15 days that it has received the proposal and whether it is complete. Within 30 days the Department will notify the Tribe whether it is eligible for procedures. The Department will not make a determination of the "good faith" issue at this point.

3. Following issuance of a notice of completeness and eligibility, the Department will notify the State of the Tribe's request for the issuance of procedures, and solicit the State's comments on the Tribe's proposed procedures, including any comments on the proposed scope of gaming. The State also will be asked to comment on the Tribe's statements regarding whether the State has negotiated in good faith within the meaning of IGRA, particularly on the scope of gaming issue. The State will also be invited to submit alternative proposed procedures. The State will have 60 days to respond.

4. Based on its review of the submissions of the Tribe and the State, the Department shall make a determination whether the State is negotiating in good faith with the Tribe. If the Department determines that the State is not negotiating in good faith, and the State has not submitted an alternative proposal, the Department will advise the State and Indian Tribe of: (a) its approval of the Tribe's proposal; (b) its rejection of the Tribe's proposal because of its failure to meet the substantive standards in the regulation, § 291.8; or (c) its convening of an informal conference with the State and Tribe within 30 days for the purpose of resolving any areas of disagreement.

5. Alternatively, if the State submits objections to the Indian Tribe's proposal *and* offers alternative proposed procedures, the Tribe must file objections to the State's proposal within 60 days. If the Tribe does not submit objections to the proposed procedures, the Secretary will adopt the State's proposed procedures unless they do not meet the substantive standards in the regulations, § 291.8.

6. If the Indian Tribe objects to the State's proposed procedures, the Secretary will appoint a mediator who will receive "last best offers" from the State and Tribe. The mediator must then submit to the Secretary the proposed procedures that best comport with applicable Federal and State law. Within 60 days of receipt of the mediator's recommendation, the Secretary must notify the State and Tribe of his decision to approve or disapprove the procedures submitted by the mediator, or prescribe such procedures as he determines appropriate that are consistent with State law and the provisions of IGRA.

The Johnson Act and IGRA's Criminal Provision

The Secretary has also considered the application of criminal prohibitions found in IGRA and the Johnson Act and has concluded that those prohibitions would not apply upon the adoption of "procedures" pursuant to these proposed regulations. The Johnson Act and section 23 of IGRA make most Class III gaming in Indian country illegal unless conducted pursuant to an approved compact that is "in effect."[4] In comments on the ANPR, some States argue that these criminal statutes are applicable unless there is a compact that: (1) has been voluntarily entered into by a State and an Indian Tribe, 25 U.S.C. 2710(d)(8)(A); and (2) is "in effect" within the meaning of IGRA by virtue of having been approved by the Secretary and published in the **Federal Register**. 25 U.S.C. 2710(d)(3)(B). See Comments of Arizona at 18–20; Comments of Florida at 10.

That reading of IGRA is inconsistent with the statute when read as a whole, and must therefore be rejected. The Supreme Court has long recognized that: "[i]t is a fundamental canon of statutory construction that the words of a statute must be read in their context and with a view to their place in the overall statutory scheme." *Davis* v. *Michigan Dept. of Treasury*, 489 U.S. 803, 809 (1989); *see also King* v. *St. Vincent's Hospital*, 502 U.S. 215, 221 n.10 (1991) ("in construing statute (sic) court should adopt sense of words which best harmonizes with context and promotes policy and objectives of legislature," paraphrasing *United States* v. *Hartwell*, 73 U.S. (6 Wall.) 385, 398 (1868)). Most importantly, statutes must be read to give effect to every provision. *Rake* v. *Wade*, 508 U.S. 464, 471 (1994).

The States' construction would render the section of IGRA authorizing the Secretary to establish "procedures" for Class III gaming meaningless, because thus woodenly read, no compact can be "in effect" absent a State's agreement to it. See 25 U.S.C. 2710(d)(3)(B) (compact entered into by Tribe and State "shall take effect only when notice of approval of such compact has been published by the Secretary in the **Federal Register**"). Thus, even if the Supreme Court had not decided *Seminole* as it did, under Florida and Arizona's reading of the statute, Class III gaming would remain unlawful even if procedures were set in place by the Secretary after completion of the judicially-supervised mediation process.

Put another way, if the statute is read with such extreme literalness it has a technical flaw. It provides for Secretarial procedures in the event that States and Indian Tribes cannot agree to a compact. If they can agree, such a compact becomes "in effect" upon approval by Secretary. 25 U.S.C. 2710(d)(3)(B). Where a State does not assert immunity from suit and procedures ultimately are adopted by the Secretary without State consent, IGRA does not call this a compact "in effect." Compare 25 U.S.C. 2710(d)(7)(B)(vii), with 25 U.S.C. 2710(d)(3)(B). Yet there is nothing else in the statute or its legislative history that even hints that the Johnson Act or § 23 of IGRA would criminalize Class III Indian gaming in such circumstances. If Florida and Arizona's construction were accepted, it would negate the entire part of IGRA that calls for mediation and Secretarial procedures.

To avoid such an absurd result, the statute must be read to mean that all Secretarial-sanctioned gaming is exempt from the provisions of the Johnson Act and section 23 of IGRA. The "procedures" adopted by the Secretary—whether pursuant to the judicially-supervised mode prescribed by IGRA or pursuant to this rulemaking—are properly viewed as a full substitute for the compact that would be "in effect" if a voluntary agreement had been reached, and thus qualify for the exemption to the criminal prohibitions on gaming.

Scope of Gaming

The most frequently contested issue among Tribes and States relates to the "scope of gaming" permitted under State law, for this is important in determining whether particular games are properly the subject of negotiation between a Tribe and a State. In the context of this proposed rulemaking, the issue bears directly upon whether a State is bargaining in good faith with a Tribe and whether a Tribe's requested procedures include games lawful under IGRA. 25 U.S.C. 2710(d)(1)(B). In evaluating the permissible "scope of gaming" under the various States' laws, the Department will apply the interpretation set forth as the position of the United States on the scope of gaming issue in its *amicus curiae* brief in the Supreme Court in *Rumsey Indian Rancheria of Wintun Indians* v. *Wilson*, 64 F.3d 1250 (9th Cir. 1995), *as modified on denial of petition for rehearing*, 99 F.3d 321 (9th Cir. 1996), *cert. denied, sub nom. Sycuan Band of Mission Indians* v. *Wilson*, No. 96–1059, 65 U.S.L.W. 3855 (June 24, 1997). Copies of the brief are available to any reviewer upon request.

As a threshold matter, the Secretary would disapprove proposals when "contemplated gaming activities are not permitted in the State for any purpose by any person, organization, or entity." Proposed 25 CFR § 291.8(b)(3), *infra*. This conclusion is based on 25 U.S.C. 2710(d)(1)(B), which states that "Class III gaming activities shall be lawful on Indian lands only if such activities are * * * located in a State that permits such gaming for any purpose by any person, organization or entity." IGRA thus makes it unlawful for Tribes to operate particular Class III games that State law completely and affirmatively prohibits. Courts have determined that a State therefore has no duty to negotiate with respect to such games. *See Rumsey Indian Rancheria, supra*. In other words, if a State prohibits an entire class of traditional games, it need not negotiate over the particular games within that category. Consequently, such gaming would not be permitted under Secretarial procedures.

Our interpretation of the scope of gaming issues is adopted from the United States' amicus brief filed in the Supreme Court in *Rumsey Indian Rancheria, supra:*

> In some circumstances, a question may arise concerning whether a State law prohibits a distinct form of gaming or instead regulates the manner in which a permitted form of gaming may be played. Several hypothetical examples may illustrate the point. If State law prohibits five-card stud poker but permits seven-card draw poker (or prohibits parimutuel wagering on dog racing, but not on horse racing), a question could arise as to whether that State law prohibits a distinct form of gaming known as "five card stud poker" ("or dog racing"), or instead regulates the manner in which the permitted form of gaming known as "poker" ("or animal racing") may be conducted. If characterized in the former way, the State would have to negotiate concerning only seven-card draw poker (or horse racing); if characterized in the latter way, the State would have to negotiate over all poker games (or all animal racing). The relevant question in such a case would be whether, in light of traditional understandings and the text and legislative history of IGRA, the State has reasonably characterized the relevant State laws as completely prohibiting a distinct form of gaming. If the State has not reasonably so characterized its laws, it would have a duty to negotiate with respect to the gaming.
>
> United States' Brief at 15.

It is impractical for the Department to attempt to evaluate, in advance of a tribal request, the permissible scope of gaming in each State. For that reason the proposed rule requires a Tribe to submit its own analysis along with its request for Secretarial procedures, and goes on to invite the views and active participation of the affected State with respect to the applicable scope of gaming under any Secretarial procedures.

Monitoring

Many voluntarily negotiated compacts include a monitoring role for the affected State. In these compacts States often assist in background checks on key casino personnel, and/or monitor tribal financial statements. Tribes may make certain financial information available to States to ensure that applicable regulatory requirements have been satisfied. Because of the importance of this monitoring function, the proposed regulations invite State participation in the promulgation of Secretarial procedures, notwithstanding a State's assertion of immunity from suit. If a State declines to participate in such an activity, the Department believes steps ought to be taken to ensure that independent monitoring and enforcement exists. The proposed rule requires that the Tribe provide in its procedures for monitoring and enforcement by an independent and autonomous tribal regulatory commission. Further, the Department seeks comments on whether the NIGC or some other entity should perform monitoring and enforcement functions, and, if so, who should bear the cost of such functions.

Publication of this proposed rule by the Department provides the public an opportunity to participate in the rulemaking process. Interested persons may submit written comments to the location identified in the **ADDRESSES** section of this proposed rule.

Executive Order 12988

The Department has certified to the Office of Management and Budget (OMB) that these proposed regulations meet the applicable standards provided in Sections (3)(a) and 3(b)(2) of Executive Order 12988.

Executive Order 12866

This is a significant rule under Executive Order 12866 and has been reviewed by OMB.

Regulatory Flexibility Act

We do not believe that this proposed rule will have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq*. The Regulatory Flexibility Act of 1980 requires preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions. At this time, we do not know whether any Secretarial procedures, authorized by this proposed rule, will need to be adopted. We also do not know whether the adoption of procedures in a given case will have a significant impact on small entities as defined by the Act. If procedures are proposed pursuant to this rule, States (and through the States, local jurisdictions and small entities) will be permitted to comment on a given proposal, and any concerns may be taken into account in Secretarial procedures.

It is our preliminary view that Indian tribes are not small entities within the meaning of the Regulatory Flexibility Act. The statutory definition specifically enumerates several kinds of governmental entities, but does not include Indian tribes. 5 U.S.C. 601(5). This indicates that tribes should not be considered small entities. We invite comment on this issue.

Executive Order 12630

The Department has determined that this proposed rule does not have significant "takings" implications. The proposed rule does not pertain to "taking" of private property interests, nor does it impact private property.

Executive Order 12612

The Department has determined that this proposed rule does not have significant Federalism effects.

As explained above, the Secretary has determined that he has the statutory authority to adopt procedures to permit Indian gaming in appropriate circumstances. Secretarial authority was expressly provided in IGRA with respect to the judicially-supervised mediation scheme. It would be exercised under the proposed rules in a manner consistent with the statutory directive and congressional intent. The proposed rule provides the opportunity for States to voluntarily participate in a mediation process under the auspices of the Secretary of the Interior. As the Supreme Court noted in *Seminole*, Congress may, under the Constitution, choose to withhold from States any authority over Indian gaming. Because under the proposed rules the Secretary would be tracking the scheme set forth by Congress, and because the proposed rule would afford the States as much

[4] The Johnson Act makes it "unlawful to manufacture, recondition, repair, sell, transport, possess, or use any gambling device * * * within Indian country as defined in 1151 of Title 18[.]" 15 U.S.C. 1175. It does not apply when there is a Tribal-State compact "in effect." 25 U.S.C. 2710(d)(6). Section 23 of IGRA provides that:

> (a) Subject to subsection (c), for purposes of Federal law, all State laws pertaining to the licensing, regulation, or prohibition of gambling, including but not limited to criminal sanctions applicable thereto, shall apply in Indian country in the same manner and to the same extent as such laws apply elsewhere in the State.

opportunity to participate as where it does not claim immunity from suit, we believe the proposed rule has no significant Federalism effects.

NEPA Statement

The Department has determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required pursuant to the National Environmental Policy Act of 1969.

Paperwork Reduction Act of 1995

Sections 291.4, 291.10, 291.12, and 291.15 contain information collection requirements. As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), the Department has submitted a copy of these sections to the Office of Management and Budget (OMB) for its review.

Collection of Information: When a Tribe and State do not successfully negotiate a Tribal-State compact, the Tribe will be required to collect information to document the negotiation process, and prepare proposed procedures for submission to the Secretary. The information requested will be unique for each Tribe and may be changed when necessary to fit the needs of the Tribe.

All information is to be collected upon the submission of a request by a Tribe for Class III gaming procedures. The annual reporting and record keeping burden for the collection of information is estimated to average 1,000 hours for each response and we estimate there will be approximately 25 respondents. The collection will include time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information. The total annual burden is estimated to be 25,000 hours.

Organizations and individuals desiring to submit comments on the information collection requirement should direct them to the Office of Information and Regulatory Affairs, OMB, Room 10202, New Executive Office Building, Washington, DC 20503, Attn: Desk Officer for the Department of the Interior.

The Department considers comments by the public on this proposed collection of information in:

Evaluating whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility;

Evaluating the accuracy of the Department's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

Enhancing the quality, usefulness, and clarity of the information to be collected; and

Minimizing the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other collection techniques or other forms of information technology.

OMB is required to make a decision between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment to the OMB is best assured of having its full effect if OMB receives it within 30 days of publication. This does not affect the deadline for the public to comment to the BIA on the proposed regulations.

Unfunded Mandates Act of 1995

This regulation imposes no unfunded mandates on any governmental or private entity and is in compliance with the provisions of the Unfunded Mandates Act of 1995.

Drafting Information

The primary author of this proposed rule is George Skibine, Acting Deputy Associate Solicitor, Division of Indian Affairs, Office of the Solicitor.

List of Subjects in 25 CFR Part 291

Indians—Gaming.

For the reasons given in the preamble, the Department of the Interior proposes to establish a new Part 291 of Title 25, Chapter 1 of the Code of Federal Regulations as set forth below.

PART 291—CLASS III GAMING PROCEDURES

Sec.

291.1 Purpose and scope.
291.2 Definitions.
291.3 When may an Indian Tribe ask the Secretary to issue Class III gaming procedures?
291.4 What must a proposal requesting Class III gaming procedures contain?
291.5 Where must the proposal requesting Class III gaming procedures be filed?
291.6 What must the Secretary do upon receiving a proposal?
291.7 What must the Secretary do if it has been determined that the Indian Tribe is eligible to request Class III gaming procedures?
291.8 What must the Secretary do at the expiration of the 60-day comment period if the State has not submitted an alternative proposal?
291.9 What must the Secretary do at the end of the 60-day comment period if the State offers an alternative proposal for Class III gaming procedures?
291.10 What must the Indian Tribe do when it receives the State's alternative proposal Class III gaming procedures?
291.11 What must the Secretary do if the Indian Tribe files timely objections to the State's alternative proposal?
291.12 What is the role of the mediator appointed by the Secretary?
291.13 What must the Secretary do upon receiving the proposal selected by the mediator?
291.14 When do Class III gaming procedures for an Indian Tribe become effective?
291.15 How can Class III gaming procedures issued by the Secretary be amended?

Authority: 5 U.S.C. 301; 25 U.S.C. 2,9, 2710.

§ 291.1 Purpose and scope.

The regulations in this part establish procedures that the Secretary of the Interior will use to promulgate rules for the conduct of Class III Indian gaming when:

(a) A State and an Indian Tribe are unable voluntarily to agree to a compact; and

(b) The State has asserted its immunity from suit brought by an Indian Tribe under 25 U.S.C. 2710(d)(7)(B).

§ 291.2 Definitions.

All terms have the same meaning as set forth in the definitional section of IGRA, 25 U.S.C. 2703(1)–(10).

§ 291.3 When may an Indian Tribe ask the Secretary to issue Class III gaming procedures?

An Indian Tribe may ask the Secretary to issue Class III gaming procedures when the following steps have taken place:

(a) The Indian Tribe submitted a written request to the State to enter into negotiations to establish a Tribal-State compact governing the conduct of Class III gaming activities;

(b) The State and the Indian Tribe failed to negotiate a compact 180 days after the State received the Indian Tribe's request;

(c) The Indian Tribe initiated a cause of action in Federal district court against the State alleging that the State did not respond, or did not respond in good faith, to the request of the Indian Tribe to negotiate such a compact;

(d) The State raised an Eleventh Amendment defense to the tribal action; and

(e) The Federal district court dismissed the action because of lack of jurisdiction due to the State's sovereign immunity under the Eleventh Amendment.

§ 291.4 What must a proposal requesting Class III gaming procedures contain?

A proposal requesting Class III gaming procedures must include the following information:

(a) The full name, address, and telephone number of the Indian Tribe submitting the proposal;

(b) A copy of the authorizing resolution from the Indian Tribe submitting the proposal;

(c) A copy of the Indian Tribe's gaming ordinance or resolution approved by the NIGC in accordance with 25 U.S.C. 2710;

(d) A copy of the Indian Tribe's organic documents;

(e) A copy of the Indian Tribe's written request to the State to enter into compact negotiations, along with the Indian Tribe's proposed compact, if any;

(f) A copy of the State's response to the tribal request and/or proposed compact, if any;

(g) A copy of court proceedings in the litigation with the State in Federal district court on compact negotiations, including a copy of the order dismissing the lawsuit;

(h) The Indian Tribe's factual and legal authority for the scope of gaming specified in paragraph (j)(13) of this section;

(i) A regulatory scheme for Federal (or State, if any) oversight role in monitoring and enforcing compliance; and

(j) Proposed procedures under which the Indian Tribe will conduct Class III gaming activities, including:

(1) An accounting system maintained in accordance with American Institute of Certified Public Accountants (AICPA) Standards for Audits of Casinos, including maintenance of books and records in accordance with Generally Accepted Accounting Principles (GAAP), and any applicable NIGC regulations;

(2) A reporting system for the payment of taxes and fees in a timely manner and in compliance with Internal Revenue Code and Bank Secrecy Act requirements;

(3) Preparation of financial statements covering all financial activities of the Indian Tribe's gaming operations;

(4) Internal control standards designed to ensure fiscal integrity of gaming operations;

(5) Provisions for records retention, maintenance, and accessibility;

(6) Conduct of games, including patron requirements, posting of game rules, and hours of operation;

(7) Procedures to protect the integrity of the rules for playing games;

(8) Rules governing employees of the gaming operation, including code of conduct, age requirements, conflict of interest provisions, licensing requirements, and background investigations of all management officials and key employees, vendors, lessors, or suppliers of gaming materials, equipment or supplies of any kind in excess of $5,000 per year, that comply with IGRA requirements, NIGC regulations, and applicable tribal gaming laws;

(9) Policies and procedures that protect the health and safety of patrons and employees and that address insurance and liability issues, as well as safety systems for fire and emergency services at all gaming locations;

(10) Surveillance procedures and security personnel and systems capable of monitoring all gaming activities, including the conduct of games, cashiers' cages, change booths, count rooms, movement of cash and chips, entrances and exits of gaming facilities, and other critical areas of any gaming facility;

(11) An administrative process to resolve disputes between the gaming establishment and employees or patrons, including a process to protect the rights of individuals injured on gaming premises by reason of negligence in the operation of the facility;

(12) Hearing procedures for licensing purposes;

(13) A list of gaming activities proposed to be offered by the Indian Tribe at its gaming facilities;

(14) A description of the location of proposed gaming facilities;

(15) A copy of the Indian Tribe's liquor ordinance approved by the Secretary, if any;

(16) Provisions for an autonomous tribal regulatory gaming commission, independent of gaming management;

(17) Provisions for enforcement and investigatory mechanisms, including the imposition of sanctions, monetary penalties, closure, and an administrative appeal process relating to enforcement and investigatory actions; and

(18) Any other provisions deemed necessary by the Indian Tribe.

§ 291.5 Where must the proposal requesting Class III gaming procedures be filed?

Any proposal requesting Class III gaming procedures must be filed with the Director, Indian Gaming Management Staff, Bureau of Indian Affairs, U.S. Department of the Interior, MS 2070–MIB, 1849 C Street, NW, Washington, DC 20240.

§ 291.6 What must the Secretary do upon receiving a proposal?

Upon receipt of a proposal requesting Class III gaming procedures, the Secretary must:

(a) Within 15 days, notify the Indian Tribe in writing that the proposal has been received, and whether the proposal meets the requirements of § 291.4; and

(b) Within 30 days of receiving a complete proposal, notify the Indian Tribe in writing whether the Indian Tribe meets the eligibility requirements in § 291.3. The Secretary's eligibility determination is final for the Department.

§ 291.7 What must the Secretary do if it has been determined that the Indian Tribe is eligible to request Class III gaming procedures?

(a) If the Secretary determines that the Indian Tribe is eligible to request Class III gaming procedures and that the Indian Tribe's proposal is complete, the Secretary must submit the Indian Tribe's proposal to the Governor and the Attorney General of the State where the gaming is proposed.

(b) The Governor and Attorney General will have 60 days to comment on:

(1) Whether the State is in agreement with the Indian Tribe's proposal;

(2) Whether the State believes it has negotiated in good faith with the Indian Tribe under 25 U.S.C. 2710(d)(3)(A);

(3) Whether the proposal is consistent with relevant provisions of the laws of the State; and

(4) Whether contemplated gaming activities are permitted in the State for any purposes, by any person, organization, or entity.

(c) The Secretary will also invite the State's Governor and Attorney General to submit an alternative proposal to the Indian Tribe's proposed Class III gaming procedures.

§ 291.8 What must the Secretary do at the expiration of the 60-day comment period if the State has not submitted an alternative proposal?

(a) Upon expiration of the 60-day comment period specified in § 291.7, if the State has not submitted an alternative proposal, the Secretary must review the Indian Tribe's proposal to determine:

(1) Whether all requirements of § 291.4 are adequately addressed;

(2) Whether Class III gaming activities will be conducted on Indian lands over which the Indian Tribe has jurisdiction;

(3) Whether contemplated gaming activities are permitted in the State for any purposes by any person, organization, or entity;

VOL 63 ISS 14 JA 22 1998 UMI

(4) Whether the proposal is consistent with relevant provisions of the laws of the State;

(5) Whether the proposal is consistent with the trust obligations of the United States to the Indian Tribe;

(6) Whether the proposal is consistent with all applicable provisions of the IGRA;

(7) Whether the proposal is consistent with provisions of other applicable Federal laws; and

(8) Whether the State has negotiated in good faith.

(b) Within 60 days of the expiration of the 60-day comment period in § 291.7, the Secretary must notify the Indian Tribe, the Governor, and the Attorney General of the State in writing that he/she has:

(1) Approved the proposal if the Secretary determines that there are no objections to the Indian Tribe's proposal;

(2) Disapproved the proposal if it does not meet the standards in paragraph (a) of this section; or

(3) Identified unresolved issues and areas of disagreements in the proposal, and that the Indian Tribe, the Governor, and the Attorney General are invited to participate in an informal conference to resolve identified unresolved issues and areas of disagreement.

(c) Within 30 days of the informal conference, the Secretary must prepare and mail to the Indian Tribe, the Governor, and the Attorney General:

(1) A written report that summarizes the results of the informal conference; and

(2) A final decision either setting forth the Secretary's proposed Class III gaming procedures for the Indian Tribe, or disapproving the proposal for any of the reasons in paragraph (a) of this section.

§ 291.9 What must the Secretary do at the end of the 60-day comment period if the State offers an alternative proposal for Class III gaming procedures?

Within 7 days of receiving the State's alternative proposal, the Secretary must submit the State's alternative proposal to the Indian Tribe for a 60-day comment period.

§ 291.10 What must the Indian Tribe do when it receives the State's alternative proposal for Class III gaming procedures?

(a) If the Indian Tribe objects to the State's alternative proposal, it may, within 60 days of receiving the alternative proposal, notify the Secretary in writing of its objections.

(b) If the Indian Tribe does not file written objections within 60 days of receiving of the State's alternative proposal, the Secretary must, within 60 days of the expiration of the Indian Tribe's comment period in § 291.9, notify the Indian Tribe, the Governor, and the Attorney General, in writing of his/her decision to either:

(1) Approve the State's alternative proposal for Class III gaming procedures; or

(2) Disapprove the State's alternative proposal for any of the reasons in § 291.13(b).

§ 291.11 What must the Secretary do if the Indian Tribe files timely objections to the State's alternative proposal?

If the Indian Tribe files timely objections to the State's alternative proposal, the Secretary must appoint a mediator who must convene a process to resolve differences between the two proposals.

§ 291.12 What is the role of the mediator appointed by the Secretary?

(a) The mediator must ask the Indian Tribe and the State to submit their last best proposal for Class III gaming procedures.

(b) After giving the Indian Tribe and the State an opportunity to be heard and present information supporting their respective positions, the mediator must select from the two proposals the one that best comports with the terms of the IGRA and any other applicable Federal law. The mediator must submit the proposal selected to the Indian Tribe, the State, and the Secretary.

§ 291.13 What must the Secretary do upon receiving the proposal selected by the mediator?

Within 60 days of receiving the proposal selected by the mediator, the Secretary must do one of the following:

(a) Notify the Indian Tribe, the Governor and the Attorney General in writing of his/her decision to approve the proposal for Class III gaming procedures selected by the mediator.

(b) Notify the Indian Tribe, the Governor and the Attorney General in writing of his/her decision to disapprove the proposal selected by the mediator for any of the following reasons:

(1) The requirements of § 291.4 are not adequately addressed;

(2) Gaming activities would not be conducted on Indian lands over which the Indian Tribe has jurisdiction;

(3) Contemplated gaming activities are not permitted in the State for any purpose by any person, organization, or entity;

(4) The proposal is not consistent with relevant provisions of the laws of the State;

(5) The proposal is not consistent with the trust obligations of the United States to the Indian Tribe;

(6) The proposal is not consistent with applicable provisions of the IGRA; or

(7) The proposal is not consistent with provisions of other applicable Federal laws.

(c) If the Secretary rejects the mediator's proposal under paragraph (b) of this section, he may prescribe appropriate procedures under which Class III gaming may take place consistent with the mediator's selected compact, the provisions of IGRA and the relevant provisions of the laws of the State.

§ 291.14 When do Class III gaming procedures for an Indian Tribe become effective?

Upon approval of Class III gaming procedures for the Indian Tribe under either § 291.8(b), § 291.8(c), § 291.10(b)(1), or § 291.13(a), the Indian Tribe shall have 90 days in which to approve and execute the Secretarial procedures and forward its approval and execution to the Secretary, who will publish notice of their approval in the **Federal Register**. The procedures take effect upon their publication in the **Federal Register**.

§ 291.15 How can Class III gaming procedures approved by the Secretary be amended?

An Indian Tribe may ask the Secretary to amend approved Class III gaming procedures by submitting an amendment proposal to the Secretary. The Secretary must review the proposal by following the approval process for initial tribal proposals, except that he/she may waive the requirements of § 291.4 to the extent they do not apply to the amendment request.

Dated: December 8, 1997.

Kevin Gover,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–02–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–110965–97]

RIN 1545–AV47

Obligations of States and Political Subdivisions

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Partial withdrawal of notice of proposed rulemaking; notice of proposed rulemaking by cross-reference to temporary regulations; and notice of public hearing.

SUMMARY: This document withdraws portions of the notice of proposed rulemaking published in the **Federal Register** (59 FR 67658) on December 30, 1994. In the Rules and Regulations section of this issue of the **Federal Register**, the IRS is issuing temporary regulations that provide guidance to state and local governments that issue bonds for output facilities and to certain nongovernmental persons that are engaged in the local furnishing of electric energy or gas using facilities financed with state or local bonds. These proposed regulations reflect changes made by the Tax Reform Act of 1986 and the Small Business Job Protection Act of 1996. The text of those temporary regulations also serves as the text of these proposed regulations. This document provides a notice of public hearing on these proposed regulations.

DATES: Written comments must be received by April 22, 1998. Outlines of topics to be discussed at the public hearing scheduled for April 28, 1998, at 10:00 a.m. must be received by April 7, 1998.

ADDRESSES: Send Submissions to: CC:DOM:CORP:R (REG–110965–97), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:R (REG–110965–97), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW, Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.ustreas.gov/prod/tax_regs/comments.html. The public hearing will be held in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Allan B. Seller, 202–622–3980; concerning submissions and the hearing, Michael L. Slaughter, Jr., 202–622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

Proposed regulations §§ 1.141–7 and 1.141–8, published on December 30, 1994 (59 FR 67658) addressed the application of the private activity bond tests of section 141(b)(2) to output contract for output facilities and the application of the $15 million limitation on output facility financings of section 141(b)(4). These proposed sections are withdrawn. These sections were issued as part of proposed regulations under §§ 1.141–0 through 1.141–16, Definition of Private Activity Bonds, which were finalized in part in TD 8712 published in the **Federal Register** on January 16, 1997.

Sections 1.141–7T, 1.141–8T, 1.141–15T, 1.142(f)(4)–1T, and 1.150–5T published in the Rules and Regulations portion of this issue of the **Federal Register** are issued to provide guidance on certain aspects of the private activity bond restrictions under section 141 of the Internal Revenue Code.

The text of those temporary regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the temporary regulations.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that these regulations do not have a significant impact on a substantial number of small entities. This certification is based upon the fact that in the years 1987 through 1993 a total of 61 different state or local government issuers of exempt facility bonds issued under section 142(f) for the local furnishing of electric energy or gas filed information returns with the Internal Revenue Service under section 149(e). Further, an election under section 142(f)(4) is in no event required to be filed with the Internal Revenue Service more than once by a person engaged in the local furnishing of electric energy or gas. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. Chapter 6) is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (a signed original and eight (8) copies) to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for April 28, 1998, at 10:00 a.m. in the Auditorium, Internal Revenue Building, 1111 Constitution Avenue, NW, Washington, DC. Because of access restrictions, visitors will not be admitted beyond the lobby more than 15 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing.

Persons that wish to present oral comments at the hearing must submit written comments by April 22, 1998 and submit an outline of the topics to be discussed and the time to be devoted to each topic by April 7, 1998.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these regulations are Michael G. Bailey and Allan Seller, Office of the Assistant Chief Counsel (Financial Institutions and Products), and Nancy M. Lashnits, formerly of that office. However, other personnel from the IRS and Treasury Department participated in their development.

Partial Withdrawal of Notice of Proposed Rulemaking

Under the authority of 26 U.S.C. 7805, §§ 1.141–7 and 1.141–8 in the notice of proposed rulemaking that was published on December 30, 1994 (59 FR 67658) are withdrawn.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read as follows:

AUTHORITY: 26 U.S.C. 7805 * * *

Par. 2. Section 1.141–7 is added to read as follows:

§ 1.141–7 Special rules for output facilities.

[The text of this proposed section is the same as the text of §§ 1.141–7T

VOL
63
ISS
14
JA
22
1998
UMI

published elsewhere in this issue of the **Federal Register**.]

Par. 3. Section 1.141–8 is amended by adding the text of the section to read as follows:

§ 1.141–8 $15 million limitation for output facilities.

[The text of this proposed section is the same as the text of § 1.141–8T published elsewhere in this issue of the **Federal Register**.]

Par. 4. Section 1.141–15 is amended by adding paragraphs (f) through (i) to read as follows:

§ 1.141–15 Effective dates.

* * * * *

(f) through (i) [The text of proposed paragraphs (f) through (i) are the same as the text of § 1.141–15T(f) through (i) published elsewhere in this issue of the **Federal Register**.]

Par. 5. Section 1.142(f)(4)–1 is added to read as follows:

§ 1.142(f)(4)–1 Manner of making election to terminate tax-exempt bond financing.

[The text of this proposed section is the same as the text of § 1.142(f)(4)–1T published elsewhere in this issue of the **Federal Register**.]

Par. 6. Section 1.150–5 is added to read as follows:

§ 1.150–5 Filing notices and elections.

[The text of this proposed section is the same as the text of § 1.150–5T published elsewhere in this issue of the **Federal Register**.]

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 14

RIN 1018–AE08

Importation, Exportation, and Transportation of Wildlife

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule would revise the U.S. Fish and Wildlife Service (Service) regulations providing for user fee collections from commercial importers and exporters of wildlife and wildlife products. We, the Service, propose a licensing and fee scheme which will exempt certain commercial importers and exporters from our inspection fee, based upon specific criteria, including country of origin, numbers of items, and permitting requirements. We propose to modify our user fee regulations to grant relief to certain individuals and small businesses, meeting the outlined criteria, from the designated port inspection fee and nondesignated port administrative fee and hourly minimums only. This proposal, if implemented, will allow us to continue to collect data on fee collections in order to analyze the impact of user fees on small business for future decision making.

We will also update the authority citation for this part to delete an obsolete reference and to reflect the current United States Code citation regarding fees and charges for Government services.

DATES: Comments must be submitted on or before March 23, 1998.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Director, U.S. Fish and Wildlife Service, P.O. Box 3247, Arlington, Virginia 22203–3247. Comments and materials may be hand-delivered to the U.S. Fish and Wildlife Service, Division of Law Enforcement, 4401 N. Fairfax Drive, Room 500, Arlington, Virginia, between the hours of 8 a.m. and 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Kevin R. Adams, Chief, Division of Law Enforcement, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, Telephone Number (703) 358–1949.

SUPPLEMENTARY INFORMATION:

Background

On June 21, 1996, we published a final rule (61 FR 31850) which established a new requirement in Part 14 for all commercial importers and exporters of wildlife and wildlife products to obtain an Import/Export License (license) and also provided for our charging license holders increased inspection and overtime fees. The final rule eliminated the $25,000 annual dollar value exemption the Service had utilized since 1984 in determining whether a particular business or individual was required to have a license. The final rule raised the inspection fees charged to licensees to enable the Service to more fully recoup the costs of operating the wildlife inspection program. We published the June 21, 1996, final rule after several lengthy comment periods which began with the notice of intent to review published on November 14, 1991 (56 FR 57873). Of the 800 total comments received, 81 were on the new fee structure discussed in the notice of intent, the proposed rule published November 15, 1994 (59 FR 58811), and the supplemental proposed rule published March 23, 1995 (60 FR 15277). We received 64 favorable comments on the fee increase out of 81 total with 17 commenters opposed to a user fee increase. Several of the 17 commenters opposed to the fee increase requested that we maintain a dollar value exemption for small businesses. We acknowledged these commenters' concerns and expressed our own concern for the new fee structure being perceived as overly burdensome on small business, and replied, as restated in this proposed rule, that we are attempting to maintain the most efficient inspection program possible without being overly burdensome on smaller importers. We were attempting to implement the smallest fee increase possible which would allow us to recoup the cost of the wildlife inspection program. At the same time we were attempting to respond to several studies of the Service's inspection program that clearly indicate a need to raise inspection fees and overtime rates commensurate with costs incurred by the Service. In addition to the studies cited in the June 21, 1996, final rule, a 1994 General Accounting Office report states in its recommendations to the Secretary of the Interior, that the Service should "Proceed with plans to increase the user fees charged by the wildlife inspection program * * *."

Since the implementation of the new fee schedule on August 1, 1996, we have received comments, including eight Congressional inquiries, indicating that the burden on small business may be greater than the Service initially anticipated in the June 21, 1996, rulemaking. In the economic effects section of that document, we estimated the costs to newly licensed small businesses and individuals who are now subject to the inspection fee requirement. In the analysis we used estimated numbers extrapolated from 1994 data contained in the Law Enforcement Management Information System (LEMIS) which represented the best information available. Based upon comments received subsequent to publication of the final rule, we believe that we may have underestimated the cumulative effect that the increased licensing and inspection fees may impose on small business and certain individuals. We have determined that we may need better data upon which to rely in making a definitive analysis of the effect of user fee increases on small business. The proposed system will continue to provide that data.

The Regulatory Flexibility Act of 1980 establishes as a principle of regulatory issuance that "* * * agencies shall endeavor, consistent with the objectives of the rule and of applicable statutes, to fit regulatory and informational requirements to the scale of the business, organizations, and governmental jurisdictions subject to regulation." Therefore, in order to address the immediate concerns of small business and maintain consistency with the Regulatory Flexibility Act, we propose a new licensing and inspection fee system that will accomplish two objectives. First, the new system contained in this proposed rule would grant immediate relief from the economic burden of the increased inspection fees, and/or administrative fees and hourly minimums, to importers and exporters of wildlife and wildlife products at designated ports, border or special ports, and nondesignated ports that meet specific criteria.

Second, by continuing to require that all commercial importers and exporters be licensed, the new system would allow the Service to continue to monitor wildlife import/export activity in order to gather the data necessary to make future decisions on the true impact of our user fees on small businesses and certain individuals.

Inspection Fee Exemption Criteria

We propose to amend the inspection fee system to establish specific criteria that we will use to determine if the inspection fee applies at the time of import or export. The proposed revision uses distinctions that are already established in the regulation. The Service currently uses these distinctions to determine the applicability of various parts of the regulation to wildlife being imported or exported. We propose to use these same distinctions to establish if the inspection fee applies to wildlife shipments at the time of import to or export from the United States.

Shipments will have to meet several basic criteria in order to qualify for the inspection fee exemption. The basic exemption criteria are outlined as follows: First, the inspection fee exemption will only apply to shipments that do NOT require permits under 50 CFR parts 16 (Injurious wildlife), 17 (Endangered and threatened wildlife and plants), 18 (Marine mammals), 21 (Migratory bird permits), or 23 (Endangered species convention). Those shipments that contain wildlife that require permits will not be eligible for any inspection fee exemption. Second, the wildlife must have been lawfully taken from the wild in the United States, Canada, or Mexico, and imported or exported between the United States and Canada or Mexico. Shipments containing wildlife taken in any other country and imported or exported between any countries other than the United States, Canada, or Mexico will not be eligible for the inspection fee exemption. Third, the wildlife shipment must be imported or exported by the person who took the wildlife from the wild, or by a member of that person's immediate family, provided, that the importer or exporter of record is licensed in accordance with 50 CFR 14.91. Last, the shipment must consist of raw fur, raw, salted, or crusted hides or skins, or separate parts thereof, and the shipment cannot exceed 100 raw furs, raw, salted, crusted, hides or skins or separate parts thereof. The intent of this rulemaking is to provide financial relief from the burden of the inspection fees for small business and certain individuals who may be disproportionately affected. The Service believes that a cutoff point of 100 raw furs, raw, salted, or crusted hides or skins, or separate parts thereof will adequately distinguish between small shippers disproportionately affected and those commercial wildlife dealers less impacted by the user fee.

All of the primary criteria for the user fee exemption outlined above serve as a means of limiting the exemption application to certain individuals or small business, while at the same time maintaining the integrity and intent of the user fee rulemaking published on June 21, 1996. By using distinctions already drawn in the regulation, we believe that the proposed criteria represent a balance between maintaining user fee revenues and providing small business economic relief.

In addition to the primary criteria, the Service will use additional criteria, outlined below, to ensure that the user fee exemption is utilized by those intended and to allow for statistical tracking of the exemption's use. As stated, the importer or exporter of record who is shipping wildlife that otherwise meets the inspection fee exemption criteria will still have to obtain an Import/Export License from the Service at a cost of $50 annually (see 50 CFR part 14, subpart I). The raw fur, raw, salted or crusted hides or skins, or separate parts thereof cannot have been previously bought or sold if the inspection fee exemption is to apply. The fee exemption will not apply to manufactured products or live animals of any kind.

The reason for the latter two criteria is that the fee exemption is intended to apply to small, low volume businesses engaged in wildlife trade on a small scale where there is relatively low cash flow, or to individuals who take wildlife from the wild as a hobby or to supplement their income and who do not deal in manufactured products or live animals as a primary means of income. We believe that wildlife traders buying and selling imported wildlife in the United States and those dealing in manufactured products or live animals require a higher level of oversight and are less impacted by the inspection fee.

The importer or exporter whose wildlife shipments meet the user fee exemption criteria will still be required to pay overtime fees or designated port exception permit fees if applicable. If wildlife being shipped requires a Convention on International Trade in Endangered Species (CITES) permit, no exemption from the user fee will be granted due to the higher level of oversight required by the Service on these shipments.

Certification

In order for the Service to have some means of verifying that the raw furs, raw, salted or crusted hides or skins, or separate parts thereof are, in fact, taken from the wild by the licensee who is acting as importer/exporter of record, or taken from the wild by a member of his or her immediate family, the licensee must sign a certification statement supplied by the Service at the time clearance is requested. The certification statement will ask that the licensee certify, subject to the penalties provided for under 18 U.S.C. Section 1001 for false or fraudulent statements, that he or she took the raw furs, raw, salted, or crusted hides or skins, or separate parts thereof from the wild or that they were taken from the wild by a member of that person's immediate family. We will consider the term "immediate family" to mean a licensee's spouse, parents, siblings, and children. The Service believes that extending the meaning to include grandparents, cousins, aunts, or uncles would compromise the intent of this rule. This signed certification statement will have to be presented to a Service officer at the time clearance is requested.

The Service intends that this inspection fee exemption framework utilize existing regulatory language that grants various exemptions to 50 CFR part 14, including § 14.15 and § 14.62. In addition, 50 CFR part 14 already exempts certain "classes" of wildlife

VOL 63 ISS 14 JA 22 1998 UMI

from various regulatory requirements, including farm-raised fish from the designated port requirement on export, aquatic invertebrates of the Class Pelecypoda from the designated port and declaration requirement, and captive-bred furbearers from the marking requirement. We believe that these distinctions are consistent with the intent of the regulation.

In summary, the Service will exempt commercial wildlife shipments from the designated port inspection fee and/or the nondesignated port administrative fee and hourly minimums, whichever applies, for shipments meeting the following criteria: no permits are required under 50 CFR parts 16, 17, 18, 21, or 23; imports or exports are between the United States and Canada or Mexico of raw furs, raw, salted, or crusted hides or skins, or separate parts thereof, lawfully taken from the wild in the United States, Canada, or Mexico; imported or exported by the person taking the wildlife from the wild, or taken from the wild by a member of the importer or exporters' immediate family; provided, the importer or exporter of record is licensed; the shipment or any part thereof has not been previously bought or sold; the shipment does not exceed 100 raw furs, raw, salted, or crusted, hides or skins, or separate parts thereof; the shipment does not contain any manufactured products or live animals; overtime fees, if applicable, have been paid; and the importer or exporter has attached a certification statement stating that the shipment contains items taken from the wild by the importer/exporter of record or by a member of that person's immediate family.

The following chart illustrates the commercial user fee charges at designated and nondesignated ports during normal working hours before the June 21, 1996, final rule, after the August 1, 1996, effective date of that final rule, and under this proposed rule, for comparison:

Fees	Prior to June 21, 1996 final rule	After August 1, 1996 effective date	Proposed
Designated Port	Under 25K/year No Charge. $125/year License Fee. $25/Shipment Inspection Fee.	$50/year License Fee. $55/Shipment Inspection Fee.	$50/year License Fee. $55/Shipment Inspection Fee if criteria not met. No Charge if criteria met.
Nondesignated Port	Under 25K/year No Charge. $125/Shipment Administrative Fee plus 2 hour minimum at $25/hr ($50).	$50/year License Fee. $55 Administrative Fee plus 2 hour minimum at $20/hr ($40).	$50/year License Fee. $55 Administrative Fee plus 2 hour minimum at $20/hr ($40) if criteria not met. No Charge if criteria met.

All interested parties are invited to submit comments on this proposal.

Paperwork Reduction Act of 1995, 44 U.S.C. 3501 et seq.

This proposed rule affects only the requirement to pay an inspection fee for shipments and contains no information collections for which Office of Management and Budget approval is required under the Paperwork Reduction Act (44 U.S.C. 3501). Importers/exporters subject to this rule may be subject to the requirement to file a Declaration for Importation or Exportation of Fish or Wildlife (FWS form 3–177; OMB approval number 1018–0012; expiration date August 31, 2000). This rule does not change or affect the information collection requirements associated with the declaration form 3–177.

Required Determinations

The Service has determined that these proposed regulations meet the applicable standards provided in Sections 3(a) and 3(b)(2) of Executive Order 12988.

The Service has determined and certifies pursuant to the Unfunded Mandates Act, 2 U.S.C. 1502 et seq., that this rulemaking will not impose a cost of $100 million or more in any given year on local or State governments or private entities.

Economic Effects

The Service conducted an economic analysis of this proposed rule. The declared value of all wildlife shipments requiring Service clearance in Fiscal Year 1995 was approximately $860,000,000. In 1996, the total value of all wildlife shipments which may be eligible for the proposed exemption was $700,734. Fees payable to the Service on these shipments would be reduced between $22,935 and $39,615 under the proposed rule. No substantial indirect economic effects are anticipated so the effect of the rule is much less than $100 million annually. Shipment volume is not expected to rise to a level that would generate $100 million annual impact. This rulemaking was not subject to review by the Office of Management and Budget under Executive Order 12866.

Accordingly, under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.), this rulemaking will not have a significant economic effect on a substantial number of small entities, which include businesses, organizations, or governmental jurisdictions. The proposed rule exempts small shippers from the Fish and Wildlife Service inspection fee and so represents an adaptation of the current fee structure to provide relief for small shippers, therefore, this rule will have a beneficial effect on such entities.

List of Subjects in 50 CFR Part 14

Animal welfare, Exports, Fish, Imports, Labeling, Reporting and recordkeeping requirements, Transportation, Wildlife.

Regulation Promulgation

For the reasons set out in the preamble, the Service proposes to amend Title 50, Chapter I, subchapter B of the Code of Federal Regulations as set forth below:

PART 14—IMPORTATION, EXPORTATION, AND TRANSPORTATION OF WILDLIFE

1. Revise the authority citation for Part 14 to read as follows:

Authority: 16 U.S.C. 668, 704, 712, 1382, 1538(d)–(f), 1540(f), 3371–3378, 4223–4244, and 4901–4916; 18 U.S.C. 42; 31 U.S.C. 9701.

2. Amend § 14.94 by revising paragraph (a) and adding paragraph (e) to read as follows:

§ 14.94 Fees.

(a) *License and inspection fees.* The Service will impose a yearly fee for a license pursuant to § 14.93. In addition, each licensee must pay an inspection fee for each wildlife shipment imported into or exported from the United States at a designated port. Licensees who import into or export from the United States wildlife shipments meeting the criteria outlined in paragraph (e) of this section are exempt from the designated port inspection fee, or nondesignated port administrative fee and hourly minimums, whichever apply, *provided*, that all overtime fees and permit fees still apply.

* * * * *

(e) *Exemption criteria.* Wildlife shipments meeting all of the following criteria are exempt from the designated port inspection fee or nondesignated port administrative fee and hourly minimums:

(1) No permits are required under parts 16, 17, 18, 21, 22, or 23 of this subchapter;

(2) The wildlife is imported or exported between the United States and Canada or Mexico;

(3) The wildlife shipment consists of raw fur, raw, salted, or crusted hides or skins, or separate parts thereof, lawfully taken from the wild in the United States, Canada, or Mexico;

(4) The wildlife was taken from the wild by the importer or exporter of record or a member of his immediate family;

(5) The importer or exporter of record is licensed in accordance with § 14.91;

(6) The wildlife or any part thereof has not been previously bought or sold;

(7) The shipment does not exceed 100 raw furs, raw, salted, or crusted hides or skins, or separate parts thereof;

(8) The shipment does not contain any manufactured products or live animals.

Donald J. Barry,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 98–1414 Filed 1–21–98; 8:45 am]

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AE30

Endangered and Threatened Wildlife and Plants; Notice of Public Hearing and Extension of Comment Period on Proposed Endangered Status for Rough Popcornflower

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of public hearing and reopening and extension of comment period.

SUMMARY: The Fish and Wildlife Service (Service), pursuant to the Endangered Species Act of 1973, as amended (Act), provides notice of a public hearing on the proposed endangered status for *Plagiobothrys hirtus* (rough popcornflower). In addition, the Service has reopened and extended the comment period to accommodate a public hearing that was requested by Mr. Danny Lang of Roseburg, Oregon. All parties are invited to submit comments on this proposal.

DATES: The comment period now closes on February 23, 1998. Any comments received by the closing date will be considered in the final decision on this proposal. The public hearing will be held on Tuesday, February 10, 1998, from 6:00 p.m. to 8:00 p.m.

ADDRESSES: The public hearing will be held at the Holiday Inn Express, 375 West Harvard Boulevard, Roseburg, Oregon. Comments and materials concerning this proposal should be sent to the State Supervisor, U.S. Fish and Wildlife Service, Oregon State Office, 2600 S.E. 98th Avenue, Suite 100, Portland, Oregon 97266. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Dr. Andrew F. Robinson Jr. of the Oregon State Office (see **ADDRESSES** section) at (503) 231–6179.

SUPPLEMENTARY INFORMATION:

Background

Plagiobothrys hirtus is an annual herb on drier sites, or perennial herb on wetter sites, that is known from only the interior valley of the Umpqua River in Douglas County, Oregon. The plant is threatened by destruction and/or alteration of habitat by development and hydrological change (e.g., wetland fills, draining, construction); spring and summer grazing by domestic cattle, horses, and sheep; roadside maintenance; and competition from native and non-native species (i.e., succession and encroachment). Comments from the public regarding the accuracy of this proposed rule are sought, especially regarding:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to the species listed above;

(2) The location of any additional populations of the species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population sizes of the species; and

(4) Current or planned activities in the subject area and their possible impacts on the species.

On November 20, 1997, the Service published a rule proposing endangered status for *Plagiobothrys hirtus* in the **Federal Register** (62 FR 61953). The original comment period was to close on January 20, 1998. Section 4(b)(5)(E) of the Act (16 U.S.C. 1531 et seq.) requires that a public hearing be held if it is requested within 45 days of the publication of the proposed rule. A public hearing request from Mr. Danny Lang of Roseburg, Oregon was received within the allotted time period. The Service has scheduled a public hearing on Tuesday, February 10, 1998, at the Holiday Inn Express in Roseburg, Oregon.

Parties wishing to make statements for the record should bring a copy of their statements to the hearing. Oral statements may be limited in length, if the number of parties present at the hearing necessitates such a limitation. There are no limits to the length of written comments or materials presented at the hearing or mailed to the Service. Written comments carry the same weight as oral comments. The comment period now closes on February 23, 1998. Written comments should be submitted to the Service Office listed in the **ADDRESSES** section.

Author

The primary author of this notice is Dr. Andrew F. Robinson Jr. (see **ADDRESSES** section).

Authority

The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

Dated: January 7, 1998.

Don Weathers,

Acting Regional Director, Region 1, Portland, Oregon, Fish and Wildlife Service.

[FR Doc. 98–857 Filed 1–21–98; 8:45 am]

BILLING CODE 4310–55–M

DEPARTMENT OF THE INTERIOR

50 CFR Part 17

RIN 1018–AE54

Endangered and Threatened Wildlife and Plants; Proposed Rule To List the Plant Lesquerella Thamnophila (Zapata Bladderpod) as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to list the plant *Lesquerella thamnophila* (Zapata bladderpod) as an endangered species under the Endangered Species Act of 1973, as amended (Act). *Lesquerella thamnophila* is known from four locations in Zapata and Starr Counties, Texas. This species is threatened by increased urban development, highway construction, increased oil and gas

VOL 63 ISS 14 JA 22 1998 UMI

activities, alteration and conversion of native plant communities to improved pastures, overgrazing, and vulnerability from low population numbers. This proposal, if made final, will extend the Act's protection to *Lesquerella thamnophila*. Designation of critical habitat is not being proposed because the Service has determined such designation is not prudent.

DATES: Comments from all interested parties must be received by March 23, 1998. Public hearing requests must be received by March 9, 1998.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Ecological Services Field Office, c/o Texas A&M University-Corpus Christi, Campus Box 338, 6300 Ocean Drive, Corpus Christi, Texas 78412. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Field Supervisor of the Corpus Christi Ecological Services Field Office in Corpus Christi, Texas. (Telephone 512–994–9005; Facsimile 512–994–8262).

SUPPLEMENTARY INFORMATION:

Background

Lesquerella thamnophila, a member of the mustard family, was first collected in Zapata County, Texas by R.C. Rollins in 1959. The species was named *Lesquerella thamnophila* in 1973 by R.C. Rollins and E.A. Shaw in their work on the genus *Lesquerella* (Rollins and Shaw 1973). The few collected specimens of *Lesquerella thamnophila* have all come from Zapata and Starr Counties in southern Texas.

Lesquerella thamnophila is a pubescent, somewhat silvery-green herbaceous perennial plant with sprawling stems 43–85 centimeters (cm) (16–32 inches (in)) long. It has narrow basal leaves 4–12 cm (1.5–4.7 in) long and 7–15 millimeters (mm) (0.3–0.6 in) wide, with entire to wavy or slightly toothed margins. The stem leaves are 3–4 cm (1–1.5 in) long and 2–8 mm (0.1–0.3 in) wide, with margins similar to the basal leaves. The inflorescences, usually appearing in April but dependent upon the timing of spring rains, are loose racemes of yellow-petaled flowers. Fruits are round and 4.5–6.5 mm (0.2–0.8 in) in diameter on short downward curving pedicels (Poole 1989).

Lesquerella thamnophila occurs on level to sloping terrain in gravelly to sandy-loam upland terrace or Rio Grande floodplain soils. Known locations are associated with three Eocene-age geologic formations—the Jackson, Laredo, and Yegua—which have yielded fossiliferous and calcareous sandstones and clays. The Starr County sites for *Lesquerella thamnophila* occur within the Jimenez-Quemado soil association and on Catarina series soils. Jimenez-Quemado soils are well-drained, shallow, gravelly to sandy loams underlain by caliche. Catarina series soils are clayey, saline upland soils developed from calcareous, gypsiferous, or saline clays that usually contain many drainages and erosional features. The underlying material of these soils contains many calcareous concretions, gypsum crystals, and marine shell fragments (Thompson, *et al.* 1972).

The soils of Zapata County have not been mapped in detail, but the bladderpod sites in Zapata County occur within the Zapata-Maverick soil association, based upon the general soils map for the county. Zapata soils are shallow and well-drained, occurring over caliche. Maverick soils are upland clayey soils occurring over caliche with the underlying calcareous material also containing shale and gypsum crystals (Thompson, *et al.* 1972).

Lesquerella thamnophila occurs as a herbaceous component of an open *Leucophyllum frutescens* (cenizo) shrub community that grades into an *Acacia rigidula* (blackbrush) shrub community. Both plant communities dominate many upland habitats on shallow soils near the Rio Grande (Diamond 1990). Other common plant species in the cenizo and blackbrush communities include *Acacia berlandieri* (guajillo), *Prosopis glandulosa* (mesquite), *Celtis pallida* (granjeno), *Yucca treculeana* (Spanish dagger), *Zizyphus obtusifolia* (lotebush), and *Porlieria angustifolia* (guayacan). The aggressively invasive nonnative *Cenchrus ciliaris* (buffelgrass) is also commonly present. These shrublands are sparsely vegetated due to the shallow, fast-draining soils and semi-arid climate (Poole 1989).

These open brushland communities are used primarily as rangeland and, due to the semi-arid environment, are sensitive to soil erosion and vegetation changes brought about by long-term livestock overgrazing (Schlesinger, *et al.* 1990). As a result, root-plowing of shrubs and subsequent planting of buffelgrass are common regional practices for rangeland improvement. Cattle reportedly graze on *Lesquerella thamnophila* (Poole 1989).

Lesquerella thamnophila occurred historically in Zapata and Starr counties in the United States. It has never been collected in Mexico despite its potential occurrence there. Recent surveys of historical locations in Starr County failed to relocate those populations. Poole (1989) located three populations, two in Zapata County and one in Starr County. In April 1994, Bill Carr and Lee Elliott of the Texas Parks and Wildlife Department discovered another previously unknown Starr County location (Lee Elliott, pers. comm. 1994).

The number of plants in known populations appears to fluctuate dramatically in apparent response to precipitation (Poole 1989). In 1985, there were approximately 5,000 plants at one 4-hectare (ha) (10-acre (ac)) Zapata County site (Tigre Chiquita) and approximately 1,000 plants at the 15-acre type locality in Zapata County (Falcon Lake West). The year 1986 was dry; only 28 plants were counted at the Tigre Chiquita site, and none at Falcon Lake West. Plants were seen at both Zapata County sites again in 1988, but no specific population counts were recorded. No plants have been observed at the Falcon Lake West site since 1988.

The Texas Parks and Wildlife Department has established a management agreement with the Texas Department of Transportation for the Tigre Chiquita site. The agreement requires that the transportation agency avoid mowing within the highway right-of-way from February to May, while the plant is actively growing. The Texas Parks and Wildlife Department annually monitors the site for population size and has recorded these numbers: 10 reproductive plants and 3 non-reproductive ones in 1991; no plants in 1992; 7 non-reproductive plants in 1993; one reproductive plant in 1994; 3 non-reproductive plants in 1995; and no plants in 1996 (probably due to drought).

In 1986, Poole (1989) found 20 plants at a 2–ha (5–ac) site in Starr County (Santa Margarita Ranch). Plants were again observed at this site in 1994, but the number of individuals was not recorded that year (Gena Janssen, Texas Parks and Wildlife Department, Austin, Texas, pers. comm. 1994). Approximately 70 plants were seen in 1997. In 1994, the Texas Parks and Wildlife Department recorded about 50 plants at a new Starr County site (Cuellar Tract) located on a tract of the Lower Rio Grande National Wildlife Refuge. In 1996, a monitoring plot was established and a total of 131 plants were located, 84 of them non-reproductives. In 1997, an extremely wet year, the estimated number of individuals increased to several thousand, all within a 2–3 acre section of the tract.

Lesquerella thamnophila is a cryptic annual species and blooms within a set period of time following spring rainfall, creating a short period in which to survey. These factors may contribute to the occasional inability to locate these plants at known sites. Additional surveys carried out at the most favorable times to find specimens, and focusing on associated soil types, are warranted during the review of this species for listing as endangered.

Previous Federal Action

Federal action involving this species began with section 12 of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*), which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94–51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) accepting the Smithsonian report as a petition within the context of section 4(c)(2) of the Act, now section 4(b)(3)(A), and announcing that it would initiate a review of the status of those plants. *Lesquerella thamnophila* was included as threatened in the Smithsonian report and in the Service notice.

On June 16, 1976 (41 FR 24523), the Service published a proposed rule to determine approximately 1,700 vascular plants as endangered. *Lesquerella thamnophila* was included in this proposal. However, the 1978 amendments to the Act required the withdrawal of all proposals over 2 years old (although a 1 year grace period was allowed for those proposals already over 2 years old). On December 10, 1979 (44 FR 70796), the Service published a notice withdrawing that portion of the June 16, 1976, proposal that had not been made final.

On December 15, 1980 (45 FR 82823), the Service published a list of plants under review for listing as threatened or endangered, in which *Lesquerella thamnophila* was included as a category 2 candidate. Category 2 candidates were those species for which available information indicated listing as threatened or endangered may have been appropriate, but for which substantial data were not available to support preparation of a proposed rule.

Section 4(b)(3)(B) of the Act requires that findings be made by the Secretary on pending petitions within 12 months of their receipt. Section 2(b)(1) of the 1982 amendments to the Act required that all petitions pending as of October 13, 1982, be treated as having been submitted on that date. The 1975 Smithsonian report was accepted as a petition; therefore, all the plants noted within the report, including *Lesquerella thamnophila*, were treated as being newly petitioned on October 13, 1982. In each subsequent year, from 1983 to 1993, the Service determined that the petition to list *Lesquerella thamnophila* was warranted, but precluded by other listing actions of higher priority, and that additional data on vulnerability and threats were still being compiled.

A status report on *Lesquerella thamnophila* was completed August 8, 1989 (Poole 1989). That report provided sufficient information on biological vulnerability and threats to warrant reassigning the species as a category 1 candidate and supporting preparation of a proposed rule to list *Lesquerella thamnophila* as endangered. "Category 1 candidates" were those for which the Service had substantial information indicating that listing under the Act was warranted.

Notices revising the 1980 list of plants under review for listing as endangered or threatened were published in the **Federal Register** on September 27, 1985 (50 FR 39626), February 21, 1990 (55 FR 6184), and September 30, 1993 (58 FR 51171). *Lesquerella thamnophila* was included in the September 30, 1993 notice as a category 1 candidate.

The 1996 Notice of Review (55 FR 6184) included *Lesquerella thamnophila* as a candidate. Candidates are species for which the Service has sufficient information indicating that a listing proposal is appropriate. The 1997 Notice of Review (62 FR 49398) also included *Lesquerella thamnophila* as a candidate.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Lesquerella thamnophila* are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Habitat destruction and modification are the primary threats to *Lesquerella thamnophila*. These threats include the introduction of non-native pasture grasses such as buffelgrass and conversion of native rangeland to improved pasture, overgrazing, urban development, construction or improvement of highways and utility transmission systems necessary to support urban infrastructures, and oil and gas exploration and production. These types of activities have destroyed or altered more than 95 percent of the native habitat in south Texas (Jahrsdoerfer and Leslie 1988).

It is a common practice in south Texas to improve rangeland for livestock production by removing the native shrubs through root-plowing or aerial herbicide application and then reseeding the area with non-native grasses, usually buffelgrass. This practice potentially destroys *Lesquerella thamnophila* habitat. Buffelgrass has spread beyond the improved pastures and is now present throughout south Texas. This invasive non-native grass out-competes and displaces native grasses, forbs, and small shrubs. Potential sites for native plant seedling establishment are lost due to light and moisture competition with buffelgrass, and possibly due to allelopathy.

Much of south Texas was severely overgrazed in the past, and overgrazing continues in many areas today. Vegetation of the semi-arid south Texas climate is less resilient to the impacts of long-term grazing than is the vegetation of wetter climates. This has led to severe erosion of the often highly erodible south Texas soils (Schlesinger, *et al.* 1990). It is impossible to calculate how much habitat suitable to *Lesquerella thamnophila* may have been lost in the past because of the destructive effects of overgrazing or the conversion of native rangeland to improved pasture.

Lesquerella thamnophila is threatened by potential urban development. The type locality for this species has been reduced to a small vacant lot in a resort subdivision on Falcon Reservoir in the City of Zapata. This area is undergoing rapid retirement home development. Another *Lesquerella thamnophila* population occurs in an abandoned trailer park adjacent to a major highway. Recent construction of convenience stores in the area could stimulate urbanization that might extirpate the population.

South Texas is undergoing a rapid increase in highway improvements and construction to handle increased traffic stimulated by the North American Free Trade Agreement. There are *Lesquerella thamnophila* populations adjacent to existing roads that could be proposed for widening. Additionally, existing unimproved roads adjacent to populations could be proposed for widening and paving.

There are *Lesquerella thamnophila* populations adjacent to maintained highway rights-of-way where herbicides are used to control vegetation around

VOL

ISS
14
JA
22
1998
UMI

bridges, guard rails, signs, and reflector posts. Herbicides may also be used to kill woody species encroaching into the rights-of-way and along fence lines. Any plants within the rights-of-way are threatened by maintenance practices such as blading or disking and reseeding with erosion control seed mixtures, which contain primarily non-native invasive grasses.

South Texas is presently undergoing a significant increase in oil and gas exploration and production, especially in Zapata and Starr counties. All phases of exploration and production have the potential to harm *Lesquerella thamnophila* populations and habitat. The seismic vibration method of gas exploration results in extensive temporary rights-of-way being cleared to facilitate equipment traffic. The construction of well pads, access roads, electric lines, and oil gathering lines from wells, if not planned properly, can all destroy plants and habitat. The proximity of this species to existing oil and gas development poses a threat from an increase in number and capacity of gathering lines.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* No commercial trade is currently known to exist for the species. However, listed plant species can be threatened by both collection and vandalism, activities difficult to prevent and only regulated on lands under Federal jurisdiction or in knowing violation of a State law or regulation. Listing a plant species can precipitate commercial and scientific interest in the species. This interest can threaten the species through unauthorized and uncontrolled collection. Federally listing a species under the Act creates the potential for vandalism at known and potential habitat sites. In many areas, private landowner concern regarding endangered species is especially high and may result in the intentional destruction of endangered species habitat.

C. *Disease or predation.* The populations of *Lesquerella thamnophila* have shown no evidence of disease. However, Poole (1989) reports that cattle graze the species to the extent that numbers of plants in populations subjected to grazing are severely reduced compared to those in adjacent, ungrazed lands. Grazing and browsing are greater threats during drought conditions when range quality is reduced and other forage species have been reduced or removed. This portion of south Texas is sensitive to overgrazing during drought conditions due to the semi-arid environment and the large area needed per grazing animal, even under ideal range conditions.

D. *The inadequacy of existing regulatory mechanisms.* The species is not currently protected by any Federal or State laws or regulations.

E. *Other natural or man-made factors affecting its continued existence.* There are only four known small *Lesquerella thamnophila* populations with widely fluctuating numbers of plants from year to year. Low plant numbers during drought years could cause genetic drift. This has the effect of lowering genetic variability and may reduce the species' ability to cope with environmental perturbations. The reduced number of plants during drought years, with populations in some areas actually being reduced to zero above-ground vegetative individuals, also makes the species vulnerable to extinction from a prolonged drought. *Lesquerella thamnophila* occurs along the Rio Grande and the effect of past flooding on creating or maintaining habitat for the species is unknown. The extreme rarity of this species makes populations vulnerable to extirpation and the species vulnerable to extinction from a variety of random environmental events.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by the species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Lesquerella thamnophila* as endangered. The endangered status is appropriate because of the species' limited distribution, low population numbers, and imminent threats of habitat destruction. Threatened status would not accurately reflect the current status of this species.

Critical Habitat

Critical habitat is defined in section 3 of the Act as—(I) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection and; (ii) specific areas outside the geographic area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. Service regulations (50 CFR 424.12(a)(1)), state that designation of critical habitat is not prudent when one or both of the following situations exist—(1) the species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species.

As discussed under Factor B in the "Summary of Factors Affecting the Species" section of this rule, *Lesquerella thamnophila* is threatened by vandalism, an activity difficult to prevent and only regulated by the Act with respect to endangered plants in cases of (1) removal and reduction to possession from lands under Federal jurisdiction, or their malicious damage or destruction on such lands; and (2) removal, cutting, digging up, or damaging or destroying in knowing violation of any State law or regulation, including State criminal trespass law.

The limited protection for plants on private land renders them particularly vulnerable to vandalism or collection due to their lack of evasive ability. Simply listing a plant species can precipitate commercial and scientific interest, legal as well as illegal, which can threaten the species through unauthorized and uncontrolled collection for both commercial and scientific purposes. The designation of critical habitat involves publication of habitat descriptions and general mapped locations of the species, greatly increasing the likelihood of unwanted notice by potential collectors and of successful search and removal operations at specific sites.

Such information also greatly exacerbates the potential for vandalism of endangered or threatened plants at known and potential habitat sites. The designation of critical habitat affects only Federal projects or activities which they fund, authorize, or carry out. Its designation does not affect private land activities conducted by State and local government activities if the activity does not involve Federal funds or authorization. However, this is not always easily understood by private landowners whose property boundaries may be included within a general description of critical habitat for a specific species. Identification of proposed critical habitat for other species has resulted in widespread confusion and heightened concern by the general public. More importantly, such action has resulted in the unnecessary destruction of endangered species habitat by landowners in order to avoid the imagined attention of the Service and perceived prohibitions on private land.

In the case of *Lesquerella thamnophila*, the Service finds that designation of critical habitat is not prudent since it is likely to increase the degree of threat of take of the species. Publication of critical habitat descriptions and locations would make the species especially vulnerable to collection and vandalism.

The designation of critical habitat for *Lesquerella thamnophila* is also not prudent since it will provide no additional conservation benefit to the species. The most severe threats to the species include the overgrazing of native range, and conversion of native rangeland to improved pasture with nonnative grasses. Designation of critical habitat will not affect these threats, since impacts stem from private land activities. Further protection of habitat on private or State land will be addressed through the recovery process and will involve identifying measures that can mutually benefit both the species and landowner.

Section 7 of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or cause the destruction or adverse modification of its critical habitat. *Lesquerella thamnophila* is currently restricted to four sites ranging from 5 acres to 45 acres in size. Any adverse impact to sites that would result in destruction or adverse modification of critical habitat would likely also jeopardize the continued existence of *Lesquerella thamnophila*. Thus, in the case of this species, critical habitat would provide no additional benefit beyond that provided through listing as endangered.

In summary, the Service finds that *Lesquerella thamnophila* is vulnerable to collection and vandalism, and that identification of critical habitat would increase its vulnerability. Further, adequate protection from adverse Federal actions is provided through listing the species as endangered under the Act, and designation of critical habitat would provide little additional protection. Therefore, the Service finds that designation of critical habitat would, on balance, be detrimental to the species. Critical habitat designation is thus not prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness and conservation actions by Federal, State, and local agencies, private organizations, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. For listed species, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service.

Federal agency actions that may require conference and/or consultation as described in the preceding paragraph include brush clearing for flood control in arroyos within the jurisdiction of the International Boundary and Water Commission; technical assistance to landowners by the Natural Resources Conservation Service (formerly Soil Conservation Service) for activities funded by the Consolidated Farm Service Agency (formerly Agricultural Stabilization and Conservation Service); and rangeland herbicide registration by the Environmental Protection Agency. The Federal Highway Administration will need to consider the occurrence of the species in activities such as widening existing roadways or constructing new highways. The U.S. Department of Housing and Urban Development will need to consider these species when water, sewer, and power services are authorized following the development of unauthorized human settlements.

The Act and its implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered plants. All prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale in interstate or foreign commerce any such plant species; or to remove and reduce the species to possession from areas under Federal jurisdiction. In addition, for plants listed as endangered, the Act prohibits the removal and malicious damage or destruction of such plants on areas under Federal jurisdiction; and the removal, cutting, digging up, or damaging or destroying of such plants in any other area, including non-Federal lands, in knowing violation of any State law or regulation, including State criminal trespass law. Certain exceptions to the prohibitions apply to agents of the Service and State conservation agencies.

The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered plants under certain circumstances. Such permits are available for scientific purposes and to enhance the propagation or survival of the species. It is anticipated that few trade permits would ever be sought or issued because this species is not in cultivation nor common in the wild.

It is the policy of the Service (59 FR 34272) to identify to the maximum extent practicable at the time a species is listed those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of the listing on proposed and ongoing activities within a species' range.

One population of the *Lesquerella thamnophila* occurs on public land under the jurisdiction of the Service. Collection, damage or destruction of this species on Federal lands is prohibited, although in appropriate cases a Federal endangered species permit may be issued to allow collection. As noted above, such activities on non-Federal lands would constitute a violation of section 9 if conducted in knowing violation of State law or regulation, including State criminal trespass law.

Normal residential lawn care and maintenance and the clearing of small areas surrounding a residence, which may be used as a fire break are not violations of section 9 and will not constitute take. The Service is not aware of any otherwise lawful activities being conducted or proposed by the public that will be affected by this listing and result in a violation of section 9.

Questions regarding whether specific activities will constitute a violation of section 9 should be directed to the Field Supervisor of the Service's Corpus Christi Office (see **ADDRESSES** section). Requests for copies of the regulations regarding listed plants and inquiries about prohibitions and permits may be addressed to U.S. Fish and Wildlife Service, Branch of Endangered Species/Permits, P.O. Box 1306, Albuquerque, New Mexico 87103 (telephone 505/248–6920; facsimile 505/248–6922).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) Reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species;

(4) Current or planned activities in the subject area and their possible impacts on this species.

Final promulgation of the regulations on this species will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor (see **ADDRESSES** section).

Required Determinations

This rule does not contain collections of information that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The Fish and Wildlife Service has determined that Environmental Assessments and Environmental Impact Statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

Accordingly, the Service hereby proposes to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—[AMENDED]

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Amend § 17.12(h) by adding the following, in alphabetical order under FLOWERING PLANTS, to the List of Endangered and Threatened Plants to read as follows:

§ 17.12 Endangered and threatened plants.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Commission on 21st Century Production Agriculture Meeting

AGENCY: Office of the Secretary.

ACTION: Notice of establishment and meeting.

SUMMARY: The U.S. Department of Agriculture (USDA) has established the Commission on 21st Century Production Agriculture. In accordance with Section 10(a)(2) of the Federal Advisory Committee Act, notice is hereby given of the first meeting of the Commission on 21st Century Production Agriculture. The purpose of this meeting is to consider organizational matters, operational procedures, and personnel matters. This meeting will be open to the public (limited only by space available) except when in executive session to consider personnel matters.

PLACE, DATE, AND TIME OF MEETING: The meeting will be held in Room 221–A, Jamie L. Whitten Federal Building, U.S. Department of Agriculture, 1400 Independence Avenue, S.W., Washington, D.C. 20250, from 9:00 am–5 pm on February 2, 1998, and 9:00 am–noon on February 3, 1998.

FOR FURTHER INFORMATION CONTACT:

Keith J. Collins (202–720–5955), Chief Economist, Room 112–A, Jamie L. Whitten Federal Building, 1400 Independence Avenue, S.W., Washington, D.C. 20250–3810.

Dated: January 16, 1998.

Keith J. Collins,

Chief Economist.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Federal Invention Available for Licensing and Intent To Grant Co-Exclusive Licenses

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of availability and intent.

SUMMARY: Notice is hereby given that a Federally owned invention U.S. Serial No. 08/876,800, filed June 16, 1997, entitled, "Apparatus and Procedure for Placement of Bale Ties" is available for licensing and the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to Harrell Equipment Company, Inc., of Pelham, Georgia, and Leggett & Platt Packaging Group, of Carthage, Missouri, co-exclusive licenses to Serial No. 08/876,800.

DATES: Comments must be received by April 22, 1998.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, Room 415, Building 005, BARC-West, Beltsville, Maryland 20705–2350.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301–504–5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as the Harrell Equipment Company, Inc., and the Leggett & Platt Packaging Group, have submitted complete and sufficient applications for licenses. The prospective co-exclusive licenses will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective co-exclusive licenses may be granted unless, within ninety (90) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the licenses would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Richard M. Parry, Jr.,

Assistant Administrator.

[FR Doc. 98–1508 Filed 1–21–98; 8:45 am]

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Federal Invention Available for Licensing and Intent to Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of availability and intent.

SUMMARY: Notice is hereby given that a Federally owned invention U.S. Serial No. 08/890,890, filed July 10, 1997, entitled, "Device and Method for Reducing Bale Packaging Forces" is available for licensing and the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to Leggett & Platt Packaging Group, of Carthage, Missouri, an exclusive license to Serial No. 08/890,890.

DATES: Comments must be received by April 22, 1998.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, Room 415, Building 005, BARC-West, Beltsville, Maryland 20705–2350.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301–504–5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as Leggett & Platt Packaging Group, has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within ninety (90) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Richard M. Parry, Jr.,

Assistant Administrator.

VOL 63 ISS 14 JA 22 1998 UMI

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent to Grant Exclusive License

AGENCY: Agricultural Research Service, USDA.

ACTION: Notice of intent.

SUMMARY: Notice is hereby given that the U.S. Department of Agriculture, Agricultural Research Service, intends to grant to Roxide International, Inc., of New Rochelle, New York, an exclusive license to Serial No. 08/779,066 filed on January 7, 1997, entitled "Whitefly Trap." Notice of Availability was published in the **Federal Register** on August 7, 1997.

DATES: Comments must be received by March 23, 1998.

ADDRESSES: Send comments to: USDA, ARS, Office of Technology Transfer, Room 415, Building 005, BARC-West, Beltsville, Maryland 20705–2350.

FOR FURTHER INFORMATION CONTACT: June Blalock of the Office of Technology Transfer at the Beltsville address given above; telephone: 301–504–5989.

SUPPLEMENTARY INFORMATION: The Federal Government's patent rights to this invention are assigned to the United States of America, as represented by the Secretary of Agriculture. It is in the public interest to so license this invention as Roxide International, Inc., has submitted a complete and sufficient application for a license. The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within sixty (60) days from the date of this published Notice, the Agricultural Research Service receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Forest Service

California Coast Province Advisory Committee (PAC)

AGENCY: Forest Service, USDA.

ACTION: Notice of Meeting.

SUMMARY: The California Coast Province Advisory Committee (PAC) will meet on February 4 and 5, 1998, at Humboldt State University, Agate Room in the Jolly Giant Commons, in Arcata, CA. The meeting will be held from 8:00 a.m. to 5:00 p.m. each day. Humboldt State University is located in 1 Harpst Street in Arcata. Agenda items to be covered include: (1) Subcommittee meetings; (2) Work on the Ground Subcommittee report and recommendations; (3) Panel discussion and recommendations on old growth standards and guidelines in the Northwest Forest Plan; (4) Recreation/Tourism Subcommittee report; (5) Public/Private/Tribal Partnership Opportunities Subcommittee report and recommendations; (6) Presentation on air quality standards and impacts on fuels management; (7) Monitoring Subcommittee report and recommendations; (8) Presentation on Pacific Southwest Research fuels research proposal; (9) Report and recommendations from the PAC/SCERT coordinating committee; (10) Presentation on community based outreach; (11) PAC and agency updates; and (12) Open public forum. All California Coast Province Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Daniel Chisholm, USDA, Forest Supervisor, Mendocino National Forest, 825 N. Humboldt Avenue, Willows, CA 95988, (530) 934–3316 or Phebe Brown, Province Coordinator, USDA, Mendocino National Forest, 825 N. Humboldt Avenue, Willows, CA 95988, (530) 934–3316.

Dated: January 15, 1998.

Arthur Quintana,

Acting Forest Supervisor.

BILLING CODE 3410–FK–M

ARMS CONTROL AND DISARMAMENT AGENCY

Sunshine Act Meeting; Determination to Close Meetings of the Director's Advisory Committee

January 9, 1998.

The Director's Advisory Committee (DirAC) will hold meetings in Washington, D.C. on January 26–27 and April 6–7, 1998, and in Los Alamos, New Mexico on March 2, 1998.

The entire agenda of these meetings will be devoted to specific national security policy and arms control issues. In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92–463, 86 Stat 770 (1972) (codified at 5 U.S.C. App. 2510(a)(1)(1996)), it has been determined that discussions during the meetings are likely to disclose matters covered under 5 U.S.C. 552b(c)(1).

Materials to be discussed at the meetings have been properly classified and are specifically authorized under criteria established by Executive Order 12958, 60 FR 19,825 (1995), to be kept secret in the interests of national defense and foreign policy.

Therefore, in accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92–463, 86 Stat 770 (1972) (codified at 5 U.S.C. App. 2 510(a)(1)(1996)), I have determined that, because of the need to protect the secrecy of such national security matters, the meetings should be closed to the public.

This notice is being published less than 15 days before the first meeting day, in order to enable more Committee members to attend.

John D. Holum,

Acting Under Secretary of State for Arms Control and International Security Affairs and Director, U.S. Arms Control and Disarmament Agency.

BILLING CODE 8820–01–M

DEPARTMENT OF COMMERCE

Bureau of the Census

[Docket No. 971231318–7318–01]

Establishing New Research Data Centers (RDCs)

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of program and request for proposals.

SUMMARY: This notice informs the public about the process and selection criteria available for establishing a limited number of new Research Data Centers (RDCs) at nonprofit organizations around the United States. Such organizations could include universities, nongovernmental research centers, and certain government facilities. The Census Bureau's Center for Economic Studies has developed and put into practice the concept of RDCs. At RDCs, qualified researchers may have access to microdata from Census Bureau economic (business establishment and firm) and demographic (household and individual) surveys with appropriate safeguards to protect data confidentiality.

DATES: Proposals can be submitted for the National Science Foundation (NSF) winter 1998 proposal review cycle, with a proposal submission deadline of March 1, 1998. Thereafter, proposals will be accepted for the August 15 and January 15 review cycles until further notice.

ADDRESSES: Written proposals to establish new RDCs should be submitted formally to the Division of Social, Behavioral, and Economic Research (SBER) at the NSF. Detailed information on proposal guidelines and review procedures is available on the NSF web site <http://www.nsf.gov>.

FOR FURTHER INFORMATION CONTACT: Arnold Reznek at (301) 457–1856 (areznek@census.gov), John Haltiwanger at (301) 457–1848 (jhaltiwa@census.gov), Cheryl Eavey (ceavey@nsf.gov), or Daniel Newlon (dnewlon@nsf.gov). Also see the Census Bureau's World Wide Web site (http://www.census.gov/ces/ces.html).

SUPPLEMENTARY INFORMATION: The Bureau of the Census is prepared to enter into partnerships with universities, nongovernmental research centers, and certain government facilities to establish a limited number of new RDCs around the United States. Written proposals to establish new RDCs will be reviewed and evaluated jointly by the Census Bureau and the NSF.

The RDC program now operates pilot RDCs in Boston (in partnership with the National Bureau of Economic Research) and in Pittsburgh (in partnership with Carnegie Mellon University). The Census Bureau and the National Center for Health Statistics also plan to establish a narrowly-focused RDC concerned with research using health data.

The RDC program has two major goals: (1) To use the results of the research carried out at the RDCs, and the contact between the Census Bureau and RDC researchers, to improve Census Bureau data programs, including data collection methodology and the underlying research microdatabases (benefit to the Census Bureau is required by the law authorizing the Census Bureau to enter into RDC arrangements, Title 15, United States Code, Section 1525); and (2) to promote academic research using microdata collected by the Census Bureau as part of its ongoing survey and census operations.

The Census Bureau data available at the RDCs would include both economic (business establishment and firm) data and demographic (household and individual) data collected in the Census Bureau's surveys and censuses. In particular cases, it may be possible to supplement these data with similar data from other governmental agencies.

A successful proposal from a research organization or a consortium of such organizations would have to demonstrate (1) the ability to work along with the Census Bureau to provide fair and objective access to researchers while protecting the confidentiality of the underlying microdata, (2) the existence of a regional research community of sufficient size and quality to yield high-quality research output, and (3) a sound plan for long-term funding that provides access to data users on a low-cost basis. The NSF's evaluation of the potential research output of proposed RDCs will be a key element in selection decisions.

The Census Bureau will enter into joint project Memoranda of Understanding (MOUs) with those organizations chosen by the evaluation process. The authority for the Census Bureau to enter into these MOUs is found in Title 15, United States Code, Section 1525.

Any MOU entered into under the authority of Title 15, United States Code, Section 1525 will include information relating to the mutual interest of the Census Bureau and its MOU partner(s) in establishing an RDC; the equitable apportionment of costs by the Census Bureau and its partner(s); the nonprofit status of the partner(s); and the mutuality of the benefit to be derived from the joint project.

RDC operations will emphasize the following elements: (1) A secure research computer laboratory (as certified by the Census Bureau) in which to store and use the data, (2) a research project selection and approval process carried out jointly with the Census Bureau, (3) at least one Census Bureau employee on-site to provide support and to help instill the Census Bureau's "culture of confidentiality" into the researchers at the RDC, (4) an executive director (or senior "faculty advisor") to act as a liaison between the local research community and the Census Bureau, and (5) an RDC review and oversight board to ensure efficient operation of the RDC, as well as fair and objective choice of projects at the RDC.

An overriding consideration in providing researchers with access to these data will be the need to protect the confidentiality of the underlying data pursuant to Title 13, United States Code, Section 9. In particular, prospective researchers will be required to submit detailed project descriptions that must be approved by both the RDC board and the Census Bureau. It is important to remember that RDCs are reserved for projects that involve statistical or econometric modeling using economic and demographic microdata. RDCs are neither equipped nor designed to supplement the Census

VOL
63
ISS
14
JA
22
1998
UMI

Bureau's existing data program operations by producing large-scale special tabulations from confidential Census Bureau microdata.

Once projects are approved, project researchers will be required to obtain Special Sworn Status from the Census Bureau. Obtaining this status requires researchers to undergo a security check, including fingerprinting. Researchers holding Special Sworn Status will be subject to the same criminal penalties as regular Census Bureau employees for disclosure of confidential information. (The penalties are a fine of up to $5,000, imprisonment for up to five years, or both.) Only persons with Special Sworn Status are allowed access to the RDC facility. Moreover, all research findings must be submitted to Census Bureau personnel for disclosure review prior to release to the public.

The estimate of the annual operating costs is $250,000 per year, with higher initial costs in the first year to equip the RDC. This estimate is based upon experience at the pilot RDCs and includes (1) costs at the RDC of equipment, software, space, and the salary of the Census Bureau employee stationed at the RDC, and (2) costs of supporting the RDC at Census Bureau headquarters.

RDCs must be self-financing, with funding coming from institutions, foundations, or state support. The NSF is prepared to provide seed money to assist in covering start-up costs associated with establishing RDCs. An organization proposing to establish an RDC can request from the NSF up to $100,000 per year for a three-year term to cover part of the start-up costs and annual operating costs associated with establishing the RDC. Determinations on these requests will be made by NSF.

RDCs may charge fees to researchers not supported by the NSF to help defray facilities costs. It is the goal of the NSF and the Census Bureau in establishing these centers that these fees will be kept low in order to promote widespread access to the data by the academic community, contingent on sufficient funding to cover annual operating costs. The NSF will continue to provide support through its regular grant competition for faculty time and graduate student assistance on individual research projects that use RDC facilities. NSF-funded individual research projects can be charged access fees once NSF institutional support has been phased out.

Proposals to establish RDCs must follow the standard NSF proposal format. They can be submitted for the NSF winter 1998 proposal review cycle, with a proposal submission deadline of March 1, 1998. Thereafter, proposals will be accepted for the August 15 and January 15 review cycles until further notice. The pace of expansion of RDCs will be limited by the capacity of the Census Bureau to provide adequate support and oversight. It is anticipated that up to four additional RDCs can be supported in the next two to three years.

Proposals should be formally submitted to the Division of Social, Behavioral, and Economic Research (SBER) at the NSF. Detailed information on proposal guidelines and review procedures is available on the NSF web site <http://www.nsf.gov>. Proposals will be reviewed jointly by relevant peer review panels, including Economics; Methodology, Measurement, and Statistics; and Sociology. Final decisions will be made jointly by the Census Bureau and the NSF.

A detailed prospectus is available on the Census Bureau World Wide Web site (http://www.census.gov/ces/ces.html). The prospectus gives more information on the expected contents of the proposal and the expected roles of both the Census Bureau and its partners in RDC operations, including costs. For more information, contact Arnold Reznek at (301) 457–1856 (areznek@census.gov), John Haltiwanger at (301) 457–1848 (jhaltiwa@census.gov), Cheryl Eavey (ceavey@nsf.gov), or Daniel Newlon (dnewlon@nsf.gov). Those who do not have web access may contact Kim Austin at (301) 457–1848 (kaustin@census.gov) to obtain a paper copy of the prospectus.

Notwithstanding any other provision of law, no person is required to respond, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid Office of Management and Budget (OMB) control number. The collection of information contained in the Notice is cleared under OMB Control Number 3145–0058.

It has been determined that this notice is not significant under Executive Order 12866.

Dated: January 12, 1998.

Bradford R. Huther,

Deputy Director and Chief Operating Officer, Bureau of the Census.

[FR Doc. 98–1504 Filed 1–21–98; 8:45 am]

BILLING CODE 3510–07–P

CONSUMER PRODUCT SAFETY COMMISSION

Notice of Approval of Guidance Document on Lead in Consumer Products

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of approval of guidance document on lead in consumer products.

SUMMARY: The Commission announces that it has approved a statement that provides guidance for manufacturers, importers, distributors, and retailers of consumer products that may contain lead.

FOR FURTHER INFORMATION CONTACT: Laura Washburn, Office of Compliance, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504–0400, ext. 1452.

SUPPLEMENTARY INFORMATION:

The text of the guidance document is as follows:

Guidance for Lead (Pb) in Consumer Products

Summary

The U.S. Consumer Product Safety Commission issues this guidance to manufacturers, importers, distributors, and retailers to protect children from hazardous exposure to lead in consumer products.[1] The Commission identifies the major factors that it considers when evaluating products that contain lead, and informs the public of its experience with products that have exposed children to potentially hazardous amounts of lead.

To reduce the risk of hazardous exposure to lead, the Commission requests manufacturers to eliminate the use of lead that may be accessible to children from products used in or around households, schools, or in recreation. The Commission also recommends that, before purchasing products for resale, importers, distributors, and retailers obtain assurances from manufacturers that those products do not contain lead that may be accessible to children.

Hazard

Young children are most commonly exposed to lead in consumer products from the direct mouthing of objects, or from handling such objects and subsequent hand-to-mouth activity. The specific type and frequency of behavior that a child exposed to a product will exhibit depends on the age of the child and the characteristics and pattern of use of the product. The adverse health effects of lead poisoning in children are well-documented and may have long-lasting or permanent consequences. These effects include neurological damage, delayed mental and physical development, attention and learning deficiencies, and hearing problems. Because lead accumulates in the body, even exposures to small amounts of lead can contribute to the overall level of lead in the blood and to the subsequent risk of adverse health effects. Therefore, any unnecessary exposure of children to lead should be avoided. The scientific community generally recognizes a level of 10 micrograms of lead per deciliter of blood as a threshold level of concern with respect to lead poisoning. To avoid exceeding that level, young children should not chronically ingest more than 15 micrograms of lead per day from consumer products.

Guidance

Under the Federal Hazardous Substances Act (FHSA), 15 U.S.C. 1261(f)(1), household products that expose children to hazardous quantities of lead under reasonably foreseeable conditions of handling or use are "hazardous substances." A household product that is not intended for children but which creates such a risk of injury because it contains lead requires precautionary labeling under the Act. 15 U.S.C. 1261(p). A toy or other article intended for use by children which contains a hazardous amount of lead that is accessible for children to ingest is a banned hazardous substance. 15 U.S.C. 1261(q)(1)(B). In evaluating the potential hazard associated with products that contain lead, the Commission staff considers these major factors on a case-by-case basis: the total amount of lead contained in a product, the bioavailability of the lead, the accessibility of the lead to children, the age and foreseeable behavior of the children exposed to the product, the foreseeable duration of the exposure, and the marketing, patterns of use, and life cycle of the product.

Paint and similar surface coatings containing lead have historically been the most commonly-recognized sources of lead poisoning among the products within the Commission's jurisdiction. The Commission has, by regulation, banned (1) paint and other similar surface coatings that contain more than 0.06% lead ("lead-containing paint"), (2) toys and other articles intended for use by children that bear lead-containing paint, and (3) furniture articles for consumer use that bear lead-containing paint. 16 CFR part 1303. In recent years, however, the Commission staff has identified a number of disparate products—some intended for use by children and others simply used in or around the household or in recreation—that presented a risk of lead poisoning from sources other than paint. These products included vinyl miniblinds, crayons, figurines used as game pieces, and children's jewelry.

In several of these cases, the staff's determination that the products presented a risk of lead poisoning resulted in recalls or in the replacement of those products with substitutes, in addition to an agreement to discontinue the use of lead in future production. The Commission believes that, had the manufacturers of these lead-containing products acted with prudence and foresight before introducing the products into commerce, they would not have used lead at all. This in turn would have eliminated both the risk to young children and the costs and other consequences associated with the corrective actions.

The Commission urges manufacturers to eliminate lead in consumer products to avoid similar occurrences in the future. However, to avoid the possibility of a Commission enforcement action, a manufacturer who believes it necessary to use lead in a consumer product should perform the requisite analysis before distribution to determine whether the exposure to lead causes the product to be a "hazardous substance." If the product is a hazardous substance and is also a children's product, it is banned. If it is a hazardous household substance but is not intended for use by children, it requires precautionary labeling. This same type of analysis also should be performed on materials substituted for lead.

The Commission also notes that, under the FHSA, any firm that purchases a product for resale is responsible for determining whether that product contains lead and, if so, whether it is a "hazardous substance." The Commission, therefore, recommends that, prior to the acquisition or distribution of such products, importers, distributors, and retailers obtain information and data, such as analyses of chemical composition or accessibility, relevant to this determination from manufacturers, or have such evaluations conducted themselves.

[1] This guidance is not a rule. It is intended to highlight certain obligations under the Federal Hazardous Substances Act. Companies should read that Act and the accompanying regulations at 16 CFR part 1500 for more detailed information.

Dated: January 15, 1998.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

Notice of Addendum to the Atlantic Coast of Long Island, From Fire Island Inlet to Montauk Point, New York (Reach 1-Fire Island Inlet to Moriches Inlet Interim Plan for Storm Damage Protection)

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent.

SUMMARY: In previous **Federal Register** notice (Vol. 62, No. 228, pages 63134–63135) Wednesday, November 26, 1997, subject notice was published to provide an opportunity for public comment during the public scoping phase of the project. Based on comments received by this office, certain changes are required to the document and are provided in the **SUPPLEMENTARY INFORMATION** paragraph.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen A. Couch, Study Manager, (212) 264–9077; Mr. Peter M. Weppler, EIS Coordinator, (212) 264–4663; Planning Division, Corps of Engineers, New York District, 26 Federal Plaza, New York, New York 10278–0090.

SUPPLEMENTARY INFORMATION: On page 63134, in column 3, last paragraph, revise Section 1 to read:

1. Location of Proposed Action

The project area is located entirely in Suffolk County, Long Island, New York, along the Atlantic and bay-shore of the towns of Babylon, Islip, and Bookhaven. The study area includes Great South Bay, which is connected to the Atlantic Ocean through Fire Island Inlet, a federal navigation channel. Great South Bay is connected to Moriches Bay by a narrow channel behind the barrier island. The westernmost portion of the study area, Fire Island Inlet, is located approximately 52 miles by water east of the Battery, New York. The project area includes the Atlantic Ocean and Great South Bay, Fire Island, Moriches Inlet, barrier beaches, the mainland of Long Island fronted by Fire Island, as well as suitable offshore borrow areas that will supply material for beach construction and replenishment. The study area is approximately 30 miles long. The lands and waters within the proposed project area are owned by various interests and are subject to various uses. The Federal Government (Department of the Interior, National Park Service (NPS)) has jurisdiction over approximately 26 miles of the area included within the boundaries of the Fire Island National Seashore (FINS). The New York State government has jurisdiction over Robert Moses State Park (Office of Parks, Recreation and Historic Preservation), tidal waters (bays) (Department of Environmental Conservation) and submerged lands offshore to the three-mile limit (Department of State). The Suffolk County government (Department of Parks and Recreation) has jurisdiction over county parks located at Smith Point and Moriches Inlet. Most of the remaining land is held by private landowners located in Towns of Babylon, Brookhaven, and Islip and Villages of Ocean Beach and Saltaire. There are 17 "exempted" and 3 Seashore District (non-exempted) communities within the boundaries of FINS. An exempted community is one that is defined by the 1964 FINS Enabling Legislation (Pub. L. 88–587), and described by the Federal Zoning Regulations, 36 CFR part 28, as falling within the boundaries of the Community Development District. The Seashore District is comprised of all portions of the lands and waters within the boundary of FINS, which are not included in the Community Development District, comprising all private and public developments. The improved private properties in either district are exempted from the acquisition authority of the Secretary of the Interior, as long as the development conforms to all local and federal zoning requirements at the time of construction. There are five NPS facilities on Fire Island under the jurisdiction of FINS. They are: the Lighthouse Area, Sunken Forest/Sailors Haven, Talisman, Watch Hill, and Smith Point.

On page 63135, in column 1, first paragraph, revise Section 2 to read:

2. Description of Potential Interim Alternatives

No Federal Action

The No Federal Action alternative for this proposed project means that no interim measures would be taken by the Federal government to provide storm damage protection in the study area. Other entities (State and local agencies, private interests, etc.) could undertake measures intended to prevent or minimize further storm damage and the Federal Government could proceed with the Reformulation Study. For evaluation of the interim project, the No-Action alternative recognizes that the Breach Contingency Plan is in place, and that any breach of the barrier island that may occur within this area would be closed using the authority provided by the Breach Contingency Plan.

3. Non-Structural Alternatives

Buy-Out Plan/Land Use Regulations/ Flood-Proofing

A buyout plan would include the permanent evacuation of areas within the floodplain subject to erosion or inundation, including the mainland and barrier island. This would involve the acquisition of land and structures either by purchase or by exercising the power of eminent domain. Following this action, structures in the affected areas could be demolished or relocated. Other potential land use regulations may include a range of management techniques, including zoning, subdivision regulations, building codes, and setback ordinances. Other flood-proofing strategies include raising structures or providing walls or floodshields around structures, in addition to relocations.

4. Beach Nourishment Alternatives

Beach nourishment involves the placement of sand extracted from an offshore borrow source onto an eroding shoreline to restore its form and to provide an adequate protective beach. A beach fill plan typically includes a berm (that slopes to the sea floor) backed by a dune. Together, the dune and the berm combine to prevent erosion and inundation damages to leeward areas. Beach nourishment requires the periodic placement of sand to offset erosion of the beach fill in order to maintain the designed level of protection.

a. Modified Authorized Plan w/o Groins

This alternative would involve widening the beaches along the project area to a minimum of 100 ft with an elevation of +11 ft NGVD, and raising the dunes to an elevation of +20 ft NGVD, with a minimum dune crest width of 25 ft. Certain very low zones of the project area will have a berm elevation of +13 ft NGVD. The proposed dune slopes are 1V:5H, and the design berm slopes are to be 1V:15H to Mean Low Water (MLW), and 1V:30H below MLW.

b. Beach Nourishment (Option A)—Fill in Wilderness Area

This alternative consists of beachfill with a minimum berm width of 90 feet (ft) at elevation +9.5 ft NGVD, and a minimum 25-ft wide dune at elevation +15 ft NGVD. Proposed dune and berm slopes are 1V:5H to MLW, and 1V:30H below MLW. Different specifications would be required between Kismet and Point O'Woods and in the Federal Wilderness Area. The berm and dune elevations from Kismet to Point O'Woods would be increased to +11.5 ft. NGVD and +18 ft NGVD, respectively. These increased elevations would be required to provide a 44-year level of protection due to extremely low elevations north of the dune in these areas.

c. Beach Nourishment (Option B)—Feeder Beach w/Stockpile at Smith Point

This alternative would require the use of a feeder beach and stockpiling sand at Smith Point County Park. While offering some protection, these measures are not likely to provide a 44-year level of protection.

On page 63135, column 1, last paragraph, Section 4(b), revised the first two sentences to read:

A scoping meeting was held on December 4, 1997 at the Holiday Inn Macarthur Airport, Ronkonkoma. If more public meetings are found to be needed, public notices shall be issued at a later date containing the dates, times and places of the scoping meetings.

On page 63135, column 1, end of the last paragraph, Section 4(b), add the following sentence:

The scoping period has been extended to 30 days from the date of this notice's appearance in the **Federal Register**.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

DELAWARE RIVER BASIN COMMISSION

Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, January 28, 1998. The hearing will be part of the Commission's regular business meeting which is open to the public and scheduled to begin at 1:00 p.m. in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey.

A presentation on the Commission's retreat process will be held at 11:00 a.m. at the same location. In December 1995 the Commission conducted a retreat to examine the agency and its future. The process progressed through interviews with key constituents; an extensive constituent survey; a niche selection process and preparation of a vision and mission statement entitled "Charting the Future", adopted by the Commission on December 17, 1997. The results of the retreat process and next steps will be reviewed at this presentation. A "Summary of Delaware River Basin Commission Retreat Process" and "Charting the Future" are available upon request by contacting Susan M. Weisman at (609) 883–9500 ext. 203.

In addition to the subjects listed which are scheduled for public hearing at the 1:00 p.m. business meeting, the Commission will also address the following: Minutes of the December 17, 1997 business meeting; announcements; General Counsel's Report; report on Basin hydrologic conditions; a resolution to adopt the current expense and capital budgets for Fiscal Year 1999; a resolution to designate the Chair of the Flow Management Technical Advisory Committee as the Chair at meetings of the Parties to the 1954 U.S. Supreme Court Decree concerning drought-related resolutions; a resolution to amend the Ground Water Protected Area Regulations for Southeastern Pennsylvania by the establishment of numerical withdrawal limits for Protected Area subbasins; and public dialogue. A "Response Document on Proposed Amendments to the Southeastern Pennsylvania Ground Water Protected Area Regulations" is also available upon request by contacting Ms. Weisman at the number provided above.

The subjects of the hearing will be as follows:

Applications for Approval of the Following Projects Pursuant to Article 10.3, Article 11 and/or Section 3.8 of the Compact

1. Portland Borough Authority D–97–29 CP

An application for approval of a ground water withdrawal project to supply up to 5.18 million gallons (mg)/30 days of water to the applicant's distribution system from new Well No. 3, and to increase the existing withdrawal limit from all wells to 5.7 mg/30 days. The project is located in Upper Mount Bethel Township, Northampton County, Pennsylvania.

2. Pennsylvania Power & Light Company D–97–37

A project to construct two 12-kilowatt aerial power line crossings: one on a reach of the Schuylkill River and one on a reach of the Little Schuylkill River near their confluence. Both crossings are on reaches of the rivers designated as Scenic Rivers by the Pennsylvania

VOL 63 ISS 14 JA 22 1998 UMI

Department of Conservation and Natural Resources and included in the DRBC Comprehensive Plan. The proposed power line will provide service to an existing commercial enterprise in Port Clinton, Schuylkill County, Pennsylvania. The line will cross on poles located near two bridges; one just upstream of a railroad bridge over the Schuylkill River between Tilden Township, Berks County and Port Clinton Borough, Schuylkill County, and one at the Broad Street Bridge over the Little Schuylkill River in Port Clinton Borough.

3. Glen Mills Schools D–97–39

A surface water withdrawal project to provide a monthly average of 367,000 gallons per day (gpd) (11 mg/30 days) for irrigation of the proposed 18-hole Golf Course at Glen Mills located in Thornbury Township, Delaware County, Pennsylvania. The applicant proposes to withdraw water from Chester Creek and, if needed to supplement flow, from two existing on-site wells (averaging less than 100,000 gpd).

4. American Cyanamid Company D–97–41

A project to upgrade an existing 120,000 gpd average monthly capacity industrial wastewater treatment plant (IWTP) located at the applicant's Agricultural Research Division facilities at U.S. Route 1 and Quakerbridge Road in West Windsor Township, Mercer County, New Jersey. The IWTP will continue to provide secondary biological treatment utilizing an extended aeration activated sludge process. Tertiary filtration will be provided as well as ultraviolet disinfection prior to discharge via an aeration cascade to an unnamed tributary of the Assunpink Creek. The applicant's facilities are located on property that straddles the Delaware River Basin divide and a major portion of the applicant's water source is obtained from wells located outside the Delaware River Basin. However, the applicant proposes a high overall BOD removal rate (98 percent) that will offset the imported load.

5. City of Bethlehem Authority D–97–47 CP

A proposed temporary emergency surface water withdrawal project that entails installation of an intake structure in the Beltzville Reservoir, just downstream of the confluence of Pohopoco Creek with the Reservoir's backwater, in Towamensing Township, Carbon County, Pennsylvania. The withdrawal is planned to provide an average of 15 million gallons per day during a three-year period while the applicant's Penn Forest Dam is undergoing reconstruction and refilling. The applicant's distribution system serves the City of Bethlehem and 11 other municipalities in its vicinity, in both Lehigh and Northampton Counties. Documents relating to these items may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact Thomas L. Brand at (609) 883–9500 ext. 221 concerning docket-related questions. Persons wishing to testify at this hearing are requested to register with the Secretary at (609) 883–9500 ext. 203 prior to the hearing.

Dated: January 12, 1998.

Susan M. Weisman,

Secretary.

BILLING CODE 6360–01–P

DEPARTMENT OF EDUCATION

National Awards Program for Model Professional Development; Notice of New Application Deadline for Certain Applicants for Fiscal Year (FY) 1998

SUMMARY: The Secretary establishes a new deadline for the submission of applications under the National Awards Program for Model Professional Development for FY 1998 by those schools and school districts in areas of Maine, New Hampshire, New York and Vermont that the President or the governors of those States have declared disaster areas because of the severe ice storms that occurred during the week of January 5, 1998, as well as to schools and the school district on the Island of Guam.

NEW DEADLINE FOR TRANSMITTAL OF APPLICATIONS: The new deadline for the Department's receipt of applications from these schools and school districts is January 26, 1998. In addition, the Secretary will consider, on a case-by-case basis, a written request received by January 26, 1998, for a further extension of the application deadline for any school or school district in these affected areas that confirm an inability to meet this new application deadline because of continued storm-related disruptions.

SUBMITTING APPLICATIONS OR EXTENSION REQUESTS: Application to the National Awards Program or written requests for an extension of the application deadline beyond January 26, 1998, must be sent to Sharon Horn, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue, NW., Room 506E, Washington, DC 20208–5644. Telephone: 202–219–2203.

To obtain information on the program, call or write Sharon Horn at the address and telephone number identified above. Inquiries also may be sent by e-mail to sharon__horn@ed.gov or by FAX at (202) 219–2198. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, between 8 a.m. and 8 p.m.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

Individuals with disabilities may obtain a copy of the application package in an alternate format, also, by contacting that person. However, the Department is not able to reproduce in an alternate format the standard forms included in the application package.

SUPPLEMENTARY INFORMATION: On October 30, 1997, the Secretary announced in the **Fedeal Register** (62 FR 58874) the National Awards Program For Model Professional Development for FY 1998. This program recognizes a variety of schools and school districts with model professional development activities in the pre-kindergarten through twelfth grade levels that have led to increases in student achievement. The notice inviting applications for the program (62 FR 58874), which accompanied the notice of eligibility and selection criteria for the program, identified the deadline for transmittal of applications as January 15, 1998. During the week of January 5, 1998, portions of the States of Maine, New Hampshire, New York and Vermont experienced extraordinarily severe ice storms that extinguished electric service and caused major disruptions to school communities in these areas. In addition, the Secretary has learned that the school community on the Island of Guam is only now reopening on a part-time basis as a result of a severe typhoon that struck, the island on December 16, 1997.

The Secretary is concerned that because of these circumstances schools and school districts in these affected areas that wish to apply for recognition under the National Awards Program may be prevented from doing so by the previously announced application deadline. For this reason, the Secretary extends the deadline for transmittal of applications under the National Awards Program until January 26, 1998, for those schools and school districts in the States of Maine, New Hampshire, New York and Vermont that the President or the governors of those States have declared to be disaster areas, as well as for schools and the school district on Guam. Since it is impossible to predict whether continued disruptions in utility service will preclude the submission of applications by January 26, 1998, the Secretary also will consider, on a case-by-case basis, a written request received by January 26, 1998, for a further extension of the application deadline for any school or school district in these affected areas that confirms its inability to meet the January 26 application deadline because of continued storm-related disruptions.

BILLING CODE 4000–01–M

DEPARTMENT OF EDUCATION

Submission of Data by State Educational Agencies

AGENCY: Department of Education.

ACTION: Notice of dates of submission of State revenue and expenditure reports for fiscal year 1997 and of revisions to those reports.

SUMMARY: The Secretary of Education announces dates for the submission by State educational agencies (SEAs) of expenditure and revenue data and average daily attendance statistics on ED Form 2447 (the National Public Education Financial Survey) for fiscal year (FY) 1997. The Secretary sets these dates to ensure that data are available to serve as the basis for timely distribution of Federal funds. The U.S. Bureau of the Census is the data collection agent for the Department's National Center for Education Statistics (NCES). The data will be published by NCES and will be used by the Secretary in the calculation of allocations for FY 1999 appropriated funds.

DATES: The date on which submissions will first be accepted is March 15, 1998. The mandatory deadline for the final submission of all data, including any revisions to previously submitted data, is September 8, 1998.

ADDRESSES: SEAs may mail ED Form 2447 to: Bureau of the Census, ATTENTION: Governments Division, Washington, DC 20233–6800.

Alternatively, SEAs may hand deliver submissions to: Governments Division, Bureau of the Census, 8905 Presidential Parkway, Washington Plaza II, Room 508, Upper Marlboro, MD, by 4 p.m., Eastern time, Monday through Friday.

If an SEA's submission is received by the Bureau of the Census after September 8, in order for the submission to be accepted, the SEA must show one of the following as proof that the submission was mailed on or before the mandatory deadline date:

1. A legibly dated U.S. Postal Service postmark.
2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
3. A dated shipping label, invoice, or receipt from a commercial carrier.
4. Any other proof of mailing acceptable to the Secretary.

If the SEA mails ED Form 2447 through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

1. A private metered postmark.
2. A mail receipt that is not dated by the U.S. Postal Service.

Note: The U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an SEA should check with its local post office.

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence R. MacDonald, Chief, Bureau of the Census, ATTENTION: Governments Division, Washington, DC 20233–6800. Telephone: (301) 457–1574. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain this notice in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to: Frank Johnson, National Center for Education Statistics, U.S. Department of Education, 555 New Jersey Avenue, N.W., Room 410E, Washington, DC 20208–5651.

SUPPLEMENTARY INFORMATION: Under the authority of section 404(a) of the National Education Statistics Act of 1994 (20 U.S.C. 9003(a)), which authorizes NCES to gather data on the financing of education, NCES collects data annually from SEAs through ED Form 2447. The report from SEAs includes attendance, revenue, and expenditure data from which NCES determines the average State per pupil expenditure (SPPE) for elementary and secondary education.

In addition to using the SPPE data as useful information on the financing of elementary and secondary education, the Secretary uses these data directly in calculating allocations for certain formula grant programs, including Title I of the Elementary and Secondary Education Act of 1965, as amended by the Improving America's Schools Act of 1994 (Title I), Impact Aid, and Indian Education. Other programs such as the Goals 2000: Educate America Act, the Technology Literacy Challenge Fund, the Education for Homeless Children and Youth Program under Title VII of the Stewart B. McKinney Homeless Assistance Act, the Dwight D. Eisenhower Professional Development Program, and the Safe and Drug-Free Schools and Communities Program make use of SPPE data indirectly because their formulas are based, in whole or in part, on State Title I allocations.

In January 1998, the Bureau of the Census, acting as the data collection agent for NCES, will mail to SEAs ED Form 2447 with instructions and request that SEAs submit data to the Bureau of the Census on March 15, 1998, or as soon as possible thereafter. SEAs are urged to submit accurate and complete data on March 15, or as soon as possible thereafter, to facilitate timely processing. Submissions by SEAs to the Bureau of the Census will be checked for accuracy and returned to each SEA for verification.

Having accurate information, on time, is critical to an efficient and fair allocation process, as well as the NCES statistical process. To ensure timely distribution of Federal education funds based on the best, most accurate data available, NCES establishes, for allocation purposes, September 8, 1998,

VOL
63
ISS
14
JA
22
1998
UMI

as the final date by which ED Form 2447 must be submitted. However, if an SEA submits revised data after the final deadline that results in a lower SPPE figure, its allocations may be adjusted downward or the Department may request the SEA to return funds. SEAs should be aware that all of these data are subject to audit and that, if any inaccuracies are discovered in the audit process, the Department may seek recovery of overpayments for the applicable programs. If an SEA submits revised data after September 8, the data may also be too late to be included in the final NCES published dataset.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Idaho Operations Office; Notice of Intent to Solicit Applications for Financial Assistance Awards

AGENCY: Department of Energy.

ACTION: Notice of solicitation for financial assistance number DE–PS07–98ID13605—Advanced Drilling Systems Research.

SUMMARY: The U.S. Department of Energy's Office of Geothermal Technologies, Advanced Drilling Systems Research Program, via the Idaho Operations Office (DOE–ID), is seeking applications for cost-shared cooperative agreements for industry-government Research & Development projects to develop advanced drilling technologies and transfer the results to industry. These new developments can then be used by the U.S. geothermal industry to solve technical problems.

DATES: The anticipated issuance date of Solicitation No. DE–PS07–98ID13605 is January 26, 1998. A copy of the solicitation in its full text can be found at the following Internet address: *http://www.inel.gov/doeid/solicit.html* under ACurrent Solicitations.@ Also, application packages and instructions (including all required forms, certifications and assurances) are available at this website. The website is the agency preferred method for interested parties to obtain the solicitation and application information. Interested parties requiring hardcopies should request them in writing (preferably via e-mail) from the Contracting Officer below. The website will be the official notification medium for any possible changes in the solicitation. All interested parties should monitor the website during the application period.

ADDRESSES: Applications shall be submitted to: Mr. Michael K. Barrett, Contracting Officer, U.S. Department of Energy, Idaho Operations Office, 850 Energy Drive, Mail Stop 1221, Idaho Falls, ID 83401–1563, e-mail: *barretmk@inel.gov*, Tele: (208) 526–5743, Fax: (208) 526–5548.

FOR FURTHER INFORMATION CONTACT: Michael K. Barrett, Contracting Officer at (208) 526–5743 or Willetia Amos, Program Manager at (208) 526–4097; U.S. Department of Energy, Idaho Operations Office, 850 Energy Drive, Mail Stop 1221, Idaho Falls, ID 83401–1563.

SUPPLEMENTARY INFORMATION: The solicitation will be issued pursuant to 10 CFR 600.6(a) with no eligibility restrictions. The statutory authority for the issuance of this solicitation is Public Law 93–410, the Geothermal Energy Research, Development & Demonstration Act of 1974. The catalog of Federal Domestic Assistance Number for this program is 81.087.

This notice is also intended to promote the formation of industry partnerships, to stimulate interaction among potential participants, and to encourage organizations to investigate creative solutions. Funding for phase I will be available to support several awards for a period of approximately six to twelve months. Funding for phase II will be available to support one or more awards, for a period of 12–24 months. Applications may include Federally Funded Research and Development Centers, but only as lower tier participants with funding for their expected costs provided through their existing arrangements with the Government.

Issued in Idaho Falls, ID January 14, 1998.

Michael L. Adams,

Acting Director, Procurement Services Division.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PR98–4–000]

AOG Gas Transmission Company, L.P.; Notice of Petition for Rate Approval

January 15, 1998.

Take notice that on January 6, 1998, AOG Gas Transmission Company, L.P. (AOGGT) filed pursuant to Section 284.123(b)(2) of the Commission's Regulations, a petition for rate approval requesting that the Commission approve its existing system-wide rates of $0.0019 per Mmbtu applicable to transportation service rendered from its system in the state of Oklahoma, and $0.1023 per Mmbtu applicable to transportation service rendered from its system in the state of New Mexico. These rates will be applicable to the transportation of natural gas under Section 311(a)(2) of the Natural Gas Policy Act of 1978 (NGPA).

Pursuant to Section 284.123(b)(2)(ii), if the Commission does not act within 150 days of the date of this filing, the rates will be deemed to be fair and equitable and not in excess of an amount which interstate pipelines would be permitted to charge for similar transportation service. The Commission may, prior to the expiration of the 150 day period, extend the time for action or institute a proceeding to afford parties an opportunity for written comments and for the oral presentation of views, data and arguments.

Any person desiring to participate in this proceeding must file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before January 30, 1998. Copies of this petition are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

Federal Energy Regulatory Commission

[Docket No. TM98–5–23–000]

Eastern Shore Natural Gas Company, Notice of Proposed Changes in FERC Gas Tariff

January 15, 1998.

Take notice that on January 8, 1998, Eastern Shore Natural Gas Company (ESNG) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, certain revised tariff sheets in the above captioned docket with proposed effective dates of January 1, 1998 and February 1, 1998, respectively.

ESNG states that the purpose of the instant filing is to track rate changes attributable to storage service purchased from Columbia Gas Transmission Corporation (Columbia) under its Rate Schedules SST and FSS the costs of which are included in the rates and charges payable under ESNG's Rate Schedule CFSS. This tracking filing is being made pursuant to Section 3 of ESNG's Rate Schedule CFSS.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed as provided in Section 154.210 of the Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP96–147–005]

Equitrans, L.P.; Notice of Proposed Changes in FERC Gas Tariff

January 15, 1998.

Take notice that on January 13, 1998, Equitrans, L.P. (Equitrans) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets to become effective September 1, 1997:

Second Substitute Third Revised Sheet No. 220
Second Substitute Second Revised Sheet No. 220A
Second Substitute Second Revised Sheet No. 220B

Equitrans states that the proposed tariff sheets are submitted in compliance with the Order on Rehearing and Clarification issued by the Federal Energy Regulatory Commission (Commission) on December 29, 1997 in Docket No. RP96–147–002. Equitrans states that the Commission required Equitrans to file revised tariff sheets to impose late winter storage withdrawal limitations or "ratchets" on Equitrans' open-access base load storage Rate Schedule 115SS.

Equitrans states that it has included revisions to Section 9.3 of its General Terms and Conditions to provide that late season storage withdrawal ratchets will apply to all firm Part 284 storage services including Rate Schedule 115SS. Equitrans states that the inventory levels at which ratchets may be applied and the application of ratchets based on each individual Part 284 customer's percentage of TASQ which remains in storage under each individual Rate Schedule remains unchanged from the methodology previously approved by the Commission.

Any person desiring to protest the filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure. All such protests should be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining appropriate action, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

K N Interstate Gas Transmission Co.; Notice of Filing

January 15, 1998.

Take notice that on January 9, 1998, K N Interstate Gas Transmission Co. (KNI) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1–B, the following revised tariff sheets, to be effective October 1, 1997:

Second Revised Sheet No. 36
Second Revised Sheet No. 89

On April 17, 1997, K N Interstate Gas Transmission Co. (KNI) submitted a compliance filing which was subsequently approved by the Commission in Docket No. RP97–142. Included within this compliance filing were First Revised Sheet Nos. 36 and 89. It has since been determined that pagination and language problems exist with the above referenced sheets. Therefore, KNI is submitting Second Revised Sheet No. 36 and Second Revised Sheet No. 89 to correct the pagination and language problems.

KNI states that copies of this filing were served upon KNI's jurisdictional customers, interested public, bodies, and all parties to the proceedings.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

Mississippi River Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

January 15, 1998.

Take notice that on January 13, 1998, Mississippi River Transmission Corporation (MRT) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the tariff sheets listed below to be effective February 12, 1998.

Twenty-Ninth Revised Sheet No. 5
Twenty-Ninth Revised Sheet No. 6
Twenty-Sixth Revised Sheet No. 7

MRT states that the purpose of the instant filing is to remove the Miscellaneous Revenue Flowthrough Adjustment credit from MRT's base tariff rates under Rate Schedules FTS, SCT, and ITS.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Southern California Edison Company; Notice of Filing

January 14, 1998.

Take notice that on December 30, 1997, Southern California Edison Company (Edison) tendered for filing the Edison-Southern California Water Company 1997 Restructuring Agreement) between Edison and the Southern California Water Company (SCWC), and a Notice of Cancellation of various rate schedules applicable to SCWC. Included in the Restructuring Agreement as Appendices A, B, C, and D are: Amendment No. 1 to the Agreement For Services, Amendment No. 1 to the Control Area Import Agreement, Amendment No. 1 to the Transmission Service Agreement, and the Wholesale Distribution Access Tariff Service Agreement.

The Restructuring Agreement, including all of its Appendices, are the result of negotiations between Edison and SCWC to modify existing agreements to accommodate the emerging Independent System Operator/Power Exchange market structure. The Restructuring Agreement simplifies the existing operational arrangements between Edison and SCWC.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before January 30, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP95–112–022]

Tennessee Gas Pipeline Company; Notice of Compliance Filing

January 15, 1998.

Take notice that on January 9, 1998, Tennessee Gas Pipeline Company (Tennessee), tendered for filing as part of its FERC Gas Tariff, the following tariff sheets, with an effective date of January 1, 1998:

Fifth Revised Volume No. 1
Tenth Revised Sheet No. 26
Tenth Revised Sheet No. 26A
Eighteenth Revised Sheet No. 26B
Original Volume No. 2
Thirty-Fourth Revised Sheet No. 5

Tennessee states that this filing is in compliance with the Stipulation and Agreement approved by the Commission in its October 30, 1996 Order on Contested Settlement in the above-referenced docket. Tennessee Gas Pipeline Company, 77 FERC ¶ 61,083 (1996), reh'g denied, 78 FERC ¶ 61,069 (1997). Tennessee requests waiver of the Commission's thirty-day notice requirement to allow an effective date of January 1, 1998 for the tariff sheets. Tennessee submits that good cause exists for the waiver because: (1) The proposed tariff sheets represent a reduction in customers' existing rates; (2) all of Tennessee's customers were informed of the rates since such rates were set forth in the Stipulation and Agreement; and (3) the Commission previously approved implementation of the rates, effective January 1, 1998, in its orders approving the Stipulation and Agreement.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in Determining the appropriate action to be taken, but will not serve to make protestants parties to this proceeding. Copies of this filing are on file with the Commission and available for public inspection in the Public Reference Room.

Texas Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

January 15, 1998.

Take notice that on January 12, 1998, Texas Gas Transmission Corporation (Texas Gas) tendered for filing changes to its FERC Gas Tariff, First Revised Volume No. 1, with an effective date of November 1, 1997:

Substitute First Revised Sheet No. 50
Substitute First Revised Sheet No. 51

Texas Gas states that this instant filing is made in compliance with the Ordering Paragraph B of the Commission's Order issued December 29, 1997, in Docket No. RP97–344 at 81 FERC ¶ 61,398 (1997). As required by that Order, Texas Gas has revised the tariff sheets to provide that service under Rate Schedule NNS will be available to any Customer provided that there are operational and/or administrative arrangements in place to meet the requirements of such service.

Texas Gas further states that it has served copies of this filing upon the company's jurisdictional customers, interested state commissions, and all parties appearing on the official restricted service list in Docket No. RP97–344.

Any person desiring to protest said filing should file a Protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure. All such protests should be filed in accordance with Section 154.210 of the Commission's Regulations. Protests may be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the

Transcontinental Gas Pipe Line Corporation; Notice of Proposed Changes in FERC Gas Tariff

January 15, 1998.

Take notice that on January 12, 1998, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing certain revised tariff sheets to its FERC Gas Tariff, Third Revised Volume No. 1 which tariff sheets are enumerated in Appendix A attached to the filing. The referenced tariff sheets are proposed to be effective December 21, 1997.

Transco states that the purpose of the instant filing is to comply with the Commission's order issued January 7, 1998 in Docket No. RP98–58–001. Such order required Transco to refile tariff sheets that were duplicatively numbered in Transco's December 23, 1997 filing in that docket. Transco tendered the sheets enumerated in Appendix A with the revised pagination.

Transco states that it is serving copies of the instant filing on parties to Docket No. RP98–58 and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests should be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP97–159–009]

Transcontinental Gas Pipe Line Corporation; Notice of Request for Extension of Waiver

January 15, 1998.

Take notice that on November 26, 1997, Transcontinental Gas Pipe Line Corporation (Transco) filed in Docket No. RP97–159–009 a request pursuant to 18 CFR § 385.2008 for extension of waiver to permit Transco to continue to use non-standard GISB data elements and datasets for an additional six months until June 1, 1998.

Transco states that a May 15, 1997, Commission Order on Compliance Filing and rehearing (79 FERC ¶ 61,172 (1997), granted a waiver to permit Transco to use non-standard data elements and datasets until December 1, 1997, so that implementation of the Internet electronic communication standards can proceed while GISB is considering requests for modification of the datasets.

Transco states that its requests for modification are still pending before GISB, and that under the circumstances, good cause exists for the Commission to grant Transco an extension of the waiver granted in the May 15 order to allow GISB additional time for consideration of Transco's requests.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426 in accordance with Section 385.211 of the commission's Rules and Regulations. All such protests must be filed on or before January 23, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this application are on file with the Commission and are available for public inspection in the Public Reference Room.

Williston Basin Interstate Pipeline Company; Notice of Request Under Blanket Authorization

January 15, 1998.

Take notice that on January 9, 1998, Williston Basin Interstate Pipeline Company (Williston Basin), 200 North Third Street, Suite 300, Bismarck, North Dakota 58501, filed a request with the Commission in Docket No. CP98–177–000, pursuant to Sections 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to utilize existing taps for transportation of natural gas deliveries to Montana-Dakota Utilities Co. (Montana-Dakota) authorized in blanket certificate issued in Docket No. CP82–487–000, *et al.*, all as more fully set forth in the request on file with the Commission and open to public inspection.

Williston Basin proposes to transport natural gas to Montana-Dakota at three existing transmission line taps, for ultimate use by additional end-use customers. The taps are located in Dawson County and Richland County, Montana, and Pennington County, South Dakota.

Any person or the Commission's staff may, within 45 days after the Commission has issued this notice, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the allowed time, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the NGA.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–167–000]

PG&E Gas Transmission, Northwest Corporation; Notice of Intent To Prepare an Environmental Assessment for the Proposed PG&E Gas Transmission, Northwest Corporation's 1998 Expansion Project and Request for Comments on Environmental Issues and Notice of Site Visit

January 15, 1998.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction, installation and operation of three new compressor units at three of its existing compressor stations proposed in the PG&E Gas Transmission, Northwest Corporation's 1998 Expansion Project.[1] This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

Summary of the Proposed Project

PG&E Gas Transmission, Northwest Corporation (PG&E), formerly Pacific Gas Transmission Company, proposes to expand the capacity of its facilities in Oregon, Washington, and Idaho. PG&E states that the proposed compression upgrades would allow PG&E to transport between Kingsgate, British Columbia and Stanfield, Oregon up to an additional 56,000 dekatherms per day on an annual basis. PG&E seeks to increase the total horsepower (hp) at three of its existing compressor stations:

- 3,100 hp increase at Station 4, located at milepost (MP) 46.7 on PG&E's existing mainline pipeline in Bonner County, Idaho; specifically, by exchanging an existing 13,000 hp unit with a new 15,000 hp unit and exchanging an existing 13,000 hp unit with a low-hour 14,100 hp refurbished unit;
- 4,700 hp increase at Station 7, located at MP 212.6 on PG&E's existing mainline pipeline in Walla Walla County, Washington; specifically, by upgrading its existing 35,000 hp unit to 39,700 hp through equipment modifications and control setpoint changes; and
- 1,500 hp increase at Station 9, located at MP 319.5 on PG&E's existing mainline pipeline in Morrow County, Oregon; specifically, by exchanging an existing 12,600 hp unit with a new 14,100 hp unit. PG&E would install a new, higher capacity oil cooler to be located immediately outside the compressor building and would adjust the temperature control setpoint to the turbine unit.

The general location map and plot plans for each of the proposed compressor station upgrades are shown in Appendix 1. If you are interested in obtaining procedural information, please write to the Secretary of the Commission.

Land Requirements for Construction

All construction activities would take place within the existing fencelines of all three compressor stations. No new land disturbance outside existing compressor station fencelines would be required.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping". The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents

[1] PG&E Gas Transmission, Northwest Corporation's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

VOL 63 ISS 14 JA 22 1998 UMI

of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Air and noise quality
- Land use
- Geology and soils
- Public safety
- Endangered and threatened species
- Cultural resources

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

PG&E has proposed a system alternative, known as the Pipeline Looping Alternative, which would involve the looping of PG&E's existing mainline with a third, 42-inch-diameter pipeline located between Mainline valve (MV) 5–1 in Kootenai County, Idaho and MV 5–2 in Spokane County, Washington. The pipeline loop would be about 10.7 miles in length. See appendix 2 for an approximate location of this system alternative.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provide by PG&E. This preliminary list of issues may be changed based on your comments and our analysis.

- Four noise-sensitive areas (NSAs) have been identified in close proximity to Station 4.
- One NSA has been identified in close proximity to Station 7.
- One NSA has been identified in close proximity to Station 9.
- Possible consideration of the Pipeline Looping Alternative in lieu of expanding the three existing compressor stations.

No nonjurisdictional facilities have been identified for this project.

Public Participation

You can make a difference by sending a letter addressing your specific comments or concerns about the project. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative routes, and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please carefully follow these instructions to ensure that your comments are received in time and properly recorded:

- Send two copies of your letter to: Mr. David P. Boergers, Acting Secretary, Federal Energy Regulatory Commission, 888 First St., N.E., Room 1A, Washington, DC 20426;
- Label one copy of the comments for the attention of the Environmental Review and Compliance Branch, PR–11.1;
- Reference Docket No. CP98–167–000; and
- Mail your comments so that they will be received in Washington, DC on or before February 17, 1998.

Notice of Site Visit

On January 22, 1998, the staff of the Office of Pipeline Regulation will be conducting an environmental site visit of PG&E's Pipeline Looping Alternative. All parties may attend. Those planning to attend must provide their own transportation.

For further information about where the site inspection will begin, please contact Paul McKee at (202) 208–1088.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding or become an "intervenor". Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must files a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 3).

You do not need intervenor status to have your environmental comments considered.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: Cooperative Agreements and State Contracts for Superfund Response Actions (OMB Control #2010–0020, εχπιρατιον δατε—02/28/98).

DATES: Comments must be submitted on or before February 23, 1998.

FOR FURTHER INFORMATION OR A COPY: Contact Sandy Farmer at EPA by phone at (202) 260–2740, by e-mail at farmer.sandy@epamail.epa.gov, or download off the Internet at http://www.epa.gov/icr/icr.htm and refer to EPA ICR No. 1487.06.

SUPPLEMENTARY INFORMATION:

Title: Cooperative Agreements and Superfund contracts for Superfund Response Actions (OMB Control No. 2010–0020; EPA–ICR No. 1487.06) expiring 02/28/98. This is a request for an extension of a currently approved Information Collection Request (ICR).

Abstract

This ICR authorizes the collection of information under EPA's Superfund Rule (40 CFR, part 35, subpart O) that establishes the administrative requirements for the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)—funded cooperative agreements for State, local and Federally recognized Indian tribal government response actions. The regulation also codifies the administrative requirements for Superfund State Contracts for non-State lead remedial responses. This regulation includes only those provisions as mandated by CERCLA, required by OMB Circulars, or added by EPA to ensure sound and effective financial assistance management. The information is collected from applicants/recipients of EPA assistance and used to make awards, pay recipients and collect information on how Federal funds are being spent. EPA needs the information to meet its Federal stewardship responsibilities. Recipient responses are required to obtain a benefit (federal funds) under 40 CFR part 31, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments." An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 49 CFR Chapter 15. The **Federal Register** Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 07/02/97 (vol. 62, No. 127, pg. 35803; no comments were received).

Burden Statement

The annual reporting and record keeping burden for this collection of information is estimated to average [10] hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing information, processing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State, Local or Tribal Governments.

Estimated Number of Respondents: 500.

Frequency of Response: As required.

Estimated Total Annual Hour Burden: 5,000.

Estimated Total Annualized Cost Burden: 5,000$36/hr=$180,000.00.

Send Comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1487.06 and OMB Control No. 2010–0020—in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, S.W. Washington, D.C. 20460

and

Office of Information and Regulatory Affairs, Office of Management and Budget, 727 17th Street, N.W., Washington, D.C. 20502

Dated: January 15, 1998.

Joseph Retzer,

Director, Regulatory Information Division.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

Privacy Act of 1974: Systems of Records

AGENCY: Federal Communications Commission (FCC).

ACTION: Notice of a new system of records.

SUMMARY: This notice meets the requirements of the Privacy Act of 1974 regarding the publication of an agency's notice of systems of records. It documents a new FCC system of records.

DATES: Written comments on the proposed altered system should be received by February 23, 1998. Office of Management and Budget, which has oversight responsibility under the Privacy Act to review the system may submit comments on or before March 3, 1998. The proposed system shall be effective without further notice on March 3, 1998 unless the FCC receives comments that would require a contrary determination. As required by 5 U.S.C. 552a(o) of the Privacy Act, the FCC submitted reports on this new system to both Houses of Congress.

ADDRESSES: Comments should be mailed to Judy Boley, Privacy Act Officer, Performance Evaluation and Records Management, Room 234, FCC, 1919 M Street, NW., Washington, DC 20554. Written comments will be available for inspection at the above address between 9:00 a.m. and 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Judy Boley, Privacy Act Officer, Performance Evaluation and Records Management, Room 234, FCC, 1919 M Street, NW., Washington, DC 20554, (202) 418–0214 or via internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: As required by the Privacy Act of 1974, 5 U.S.C. 552a(e)(4), this document sets forth notice of the proposed system of records maintained by the FCC. This notice is a summary of more detailed information which may be viewed at the location and hours given in the **ADDRESSES** section above.

The proposed system of records is as follows:

FCC/Central-10, "FCC Access Control System." This system will be used by the FCC Security Officer and the Personnel Security Specialist of the Security Office to control and account for all persons entering the facility and by which the FCC may ascertain the times persons were in the facility.

FCC/Central-10

SYSTEM NAME:

FCC Access Control System.

SYSTEM LOCATION:

Federal Communications Commission (FCC), Office of Managing Director, Security Operations Staff, 1919 M Street, NW., Washington, DC 20554.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current FCC employees, current contractors, special visitors and visitors.

CATEGORIES OF RECORDS IN THE SYSTEM:

The system consists of a computer database, with all records containing the last and first name, filed alphabetically by last name, with a corresponding Badge Number. FCC employee database will include first and last name, telephone number, Bureau/Office, supervisor, room number, date of issuance, and parking permit number, if applicable. Contractor database will include first and last name, contractor company name, telephone number, FCC point of contact and telephone number, and date of issuance. Proof of identity required through photographic identification is necessary prior to issuance of contractor badge.

Special visitor's database will include first and last name, employer's name, address, telephone number, point of contact at the employer, and date of issuance. Proof of identity required through photographic identification is necessary prior to issuance of special visitor badge.

Visitor database will include first and last name, telephone number, destination, agency or firm name, photographic identification along with numerical identifier.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Presidential Directive based on Department of Justice Report entitled Vulnerability Assessment of Federal Facilities.

PURPOSE(S):

This system provides a method by which the FCC can control and account

VOL
63
ISS
14
JA
22
1998
UMI

for all persons entering the facility and by which the FCC may ascertain the times persons were in the facility.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Where there is an indication of a violation or potential violation of a statute, regulation, rule or order, records from this system may be referred to the appropriate Federal, state, or local agency responsible for investigating or prosecuting a violation or for enforcing or implementing the statute, rule, regulation or order.

2. A record from this system may be disclosed to a request for information from a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information if necessary to obtain information relevant to a investigation.

3. A record on an individual in this system of records may be disclosed to a Congressional office in response to an inquiry the individual has made to the Congressional office.

4. A record from this system of records may be disclosed to GSA and NARA for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall not be used to make a determination about individuals.

In each of these cases, the FCC will determine whether disclosure of the records is compatible with the purpose for which the records were collected.

5. Records from this system may be disclosed to FCC supervisors or management representatives to ascertain (either confirm or refute) the times employees were in the facility.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in a password protected computer database.

RETRIEVABILITY:

Records are retrieved by the name of individuals on whom they are maintained, by a limited number of authorized individuals.

SAFEGUARDS:

The computer terminals are stored within a secured area.

RETENTION AND DISPOSAL:

When an employee/contractor leaves the agency the file in the database is deleted. Special visitor badges are given a 1 year valid period, after which the card will automatically deactivate. All returned visitor cards will be reused on a daily basis. Transaction data for all cards will be placed on backup discs and stored for six months.

SYSTEM MANAGER(S) AND ADDRESS:

FCC, Office of Managing Director, Security Operations Staff, 1919 M Street, N.W., Washington, DC 20554.

NOTIFICATION PROCEDURE:

Individuals wishing to inquire whether this system of records contains information about them should contact the system manager indicated above. Individuals must furnish the following information for their records to be located and identified:

Full name.

RECORD ACCESS PROCEDURES:

Individuals wishing to request access to records about them should contact the system manager indicated above. Individuals must furnish the following information for their record to be located and identified:

Full name.

An individual requesting access must also follow FCC Privacy Act regulations regarding verification of identity and access to records (47 CFR 0.554 and 0.555).

CONTESTING RECORD PROCEDURES:

Individuals wishing to request amendment of their records should contact the system manager indicated above. Individuals must furnish the following information for their record to be located and identified:

Full name.

An individual requesting amendment must also follow the FCC Privacy Act regulations regarding verification of identity and amendment of records (47 CFR 0.556 and 0.557).

RECORD SOURCE CATEGORIES:

The individual to whom the information applies.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35). Currently, the FDIC is soliciting comments concerning an information collection titled "Community Reinvestment Act."

DATES: Comments must be submitted on or before March 23, 1998.

ADDRESSES: Interested parties are invited to submit written comments to Tamara R. Manly, Management Analyst (Regulatory Analysis), (202) 898–7453, Office of the Executive Secretary, Room 4022, Attention: Comments/OES, Federal Deposit Insurance Corporation, 550 17th Street N.W., Washington, D.C. 20429. All comments should refer to "Community Reinvestment Act." Comments may be hand-delivered to the guard station at the rear of the 17th Street Building (located on F Street), on business days between 7:00 a.m. and 5:00 p.m. [FAX number (202) 898–3838; Internet address: comments@fdic.gov].

A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Alexander Hunt, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Tamara R. Manly, at the address identified above.

SUPPLEMENTARY INFORMATION: Proposal to renew the following currently approved collection of Information:

Title: Community Reinvestment Act.

OMB Number: 3064–0092.

Frequency of Response: Annually.

Affected Public: Any depository institution that serves the credit needs of the communities in which they are chartered to do business.

Estimated Number of Respondents: 6,169.

Estimated Time per Response: 12 hours.

Estimated Total Annual Burden: 74,028 hours.

General Description of Collection: The Community Reinvestment Act and regulation 12 CFR 345 require each appropriate Federal financial supervisory agency to use its authority when examining financial institutions, to encourage such institutions to help meet credit needs of the local communities in which they are chartered consistent with safe and sound operation of such institutions.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the collection should be modified prior to submission to OMB for review and approval. Comments submitted in response to this notice also will be summarized or included in the FDIC's requests to OMB for renewal of this collection. All comments will become a matter of public record.

Dated at Washington, D.C., this 14th day of January, 1998.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Submission to OMB Under Delegated Authority

Background

Notice is hereby given of the final approval of a proposed revised information collection by the Board of Governors of the Federal Reserve System (Board) under OMB delegated authority, as per 5 CFR 1320.16 (OMB Regulations on Controlling Paperwork Burdens on the Public). The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

FOR FURTHER INFORMATION CONTACT: Chief, Financial Reports Section—Mary M. McLaughlin—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, DC 20551 (202-452-3829) OMB Desk Officer—Alexander T. Hunt—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, DC 20503 (202-395-7860)

Final approval under OMB delegated authority of the extension for three years, with revision, of the following report:

1. Report title: Money Market Mutual Fund Assets Reports

Agency form number: FR 2051a, b, c, and d

OMB Control number: 7100-0012

Effective Date: February 23, 1998.

Frequency: weekly and monthly

Reporters: money market mutual funds

Annual reporting hours: 5,580

Estimated average hours per response: 3 minutes (FR 2051a), 12 minutes (FR 2051b)

Number of respondents: 1,500 (FR 2051a), 700 (FR 2051b)

Small businesses are affected.

General description of report: This information collection is voluntary (12 U.S.C. 353 et seq.) and is given confidential treatment (5 U.S.C. 552(b)(4)).

Abstract: These reports provide information on the assets of money market mutual funds which the Federal Reserve System uses in the construction of the monetary aggregates and for current analysis of money market conditions and banking developments.

The Federal Reserve has reduced and simplified this information collection. While the weekly FR 2051a is unchanged, the monthly FR 2051b report has been reduced by condensing six items into three. The weekly FR 2051c and d reports have been discontinued.

Board of Governors of the Federal Reserve System, January 15, 1998.

William W. Wiles,

Secretary of the Board.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 17, 1998.

A. Federal Reserve Bank of Atlanta (Lois Berthaume, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303-2713:

1. Hibernia Corporation, New Orleans, Louisiana; to merge with Firstshares of Texas, Inc., Marshall, Texas, and thereby indirectly acquire First National Bank, Marshall, Texas.

B. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198-0001:

1. CountryBanc Holding Company, Edmond, Oklahoma; to acquire 100 percent of the voting shares of First State Holding Company of Elkhart, Elkhart, Kansas, and thereby indirectly acquire First State Bank of Elkhart, Elkhart, Kansas.

C. Federal Reserve Bank of Dallas (Genie D. Short, Vice President) 2200 North Pearl Street, Dallas, Texas 75201-2272:

1. MainBancorp, Inc., Austin, Texas, and Maincorp Intermediate Holding Co., Inc., Wilmington, Delaware; to acquire 100 percent of the voting shares of, and thereby merge with First National Bancorporation, Inc., Ennis, Texas, and thereby indirectly acquire First National Bank of Ennis, Ennis, Texas.

Board of Governors of the Federal Reserve System, January 16, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

VOL 63 ISS 14 JA 22 1998 UMI

FEDERAL RESERVE SYSTEM

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 17, 1998.

A. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198-0001:

1. Cornhusker Growth Corporation, Lincoln, Nebraska; to acquire Johnston Growth Corporation, Johnston, Iowa, and thereby indirectly acquire Johnston Charter Bank, Johnston, Iowa, a de novo organization, pursuant to § 225.28(b)(4) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, January 16, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

The National Center for Infectious Diseases (NCID) of the Centers for Disease Control and Prevention (CDC) Announces the Following Workshop

Name: Addressing Emerging Infectious Diseases II: Entering the 21st Century.

Times and Dates: 10:30 a.m.–5:45 p.m., January 22, 1998; 8:30 a.m.–3 p.m., January 23, 1998.

Place: CDC, Auditorium A, 1600 Clifton Road, NE, Atlanta, Georgia 30333.

Status: Open to the public, limited only by the space available.

Purpose: The purpose of this workshop is to discuss the proposed update to the CDC Plan, "Addressing Emerging Infectious Diseases Threats: A Prevention Strategy for the United States."

Matters To Be Discussed: The Workshop will consist of a revision and up-dating of goals, directions, prevention, and control strategies of emerging and re-emerging infectious diseases of the 21st Century. The agenda will include an NCID update; an overview of CDC Emerging Infections Plan 1998–2003; discussion; charge to the workgroups on (a) surveillance and response, (b) applied research, (c) prevention and control, and (d) infrastructure; a review of the workgroup progress; and reports.

The working groups will consist of representatives from national and international organizations, and State and Federal representatives.

Agenda items are subject to change as priorities dictate.

Written comments are welcome and should be received by the contact person listed below prior to the opening of the meeting.

Contact Person for More Information: Diane S. Holley, Office of the Director, NCID, CDC, M/S C–20, 1600 Clifton Road, NE, Atlanta, Georgia 30333, telephone 404/639–0078.

Dated: January 16, 1998.

Carolyn J. Russell,

Director, Management Analysis and Services Office Centers for Disease Control and Prevention (CDC).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Federal Allotments to States for Social Services Expenditures, Pursuant to Title XX, Block Grants to States for Social Services; Revised Promulgation for Fiscal Year 1998

AGENCY: Administration for Children and Families, Department of Health and Human Services.

ACTION: Notification of allocation of title XX—social services block grant allotments for Fiscal Year 1998.

SUMMARY: This issuance sets forth the individual revised allotments to States for Fiscal Year 1998, pursuant to title XX of the Social Security Act, as amended (Act). The initial **Federal Register** notice was published on December 2, 1996 based on the authorization level of $2.380. The appropriation which was enacted on November 13, 1997 (Pub. L. 105–78) decreased the authorization amount for title XX from $2.380 billion to $2.299 billion which is a decrease of $81 million. Grant awards for Fiscal Year 1998 will be issued based on the appropriation amount.

FOR FURTHER INFORMATION CONTACT: Frank A. Burns, (202) 401–5536.

SUPPLEMENTARY INFORMATION: For Fiscal Year 1998, the allotments are based upon the Bureau of Census population statistics contained in its reports "Population of States by Broad Age Groups and Sex: 1990 and 1995 (CB96–88, Table 4) released May 31, 1996, and "1990 Census of Population and Housing" (CPH–6–AS and CPH–6–CNMI) published April 1992, which was the most recent data available from the Department of Commerce at the time of the Department's initial promulgation.

EFFECTIVE DATE: The allotments are effective October 1, 1997.

FISCAL YEAR 1998 FEDERAL ALLOTMENTS TO STATES FOR SOCIAL SERVICES—TITLE XX BLOCK GRANTS

	Initial FY 98 allotment	Revised FY 98 allotment

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 95N–0192]

Agency Information Collection Activities; Announcement of OMB Approval

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a collection of information entitled "Quality Mammography Standards" has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA).

FOR FURTHER INFORMATION CONTACT: Margaret R. Schlosburg, Office of Information Resources Management (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1223.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 28, 1997 (62 FR 55851), the agency announced that the proposed information collection had been submitted to OMB for review and clearance under section 3507 of the PRA (44 U.S.C. 3507). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has now approved the information collection and has assigned OMB control number 0910–0309. The approval expires on December 31, 2000.

Dated: January 14, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

[Docket No. 98D–0016]

Draft Guidance on Professional Flexible Labeling of Antimicrobial Drugs; Availability; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft level 1 Guidance for Industry entitled "Professional Flexible Labeling of Antimicrobial Drugs (#66)." This draft guidance is intended to provide specific guidance on the development of Professional Flexible Labeling (PFL) for therapeutic veterinary prescription antimicrobial drugs. The agency is requesting comments on this draft guidance.

DATES: Submit written comments by April 22, 1998.

ADDRESSES: Submit written comments on the draft guidance to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857. Comments should be identified with the full title of the draft guidance and the docket number found in brackets in the heading of this document.

Submit written requests for single copies of this draft guidance to the Communications Staff (HFV–12), Center for Veterinary Medicine, Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855. Send two self-addressed adhesive labels to assist that office in processing your requests.

Copies of this draft guidance document may also be obtained from the CVM Home Page (http://www.cvm.fda.gov) on the Internet.

FOR FURTHER INFORMATION CONTACT: John D. Baker, Center for Veterinary Medicine (HFV–110), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–827–0130. E-mail: jbaker@bangate.fda.gov.

SUPPLEMENTARY INFORMATION:

Background

For many years, CVM has approved veterinary prescription antimicrobial products labeled with single fixed dosages for a narrow range of specific diseases and organisms. The very narrow label indications often failed to address the fact that, while some specific bacteria produce repeatable, recognized disease, many organisms are either opportunistic or are known to produce a variety of clinical manifestations. In addition, with the approval of single fixed dosages, the efficacy of some products could become suboptimal as bacterial susceptibility patterns change with time.

The basic concept of Professional Flexible Labeling (PFL) is to provide prescription veterinary products that carry useful prescribing information for the range of clinical situations included within their approved conditions of use. Implementation of PFL is based on the recognition that, as a function of their medical training, veterinarians possess the knowledge, skills, and abilities to interpret medical diagnostic and prescribing information. Accordingly, they are able to develop these data into appropriate therapeutic regimens. In the course of their professional studies, veterinarians are trained in microbiology, the interpretation of bacterial culture and sensitivity determinative procedures, and pharmacokinetics. This knowledge gives them the ability to determine the appropriateness of a particular drug for use in a specific case.

Under section 502 (f)(1) of the Federal Food, Drug, and Cosmetic Act (the act), a drug is deemed to be misbranded unless its labeling bears adequate directions for use (21 U.S.C. 352(f)(1)). The regulations regarding veterinary drugs at 21 CFR 201.105 exempt a drug from this provision of the act if it is in the possession of a licensed veterinarian for use in the course of professional practice, is dispensed in accordance with section 503(f) of the act (21 U.S.C. 353(f)), and its label bears certain stipulated information. Section 504 of the act (21 U.S.C. 354) stipulates that a veterinary feed directive drug, a drug intended for use in or on animal feed which is limited to use under the supervision of a licensed veterinarian, is exempt from section 502(f) when labeled, distributed, held, and used in accordance with the conditions set forth in section 504.

Drugs labeled in accordance with the PFL concept require the training of licensed veterinarians to help ensure appropriate clinical usage. Such labels would not provide adequate directions for use by the lay person. Therefore, use of PFL on nonprescription or nonveterinary feed directive drugs would cause the drugs to be misbranded under section 502 (f)(1) of the act, PFL-labeled drugs must be classified as prescription animal drugs or veterinary feed directive drugs. Accordingly, the PFL concept discussed in this document may apply to either veterinary prescription or veterinary feed directive antimicrobial drugs.

The PFL concept has been a topic of discussion for many years. Recent workshops on PFL were held in April and December 1995 under the cosponsorship of the Center for Veterinary Medicine, the American Academy of Veterinary Pharmacology and Therapeutics, the Animal Health Institute, and the American Veterinary Medical Association.

A summary of the discussions and opinions expressed in the April, 1995 workshop were published in the *Journal of the American Veterinary Medical Association (JAVMA)*, October 1, 1995. At the conclusion of the December, 1995 workshop, a task force prepared a report on the PFL concept. The task force report, which included a model drug label, was published in the *JAVMA* on July 1, 1996.

This draft guidance is intended to describe how the PFL concept can be applied to prescription antimicrobial products to enable veterinary practitioners to apply their expertise to appropriately, effectively, and safely use antimicrobials for specific clinical cases. The draft document provides specific guidance for drug sponsors on the development of PFL labeling for therapeutic veterinary prescription antimicrobial drugs. Ultimately, the labeling of products such as described in this draft guidance will better accommodate the needs of veterinary practitioners in utilizing animal drugs to treat animals in the course of their professional practices.

Approaches to PFL may not be equally applicable to all classes of therapeutic prescription products (e.g., antimicrobials, antiparasitics, physiologics). Therefore, CVM intends to develop PFL guidances that are specific to the various classes of drugs. This draft guidance document specifically addresses the application of the PFL concept to prescription therapeutic antimicrobial products.

A sponsor may follow the guidance provided in this draft document, or a sponsor may choose to follow alternate procedures or practices. If a sponsor elects to use alternate procedures or practices, that sponsor may wish to discuss the matter *a priori* with the agency to prevent an expenditure of money and effort on activities that may later be determined to be unacceptable to FDA.

This draft document represents current FDA thinking on PFL for antimicrobial drugs. This draft guidance document does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternate approach may be used if such an approach satisfies the requirements of the applicable statute, regulations, or both. FDA may amend this draft guidance document based upon comments submitted by interested persons.

Request for Comments

Interested persons may, on or before April 22, 1998, submit to the Dockets Management Branch (address above) written comments on the draft guidance document. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document, and with the full title of the guidance document.

The draft guidance and received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. An electronic version of this guidance is available on the Internet at http://www.fda.gov. After review of these comments, FDA will finalize the guidance document with any appropriate changes. Thereafter, interested persons may submit written comment on the guidance document directly to the CVM Communications Staff (address above).

Dated: January 14, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[Document Identifier: HCFA–R–226]

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: New Collection; *Title of Information Collection:* Evaluation of Medicare Choices Demonstration; *Form No.:* HCFA–R–226; *Use:* The objective of the evaluation of the Medicare Choices Demonstration is to determine whether the newer types of managed care delivery systems in the demonstration are effective at attracting and retaining Medicare enrollees and providing a high quality, cost-effective care. The key research questions HCFA will ask Medicare enrollees include: (A) Beneficiary choice, knowledge, and biased selection. Why do beneficiaries enroll (or not enroll) in plans? What proportion of enrollees disenroll, and why? What is the nature and extent of biased selection in the demonstration, and does it vary across plans? How well do enrollees understand their plans and the rules and procedures for obtaining care? (B) Effects on service use. What are the effects of the plans on the use of Medicare-covered services? Are some plans more effective at controlling service use than others? (C) Effects on Medicare costs. What are the effects of the various payment methods being tested in the demonstration on Medicare costs? (D) Effects on satisfaction, access, and quality. What are the effects of the plans on enrollee satisfaction, access to care, and quality of care? How does this vary across plans? *Frequency:* one time; *Affected Public:* Individuals or Households; *Number of Respondents:* 10,000; *Total Annual Responses:* 10,000; *Total Annual Hours:* 3,880.

To obtain copies of the supporting statement for the proposed paperwork collections referenced above, access HCFA's WEB SITE ADDRESS at http://www.hcfa.gov/regs/prdact95.htm, or to obtain the supporting statement and any related forms, E-mail your request, including your address and phone number, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Information Services, Information Technology Investment Management Group, Division of HCFA Enterprise Standards, Attention: John Rudolph, Room C2–26–17, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

VOL 63 ISS 14 JA 22 1998 UMI

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Notice of Meeting and Correction of Meeting Notice

Pursuant to Public Law 92–463, notice is hereby given of a correction of a notice of meeting of the SAMHSA National Advisory Council and of the meeting of the Center for Substance Abuse Treatment (CSAT) National Advisory Council to be held in January 1998.

Public notice was given in the **Federal Register** on January 8, 1998 (Volume 63, Number 5, page 1120) that the SAMHSA National Advisory Council would be meeting on January 21, 1998, at the Parklawn Building, Room 17–89. The date of this meeting has subsequently changed to January 22, 1998. The agenda of the meeting and the contact for additional information remain as announced.

With regard to the CSAT National Advisory Council meeting, a portion of the meeting will be open and include discussion of the Center's policy issues and current administrative, legislative, and program developments. If anyone needs special accommodations for persons with disabilities please notify the Contact listed below.

The meeting will include the discussion of information about the Center for Substance Abuse Treatment's procurement plans. Therefore a portion of the meeting will be closed to the public as determined by the Administrator, SAMHSA, in accordance with Title 5 U.S.C. 552b(c)(3) and 5 U.S.C. App. 2, section 10(d).

A summary of the meeting and roster of council members may be obtained from: Mrs. Marjorie Cashion, CSAT, National Advisory Council, Rockwall II Building, Suite 619, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–8923.

Substantive program information may be obtained from the contact whose name and telephone number is listed below.

Committee Name: Center for Substance Abuse Treatment, National Advisory Council.

Meeting Date: January 27, 1998—8:30 a.m.–5:00 p.m; January 28, 1998—9:00 a.m.–2:00 p.m.

Place: Omni Shoreham Hotel, Hampton Room, 2500 Calvert Street, N.W., Washington, D.C. 20008.

Type: Closed: January 27, 1998—8:30 a.m.–9:00 a.m. Open: January 27, 1998—9:00 a.m.–5:00 p.m.; January 28, 1998—9:00 a.m.–2:00 p.m.

Contact: Marjorie M. Cashion, Executive Secretary, Telephone: (301) 443–8923. and FAX: (301) 480–6077.

This notice is being published with less than 15 days prior to the meeting due to the urgent need to meet timing limitations imposed by the review and funding cycle.

Dated: January 20, 1998.

Jeri Lipov,

Committee Management Officer, Substance Abuse and Mental Health Services Administration.

[FR Doc. 98–1611 Filed 1–20–98; 12:12 pm]

BILLING CODE 4162–20–U

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4263–N–72]

Submission for OMB Review: Comment Request

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due date: February 23, 1998.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments must be received within thirty (30) days from the date of this Notice. Comments should refer to the proposal by name and/or OMB approval number and should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Wayne Eddins, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 708–1305. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Eddins.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: January 15, 1998.

David S. Cristy,

Director, Information Resources, Management Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Title of Proposal: Survey Instructions and Certificate.

Office: Housing.

OMB Approval Number: 2502–0010.

Description of the Need for the Information and its Proposed Use: A land survey and related information are necessary to secure a marketable title and title insurance for the property that provides security for project mortgage insurance furnished under the FHA multifamily programs. Form HUD–2457 provides a uniform method for acceptably meeting program criteria to minimize risk to the insurance fund and the U.S. Treasury that might arise from inadequate project land surveys and related data.

Form Number: HUD–2457.

Respondents: Business or Other For-Profit and Not-For-Profit Institutions.

Frequency of Submission: On Occasion.

Reporting Burden:

	Number of respondents	×	Frequency of response	×	Hours per response	=	Burden hours
HUD–2457	750		2		.5		750

Total Estimated Burden Hours: 750.

Status: Reinstatement, with changes.

Contact: Ben J. Jacinto, HUD, (202) 708–2866, x2533; Joseph F. Lackey, Jr., OMB, (202) 395–7316.

Dated: January 15, 1998.

[FR Doc. 98–1435 Filed 1–21–98; 8:45 am]

BILLING CODE 4210–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4315–N–01]

Mortgage and Loan Insurance Programs Under the National Housing Act—Debenture Interest Rates

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, (HUD).

ACTION: Notice of change in debenture interest rates.

SUMMARY: This notice announces changes in the interest rates to be paid on debentures issued with respect to a loan or mortgage insured by the Federal Housing Commissioner under the provisions of the National Housing Act (the "Act"). The interest rate for debentures issued under Section 221(g)(4) of the Act during the six-month period beginning January 1, 1998, is 6¼ percent. The interest rate for debentures issued under any other provision of the Act is the rate in effect on the date that the commitment to insure the loan or mortgage was issued, or the date that the loan or mortgage was endorsed (or initially endorsed if there are two or more endorsements) for insurance, whichever rate is higher. The interest rate for debentures issued under these other provisions with respect to a loan or mortgage committed or endorsed during the six-month period beginning January 1, 1998, is 6⅜ percent.

FOR FURTHER INFORMATION CONTACT: James B. Mitchell, Department of Housing and Urban Development, 451 7th Street, S.W., Room 6164, Washington, D.C. 20010. Telephone (202) 708–1220 ext. 2612, or TDD (202) 708–4594 for hearing- or speech-impaired callers. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: Section 224 of the National Housing Act (24 U.S.C. 1715o) provides that debentures issued under the Act with respect to an insured loan or mortgage (except for debentures issued pursuant to Section 221(g)(4) of the Act) will bear interest at the rate in effect on the date the commitment to insure the loan or mortgage was issued, or the date the loan or mortgage was endorsed (or initially endorsed if there are two or more endorsements) for insurance, whichever rate is higher. This provision is implemented in HUD's regulations at 24 CFR 203.405, 203.479, 207.259(e)(6), and 220.830. Each of these regulatory provisions states that the applicable rates of interest will be published twice each year as a notice in the **Federal Register**.

Section 224 further provides that the interest rate on these debentures will be set from time to time by the Secretary of HUD, with the approval of the secretary of the Treasury, in an amount not in excess of the annual interest rate determined by the Secretary of the Treasury pursuant to a statutory formula based on the average yield of all outstanding marketable Treasury obligations of maturities of 15 or more years.

The Secretary of the Treasury (1) has determined, in accordance with the provisions of Section 224, that the statutory maximum interest rate for the period beginning January 1, 1998, is 6⅜ percent and (2) has approved the establishment of the debenture interest rate by the Secretary of HUD at 6⅜ percent for the six-month period beginning January 1, 1998. This interest rate will be the rate borne by debentures issued with respect to any insured loan or mortgage (except for debentures issued pursuant to Section 221(g)(4)) with an insurance commitment or endorsement date (as applicable) within the first six months of 1998.

For convenience of reference, HUD is publishing the following chart of debenture interest rates applicable to mortgages committed or endorsed since January 1, 1980:

Effective interest rate	On or after	Prior to
9½	Jan. 1, 1980	July 1, 1980.
9⅞	July 1, 1980	Jan. 1, 1981.
11¾	Jan. 1, 1981	July 1, 1981.
12⅞	July 1, 1981	Jan. 1, 1982.
12¾	Jan. 1, 1982	Jan. 1, 1983.
10¼	Jan. 1, 1983	July 1, 1983.
10⅜	July 1, 1983	Jan. 1, 1984.
11½	Jan. 1, 1984	July 1, 1984.
13⅜	July 1, 1984	Jan. 1, 1985.
11⅝	Jan. 1, 1985	July 1, 1985.
11⅛	July 1, 1985	Jan. 1, 1986.
10¼	Jan. 1, 1986	July 1, 1986.
8¼	July 1, 1986	Jan. 1, 1987.
8	Jan. 1, 1987	July 1, 1987.
9	July 1, 1987	Jan. 1, 1988.
9⅛	Jan. 1, 1988	July 1, 1988.
9⅜	July 1, 1988	Jan. 1, 1989.
9¼	Jan. 1, 1989	July 1, 1989.
9	July 1, 1989	Jan. 1, 1990.
8⅛	Jan. 1, 1990	July 1, 1990.
9	July 1, 1990	Jan. 1, 1991.
8¾	Jan. 1, 1991	July 1, 1991.
8½	July 1, 1991	Jan. 1, 1992.

VOL 63 ISS 14 JA 22 1998 UMI

Effective interest rate	On or after	Prior to
8	Jan. 1, 1992	July 1, 1992.
8	July 1, 1992	Jan. 1, 1993.
7¾	Jan. 1, 1993	July 1, 1993.
7	July 1, 1993	Jan. 1, 1994.
6⅝	Jan. 1, 1994	July 1, 1994.
7¾	July 1, 1994	Jan. 1, 1995.
8⅜	Jan. 1, 1995	July 1, 1995.
7¼	July 1, 1995	Jan. 1, 1996.
6½	Jan. 1, 1996	July 1, 1996.
7¼	July 1, 1996	Jan. 1, 1997.
6¾	Jan. 1, 1997	July 1, 1997.
7⅛	July 1, 1997	Jan. 1, 1998.
6⅜	Jan. 1, 1998	July 1, 1998.

Section 221(g)(4) of the Act provides that debentures issued pursuant to that paragraph (with respect to the assignment of an insured mortgage to the Secretary) will bear interest at the "going Federal rate" of interest in effect at the time the debentures are issued. The term "going Federal rate" is defined to mean the interest rate that the Secretary of the Treasury determines, pursuant to a statutory formula based on the average yield on all outstanding marketable Treasury obligations of eight- to twelve-year maturities, for the six-month periods of January through June and July through December of each year. Section 221(g)(4) is implemented in the HUD regulations at 24 CFR 221.790.

The Secretary of the Treasury has determined that the interest rate to be borne by debentures issued pursuant to Section 221(g)(4) during the six-month period beginning January 1, 1998, is 6¼ percent.

HUD expects to publish its next notice to change in debenture interest rates in July 1998.

The subject matter of this notice falls within the categorical exclusion from HUD's environmental clearance procedures set forth in 24 CFR 50.20(1). For that reason, no environmental finding has been prepared for this notice.

(Secs. 211, 221, 224, National Housing Act, 12 U.S.C. 1715b, 17151, 1715o; sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d))

Dated: January 15, 1998.

Sarah Rosen,

Associate General Deputy, Assistant Secretary for Housing.

[FR Doc. 98–1434 Filed 1–21–98; 8:45 am]

BILLING CODE 4210–27–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Intent to Prepare Comprehensive Conservation Plan

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Intent to Prepare Comprehensive Conservation Plan.

SUMMARY: This notice advises that the U.S. Fish and Wildlife Service (Service) intends to gather information necessary to prepare a Comprehensive Conservation Plan (CCP) and associated environmental documents for the Lacreek National Wildlife Refuge in Bennett County in southwestern South Dakota.

The Notice of Intent is in compliance with the Service's CCP policy to advise other agencies and the public of its intentions. The Service plans to obtain suggestions and information on the scope of issues to be considered in the planning process.

DATES: Written comments should be received by February 23, 1998.

ADDRESSES: Comments and requests for more information should be referred to Jon Kauffeld, Planning Team Leader, U.S. Fish and Wildlife Service, 203 W. 2nd, Federal Building, Grand Island, NE 68801.

SUPPLEMENTARY INFORMATION: The Service has initiated Comprehensive Conservation Planning for the Lacreek National Wildlife Refuge. Each National Wildlife Refuge has specific purposes for which it was established and for which legislation was enacted. Those purposes are used to develop and prioritize management goals and objectives within the National Wildlife Refuge System mission, and to guide which public uses occur on the Refuge. The planning process is a way for the Service and the public to evaluate management goals and objectives for the best possible conservation efforts of this important wildlife habitat, while providing for wildlife-dependent recreation opportunities that are compatible with each national wildlife refuge's establishing purposes and the mission of the National Wildlife Refuge System.

The Lacreek National Wildlife Refuge (16,410 acres) was established as "* * * a refuge and breeding ground for migratory birds and other wildlife * * *" by Executive Order No. 7160, on August 26, 1935. The Refuge is located in the Lake Creek Valley, southern Bennett County, on the northern edge of the Nebraska sandhills. The Refuge provides breeding and migration habitat for Central Flyway waterfowl, other migratory birds, and is home to a significant portion of the high plains trumpeter swan populations.

The Refuge administers the Little White River Recreation Area which was donated to and accepted by the Service on May 20, 1980, under authority of the Refuge Recreation Act (16 U.S.C. 460K–K4) for public recreation. Public use opportunities include wildlife observation and photography, environmental education, and hunting and fishing on the refuge, and on the Little White River Recreation Area boating, waterskiing, swimming, and camping are also permitted.

The Service will conduct a comprehensive conservation planning process that will provide opportunity for Tribal, State and local governments, agencies, organizations, and the public to participate in scoping issues and comment. The Service is requesting input for issues, concerns, ideas, and suggestions for future management of Lacreek National Wildlife Refuge. Anyone interested in providing input is invited to respond to the following three questions.

(1) What makes the Lacreek Refuge (or any specific unit) special or unique for you?

(2) What problems or issues do you want to see addressed in the Comprehensive Conservation Plan?

(3) What improvements would you recommend for the Lacreek Refuge (or any specific unit)?

The Service has provided the above questions for your optional use. There is no requirement to provide information to the Service. The Planning Team developed the above questions to facilitate gathering of information about individual issues and ideas concerning the Lacreek National Wildlife Refuge. Comments received by the Planning Team will be used as part of the planning process, individual comments will not be referenced in our reports or directly responded to.

There was an advertised open house on November 13, 1997, which provided the opportunity to scope issues and concerns. Comments may also be provided anytime during the planning process by writing to the above address. All information provided voluntarily by mail, phone, or at public meetings becomes part of the official public record (e.g., names, addresses, letters of comment, input recorded during meetings). If requested under the Freedom of Information Act by a private citizen or organization, the Service may provide copies of such information.

The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), NEPA Regulations (40 CFR 1500–1508), other appropriate Federal laws and regulations, Executive Order 12996 (Management and Public Use of the National Wildlife Refuge System), the National Wildlife Refuge System Improvement Act of 1997, and Service policies and procedures for compliance with those regulations.

We estimate that the draft environmental documents will be available for review in December 1998.

Dated: January 14, 1998.

Terry T. Terrell,

Deputy Regional Director, Denver, Colorado.

BILLING CODE 4310–55–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Proposed Agency Information Collection Activities; Comment

AGENCY: Bureau of Indian Affairs—Office of Indian Education Programs.

ACTION: Notice.

SUMMARY: This notice announces the Information Collection Request for the Tribally Controlled Community College Grant Application Form, OMB #1076–018, and the Tribally Controlled Community College Annual Report Form, OMB #1076–0105, require reinstatement. The proposed information collection requirement, with no appreciable changes, described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act of 1995, Public Law 104–13, 44 U.S.C. 350(c)(2)(A). The Bureau is soliciting public comments on the subject proposal.

DATES: Written comments must be submitted on or before March 23, 1998.

ADDRESSES: Comments are to be mailed to Director, Office of Indian Education Programs, Department of the Interior, Bureau of Indian Affairs, 1849 C Street, NW, Mail Stop 3512–MIB, Washington D.C. 20240, or hand delivered to Room 3512 at the above address. All written comments will be available for public inspection in Room 3543 of the Main Interior Building, 1849 C Street, NW, Washington D.C., from 9:00 a.m. until 3:00 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Garry R. Martin, Bureau of Indian Affairs, Department of the Interior, 1849 C Street, NW, Mail Stop 3512, Washington D.C. 20240. Telephone 202–208–3478.

SUPPLEMENTARY INFORMATION:

I. Abstract

The information collection is necessary to assess the need for financial assistance and annual performance in accordance with 25 CFR, part 41—Grants To Tribally Controlled Community Colleges And Navajo Community College.

II. Method of Collection

The Tribally Controlled Community Colleges and Navajo Community College regulations provided in 25 CFR part 41.9, subpart A and 25 CFR part 41.25, subpart B contain the program requirements which govern the program. Information collected from the institutions will be used for the continued operation and improvement of tribally controlled community colleges to ensure continued and expanded opportunities for Indian students.

III. Data

(1) *Titles of the Collection of Information* are (a) Tribally Controlled Community College Grant Application, OMB No. 1076–018. Expiration Date: 6–30–93; Type of Review: Reinstatement of an approved information collection form; and (b) Tribally Controlled Community College Annual Report, OMB No. 1076–0105. Expiration Date: 8–31–93; Type of Review: Reinstatement of an approved information collection form.

(2) *Summary of the Collection of Information:* The collection of information provides pertinent data concerning institutional need and annual performance of the Tribally Controlled Community Colleges.

(3) *Affected Entities:* Tribally Controlled Community Colleges

(4) *Description of the need for the information and proposed use of the information:* Submission of an annual grant application (OMB No. 1076–018), is required by statute. Submission of the annual report (OMB No. 1076–0105) is necessary to assess an annual performance for the expenditure of funds received under the authorizing Act. The information is needed to ensure continued support of the establishment, operation and improvement of tribally controlled community colleges. The information collected with the annual report will be used by the Bureau of Indian Affairs or tribal programs for fiscal accountability. The analysis of data will be utilized for administrative and program planning.

(5) *Description of likely respondents, including the estimated number of likely respondents, and proposed frequency of responses to the collection of information:* There are 25 tribal college institutions that respond annually. The number of likely respondents, currently estimated at four additional institutions, will depend on an institution's ability to complete the criteria for becoming an approved tribal college.

(6) *Estimate of total annual reporting and record keeping burden that will result from the collection of information:* 150 hours per annum. 75 hours is the estimated public reporting burden for the 25 tribal institutions to complete the tribally controlled community college grant application (OMB No. 1076–018). This form is estimated to average three hours per respondent that includes time for reviewing the instructions, gathering and maintaining data and completing the form. 75 hours is the estimated public reporting burden for the 25 tribal institutions to complete the tribally controlled community college annual report (OMB No. 1076–0105). This form is estimated to average three hours per respondent that includes time for reviewing the instructions, gathering and maintaining data and completing the form. Estimated Total Annual Burden Hours: 150 hours. Estimated

UMI

Annual Costs: $2,700.00 (150 hours @$18.00/hour).

IV. Request for Comments

The Department of the Interior invites comments on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden (including the hours and cost) of the proposed collection of information, including the validity of the methodology and assumption used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other collection techniques or other forms of information technology.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions, to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information and disclosing and providing information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they will become a matter of public record.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information, unless it displays a currently valid Office of Management and Budget control number.

Dated: December 9, 1997.

Kevin Gover,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Proclaiming Certain Lands as Reservation for the Cow Creek Band of Umpqua Tribe of Indians in Oregon

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of reservation proclamation.

SUMMARY: The Assistant Secretary—Indian Affairs proclaimed approximately 4.07 acres as an addition to the reservation of the Cow Creek Band of Umpqua Tribe of Indians on December 19, 1997. This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.1.

FOR FURTHER INFORMATION CONTACT: Larry E. Scrivner, Bureau of Indian Affairs, Division of Real Estate Services, MS–4510/MIB/–Code 220, 1849 C Street, N.W., Washington, D.C. 20240, telephone (202) 208–7737.

SUPPLEMENTARY INFORMATION: A proclamation was issued according to the Act of June 18, 1934 (48 Stat. 986; 25 U.S.C. 467), for the tract of land described below. The land was proclaimed to be an addition to and part of the reservation of the Cow Creek Band of Umpqua Tribe of Indians for the exclusive use of Indians on that reservation who are entitled to reside at the Cow Creek Reservation by enrollment or tribal membership.

Reservation of the Cow Creek Band of Umpqua Tribe of Indians

Douglas County, Oregon

The following described real property is located in the Northwest quarter of Section 27, Township 30 South, Range 5 West, W.M., Douglas County, Oregon.

Beginning at a 5/8" iron rod located on the easterly right of way of County Road Number 1 (also known as Old Pacific Highway Number 99), said 5/8" iron rod bears North 30°34'51" West 335.30 feet from the Southwest corner of the Long Subdivision to the City of Canyonville (See Volume 6, Page 63, Douglas County Surveyor's Office); thence along said Easterly right of way of said County Road Number 1, North 30°34'51" West 750.62 feet to a 5/8" iron rod; thence leaving said Easterly right of way and running North 87°50'25" East 275.35 feet to a 3/4" iron pipe; thence North 87°58'12" East 150.92 feet to a 5/8" iron rod; thence South 3°47'25" East 246.10 feet to a 5/8" iron rod; thence South 8°49'22" East 421.37 feet to a 5/8" iron rod; thence due West 125.00 feet to the point of beginning. Containing 4.07 acres, more or less.

Title to the land described above is conveyed subject to any valid existing easements for public roads and highways, for public utilities and for railroads and pipelines and any other right-of-way or reservation of record.

Dated: December 19, 1997.

Kevin Gover,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310–02–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

DEPARTMENT OF AGRICULTURE

Forest Service

[WO–830–1030–2–241A]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCIES: Bureau of Land Management, Interior, and United States Forest Service, Agriculture.

ACTION: Notice and request for comments.

SUMMARY: The Bureau of Land Management (BLM) and the U.S. Forest Service are soliciting comments concerning the proposed three-year joint collection of information that would conduct surveys of the public in each of their users groups.

DATES: Written comments must be submitted on or before March 23, 1998 to be assured of consideration.

ADDRESSES: Send comments to John Kerwyn Keith, Management Systems Group, Business and Fiscal Resources Directorate, Bureau of Land Management, 1849 C Street, NW, Room LS1000, Washington, DC 20240 (fax: 202–452–5171, email: j55keith@wo.blm.gov).

FOR FURTHER INFORMATION CONTACT: John Kerwyn Keith at 202–452–5159.

NATURE OF COMMENTS: We specifically request your comments on the proposed collection in the following areas:

(1) Whether the collection of information is necessary for the proper functioning of BLM and the Forest Service;

(2) The accuracy of our estimates of the burden of collecting the information, including the validity of the methodology and assumptions used;

(3) The quality, utility, and clarity of the information collected; and

(4) How to minimize the burden of collecting the information on those who are to respond, including using the appropriate automated, electronic, mechanical or other forms of information technology.

SUPPLEMENTARY INFORMATION:

I. Background
II. Current Actions
III. Methodology
IV. Requests for Comments

I. Background

The Government Performance and Results Act of 1993 (Pub. L. No. 103–62) sets out to "improve Federal program effectiveness and public accountability by promoting a new focus on results, service quality, and customer satisfaction" (Section 2, b, 3). In order to fulfill this responsibility, the BLM and the Forest Service must collect data from their respective user groups to (1) better understand the needs and desires of the public and (2) respond to those needs and desires accordingly.

This course of action is fortified by Executive Order No. 12862, signed by the President on September 11, 1993, aimed at "ensuring the Federal government provides the highest quality service possible to the American people." The Order discusses surveys as a means for determining the kinds and qualities of services desired by the Federal Government's customers and for determining satisfaction levels for existing services. These voluntary customer surveys will be used to ascertain customer satisfaction with the BLM and Forest Service in terms of services and products. Respondents will be individuals and organizations that are the recipients of the BLM and Forest Service's services and products. Previous customer surveys have provided useful information to the BLM and Forest Service for assessing how well we deliver our services and products and for making improvements. The results are used internally and summaries are provided to the Office of Management and Budget on an annual basis and are used to satisfy the requirements and spirit of Executive Order No. 12862.

Continuing to work collectively on issues that pertain to the outside public, the BLM and Forest Service anticipate performing all of their customer surveys under one three-year clearance. Where applicable, similar questions will be asked in the surveys of the two agencies, thus allowing better bench marking between the agencies.

II. Current Actions

The request to OMB will be for a three-year clearance to conduct customer surveys in the BLM and the

VOL
63
ISS
14
JA
22
1998
UMI

Forest Service. During the past clearance cycle the BLM conducted 17 customer surveys and the Forest Service conducted 9 surveys by telephone and mail. (Examples of previously conducted customer surveys are available upon request.) Our planned activities in the next three fiscal years reflect our increased emphasis on and expansion of these activities.

III. Methodology

The BLM and Forest Service survey customers in the following general categories: (1) Use requiring authorization; (2) state and private forestry; (3) timber sales; (4) wild horse and burro; (5) research; (6) law enforcement; (7) fire and aviation; (8) wildlife and fisheries; (9) recreation; (10) information [general, land, title, and technology-based]; (11) pilot programs; (12) stakeholders and partners; and (13) state and local governments.

A stratified sampling technique is employed for categories 1 through 8; categories 9 and 10 use intercept surveys; and a general sampling technique is employed for categories 11 through 13. The randomized sample pulled from the databases will include an estimated 1200 persons unless the population is less than 1200, at which point the entire user population will be surveyed. An 80% response rate goal has been set; for this reason, whenever possible telephone surveys are chosen over mail surveys.

Parallel to this effort, comment cards will be solicited from all of the above groups on an intercept basis—accompanying transaction performed with the agencies.

The questionnaires are developed with the help of focus groups from around the country. We ask questions in the following general areas: (1) Program specific (i.e., processing permits, recordation of mining claims, facilities and access to public land for recreation); (2) service delivery; (3) management practices; (4) resource protection; (5) rules, regulations, and policies; (6) communication with the public; (7) overall satisfaction; and (8) general demographics.

IV. Requests for Comments

Prospective respondents and other interested parties should comment on the actions discussed in items II & III. The following guidelines are provided to assist you in responding.

General Issues

A. Is the proposed collection of information necessary, taking into account its accuracy, adequacy, and reliability, and the agency's ability to process the information it collects in a useful and timely fashion?

B. What enhancements can the BLM and Forest Service make to the quality, utility, and clarity of the information to be collected?

As a Potential Respondent

A. The average public reporting burden for a customer survey is estimated to be .25 hours per response (13,000 respondents per year ×15 minutes per response =3250 hours annually). For comment cards, the average public reporting burden is estimated to be 3 minutes per response (30,000 respondents per year × 3 minutes per response =1500 hours annually). Burden includes the total time, effort, or financial resources expended to generate, maintain, retain, or disclose or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for purposes of collecting, validating, verifying, processing, maintaining, disclosing, and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting or otherwise disclosing the information.

Please comment on (1) the accuracy of our estimate and (2) how the agencies could minimize the burden of the collection information, including the use of automated collection techniques.

B. The BLM and Forest Service estimate that respondents will incur no additional costs for reporting other than the time required to complete the collection. What is the estimated (1) total dollar amount annualized for capital and start-up costs and (2) recurring annual dollar amount of operation and maintenance and purchase of services costs associated with this data collection? The estimates should take into account the costs associated with generating, maintaining, and disclosing or providing information.

C. Do you know of any other Federal, State, or local agency that collects similar data? If you do, specify the agency, collection element (s), and the methods of collection.

As a Potential User

Are there any alternative sources of data and do you use them? If so, what are their deficiencies and/or strengths?

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the survey. They also will become a matter of public record.

Dated: January 15, 1998.

Carole Smith,

Bureau of Land Management, Information Collection Officer.

Dated: January 8, 1998.

William Delaney,

U.S. Forest Service, Management Improvement.

BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NV–010–1990–09]

Notice of Intent; Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a supplemental Environmental Impact Statement for the Barrick Goldstrike Mines Inc. Betze Project in the Elko and Eureka Counties, Nevada.

SUMMARY: On August 31, 1994 pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, as amended, the Bureau of Land Management, Elko Field Office published a Notice of Intent to prepare a supplemental environmental impact statement (EIS) with respect to Barrick Goldstrike Mines Inc.'s (Barrick) Betze Project. At that time, the Bureau had determined the need to prepare the Supplemental EIS to assess the environmental impacts of the pumping and water management operations associated with Barrick's mining operations. Since the Notice of Intent was published, Barrick has begun discharging water produced by groundwater pumping operations to the Humboldt River under a permit from the Nevada Division of Environmental Protection. In addition, Barrick and Elko Land and Livestock Company (ELLCO) submitted an application to amend an existing water pipeline right-of-way from 40 feet to 80 feet in width to accommodate installation of approximately 4,000 linear feet of buried 48-inch steel pipeline. The additional pipeline would be used to increase the operational efficiency of discharging water to either the Humboldt River or to irrigation and infiltration. The Bureau of Land Management is publishing this supplemental Notice of Intent to advise the public of the application to amend the right-of-way and to seek any additional comments or concerns to be addressed in preparation of the Supplemental EIS.

EFFECTIVE DATES: This notice re-initiates public scoping for the supplemental Betze EIS. A scoping meeting will be held on February 5, 1998, at the Bureau of Land Management, Elko Field Office, 3900 E. Idaho, Elko, Nevada. The public is invited to attend the meeting scheduled from 4:30 pm until 6:30 pm to review the project and identify issues and concerns which need to be addressed in the Supplemental EIS. Representatives from the Bureau of Land Management and Barrick will be available during the meeting to answer questions. Written comments on the scope of the EIS will also be accepted until February 16, 1998. A draft supplemental environmental impact statement (DSEIS) is expected to be completed by the summer of 1998 and made available for public review and comment. At that time a Notice of Availability of the DSEIS will be published in the **Federal Register**. The comment period on the DSEIS will be 60 days from the date the Notice of Availability is published.

FOR FURTHER INFORMATION CONTACT: Scoping comments may be sent to: District Manager, Bureau of Land Management, 3900 E. Idaho St., Elko, NV 89801. ATTN: Supplemental Betze EIS Coordinator. For additional information, write to the above address or call Nick Rieger at (702) 753–0200.

SUPPLEMENTARY INFORMATION: In response to a Plan of Operations submitted in April 1989, the Bureau of Land Management, Elko Field Office prepared an environmental impact statement (EIS) with respect to Barrick's Betze Project. The Final EIS and Record of Decision for the Betze Project were issued on June 10, 1991. The Final EIS included a description of the environmental impacts projected to result from groundwater pumping conducted by Barrick to lower the local groundwater elevations below the proposed Betze mining operations. Since the Betze EIS was issued, Barrick's implementation of the pumping operations and its monitoring of groundwater elevations have provided new information regarding the pumping requirements and potential environmental impacts of pumping operations. This new information indicates that the highly transmissive area from which the groundwater is to be pumped is more extensive than projected at the time the Betze EIS was prepared. As a result, Barrick has been pumping groundwater at higher rates than projected in the Betze EIS, and a greater volume of water has been produced. In addition to delivering water to a local rancher for irrigation uses as described in the Betze EIS, Barrick has implemented reinjection and infiltration programs to return more water to the groundwater system, and has obtained approval to discharge water to the Humboldt River from the state of Nevada. Barrick and ELLCO are now proposing to install approximately 4,000 linear feet of buried 48-inch steel pipeline next to an existing pipeline they are using to discharge water to improve operational flexibility of the existing Boulder Valley water management system. The second pipeline would allow Barrick to by-pass a water treatment plant when the water is discharged for irrigation and infiltration.

In the Notice of Intent published on August 31, 1994, the Bureau proposed preparation of a supplement to the Betze EIS that would describe the new information gathered since the Betze EIS was prepared and would describe any changes in the projected environmental impacts as a result of the new information. In addition, the Bureau stated that the supplemental EIS would assess the cumulative impacts of groundwater pumping to lower elevations and for longer periods of time than is associated with mining of other deposits situated on lands within the area in which groundwater levels are being lowered. By this notice, the Bureau is proposing to expand the original scope to evaluate the environmental impacts of installing the proposed pipeline and to determine whether there may be any adverse environmental impacts that were not specifically identified in the Betze EIS that may be mitigated under the terms of the Betze Record of Decision.

In response to the initial Notice of Intent and a Dear Interested Party letter dated September 2, 1994, the Bureau received eleven written and nine oral comments. Based on these comments and the BLM's internal review, five issues of concern were identified and are currently the focus of the supplemental EIS:

Potential impacts to surface and ground water resources, including the Humboldt River;

Potential impacts to livestock operations;

Potential impacts to threatened and endangered species;

Potential impacts to riparian and wetland vegetation; and

Potential impacts to wildlife and fisheries resources.

Through this supplemental Notice, the Bureau is soliciting any additional comments on the scope of the supplemental EIS to assist the Bureau in identifying and considering additional issues and concerns to be analyzed in the supplemental EIS. Comments submitted in response to this supplemental Notice of Intent should be directed to the attention of Nick Rieger, Project Manager at the Bureau of Land Management, Elko Field Office, 3900 East Idaho Street, Elko, Nevada 89801. Comments must be received by the close of business on February 16, 1998.

Dated: January 7, 1998.

Helen Hankins,

District Manager.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WY–930–1060–04]

Notice of Public Hearing and Intent to Remove Wild Horses

AGENCY: Bureau of Land Management, Interior.

SUMMARY: A public meeting is scheduled for February 25, 1998 at the White Mountain Library, Rock Springs, Wyoming. A formal hearing will be conducted to receive statements from the public concerning the use of helicopters and motor vehicles in wild horse management operations within Wyoming for calendar year 1998. Prior to the hearing, planned removal operations for the year will be discussed. Periodic removals are necessary in order to maintain the populations within the AML (Appropriate Management Levels) established through the planning process as a result of monitoring and analysis of that data in accordance with the National Environmental Policy Act and BLM Policies. This document serves as a Notice of Intent to remove excess wild horses from the following Herd Management Areas (HMA):

Great Divide Resource Area

Cyclone Rim HMA—remove 260 horses from an estimated 330. AML is 70 and this action would reduce the population to AML. Begin approximately March 1, end April 10. Decision Record EA# WY–037–EA4–121/122 dated July 11, 1994.

Stewart Creek HMA—remove 100 horses from an estimated 250. AML is 150 and this action would reduce the population to AML. Begin approximately August 1. Decision

VOL 63 ISS 14 JA 22 1998 UMI

Record EA WY–037-EA4–121/122 dated July 11, 1994.

I–80 North (Outside HMA)—remove 100 of 100 horses. This action would reduce the herd to 0. Begin March 1, finish April 10. Decision Record EA# WY–037–EA1–039 dated February 21, 1992.

I–80 South (Outside HMA)—remove 275 of 275 horses. This action would reduce the herd to 0. Begin approximately August 15, finish September 15. Decision Record EA# WY–037–EA1–039 dated February 21, 1992.

Lander Resource Area

Dishpan Butte HMA—remove 40 horses from an estimated 90. AML is 75 with a range of 50–100 and this action would reduce the population to the low end of the range. Fall gather date to be selected. Decision Record EA WY–036–EA3–013 dated February 25, 1993.

Conant Creek HMA—remove 40 horses from an estimated 100. AML is 80 with a range of 60–100 and this action would reduce the population to the low end of the range. Fall Gather date to be selected. Decision Record EA# WY–036–EA3–013 dated February 25, 1993.

Crooks Mountain HMA—remove 300 of 400 horses reducing the population to approximately 100. AML range is 75 with a range of 65–100 and herd will be reduced to within this range. Fertility control research may be initiated using immunocontraception on selected mares. Should this be instituted, an environmental assessment (EA) covering this action will be prepared. Begin approximately July 6, finish August 30. Decision Record EA#'s WY–037–EA4–121 and 122 dated July 11, 1994.

Rock Springs District

Divide Basin HMA—remove 200 of an estimated 640. AML is 500 with a range of 415–600. This action would reduce the population to the lower end of the range. Begin approximately July 6, finish August 15. Decision Record EA# WY–048–EA3–87 dated May 19, 1993.

Salt Wells Creek HMA—remove 415 from an estimated population of 780. AML is 365 and this action would reduce the herd to AML. Fall gather date to be selected. Decision Record EA# WY–048–EA3–87 dated May 19,1993.

Little Colorado HMA—remove 79 of an estimated population of 156. AML is 100 and this action would reduce the herd to 77 horses or 23 below AML. Fall gather date to be selected. Decision Record EA# WY–048–EA3–87 dated May 19, 1993.

Areas Outside HMAs—remove 190 of 190 horses. This action would reduce the horses outside HMA's to 0. Begin approximately July 6, finish August 15. Decision Record EA# WY–048–EA3–87 dated May 19, 1993.

Weather conditions and other logistical considerations may dictate changes in removal/completion dates. The dates indicated are approximate, and removal may take place in any of the HMAs listed above during anytime of the year with the exception that gathers will not take place between April 16 and July 7, since this is the estimated peak of foaling in Wyoming.

Numbers presented are approximate and will be finalized by aircraft census to be conducted during January/February 1998. All actions are in conformance with Bureau of Land Management Policy, documents listed above, and current monitoring data. Horse populations will not be reduced below the lower limit of the AML range. These actions represent no new decisions.

If you have comments on the plans, please contact the Wyoming State Director at P.O. Box 1828, Cheyenne, WY 82003–1828.

DATES: February 25, 1998.

ADDRESSES: White Mountain Library, 2935 Sweetwater Dr., Rock Springs, WY, 82901–4331.

FOR FURTHER INFORMATION CONTACT: Al Pierson, State Director, 5353 Yellowstone, P.O. Box 1828, Cheyenne, WY 82003–1828.

SUPPLEMENTARY INFORMATION:

Meeting Agenda:

—Introduction and Opening Remarks
—Review of the Wild Horse Management Plan
—Video presentation of roundup activity
—Public comment period on removal plans
—Formal Hearing on the Use of helicopters in the plan

The meeting will begin at 7 p.m. and is open to the public. Interested persons may make oral statements on the subject of helicopter use during the formal hearing. All statements will be recorded.

Dated: January 15, 1998.

Alan R. Pierson,

State Director.

BILLING CODE 4310–GJ–P

DEPARTMENT OF JUSTICE

[AAG/A Order No. 148–98]

Privacy Act of 1974; Modified System of Records

Pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Department of Justice, Justice Management Division, proposes to modify a system of records entitled "Department of Justice Payroll System, JMD–003."

The Department is modifying the system of records to show that, pursuant to an interagency agreement, the Department provides the U.S. Department of Agriculture, National Finance Center (NFC), relevant and necessary data to perform pay-related functions on the Department's behalf. In addition, the system description, in particular the routine use disclosure section, has been extensively edited. Four new routine uses have been italicized for public convenience.

Title 5 U.S.C. 552a(e)(4) and (11) provide that the public be given a 30-day period in which to comment on the new routine uses of a system of records. The Office of Management and Budget (OMB), which has oversight responsibility under the Act, requires that it be given a 40-day period in which to review the modifications to the system.

Therefore, please submit any comments by February 23, 1998. The public, OMB, and the Congress are invited to send written comments on new or revised routine uses to Patricia E. Neely, Information Management and Security Staff, Justice Management Division, Department of Justice, Washington, D.C. 20530 (Room 850, WCTR Building).

A description of the system of records is provided below. In accordance with 5 U.S.C. 552a(r), DOJ has provided a report to OMB and the Congress on the modification of this system of records.

Dated: January 4, 1998.

Stephen R. Colgate,

Assistant Attorney General for Administration.

JUSTICE/JMD–003

SYSTEM NAME:

Department of Justice Payroll System, Justice/JMD–003.

SYSTEM LOCATION:

Payroll records in electronic or paper format may be found in the following locations:

a. *Post Conversion Records.*[1] As of May 1993, payroll information in electronic format is located on a computer maintained by the NFC in New Orleans, Louisiana; and at backup facilities in Philadelphia. Relevant data may also be stored on Justice Data Center Computers at the Department of Justice for use in distributing accounting information to the individual Bureaus. Paper and electronic payroll information may be kept at various time and attendance recording and processing stations around the world. Paper records may be located in the Department's Personnel Staff, in servicing personnel offices throughout the Department, and in the offices of employee supervisors and managers.

b. *Pre-conversion Records.* Historical data is stored on magnetic tape at the Justice Data Center in Rockville, Maryland, and on microfiche by the Department's Finance Staff. Historical data in paper format may also be located in the Department's Finance and Personnel Staffs, in servicing personnel offices, and in the offices of employee supervisors and managers.

[1] The Department has contracted with the Department of Agriculture's National Finance Center (NFC) to maintain payroll information and conduct payroll-related activities for its employees. Conversion began in July of 1991 and was incrementally completed as of May of 1993.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former DOJ employees (excluding the FBI).

CATEGORIES OF RECORDS IN THE SYSTEM:

Any and all records essential to the conduct of payroll-related activities. Included may be:

—Personal Identifying/personnel data
—Time and attendance records
—Leave records
—Allotment or deduction information such as bonds, garnishments, health benefits, life insurance, Thrift Savings Plan and other savings, retirement, and union dues.
—Travel and Relocation information
—Court orders to initiate garnishments
—Check mailing information
—Tax, withholding, and exemption information
—Accounting and organization funding information
—Salary, severance pay, award, and bonus information; active retirement records
—Former employee pay records
—Employee death records
—Returned employee check records
—Indebtedness records, e.g., overpayment of pay or travel

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Budget and Accounting Act of 1950, as amended, 31 U.S.C. 66, 66a, and 20(a).

PURPOSE(S):

This system of records is maintained to enable the Department to administer the payroll and payroll-related functions, and any other related financial matters, in accordance with applicable laws and regulations and the requirements of the General Accounting Office (GAO) and the Office of Personnel Management (OPM). It enables the Department to prepare and document payment to all Department employees entitled to be paid and to effect all authorized deductions from gross pay; to coordinate pay, leave and allowance operations with personnel functions and other related activities; meet internal and external reporting requirements; support investigations of fraud, the collection of debts, and litigation activities.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Pursuant to Subsection (b)(3) of the Privacy Act, the Department of Justice (DOJ) may disclose relevant and necessary data as follows:

In accordance with an interagency agreement (as provided for in Office of Management and Budget (OMB) implementing regulations (40 FR 28948)), the DOJ may disclose to the U.S. Department of Agriculture (USDA), National Finance Center (NFC), in order to effect all financial transactions on behalf or the DOJ related to employee pay.

Specifically, the NFC may effect employee pay or deposit funds on behalf of DOJ employees, and/or it may withhold, collect or offset funds from employee salaries as required by law or as necessary to correct overpayment or amounts due. For example, the NFC will routinely make the necessary disclosures to Treasury for the issuance of checks; to Federal, State, and local authorities and the Social Security Administration for tax withholdings; and, according to employee directions, to the appropriate financial institutions, charitable organizations, unions, health carriers, or other appropriate entities to effect such pay distributions as savings bonds, charitable contributions, allotments, alimony, child support, union dues, and health and life insurance. In addition, the NFC will use the data to perform related administrative activities such as to certify payroll vouchers chargeable to DOJ funds; and either to perform or participate in routine audit/oversight operations of USDA/DOJ management and/or of GAO, OMB, and OPM; and to meet related reporting requirements.

In addition, based on such data as the DOJ has input to the NFC data base for these purposes, the DOJ may subsequently make a paper request, or an electronic request to the NFC data base, for information which will allow the DOJ to disclose relevant information as follows; or, where appropriate or necessary, DOJ may authorize the NFC to make the disclosure:

To Federal, State, or local housing authorities to enable these authorities to determine eligibility for low cost housing.

To heirs, executors and legal representatives of beneficiaries for estate settlement purposes.

To State and local courts of competent jurisdiction for the enforcement of child support, alimony, or both, pursuant to 41 U.S.C. 659.

To individuals, organizations, or agencies to enable such person,

VOL 63 ISS 14 JA 22 1998 UMI

organization, or agency to determine the identity or location of a current or former Federal employee to collect debts owed, where collection of such debts are authorized (either by statute, implementing regulation, or order issued pursuant thereto) and the individual, organization, or agency, has provided sufficient evidence as will reasonably validate such claims, e.g., where a spouse or creditor seeking to obtain a garnishment of wages for such purposes as alimony and/or child support has provided a court order to substantiate the indebtedness. Information relevant to the request for such garnishment may include informing the individual, organization, or agency of the unavailability of funds where, for example, a currently active garnishment precludes the implementation of a further garnishment.

To the Office of Child Support Enforcement (OCSE), Administration for Children and Families, Department of Health and Human Services, any information specifically required by statute or implementing regulation or otherwise determined to be necessary and proper for OCSE's use (as outlined more specifically in relevant OCSE published systems of records) in locating individuals owing child support obligations, and in establishing and collecting child support obligations from such individuals, including enforcement action. Information disclosed may include: Name, address, date of birth, date of hire, duty station, and social security number of the employee; the wages paid to the employee during the previous quarter; and the appropriate address and Federal Employer Identification Number of the Department of Justice.

To the appropriate Federal, State, or local agencies, e.g., to State unemployment agencies and/or the Department of Labor, to assist these agencies in performing their lawful responsibilities in connection with administering unemployment, workers' compensation, or other benefit programs; and similarly, to such agencies to obtain information that may assist the Department of Justice in performing its lawful responsibilities as they relate to such benefit programs.

To labor organizations recognized under 5 U.S.C., Chapter 71, the home addresses or designated mailing addresses of bargaining unit members.

In the event that a record(s), either on its face or in conjunction with other information, indicates a violation or a potential violation of law, whether civil, criminal or regulatory in nature, to the agency charged with enforcing or implementing such law.

To the Internal Revenue Service (IRS) to obtain taxpayer mailing addresses for the purpose of locating such taxpayer to collect or compromise a Federal claim against the taxpayer.

To a person or organization with whom the head of the agency has contracted for collection services to recover indebtedness owed to the United States. Addresses of taxpayers obtained from the IRS will also be disclosed, but only where necessary to locate such taxpayer to collect or comprise a Federal claim.

To a Federal, State, local, or foreign agency or to an individual or organization if there is reason to believe that such agency, individual, or organization possesses information relating to the debt, the identity or location of the debtor, the debtor's ability to pay, or relating to any other matter which is relevant and necessary to the settlement, effective litigation and enforced collection of the debt, or relating to the civil action trial or hearing, and the disclosure is reasonably necessary to elicit such information or to obtain the cooperation of a witness or an agency.

To employees to effect salary or administrative offsets to satisfy a debt owed the United States by that person; or when other collection efforts have failed, to the IRS to effect an offset against an income tax refund otherwise due.

To the news media and the public pursuant to 28 CFR 50.2 unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

To the National Archives and Records Administration and the General Services Administration for use in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

In a proceeding before a court or adjudicative body before which the Department is authorized to appear when any of the following is a party to litigation or has an interest in the litigation and such records are determined by the Department to be arguably relevant to the litigation: The Department, or any of the Department's components or their subdivisions; any Department employee in his/her official capacity, or in his/her individual capacity where the Department of Justice agrees to represent the employee; or the United States where the Department determines that the litigation is likely to affect it or any of the Department's components or their subdivisions.

Consistent with the foregoing routine use provisions, the Department may disclose records from this system of records for use in a computer matching program (as defined in the Privacy Act, 5 U.S.C. section 552a(8)). In accordance with the requirements of the Privacy Act, the public will be given advance notice in the **Federal Register** of the Department's participation in any such computer matching program(s).

In addition to the above routine use disclosures under subsection (b)(3) of the Privacy Act, the DOJ may retrieve from the NFC data base information which will enable the DOJ to make relevant and necessary disclosures pursuant to any of the other relevant and appropriate Privacy Act disclosure provisions.

Finally, 31 U.S.C. 3711 requires that the notice required by section 552a(e)(4) of title 5 must indicate that information in the system may be disclosed to a consumer reporting agency pursuant to subsection (b)(12). Such notice is provided as follows:

Notice of Disclosure to Consumer Reporting Agencies Under Subsection (b)(12) of the Privacy Act: Records relating to the identity of debtors and the history of claims may be disseminated to consumer reporting agencies to encourage payment of the past-due debt. Such disclosures will be made only when a claim is overdue and only after due process steps have been taken to notify the debtor and give him or her a chance to meet the terms of the debt.

(Any disclosures that may be made for debt collection purposes, whether made pursuant to subsection (b)(3) or (b)(12), would be made only when all the relevant due process or procedural steps established by the relevant statutes and implementing regulations have been taken.)

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on computer disks, magnetic tapes, microfiche and on paper.

RETRIEVABILITY:

Records are retrieved by name and social security number.

SAFEGUARDS:

Access to premises where records are stored is restricted via building passes and security guards. Access to all records is supervised and restricted to those employees with a need to know. In addition, access to computerized records is protected by encryption, password and appropriate user ID's.

RETENTION AND DISPOSAL:

Records are disposed of in accordance with General Records Schedule No. 2 as promulgated by the General Services Administration.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Personnel Staff, Justice Management Division, Department of Justice, Ariel Rios Building, 1200 Pennsylvania Avenue, NW., Suite 5206, Washington, DC 20530.

NOTIFICATION PROCEDURE:

The individual may address inquiries to the servicing personnel office of the Department component(s) by which he/she is or was employed. Addresses of Department components may be found in Appendix I., to part 16 of the Code of Federal Regulations. The individual may also address his/her request to the system manager named above.

RECORD ACCESS PROCEDURE:

Same as above.

CONTESTING RECORD PROCEDURE:

Same as above.

RECORD SOURCE CATEGORIES:

Individuals covered by the system; personnel offices; time and attendance clerks; supervisors, administrative officers, other officials; financial institutions or employee organizations; previous Federal employers; consumer reporting agencies; debt collection agencies; and the courts.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 98–1524 Filed 1–21–98; 8:45 am]

BILLING CODE 4410–AR–M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 145–97]

Privacy Act of 1974; Altered System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is hereby given that the Department of Justice proposes to modify a system of records maintained by the Immigration and Naturalization Service (INS). The system is entitled the "Employee Assistance Program (EAP) Treatment Referral Records, JUSTICE/INS–019," and was last published on October 10, 1995 (60 FR 52701).

The system notice, printed below, has been modified to reflect a reorganization of the EAP program. Clinical records will no longer be maintained on behalf of INS by Health and Human Services and Office of Personnel Management (pursuant to an interagency agreement), nor by a variety of private contractors. Nor will administrative records be maintained by EAP Coordinators in INS regional offices. The program has been consolidated to include only the EAP Manager at INS headquarters, a prime contractor, and subcontractors or "therapists" as necessary. The prime contractor and therapists are commonly referred to as "contract providers." The EAP manager and the contract providers may maintain both administrative and clinical records as appropriate.

The following captions of the notice have been redrafted to reflect the organizational changes: "System Locations," "Categories of Individuals Covered by the System," and "Categories of Records in the System." In addition, other sections of the notice have been appropriately edited, including the "Routine Use" disclosure section.

The Office of Management and Budget (OMB), which has oversight responsibility under the Act, requires a 40-day period in which to conclude its review of the system modification. In addition, 5 U.S.C. 552a(e) (4) and (11) provide that the public be given a 30-day period in which to comment on new routine uses of a system of records. However, no "new" routine uses have been added; only minor edits have been made to the Routine use section of the notice. Nevertheless, the public, as well as OMB and the Congress, are invited to submit any comments to Patricia E. Neely, Program Analyst, Information Management and Security Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (Room 850, WCTR Building).

In accordance with 5 U.S.C. 552a(r), the Department has provided a report to OMB and the Congress.

Dated: December 16, 1997.

Stephen R. Colgate,

Assistant Attorney General for Administration.

JUSTICE/INS–019

SYSTEM NAME:

Employee Assistance Program (EAP) Treatment Referral Records.

SYSTEM LOCATIONS:

Records are maintained by the EAP Manager/therapist at the Immigration and Naturalization Service (INS) headquarters office and at facilities under contract with INS to provide treatment and other services related to the administrative and financial management of the EAP program, i.e., contract providers. INS headquarters address is 425 I Street, NW, Washington, DC 20536. Addresses of the contract providers may be obtained by contacting the EAP Manager at INS headquarters.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former INS employees who have sought counseling and/or have been referred to the INS EAP Manager, EAP Specialist, or directly to the INS EAP contract providers for counseling and/or treatment. To the limited degree that counseling and treatment may be provided to family members of these employees, these individuals, too, are covered by the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records include any records which may assist in diagnosing, evaluating, counseling and/or treating the employee. Included are the therapist's intake/termination outcome forms, therapist case notes; pertinent psychosocial, medical and employment histories; medical tests or screenings, including drug and alcohol tests and information on confirmed unjustified positive drug tests generated by the staff of the Drug Free Workplace Program and the Medical Review Officer and provided by the EAP Manager or the employee's supervisor; treatment and rehabilitation plans as well as behavioral improvement plans; and records of treatment referrals. Referrals include those to community treatment resources when employees request legal, financial or other assistance not related to psychological or medical health. Where such referrals have been made, records may include relevant information related to such counseling, diagnosis, prognosis, treatment, and evaluation, together with follow-up data. Also included are written consent forms used to manage referrals and the flow of information. Finally, records include account information such as contract provider billings and INS payments.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 290dd, et seq., and 290ee, et seq.; 42 CFR part 2; Executive Order 12564; 5 U.S.C. 3301 and 7901; 44

VOL 63 ISS 14 JA 22 1998 UMI

U.S.C. 3101 and Pub. L. 100–71, sec. 503 (July 11, 1987).

PURPOSE:

The EAP is a voluntary program designed to assist the recovery of employees who are experiencing one or more of a variety of personal or behavioral problems (e.g., marital, financial, substance abuse). Records are maintained to document referral and participation in the EAP program; the nature and effects of the employee's personal or behavioral problem(s); efforts to counsel, treat, and rehabilitate the employee; and progress made in attaining his/her full recovery. Records may be used also to track compliance with agreements made to mitigate discipline based upon treatment (abeyance agreements).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures permitted by the Privacy Act itself,[1] 5 U.S.C. 552a(b), permissive disclosures without individual consent, are as follows:

1. Pursuant to subsection (m) of the Privacy Act, the contract providers maintain EAP records on behalf of INS. Therefore, in addition to those records which are given directly to the contract provider by the record subject, other records collected directly by INS may be disclosed by INS to the contract provider to the extent that it is appropriate, relevant, and necessary to enable the contract provider to perform his or her counseling, treatment, rehabilitation, and evaluation responsibilities. Similarly, records collected directly by the contract provider may be disclosed by the contract provider to the EAP Manager to the extent that it is appropriate, relevant and necessary to enable the EAP Manager to perform his or her counseling, program management and policy, and evaluation responsibilities.

2. Relevant information may also be disclosed from this system of records as follows:

a. To appropriate State or local authorities to report, under State law, incidents of suspected child abuse or neglect.

b. To any person or entity to the extent necessary to prevent an imminent and potential crime which directly threatens loss of life or serious bodily injury.

[1] To the extent that release of alcohol and drug abuse records is more restricted than other records subject to the Privacy Act, INS will follow such restrictions. See 42 U.S.C. 290dd and 290ee.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in locked file cabinets and a computerized environment.

RETRIEVABILITY:

Records are retrieved by a case number which is cross referenced to a name by the computer.

SAFEGUARDS:

In accordance with the requirements of 42 CFR 2.16, records are stored in a secure environment. *Paper records are stored in locked files and computerized records are password protected.* In addition, all paper records, e.g., case files, billings and payment vouchers, are identified by case number only and cannot be identified by a name until they are cross-referenced by the computer system to a name.

Records may be accessed within the EAP Program by designated EAP Program individuals based on their need-to-know to perform their duties. No records will be disclosed except with the written consent of the individual, or as indicated under the routine use disclosure outlined in this notice.

RETENTION AND DISPOSAL:

Records are retained for three years after the individual ceases contact with the counselor unless a longer retention period is necessary because of pending administrative or judicial proceedings. In such cases, the records are retained for six months after the case is closed. Records are destroyed by shredding or burning (General Records Schedules 26 and 36).

SYSTEM MANAGER(S) AND ADDRESSES:

EAP Manager, Immigration and Naturalization Service, 425 I Street, NW, Washington, DC 20536.

NOTIFICATION PROCEDURE:

Same as record access procedures.

RECORDS ACCESS PROCEDURES:

Address all requests for access to records to the system manager identified above. Address all requests for records maintained by the contract provider to that provider. Addresses of these offices may be obtained by contacting the EAP *Manager*. Clearly mark the envelope and letter "Privacy Act Request." Provide the full name and notarized signature of the individual who is the subject of the record, the dates during which the individual was in counseling, any other information which may assist in identifying and locating the record, and a return address.

CONTESTING RECORDS PROCEDURES:

Direct all requests to contest or amend information in accordance with procedures outlined under Record Access Procedures. State clearly and concisely the information being contested, the reason for contesting it, and the proposed amendment thereof. Clearly mark the envelope "Privacy Act Amendment Request."

RECORD SOURCE CATEGORIES:

Office of Juvenile Justice and Delinquency Prevention

[OJP(OJJDP)–1155]

Meeting of the Coordinating Council on Juvenile Justice and Delinquency Prevention

AGENCY: Office of Justice Programs, Office of Juvenile Justice and Delinquency Prevention (OJJDP), Justice.

ACTION: Notice of meeting.

SUPPLEMENTARY INFORMATION: A meeting of the Coordinating Council on Juvenile Justice and Delinquency Prevention will take place in the District of Columbia, beginning at 2:00 p.m. on Tuesday, February 3, 1998 and ending at 4:00 p.m. on February 3, 1998. This advisory committee, chartered as the Coordinating Council on Juvenile Justice and Delinquency Prevention, will meet at the White House Conference Center, located at 726 Jackson Place, Truman Room, Washington, D.C. 20503. The Coordinating Council, established pursuant to Section 3(2)A of the Federal Advisory Committee Act (5 U.S.C., App. 2), will meet to carry out its advisory functions under Section 206 of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended. This meeting will be open to the public. For security reasons, members of the public who are attending the meeting must contact the Office of Juvenile Justice and Delinquency Prevention (OJJDP) by close of business January 29, 1998. Please note: Photo identification will be required to be admitted to the Conference Center. The point of contact at OJJDP is Lutricia Key who can be reached at (202) 307–5911.

Dated: January 15, 1998.

Shay Bilchik,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of December, 1997 and January, 1998.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–33,954 & A; Color-Clings, Inc., Plymouth, MN and Bloomington, MN

TA–W–34,039; F.R. Gross Co., Inc., Warren, PA

TA–W–33,656; Garden Way, Inc., Port Washington, WI

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W–34,055; TRW/Auto Electronics Group of North America, Switch Product Line and Profit Center, Auburn, NY

The predominant cause of separations at the subject firm is the transfer of production of switch components abroad for assembly there. The subject firm is importing switches at a later stage of production, not the switch components produced at the subject plant.

TA–W–34,103; Jostens, Inc., Recognition Div., Princeton, IL

TA–W–33,900; Whirlpool Corp., Evansville, IN

TA–W–33,896 & A; Applied Materials, Inc., Austin, TX and Santa Clara, CA

TA–W–33,996; Brownsville Products, Brownsville, TX

TA–W–34,053; Frontier Corp., Rochester, NY

Increased imports did not contribute importantly to worker separations at the firm.

TA–W–33,989; Allegheny Ludlum Corp., Leechburg, PA

The investigation revealed that criteria (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–34,053; Frontier Corp., Rochester, NY

TA–W–33,959; Electra-Sound, Inc., Parma, OH

TA–W–33,980; Lockheed Martin Corp., Ocean Radar & Sensor Systems Plant Protection Unit, Liverpool, NY

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–33,906; Sunbeam, Shubuta, MS

Sunbeam made a decision to transfer production from the subject plant to another domestic facility.

TA–W–33,796; Drummond Co., Inc., Birmingham, AL

U.S. imports of coal were negligible in 1996 and in January through June 1997.

TA–W–33,946; Chevron USA Production Co. A Div. of Chevron USA, Inc., ("CPDN"), Headquartered in Houston, TX & Operating at Various Locations in the Following States: A; AL, B; CA, C; CO, D; LA, E; MS, F; NM, G; OK, H; TX, I; UT, J; WY

The investigation revealed that criteria (2) and criteria (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

TA–W–34,047; John Wiley & Sons, Inc., Wiley Law Publications, Colorado Springs, CO

A change in corporate ownership of this division resulted in a transfer to other domestic locations of the publishing of legal texts and caused the separations of workers at the subject facility.

TA–W–33,974; Lightalarms Electronic Corp., Baldwin, NY

The decline in employment at the subject firm is attributed to a shift in production to another location in St. Matthews, S.C. The Operation is being consolidated with two other affiliated facilities in which domestic company employment will increase.

Affirmative Determinations for Worker Adjustment Assistance

The following certification have been issued; the date following the company name and location of each determination references the impact date for all workers of such determination.

TA–W–33,942; Woodgrain Millwork, Inc., Lakeview, OR: October 14, 1996.

TA–W–34,019; Signal Apparel, New Tazewell, TN: November 14, 1996.

TA–W–33,837; Russell Corp., Cummings, GA: August 15, 1996.

TA–W–33,951; Robinson Manufacturing Co., Linden, TN; October 15, 1996.

TA–W–34,045; ITT Automotive, Archbold, OH: March 17, 1996.

TA–W–33,964; International Flavors & Fragrances, Inc., North American Fragrance Div., Union Beach, NJ: October 21, 1996.

TA–W–33,961; Teledyne Fluid Systems, Efficient Die & Mold Div., Independence, OH: October 17, 1996.

TA–W–33,981; Shenandoah Knitting Mills, Edinburg, VA: October 29, 1996.

TA–W–33,973; A.O. Smith EPC, Upper Sandusky, OH: October 23, 1996.

TA–W–34,23 & A; Spencer's, Inc., Hillsville, VA and Stuart, VA: November 7, 1996.

TA–W–33,977; Falcon Industries, Inc., Graham, TX: October 23, 1996.
TA–W–33,924; International Wire Insulated Wire Div., Bremen, IN: October 6, 1996.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (Pub. L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a), Subchaper D, Chaper 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of December, 1997 and January, 1998.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof (including workers in any agricultural firm or appropriate subdivision thereof), have become totally or partially separated from employment and either—

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) That imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) That there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–01894; Jostens, Inc., Recognition Div., Princeton, IL
NAFTA–TAA–01949; Almark Mills, Inc., Dawson, GA
NAFTA–TAA–01797; Garden Way, Inc., Port Washington, WI
NAFTA–TAA–02009; Dublin Garment Co., Inc., Dublin, VA

Medite Corporation; Corporate Office, Medford Oregon; MDF Plant, Medford, Oregon; Veneer Division, Rogue River, Oregon; Forestry Division, Medford, Oregon; and Corporate Office, Medford Oregon; MDF Plant, Medford Oregon; Veneer Division, Rogue River, Oregon; Forestry Division, Medford, Oregon; Notice of Negative Determination on Reconsideration

On September 22, 1997, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The petitioner presented new evidence that the collection of information regarding company sales and imports was incomplete for the time period relevant to the investigation. The notice was published in the **Federal Register** on September 30, 1997 (62 FR 51156).

The Department initially denied TAA to workers of Medite Corporation because the "contributed importantly" group eligibility requirement of Section 222(3) of the Trade Act of 1974, as amended, was not met. The workers at the subject firm were engaged in employment related to the production of lumber products.

On reconsideration, the Department requested that Medite Corporation provide additional customers for the various Medite facilities included in the petition. A survey of the major customers of Medite Corporation revealed that imports did not contribute importantly to the worker separations. All but one of the customers survey revealed that they are still purchasing domestic lumber products. The one customer that indicated some product was being produced outside the U.S. had declining imports during the relevant time period.

Conclusion

After reconsideration, I affirm the original notice of negative determination of eligibility to apply for worker adjustment assistance for workers and former workers of Medite Corporation in Medford and Rogue River, Oregon.

Signed at Washington, DC, this 24th day of December 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–33,829 AND NAFTA–01932]

Trans World Airlines Kansas City Overhaul Base, Kansas City, Missouri; Notice of Negative Determination Regarding Application for Reconsideration

By application of December 5, 1997, the International Association of Machinists and Aerospace Workers (IAMAW) requested administrative reconsideration of the Department's negative determination regarding worker eligibility to apply for Trade Adjustment Assistance (TAA) and NAFTA-Transitional Adjustment Assistance (NAFTA–TAA), applicable to workers and former workers of the subject firm.

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The TAA and NAFTA–TAA petitions, filed on behalf of workers who repaired and overhauled aircraft and aircraft parts, were denied on September 30, 1997, on the basis that the workers did not produce an "article" within the meaning of Section 222(3) and Section 250(a) of the Trade Act of 1974, as amended, but rather performed services.

In support of their application for reconsideration, the IAMAW contended that "[t]he overhauling process [performed by the petitioning workers on aircraft] takes what had become worthless parts and/or assemblies [and] remanufactures and transforms them into unique and marketable products," enabling aircraft or their parts to satisfy Federal Aviation Administration airworthiness requirements.

This contention is insufficient to support the granting of reconsideration. *Pemberton* v. *Marshall*, 639 F.2d 798 (D.C. Cir. 1981) found a similar contention insufficient to support certification. In that case, the workers alleged that their repair and overhaul of ships constituted a "remanufacturing" of an "article." The Court reasoned that "[e]ven if the repair necessitates the use of new materials, it cannot be said to be the creation of a new ship * * * the same item was also the end product." *Id.* at F.2d 800. Similarly here, although the petitioners contend that their employment conferred "new life" on aircraft and aircraft parts, no "new and different article" was created. *Nagy* v. *Donovan*, 571 F.Supp. 1261, 1265 (Ct. Int'l. Trade 1983). Rather, "[t]here was no transformation, but a mere refurbishing of what already existed" (*Pemberton*, at F.2d 800), permitting old aircraft and aircraft parts to meet airworthiness requirements.

Thus, the application for reconsideration does not alter the conclusion that the workers did not create new articles, but rather serviced existing ones by overhauling and repairing aircraft and aircraft parts. Accordingly, the petitioners' contention is insufficient to support reconsideration.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decisions. Accordingly, the application is denied.

Signed at Washington, D.C. this 5th day of January 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility to Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Acting Director of the Office of Trade Adjustment Assistance,

VOL 63 ISS 14 JA 22 1998 UMI

Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date of which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address show below, not later than February 2, 1998.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 2, 1998.

The petitions filed in this case are available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 29th day of December, 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

[TA–W–33,966]

Cason Manufacturing Company Stephenville, Texas; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on November 24, 1997, applicable to all workers of Cason Manufacturing Company, Stephenville, Texas. The notice was published in the **Federal Register** on December 10, 1997 (62 FR 65100).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. New findings show that the Department incorrectly limited the certification to "all workers engaged in employment related to the production of women's pants and skirts." The intent of the Department's certification is to include "all workers" of Cason Manufacturing Company, Stephenville, Texas adversely affected by increased imports.

The Department is amending the certification determination to correctly identify the worker group to read "all workers."

The amended notice applicable to TA–W–33,966 is hereby issued as follows:

All workers at Cason Manufacturing Company, Stephenville, Texas who became totally or partially separated from employment on or after October 24, 1996 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 11th day of January 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

Fruit of the Loom; Martin Mills, Inc. D/B/A St. Martinville Mills; Including Former Employees of Jeanerette Mills St. Martinville, Louisiana; Jackson Distribution Center; Division of Sherman Warehouse Corporation Jackson, Mississippi; Wadesboro Warehouse; Division of Martin Mills, Incorporated Wadesboro, North Carolina; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance on August 29, 1997, applicable to workers of Fruit of the Loom, Martin Mills, Inc., located in St. Martinville, Louisiana. The notice was published in the **Federal Register** on September 30, 1997 (62 FR 51152). The certification was amended on September 14, 1997 and again on December 1, 1997, to include Martin Mills, Incorporated in St. Martinville, Louisiana is doing business as St. Martinville Mills, and to cover the workers of the subject firm whose wages were reported under the separate Unemployment Insurance tax account for Jeanerette Mills, Jeanerette, Louisiana.

The notices of amended certifications were published in the **Federal Register** on September 30, 1997 (62 FR 51155) and December 10, 1997 (62 FR 65099) respectively.

At the request of the company, the Department reviewed the certification for workers of the subject firm. The company reports that worker separations occurred at the Jackson Distribution Center, Jackson, Mississippi and the Wadesboro Warehouse, Wadesboro, North Carolina when they both closed in November 1997. The workers at both the Jackson Distribution Center and the Wadesboro Warehouse were involved in the warehouse, repacking and distribution of T-shirts, briefs, boxers and A-shirts manufactured by Fruit of the Loom.

The intent of the Department's certification is to include all workers of Fruit of the Loom adversely affected by increased imports of underwear.

The amended notice applicable to A–AW–33,767 is hereby issued as follows:

All workers of Fruit of the Loom, Martin Mills, Inc., doing business as St. Martinville Mills, including former employees of Jeanerette Mills, St. Martinville, Louisiana (TA–W–33,767) and Jackson Distribution Center, Division of Sherman Warehouse Corporation, Jackson, Mississippi (TA–W–33,767G) and Wadesboro Warehouse Warehouse, Division of Martin Mills, Incorporated, Wadesboro, North Carolina (TA–W–33,767H), who became totally or partially separated from employment on or after August 14, 1996, are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed in Washington, D.C. this 11th day of January 1998.

Investigations Regarding Certifications of Eligibility To Apply for worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Acting Director of the Office of Trade Adjustment Assistance,

VOL 63 ISS 14 JA 22 1998 UMI

Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 2, 1998.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than February 2, 1998.

The petitions filed in this case are available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 22nd day of December, 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

Snap-Tite, Incorporated, Quick Disconnect Division, Union City, Pennsylvania; Notice of Affirmative Determination Regarding Application for Reconsideration

By letter of May 20, 1997, a company representative requested administrative reconsideration of the Department of Labor's Notice of Certification Regarding Eligibility to Apply for Worker Adjustment Assistance for workers of the subject firm. The certification was signed on March 25, 1997.

The company representative presents evidence that merits the Department's review of the certification.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, D.C. this 11th day of January 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

Stride Rite Corporation, Hamilton, Missouri, Tipton, Missouri, and Lexington, Massachusetts; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on March 27, 1997, applicable to all workers of Stride Rite Corporation located in Hamilton and Tipton, Missouri. The notice was published in the **Federal Register** on May 2, 1997 (62 FR 24135).

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of children's shoes. New information received by the company shows that worker separations have occurred at the Lexington, Massachusetts location of Stride Rite Corporation. The Lexington, Massachusetts facility is the corporate headquarters office and provides production planning services for children's shoes at Stride Rite Corporation.

The intent of the Department's certification is to include all workers of Stride Rite Corporation who were adversely affected by increased imports of children's shoes. Accordingly, the Department is amending the certification to cover the workers of Stride Rite Corporation, Lexington, Massachusetts.

The amended notice applicable to TA–W–33,328 is hereby issued as follows:

All workers of Stride Rite Corporation, Hamilton, Missouri (TA–W–33,328), Tipton, Missouri (TA–W–33,328A) and Lexington, Massachusetts (TA–W–33,328B) engaged in the production of children's shoes who became totally or partially separated from employment on or after February 24, 1996 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington D.C. this 14th day of January, 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA–W–33,933]

University Technical Services, Incorporated, Canton, New York; Amended Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued a Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance on November 17, 1997, applicable to all workers of University Technical Services, Incorporated, San Diego, California. The notice was published in the **Federal Register** on December 10, 1997 (62 FR 65100).

At the request of the State agency, the Department reviewed the negative determination for workers of the subject firm. New findings show that the Department incorrectly identified the subject firm location. The investigation conducted for the subject firm was conducted on behalf of workers engaged in providing operations and maintenance services for electricity generation located in Canton, New York. San Diego, California is the Administrative Services office of the subject firm and is not the subject of the investigation. The Department is amending the negative determination to correctly identify the city and state to read Canton, New York.

Conclusion

After careful review, I determine that all workers of University Technical Services, Incorporated, Canton, New York are denied eligibility to apply for adjustment assistance under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of December 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility to Apply for NAFTA Transitional Adjustment Assistance

Petitions for transitional adjustment assistance under the North American Free Trade Agreement-Transitional Adjustment Assistance Implementation Act (Pub. L. 103–182), hereinafter called (NAFTA–TAA), have been filed with the State Governors under Section 250(b)(1) of Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended, are identified in the Appendix to this Notice. Upon notice from a Governor that a NAFTA–TAA petition has been received, the Acting Director of the Office Trade Adjustment Assistance (OTAA), Employment and Training Administration (ETA), Department of Labor (DOL), announces the filing of the petition and takes actions pursuant to paragraphs (c) and (e) of Section 250 of the Trade Act.

The purpose of the Governor's actions and the Labor Department's investigations are to determine whether the workers separated from employment of after December 8, 1993 (date of enactment of Pub. L. 103–182) are eligible to apply for NAFTA–TAA under Subchapter D of the Trade Act because of increased imports from or the shift in production to Mexico or Canada.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing with the Acting Director of OTAA at the U.S. Department of Labor (DOL) in Washington, DC provided such request is filed in writing with the Acting Director of OTAA not later than February 2, 1998.

Also, interested persons are invited to submit written comments regarding the subject matter of the petitions to the Acting Director of OTAA at the address shown below not later than February 2, 1998.

Petitions filed with the Governors are available for inspection at the Office of the Acting Director, OTAA, ETA, DOL, Room C–4318, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 9th day of January, 1998.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

International Wire, Incorporated, Wire Division, Bourbon, Indiana; Notice of Termination of Investigation

Pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance, hereinafter called (NAFTA–TAA), and in accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 U.S.C. 2273), an investigation was initiated on December 1, 1997 in response to a petition filed on behalf of workers at International Wire Group, Incorporated, Bourbon, Indiana.

This case is being terminated because the workers were separated from the subject firm more than one year prior to the date of the petition. The NAFTA Implementation Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, D.C., this 9th day of January, 1998.

Employment and Training Administration

[NAFTA—01857]

Onan Corporation, Huntsville, Alabama; Including Leased Workers of ACT Personnel and Services, Incorporated; Snelling Temporary Services; Olsten Staffing Services; Team Source Personnel; Interim Health Care, Huntsville, Alabama; Amended Certification Regarding Eligibility to Apply for NAFTA-Transitional Adjustment Assistance

In accordance with Section 250(A), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 USC 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on October 23, 1997, applicable to all workers of Onan Corporation, Huntsville, Alabama. The notice was published in the **Federal Register** on November 7, 1997 (62 FR 60280).

At the request of the State agency, the Department reviewed the certification for workers of the subject firm. New information provided by the State shows that some employees of Onan Corporation were leased from ACT Personnel and Services, Incorporated, Snelling Temporary Services, Olsten Staffing Services, Team Source Personnel, and Interim Health Care to produce gasoline engines at the Huntsville, Alabama facility. Worker separations occurred at these companies as a result of the permanent closing of Onan Corporation, Huntsville, Alabama.

Based on these findings, the Department is amending the certification to include workers of ACT Personnel and Services, Incorporated, Snelling Temporary Services, Olsen Staffing Services, Team Source Personnel, and Interim Health Care, Huntsville, Alabama leased to Onan Corporation, Huntsville, Alabama.

The intent of the Department's certification is to include all workers of Onan Corporation adversely affected by imports from Canada.

The amended notice applicable to NAFTA—01857 is hereby issued as follows:

All workers of Onan Corporation, Huntsville, Alabama and leased workers of ACT Personnel and Services, Incorporated, Snelling Temporary Services, Olsten Staffing Services, Team Source Personnel, and Interim Health Care, Huntsville, Alabama engaged in employment related to the production of gasoline engines for Onan Corporation, Huntsville, Alabama who became totally or partially separated from employment on or after July 28, 1996 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of December, 1997.

Grant D. Beale,

Acting Director, Office of Trade Adjustment Assistance.

[NAFTA–01530, Stride Rite Corporation, Hamilton, Missouri; NAFTA–01530A, Tipton, Missouri; and NAFTA–01530B, Lexington, Massachusetts]

Amended Certification Regarding Eligibility To Apply for NAFTA-Transitional Adjustment Assistance

In accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 as amended (19 U.S.C. 2273) the Department of Labor issued a Certification of Eligibility to Apply for NAFTA Transitional Adjustment Assistance on March 27, 1997, applicable to all workers at Stride Rite Corporation located in Hamilton and Tipton, Missouri. The notice was published in the **Federal Register** on April 15, 1997 (62 FR 18362).

At the request of the petitioners, the Department reviewed the certification for workers of the subject firm. The workers are engaged in the production of children's shoes. New information received by the company shows that worker separations have occurred at the Lexington, Massachusetts location of Stride Rite Corporation. The Lexington, Massachusetts facility is the corporate headquarters office and provides production planning services for

VOL 63 ISS 14 JA 22 1998 UMI

children's shoes at Stride Rite Corporation.

The intent of the Department's certification is to include all workers of Stride Rite Corporation who were adversely affected by increased imports of children's shoes from Mexico. Accordingly, the Department is amending the certification to cover the workers of Stride Rite Corporation, Lexington, Massachusetts.

The amended notice applicable to NAFTA–01530 is hereby issued as follows:

"All workers of Stride Rite Corporation, Hamilton, Missouri (NAFTA–01530), Tipton, Missouri (NAFTA–01530A), and Lexington, Massachusetts (NAFTA–01530B) who became totally or partially separated from employment on or after February 24, 1996, are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974."

Signed at Washington, D.C. this 11th day of January, 1998.

[NAFTA–01967]

University Technical Services, Incorporated, University Energy, Canton, New York; Amended Negative Determination Regarding Eligibility To Apply for NAFTA-Transitional Adjustment Assistance

In accordance with Section 250(A), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974 (19 U.S.C. 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on November 28, 1997, applicable to all workers of University Technical Services, Incorporated, San Diego, California. The notice was published in the **Federal Register** on June 13, 1997 (62 FR 32376).

At the request of the State agency, the Department reviewed the negative determination for workers of the subject firm. New findings show that the Department incorrectly identified the subject firm location. The investigation conducted for the subject firm was conducted on behalf of workers engaged in providing operations and maintenance services for electricity generation located in Canton, New York. San Diego, California is the Administrative Services office of the subject firm and is not the subject of the investigation. The Department is amending the negative determination to correctly identify the city and state to read Canton, New York.

Conclusion

After careful review, I determine that all workers at University Technical Services, Incorporated, Canton, New York are denied eligibility to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974.

Signed at Washington, D.C. this 23rd day of December, 1997.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Sunshine Act Meeting

January 15, 1998.

TIME AND DATE: 10:00 a.m., Thursday, January 22, 1998.

PLACE: Room 6005, 6th Floor, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission shall consider and act upon the following:

1. *Secretary of Labor* v. *Unique Electric*, Docket No. WEST 95–333–M (Issues include whether the judge abused his discretion in determining that, in assessing a penalty under section 110(i) of the Mine Act, an operator's cessation of business is a factor militating in favor of a reduction in the penalty under the "effect of the operator's ability to continue in business" criterion).

2. *Secretary of Labor on behalf of Calahan* v. *Hubb Corporation*, Docket No. KENT 97–13–D (Issues include whether the judge erred in dismissing in its entirety a discrimination case brought under section 105(c)(2) of the Mine Act when the complaining miner, but not the Secretary, settled with the operator).

TIME AND DATE: 10:00 a.m., Thursday, January 29, 1998.

PLACE: Room 6005, 6th Floor, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission shall consider and act upon the following:

1. *Secretary of Labor* v. *Daanen & Janssen, Inc.*, Docket Nos. LAKE 95–180–RM, etc. (Issues include whether the judge properly found that the operator violated 30 CFR §§ 56.14101(a) and 56.9101 by failing to maintain in functional condition a component of the service braking system of a front-end loader, which traveled through and over a berm, fatally injuring the employee operating it).

TIME AND DATE: 10:00 a.m., Thursday, February 5, 1998.

PLACE: Room 6005, 6th Floor, 1730 K Street, N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission shall consider and act upon the following:

1. *Secretary of Labor* v. *Cannelton Industries, Inc., et al.*, Docket Nos. WEVA 94–381, etc. (Issues include whether the judge correctly determined that the operator violated 30 CFR § 75.400's prohibition against accumulations of combustible materials, whether the violation was the result of the operator's unwarrantable failure to comply with the standard, and whether two shift foremen are personally liable under section 110(c) of the Mine Act for knowingly authorizing the violation).

Any person attending oral argument or an open meeting who requires special accessibility features and/or auxiliary aids, such as sign language interpreters, must inform the Commission in advance of those needs. Subject to 29 CFR § 2706.150(a)(3) and § 2706.160(d).

CONTACT PERSON FOR MORE INFO: Jean Ellen, (202) 653–5629 / (202) 708–9300 for TDD Relay / 1–800–877–8339 for toll free.

Sandra G. Farrow,

Acting Chief Docket Clerk.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards Meeting of the ACRS Subcommittee on Planning and Procedures; Notice of Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on January 30 and 31, 1998, at the Bolger Center, 9600 Newbridge Drive, Potomac, Maryland.

The entire meeting will be open to public attendance with the exception of a portion that may be closed pursuant to 5 U.S.C. 552b(c)(2) and (6) to discuss organizational and personnel matters that relate solely to the internal personnel rules and practices of ACRS, and matters the release of which would constitute a clearly unwarranted invasion of personal privacy.

The agenda for the subject meeting shall be as follows:

Friday, January 30, 1998—8:30 a.m. until the conclusion of business.

Saturday, January 31, 1998—8:30 a.m. until the conclusion of business.

The Subcommittee will discuss issues associated with the prioritization of ACRS activities for FY 1998—FY 2000, ACRS operational plan, self-assessment of ACRS performance, potential operational areas for improved effectiveness, interaction with ACNW, ACRS Fellow's activities, and other activities related to the conduct of ACRS business. The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the cognizant ACRS staff engineer named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted therefor can be obtained by contacting the cognizant ACRS staff engineer, Dr. John T. Larkins (telephone 301/415–7360) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two working days prior to the meeting to be advised of any potential changes to the agenda, etc., that may have occurred.

Dated: January 15, 1998.

Gail H. Marcus,

Acting Chief, Nuclear Reactors Branch.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–443]

North Atlantic Energy Service Corporation, Seabrook Station; Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by Petition dated December 18, 1997, Ms. Jane Doughty (or Petitioner), representing The Seacoast Anti-Pollution League, has requested that the U.S. Nuclear Regulatory Commission take action with regard to Seabrook Station. Petitioner requests that the operating license for the Seabrook Station be suspended until such time as a thorough root cause analysis of the reasons underlying the development of leaks in piping in the "B" train of the residual heat removal (RHR) system is conducted. The leakage was reported by the Licensee on December 5, 1997.

As the basis for this request, Petitioner states that there have been past allegations of improper welding practices and substandard piping at Seabrook Station and further requests that the investigation of the RHR system pipe leakage include findings related to these past allegations.

The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this Petition within a reasonable time.

By letter dated January 15, 1998, the Director denied Petitioner's request to delay restart of the reactor at Seabrook Station, Unit 1, until all such actions requested by the Petition are taken.

A copy of the Petition is available for inspection at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555–0001 and at the local public document room located at Exeter Public Library, Founders Park, Exeter, NH 03833.

Dated at Rockville, Maryland, this 15th day of January 1998.

BILLING CODE 7710–12–M

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration; (CECO Filters, Inc., Common Stock, $.001 Par Value) File No. 1–10474

January 15, 1998.

CECO Filters, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security ("Security") from listing and registration on the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange").

The reasons cited in the application for withdrawing the Security from listing and registration include the following:

The Company has complied with the Exchange's rules regarding the voluntary delisting of securities. The Company has filed with the Exchange a copy of the resolutions adopted by the Company's Board of Directors authorizing the withdrawal of the Security from listing and registration on the Phlx, and by setting forth in detail to the Exchange the facts and reasons supporting the proposed withdrawal.

The Company is more than 80% owned by CECO Environmental Corp. ("Environmental"). Environmental's common stock is currently listed on the Nasdaq SmallCap Market. The Company constitutes Environmental's primary asset and is its only operating subsidiary. The common stock of Environmental has greater liquidity and a much larger public float than the Security. Because of the liquidity differences and varying levels of participation by market professionals, the prices of the Security and the common stock of Environmental have diverged and are no longer aligned. The Company also believes that maintaining both listings is expensive. Accordingly, the Company believes that the Security and common stock of Environmental should not both be listed.

Furthermore, the Company has approximately 224 shareholders. The Company has concluded that the public float is too small for the Security to have an active trading market.

In making the decision to withdraw its Security from listing and registration on the Phlx, the Company considered the costs and expenses associated with listing both the Security and the common stock of Environmental.

By letter dated December 8, 1997, the Phlx informed the Company that it had no objection to the withdrawal of the Company's Security from listing on the Phlx.

Any interested person may, on or before February 5, 1998, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 98–1489 Filed 1–21–98; 8:45 am]

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

Issuer Delisting; Notice of Application to Withdraw From Listing and Registration; (Hawaiian Electric Industries, Inc., Common Stock, Without Par Value) File No. 1–8503

January 15, 1998.

Hawaiian Electric Industries, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security ("Security") from listing and registration on the Pacific Exchange, Inc. ("PCX" or "Exchange").

The reasons cited in the application for withdrawing the Security from listing and registration include the following:

The Security of the Company currently is listed for trading on both the PCX and the New York Stock Exchange, Inc. ("NYSE"). The Company has complied with the rules of the PCX for delisting its Security by filing with the Exchange a request for delisting, together with a certified copy of the board resolution authorizing the delisting from the PCX, and by setting forth in detail to the Exchange the reasons and facts supporting the proposed withdrawal.

In making the decision to withdraw its Security from listing on the PCX, the Company considered the expense of maintaining the dual-listing of its Security on the PCX and the NYSE. The Company does not see any particular advantage in the dual-listing of its Security, since trading in the Security on the PCX has come to represent a very small portion of the Company's total trading volume.

By letter dated December 5, 1997, the PCX informed the Company that it had no objection to the withdrawal of the Company's Security from listing on the PCX.

By reason of Section 12(b) of the Act and the rules thereunder, the Company shall continue to be obligated to file reports under Section 13 of the Act with the Commission and the NYSE.

Any interested person may, on or before February 5, 1998, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IA–1694/803–128]

Nikko Research Center (America), Inc.; Notice of Application

January 15, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Advisers Act of 1940 ("Advisers Act").

APPLICANT: Nikko Research Center (America), Inc.

RELEVANT ADVISERS ACT SECTIONS: Exemption requested under section 203A(c) from section 203A(a).

SUMMARY OF APPLICATION: Applicant requests an order to permit it to register with the SEC as an investment adviser.

FILING DATES: The application was filed on December 3, 1997.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on February 9, 1998, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, N.W., Washington, D.C. 20549. Applicant, Nikko Research Center (America), Inc., One World Financial Center, Tower A, 200 Liberty Street, New York, New York 10281.

FOR FURTHER INFORMATION CONTACT: Kathy D. Ireland, Attorney, at (202) 942–0530, or Jennifer S. Choi, Special Counsel, at (202) 942–0716 (Division of Investment Management, Task Force on Investment Adviser Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is a corporation organized under the laws of New York and a wholly-owned subsidiary of the Nikko Research Center, Ltd. ("NRC"), an unregistered investment adviser located in Japan, which is affiliated with the Nikko Securities Co., Ltd. ("NST"), an integrated financial services company also located in Japan.

2. Applicant maintains its principal place of business in New York and is currently registered as an investment adviser in New York. Applicant was registered with the SEC as an investment adviser until July 8, 1997.

3. Pursuant to separate service agreements between applicant and NRC, NST, and Nikko Securities Co. International, Inc. ("NSI"), a registered broker-dealer located in the United States and an indirect wholly-owned subsidiary of NST, applicant provides NRC, NST, and NSI with reports concerning national and international political, economic, financial, and investment matters to assist them with the services that they provide to their clients. Some of these reports may be distributed directly by NSI and NST to their institutional clients, and NST may distribute such reports to certain retail clients, all of whom are in Japan. NSI does not have retail clients.

4. Applicant's analysts, strategists, and economists speak at seminars for clients of NSI, all of which are U.S. affiliates of Japanese-based banking institutions. NSI mails seminar materials directly to other institutional clients.

5. Applicant's analysts and economists also periodically meet directly with certain institutional clients of NSI and NST, including U.S. subsidiaries of Japanese regional banks, insurance companies, and Japanese banks and trust companies.[1] The foregoing are the only direct contacts applicant has with clients of NSI and NST. Applicant does not and will not have any direct contacts with any clients of NRC.

6. Applicant receives compensation solely from NRC, NSI and NST in an amount equivalent to its total annual operational cost plus 3%.

Applicant's Legal Analysis

1. On October 11, 1996, the National Securities Markets Improvement Act of 1996 was enacted. Title III of the Act, the Investment Advisers Supervision Coordination Act, added new section 203A to the Advisers Act. Under section 203A(a)(1),[2] an investment adviser that is regulated or required to be regulated as an investment adviser in the state in which it maintains its principal office and place of business is prohibited from registering with the SEC unless the investment adviser (i) has assets under management of not less than $25 million or (ii) is an adviser to an investment company registered under the Investment Company Act of 1940 ("Investment Company Act"). Section 203A(a)(2) defines the phrase "assets under management" as the "securities portfolios with respect to which an investment adviser provides continuous and regular supervisory or management services."[3]

2. Applicant submits that section 203A of the Advisers Act is intended to streamline the registration and oversight of investment advisers by reallocating responsibilities between the SEC and the states. Applicant notes that Congress determined that the states should be responsible for regulating investment advisers "whose activities are likely to

[1] Although NST has retail as well as institutional clients, applicant only has direct contact with certain of NST's institutional clients.

[2] 15 U.S.C. 80b–3a(a)(1).

[3] 15 U.S.C. 80b–3a(a)(2).

VOL 63 ISS 14 JA 22 1998 UMI

be concentrated in their home state," but "[l]arger advisers, with national businesses," should be regulated by the SEC and be "subject to national rules."[4]

3. Section 203A(c) of the Advisers Act authorizes the SEC to permit an investment adviser to register with the SEC if prohibiting registration would be "unfair, a burden on interstate commerce, or otherwise inconsistent with the purpose of [section 203A]."[5]

4. Applicant states that it does not qualify for SEC registration under section 203A. Applicant submits that it does not have assets under management or act as an investment adviser to an investment company registered as such under the Investment Company Act. Applicant also states that it does not satisfy any of the exemptions from the prohibition on registration provided in rule 203A–2 under the Advisers Act.

5. Applicant asserts that it would be inconsistent with the purposes of section 203A if it were prohibited from registering with the SEC. Applicant submits that its activities, like those of the nationally recognized statistical rating organizations ("NRSROs") and pension consultants, affect the national and international securities markets.

6. Applicant states that its research reports focus primarily on issues of national and international scope and significance. Applicant states that its advisory services are provided to only three clients for compensation, and that those entities utilize applicant's services in connection with the delivery of services to their own clients, many of which are substantial institutional investors, such as banks, insurance companies, and trust companies located throughout the world, that collectively manage and/or invest billions of dollars in both foreign and domestic securities. Applicant asserts that, the significant resources of these institutional investors, which may utilize its research and analyses in connection with their own investment management activities, substantially affect both national and international securities markets.[6]

7. Applicant states that the SEC exempted NRSROs from the prohibition on SEC registration although they typically do not have assets under management or act as investment advisers to registered investment companies because their activities have a significant effect on the national securities markets and the operation of federal securities laws.[7]

8. Applicant also states that the SEC exempted certain pension consultants from the prohibition on SEC registration even though they may not have assets under management or act as investment advisers to registered investment companies because they have a direct effect on the management of billions of dollars of plan assets, which in turn affects the national markets.[8]

9. Applicant also submits that it would be inconsistent with the purposes of section 203A(b)(1)(A) if it were subject to state regulation. Applicant states that, pursuant to this section, Congress preserved the states' ability to regulate certain investment adviser representatives of investment advisers registered with the SEC if those representatives provide services to retail clients. Applicant submits that Congress determined that the primary interest of the states is to maintain oversight of representatives with retail, and not institutional, clientele because the activities of these representatives predominately affect local markets. Applicant states that in defining the term "investment adviser representative" for purposes of section 203A(b), the SEC noted its belief that it is consistent with the intent of Congress to distinguish between retail and other clients.[9]

10. Applicant states that it does not provide investment advisory services directly to retail clients. Applicant submits that its three clients are institutions whose activities are national and international in scope. Further, applicant states that the advisory services that it provides to its clients are primarily used by such clients in connection with the services that they provide to their own clients, which are almost exclusively institutional.[10] Applicant states that, because its services are provided primarily to institutions, it is not the sort of investment adviser that Congress intended to be subject to regulation by and registration with the states.

11. Applicant believes that Congress intended that national investment advisers remain subject to SEC oversight, in part to focus SEC supervision and examination resources on investment advisers involved in interstate commerce. Applicant contends that the national and international nature of its activities lends itself to supervision and examination by one regulatory body.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 98–1491 Filed 1–21–98; 8:45 am]

BILLING CODE 8010–01–M

[4] S. Rep. No. 293, 104th Cong., 2d Sess. 4 (1996).

[5] 15 U.S.C. 80b–3a(c).

[6] Applicant also notes that its services reach certain institutional investors even more directly. As described above, applicant gives seminar presentations for certain of NSI's clients, and holds individual meetings directly with certain clients of NSI and NST, all which are institutional investors with a national or international presence.

[7] Rules Implementing Amendments to the Investment Advisers Act of 1940, Investment Advisers Act Release No. 1633 at Section II.D.1. (May 15, 1997) [62 FR 28112 (May 22, 1997)].

[8] *Id.* at Section II.D.2.

[10] Of applicant's three clients, only NST has retail clients, all of whom are outside the United States. Applicant has no direct contacts with any of NST's retail clients.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 23000; 812–10876]

Saratoga Advantage Trust, et al.; Notice of Application

January 14, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from section 15(a) of the Act and rule 18f–2 under the Act, and from certain disclosure requirements under the Act.

SUMMARY OF APPLICATION: The order would permit the investment adviser to an open-end registered investment company to enter into subadvisory contracts with subadvisers without receiving shareholder approval, and grant relief from certain disclosure requirements regarding advisory fees paid to subadvisers.

APPLICANTS: Saratoga Capital Management (the "Manager"), and the Saratoga Advantage Trust (the "Trust").[1]

FILING DATES: The application was filed on November 24, 1997, and amended on December 31, 1997. Applicants have agreed to file an amendment during the notice period, the substance of which is included in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on February 9, 1998 and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, N.W., Washington, DC 20549. Applicants: 1501 Franklin Avenue, Mineola, NY 11501.

FOR FURTHER INFORMATION CONTACT: Lisa McCrea, Attorney Adviser, at (202) 942–0562, or Nayda B. Roytblat, Assistant Director, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch, 450 5th Street, N.W., Washington, DC 20549 (tel. 202–942–8090).

Applicants' Representations

1. The Trust is an open-end management investment company registered under the Act. The Trust currently is comprised of seven separate investment portfolios (the "Portfolios"), each of which has its own investment objectives and policies.

2. The Manager is registered as an investment adviser under the Investment Advisers Act of 1940 (the "Advisers Act"). The Trust has entered into an investment management agreement ("Management Agreement") with the Manager under which the Manager serves as investment adviser to the Trust and its Portfolios. The Manager retains investment advisers registered under the Advisers Act to serve as investment advisers to the Portfolios ("Advisers"). Currently each Portfolio has a single Adviser although the Manager is authorized to select multiple Advisers for each Portfolio.

3. All Advisers currently must be approved by the Trust's board of trustees ("The Board") and by shareholders. In evaluating prospective Advisers, the Manager considers, among other factors, each Adviser's: level of expertise; relative performance and consistency of performance to investment discipline or philosophy; investment personnel and financial strength; and quality of service and client communication. The Manager recommends to the Board whether investment advisory agreements with Advisers ("Advisory Agreements") would be renewed, modified or terminated. In undertaking this evaluation, the Board recognizes that a portion of the fees charged by the Manager pursuant to the Management Agreement will be paid by the Manager to the Advisers, and the Board will be provided with, and will evaluate, information concerning the fees paid by the Manager to the Advisers pursuant to the Advisory Agreements.

4. Subject to the supervision and direction of the Manager and, ultimately, the Board, each Adviser's responsibilities are to manage the securities investments held by the Portfolio it serves in accordance with the Portfolio's stated investment objective and policies, and exercise discretionary authority to make investment decisions for the Portfolio and place orders to purchase and sell securities on behalf of the Portfolio.

5. The Trust's investment advisory arrangements differ from those of traditional investment companies. In the case of the Trust, the Manager does not make the day-to-day investment decisions for the Portfolios. Instead, the Manager establishes an investment program for each Portfolio and selects, supervises and evaluates the Advisers who make the day-to-day investment decisions for the respective Portfolios. In addition to selecting and monitoring Advisers, the Manager supervises the Portfolio's overall investment programs, including advising and consulting with the Trustees and the Advisers. The Manager monitors the performance of the Trust's outside service providers, including the Trust's administrator, transfer agent and custodian. The Manager also pays salaries, fees and expenses of the Trust's officers, trustees or employees that are directors, officers or employees of the Manager.

6. In return for providing the services described above, the Manager currently receives a fee from each Portfolio, computed as a percentage of net assets. The Manager pays each Adviser out of this fee.

7. Applicants request an order permitting the Manager to enter into and materially amend Advisory Agreements without obtaining shareholder approval. Applicants also request an exemption from the disclosure provisions described below regarding disclosure of fees paid to each Adviser. Each Portfolio will disclose the following (both as a dollar amount and as a percentage of a Portfolio's net assets): (a) Aggregate fees paid to the Manager and Affiliated Advisers (as defined below); and (b) aggregate fees paid to Advisers other than Affiliated Advisers (as defined below) ("Aggregate Fee Disclosure"). For purposes of this application, an Affiliated Adviser is an Adviser that is an "affiliated person", as defined in section 2(a)(3) of the Act, of the Portfolio or Manager, other than by reason of serving as an Adviser of a Portfolio.

Applicants' Legal Analysis

1. Section 15(a) of the Act makes it unlawful for any person to act as an investment adviser to a registered investment company except pursuant to a written contract which has been approved by the vote of a majority of the investment company's outstanding voting securities. Rule 18f–2 provides that each series or class of stock in a series company affected by a matter must approve such matter if the Act requires shareholder approval.

2. Certain items of Form N–1A, the registration statement used by open-end investment companies, when taken together, may require each Portfolio to disclose compensation paid to the investment company's investment adviser and the method of computing the fee.

3. Form N–14, the registration form for business combinations involving investment companies, requires the inclusion of a "table showing the current fees for the registrant and the company being acquired and pro forma fees, if different, for the registrant after giving effect to the transaction using the format prescribed" by Form N–1A.

4. Rule 20a–1 under the Act requires proxies solicited with respect to an investment company to comply with Schedule 14A under the Securities Exchange Act of 1934 (the "1934 Act"). Certain items of Schedule 14A require the following: (a) A proxy statement for a shareholder meeting at which a new fee will be established or an existing fee increased to include a table of the current and pro forma fees using the format prescribed in item 2 of Form N–1A; and (b) a proxy statement for a shareholder meeting at which an advisory contract is to be voted upon shall include the "rate of compensation of the investment adviser," the "aggregate amount of the investment adviser's fees," the "terms of the contract to be acted upon," and, if a change in fees is proposed, the existing and proposed rate schedule for advisory fees paid to the advisers.

5. Form N–SAR is the semi-annual report filed with the SEC by registered investment companies. Form N–SAR requires investment companies to disclose the rate schedule for fees paid to investment advisers.

[1] Applicants request that the relief apply to any open-end registered investment company for which the Manager or any entity controlling, controlled by, or under common control with the Manager acts as investment adviser. All existing investment companies that currently intend to rely on the order have been named as applicants, and any other existing or future investment companies that subsequently rely on the order will comply with the terms and conditions in the application.

VOL 63 ISS 14 JA 22 1998 UMI

6. Regulation S–X specifies the requirements for financial statements required to be included as part of the registration statements and shareholder reports filed with the SEC under the Act and the Securities Act of 1933. Section 6–07.2 of Regulation S–X may require that the Trust's financial statements contain information concerning fees paid to the Advisers.

7. Applicants believe that investors choose to invest in the Portfolios because of the Manager's experience and expertise in evaluating, selecting and supervising Advisers. Applicants believe that investors expect the Manager and the Board to select the Advisers for each Portfolio based on an Adviser's experience and expertise. Applicants contend that it is consistent with the protection of investors to vest the selection and supervision of the Advisers in the Manager because shareholders expect that the Manager will use its expertise to select the most able advisers.

8. Applicants believe that permitting the Manager to perform those duties for which shareholders compensate the Manager—the selection, supervision and evaluation of Advisers—without incurring unnecessary delay or expense is appropriately in the interests of the Portfolios' shareholders and will allow each Portfolio to operate more efficiently. Applicants contend that, without the delay inherent in holding shareholder meetings, the Portfolios will be able to act more quickly and with less expense to replace Advisers when the Manager and the Trustees believe that a change would benefit a Portfolio. Applicants assert that, without exemptive relief, the Trust would be required to call meetings of shareholders whenever the Manager determined to employ new or additional Advisers, or to approve a new Advisory Agreement after an assignment or due to a material change in terms.

9. Applicants argue that the relief requested from disclosure requirements would provide the Manager with more flexibility in negotiating fees with new Advisers. Applicants state that some Advisers use a "posted" rate schedule to set their fees, and that some Advisers would be unwilling to negotiate fees lower than the "posted" rate schedule, unless the rates negotiated for the Portfolios are not publicly disclosed. Disclosure of Adviser's fees would therefore lessen the Manager's bargaining power, and would not benefit shareholders. Applicants state that investors will know the rate of investment advisory fees each Portfolio will bear. Applicants assert that investors would still be able to determine whether the cost of investment advisory services, including the selection and supervision of Advisers, is competitive with services and costs which the investor could obtain elsewhere.

10. Section 6(c) provides that the SEC may exempt any person, security, or transaction from any provision of the Act, if and to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the Act. Applicants believe that the requested relief satisfies this standard.

Applicants' Conditions

Applicants agree that the order granting the requested relief shall be subject to the following conditions:

1. Within 90 days of the hiring of any Adviser, the affected Portfolio will furnish its shareholders with all information about a new Adviser or Advisory Agreement that would be included in a proxy statement. The information will include any change in the disclosure caused by the addition of a new Adviser of a Portfolio. The Portfolio will meet this condition by providing shareholders, within 90 days of the hiring of an Adviser, with an information statement that meets the requirements of Regulation 14C and Schedule 14C under the 1934 Act, and Item 22 of Schedule 14A under the 1934 Act.

2. Before a Portfolio may rely on the order requested, the operation of the Portfolio as described in the application will be approved by a majority of each Portfolio's outstanding voting securities, as defined in the Act, or, in the case of a new Portfolio whose public shareholders purchase shares on the basis of a prospectus containing the disclosure addressed in condition 3 below, by the sole shareholder before offering of shares of the Portfolio to the public.

3. The Trust will disclose in its prospectus the existence, substance, and effect of the order. In addition, the Portfolios will hold themselves out to the public as employing the management structure described in the application. The prospectus will prominently disclose that the Manager has ultimate responsibility to oversee Advisers and to recommend their hiring, termination, and replacement.

4. The Manager will provide general management and administrative services to the Trust and its Portfolios, including overall supervisory responsibility for the general management and investment of each Portfolio's securities portfolio, and, subject to review and approval by the Board, will: (i) Set the Portfolios' overall investment strategies; (ii) recommend and select Advisers; (iii) allocate and reallocate the Portfolios' assets among multiple Advisers, if more than one exists; (iv) monitor and evaluate the performance of Advisers, and (v) implement procedures to ensure that the Advisers comply with the Portfolio's investment objectives, policies, and restrictions.

5. At all times, a majority of the Board will not be "interested persons" of the Trust within the meaning of the Act ("Independent Trustees"), and the nomination of new or additional Independent Trustees will be placed within the discretion of the then existing Independent Trustees.

6. When an Adviser change is proposed for a Portfolio with an Affiliated Adviser, the Trust's Trustees, including a majority of Independent Trustees, will make a separate finding, reflected in that Trust's Board minutes, that such change is in the best interests of the Portfolio and its shareholders and does not involve a conflict of interest from which the Manager or the Affiliated Adviser derives an inappropriate advantage.

7. The Manager will not enter into an Advisory Agreement with any Affiliated Adviser without that Advisory Agreement, including the compensation to be paid thereunder, being approved by the shareholders of the applicable Portfolio.

8. Each Portfolio will disclose in the Trust's registration statement the Aggregate Fee Disclosure.

9. The Manager will provide the Board, no less frequently than quarterly, information about the Manager's profitability for each Portfolio. The information will reflect the impact on profitability of the hiring or termination of any Advisers during the quarter.

10. Whenever an Adviser is hired or terminated, the Manager will provide the Board with information showing the expected impact on the Managers' profitability.

11. At all times, independent counsel knowledgeable about the Act and the duties of Independent Trustees will be engaged to represent the Independent Trustees of the Trust. The selection of such counsel will be placed within the discretion of the Independent Trustees.

12. No Trustee or officer of the Trust or partner or officer of the Manager will own directly or indirectly (other than through a pooled investment vehicle over which such person does not have control) any interest in an Adviser except for: (i) Ownership of interests in the Manager or any entity that controls, is controlled by, or is under common control with the Manager; or (ii) ownership of less than 1% of the outstanding securities of any class of equity or debt of a publicly traded company that is either an Adviser or any entity that controls, is controlled by, or is under common control with an Adviser.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39546; File No. SR–MSRB–97–17]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Underwriting and Transaction Assessments

January 13, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 23, 1997, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change (File No. SR–MSRB–97–17). The proposed rule change is described in Items, I, II, and III below, which Items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The MSRB is filing herewith a proposed rule change to rule A–13 on Underwriting and Transaction Assessments. The proposed rule change to rule A–13 would clarify that the fee currently assessed for inter-dealer transactions reported to the Board will not automatically apply to customer transactions once they are reported under Board rule G–14. The text of the proposed rule change is below. Additions are in italics. Rule A–13 + Underwriting and Transaction Assessments for Brokers, Dealers and Municipal Securities Dealers.

(a)–(b) No change.

(c) Transaction Assessments. Each broker, dealer and municipal securities dealer shall pay to the Board a fee equal to .0005% ($.005 per $1,000) of the total par value of *inter-dealer* municipal securities sales that it reports to the Board under rule G–14(b). For those transactions reported to the Board by a broker, dealer or municipal securities dealer on behalf of another broker, dealer or municipal securities dealer, the transaction fee shall be paid by the broker, dealer or municipal securities dealer that reported the transaction to the Board. Such broker, dealer or municipal securities dealer may then collect the transaction fee from the broker, dealer or municipal securities dealer on whose behalf the transaction was reported.

(d)–(f) No change.

II. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The texts of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Board currently assesses dealers a fee equal to .0005% of par value of the dealers' inter-dealer sales transactions in municipal securities, as reported to the Board under rule G–14(b). As indicated in Board rule filings and notices concerning the fee, this fee was intended to apply exclusively to inter-dealer transactions.[1] Since the language of rule A–13 was written when inter-dealer transactions were the only transactions that were being reported to the Board, rule A–13(c) now simply states that the transaction assessment will apply to "municipal securities sales that [the dealer] reports to the Board under rule G–14." In its rule filings and notices on rule A–13(c), the Board stated its intent to add customer transactions to those reported under rule G–14(b). The Board also noted that, once customer transactions are reported to the Board under rule G–14, the Board would review the use of customer transaction activity as a means of assessing fees. The Board, however, did not intend that the fee set for inter-dealer transactions would apply automatically to customer transactions that are reported under rule G–14.

The Board is in the process of implementing the customer transaction phase of the Transaction Reporting Program. This will result in dealer-customer transactions, as well as inter-dealer transactions, being reported to the Board under rule G–14(b), beginning in March 1998. To clarify that the current language of rule A–13(c) applies only to inter-dealer transactions, the proposed rule change simply adds the word "inter-dealer" to modify "municipal securities sales." The Board continues to intend to review customer transaction activity, once it becomes available in the Transaction Reporting Program, as a means to more equitably assess fees.

2. Basis

The Board believes the proposed rule change is consistent with Section 15B(b)(2)(J) of the Act, which provides that the Board's rules shall:

> provide that each municipal securities broker and municipal securities dealer shall pay to the Board such reasonable fees and charges as may be necessary or appropriate to defray the costs and expenses of operating and administering the Board. Such rules shall specify the amount of such fees and charges.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act since it would apply equally to all brokers, dealers and municipal securities dealers and is simply a technical change in rule language not affecting the effect or application of the rule.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change is merely a technical correction of rule language, the Board has designated this proposed rule change as constituting a stated policy, practice, or interpretation with respect to the meaning, administration, or enforcement of an existing Board rule under Section

[1] *See, e.g.*, SR–MSRB–95–13 and Commission Order of Approval, Securities Exchange Act Release No. 37197 (May 10, 1996).

19(b)(3)(A) of the Act, which renders the proposed rule change effective upon receipt of this filing by the Commission. At any time within sixty days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the Board's principal offices. All submissions should refer to File No. SR–MSRB–97–17 and should be submitted by February 12, 1998.

For the Commission by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39545; File No. SR–MSRB–97–10]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Forms G–36(OS) and G–36(ARD) and Recordkeeping, Operative on January 1, 1998

January 13, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 26, 1997, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change (File No. SR–MSRB–97–10). The proposed rule change is described in Items I, II, and III below, which Items have been prepared by the Board. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Board has filed with the Commission a proposed rule change consisting of revised Forms G–36(OS) and G–36(ARD) under rule G–36 and amendments to section (a)(xv) of rule G–8, on recordkeeping. The proposed rule change becomes operative on January 1, 1998.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The texts of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Rule G–36 requires that a broker, dealer or municipal securities dealer acting as underwriter in a primary offering of municipal securities (with certain limited exceptions) send to the Board copies of the official statement and completed Form G–36(OS). If the securities advance refund an outstanding issue of municipal securities, rule G–36 requires that the underwriter also send to the Board copies of the advance refunding document and completed Form G–36(ARD). Forms G–36(OS) and G–36(ARD) are being revised to provide greater clarity to brokers, dealers and municipal securities dealers in the process of completing the forms as well as to provide additional information that would assist the enforcement agencies in their enforcement activities relating to rules G–36 and G–32.

The revisions to Form G–36(OS) add the following new data elements: the date materials are received from the issuer, the date materials are sent to the Board, whether materials submitted consist of more than one document, the actual or expected date of delivery of securities to underwriters, whether the securities advance refund another issue, the SEC registration number, information regarding CUSIP–6 number assignments and the fax number of the preparer. The revisions to Form G–36(ARD) add the following new data elements: the date materials are received from the issuer, the date materials are sent to the Board, whether materials submitted consist of more than one document, the date of delivery of securities to underwriters, the SEC registration number and the fax number of the preparer. In addition, the layout of both forms is reorganized.

Rule G–8(a)(xv) currently requires brokers, dealers and municipal securities dealers acting as underwriters in most primary offerings of municipal securities to maintain certain records relating to such primary offerings and the receipt and sending of materials as required under rule G–36. Rule G–8(a)(xv) is being amended to require such brokers, dealers and municipal securities dealers to record and maintain additional information regarding the date of delivery of the issue to the underwriters, as well as to retain a copy of the receipt of sending the required forms and documents to the Board and a copy of the forms and documents sent. The additional records required under the amended rule will assist the enforcement agencies in their enforcement activities relating to rule G–36.

2. Basis

The Board believes the proposed rule change is consistent with Section 15B(b)(2)(C) of the Act, which provides that the Board's rules shall:

> be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest.

As discussed above, the Board believes that the proposed rule change will provide greater clarity to brokers, dealers and municipal securities dealers in completing Forms G–36(OS) and G–36(ARD) and will provide additional information to the enforcement agencies that would assist them in their enforcement activities relating to rules G–36 and G–32.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act since it would apply equally to all brokers, dealers and municipal securities dealers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

In May 1997, the Board published a notice ("Notice") that, among other things, urged brokers, dealers and municipal securities dealers to review their compliance procedures in connection with rules G–36 and G–32.[1] To assist the agencies charged with enforcing rules G–36 and G–32, the Board proposed in the Notice certain revisions to Forms G–36(OS) and G–36(ARD). These revisions would require underwriters to include information regarding the dates underwriters receive official statements and advance refunding documents from issuers, the date of delivery of the issue to the underwriters, whether a new issue is an advance refunding and the date the documents are sent to the Board. In addition, the Board proposed an amendment to rule G–8(a)(xv) to require underwriters to record the date of delivery of the issue to the underwriters and to retain a copy of the receipt of sending the required forms and documents to the Board, as well as a copy of the forms and documents sent.

In response to its request for comments, the Board received comment letters addressing the proposed revisions to Forms G–36(OS) and G–36(ARD) and the proposed amendments to rule G–8(a)(xv) from eight commentators.

Several commentators state that they supported[2] or did not oppose[3] the proposed changes to Forms G–36(OS) and G–36(ARD) and the related change to rule G–8. One commentator[4] supported the collection and retention of the additional information as a deterrent to issuers for the untimely provision of official statements to underwriters and as a source of information about the frequency and severity of any problem in the municipal market with the delivery of official statements and advance refunding documents. Another commentator[5] stated that the proposal would evidence any late delivery by the issuer of official statements to underwriters.

NASD Regulation, Inc. suggested additional changes to the forms. It suggested that the forms include a clarifying statement which indicates whether the "date of delivery" is synonymous with "settlement or closing date"; that a glossary or definition of terms be included as part of the forms, or alternatively, that the forms contain a reference to the appropriate rule or interpretation which provides appropriate definitions; that, in addition to the managing underwriter, the forms identify each syndicate member and percent participation, when applicable, to be used in compliance activities under rule G–37; and that when firms are identified by name on the forms they also be identified by their broker-dealer number or SEC–8 number. The Board has incorporated most of these suggestions in the revised forms. Information regarding syndicate members and participants was not included since this information would in several respects not be compatible with the type of information mandated by rule G–37 and would require that the forms be enlarged to three pages to add data elements that are entirely unrelated to rule G–36.

Although another commentator[6] did not specifically oppose the changes in the forms, it expressed some concern regarding the revisions by stating that the "undisguised purpose" of the proposed revisions to Forms G–36(OS) and G–36(ARD) was to require brokers, dealers and municipal securities dealers to advise the Board whenever a filing is late under rule G–36. The Board acknowledges that one of the stated purposes of the revisions to Forms G–36(OS) and G–36(ARD) is to assist the enforcement agencies in their enforcement activities.

One commentator[7] opposed the proposed amendments to rule G–8(a)(xv), stating that it would increase the burden on brokers, dealers and municipal securities dealers without solving the underlying problem. The Board believes that the proposed amendments to rule G–8(a)(xv) will at most constitute a negligible compliance burden while providing significant assistance to the enforcement agencies in their enforcement activities relating to rule G–36.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; (iii) was provided to the Commission for its review at least five business days prior to the filing date; and (iv) does not become operative for at least thirty (30) days from the date of its filing, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(e)(6) thereunder and become operative on January 1, 1998. At any time within sixty days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the Board's principal offices. All submissions should refer to File No. SR–MSRB–97–10 and should be submitted by February 12, 1998.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39551; File No. SR–NASD–97–84]

Self-Regulatory Organizations; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change by the National Association of Securities Dealers, Inc. Extending the Pilot Program of the NASD's Short Sale Rule and the Amendment to the Definition of "Legal" Short Sale

January 14, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4[2] thereunder, notice is hereby given that on December 23, 1997, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons and to grant accelerated approval of the proposed rule change.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to extend until April 15, 1998, the pilot program of the NASD's short sale rule ("Rule") and the recently-approved amendment to the definition of "legal" short sale.[3] Below is the text of the proposed rule change. Proposed new language is in italics; proposed deletions are in brackets.

* * * * *

NASD Rule 3350

(1) This section shall be in effect until *April 15, 1998* [January 15, 1998].

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item V below. Nasdaq has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Background and Description of the NASD's Short Sale Rule

On June 29, 1994, the SEC approved the rule applicable to short sales[4] in Nasdaq National Market ("NNM") securities on an eighteen-month pilot basis through March 5, 1996.[5] The termination date for the pilot program for the Rule was subsequently extended until January 15, 1998.[6]

The Rule prohibits member firms from effecting short sales at or below the current inside bid as disseminated by Nasdaq whenever that bid is lower than the previous inside bid.[7] The Rule is in effect during normal domestic market hours (9:30 a.m. to 4:00 p.m., Eastern Time). To ensure that market maker activities that provide liquidity and continuity to the market are not adversely constrained when the Rule is invoked, the Rule provides an exemption to "qualified" Nasdaq market makers (*i.e.*, those market makers that meet the Primary Market Maker ("PMM") standards). Even if a market maker is able to avail itself of the qualified market maker exemption, it can only utilize the exemption from the Rule for transactions that are made in connection with bona fide market making activity. If a market maker does not satisfy the requirements to be a qualified market maker, it can remain a market maker in the Nasdaq system, although it can not take advantage of the exemption from the Rule.

Since the Rule has been in effect, there have been three methods used to determine whether a market maker is eligible for the market maker exemption. Specifically, from September 4, 1994 through February 1, 1996, Nasdaq market makers who maintained a quotation in a particular NNM security for 20 consecutive business days without interruption were exempt from the Rule for short sales in that security, provided that short sales were made in connection with bona fide market making activity (the "20-day" test). From February 1, 1996 until February 14, 1997, the "20-day" test was replaced with a four-part quantitative test known as the Nasdaq PMM Standards.[8] On February 14, 1997, the PMM standards were waived for all NNM securities due to the effects of the SEC's Order Handling Rules and corresponding NASD rule change and system modifications on the operation of the

[1] 15 U.S.C. § 78s(b)(1) (1994).

[2] 17 CFR 240.19b–4 (1997).

[3] The NASD has requested permanent approval of its short sale rule. Securities Exchange Act Release No. 38979 (Aug. 26, 1997), 62 FR 46537 (Sept. 3, 1997) [File No. SR–NASD–97–58]. In response to its solicitation of comments on the filing [SR–NASD–97–58], the Commission has received 352 comment letters to date, which will be considered in connection with the Commission's determination on SR–NASD–97–58.

[4] A short sale is a sale of a security which the seller does not own or any sale which is consummated by the delivery of a security borrowed by, or for the account of, the seller. To determine whether a sale is a short sale, members must adhere to the definition of a "short sale" contained in Rule 3b–3 of the Act, which rule is incorporated into Nasdaq's Rule by NASD Rule 3350(k)(1).

[5] Securities Exchange Act Release No. 34277 (June 29, 1994), 59 FR 34885 (July 7, 1994) [File No. SR–NASD–92–12] ("Short Sale Rule Approval Order").

[6] The Rule was extended on several occasions. *See* Securities Exchange Act Release No. 39140 (Sept. 26, 1997), 62 FR 52170 (Oct. 6, 1997) [File No. SR–NASD–97–65]; Securities Exchange Act Release No. 37917 (Nov. 1, 1996), 61 FR 57934 (Nov. 8, 1996) [File No. SR–NASD–96–41]; Securities Exchange Act Release No. 36171 (Aug. 30, 1995), 60 FR 46651 (Sept. 7, 1995) [File No. SR–NASD–95–35]. The most recent extension of the pilot program through January 15, 1998, was to allow Nasdaq and the NASD to develop more meaningful primary market maker standards.

[7] Nasdaq calculates the inside bid or best bid from all market makers in the security (including bids on behalf of exchanges trading Nasdaq securities on an unlisted trading privileges basis) and disseminates symbols to denote whether the current inside bid is an "up bid" or a "down bid." Specifically, an "up bid" is denoted by a green "up" arrow and a "down bid" is denoted by a red "down" arrow. To effect a "legal" short sale on a down bid, the short sale must be executed at a price at least a 1/16th of a point above the current inside bid. Conversely, if the security's symbol has a green "up" arrow next to it, members can effect short sales in the security without any restrictions.

[8] Under the PMM Standards, a market maker was required to satisfy at least two of the following four criteria each month to be eligible for an exemption from the Rule: (1) the market maker must be at the best bid or best offer as shown on Nasdaq no less than 35 percent of the time; (2) the market maker must maintain a spread no greater than 102 percent of the average dealer spread; (3) no more than 50 percent of the market maker's quotation updates may occur without being accompanied by a trade execution of at least one unit of trading; or (4) the market maker executes 1½ times its "proportionate" volume in the stock. If a PMM did not satisfy the threshold standards after a particular review period, the market maker lost its designation as a PMM (*i.e.*, the "P" next to its market maker identification was removed). Market makers could requalify for designation as a PMM by satisfying the threshold standards in the next review period.

four quantitative standards.[9] For example, among other effects, the requirement that market makers display customer limit orders adversely affected the ability of market makers to satisfy the "102% Average Spread Standard."

Furthermore, in an effort to not constrain the legitimate hedging needs of options market makers, the Rule contains a limited exception for standardized options market makers. The Rule also contains an exemption for warrant market makers similar to the one available for options market makers. The Rule also incorporates seven exemptions contained in Rule 10a–1 under the Act ("Rule 10a-1") that are relevant to trading on Nasdaq.[10]

2. Proposal to Extend the Short Sale Rule

When the Commission approved the Rule on a temporary basis, it made specific findings that the Rule was consistent with Sections 11A, 15A(b)(6), 15A(b)(9), and 15A(b)(11) of the Act. Specifically, the Commission stated that, "recognizing the potential for problems associated with short selling, the changing expectations of Nasdaq market participants and the competitive disparity between the exchange markets and the OTC market, the Commission believes that regulation of short selling of NNM securities is consistent with the Act."[11] In addition, the Commission stated that it "believes that the NASD's short sale bid-test, including the market maker exemption, is a reasonable approach to short sale regulation of Nasdaq National Market securities and reflects the realities of its market structure."[12] However, in light of the Commission's concerns with adverse comments made about the Rule and the Commission's own concerns with the structure and impact of the Rule,[13] the Commission determined to approve the Rule on a temporary basis to afford the NASD and the SEC an opportunity study the effects of the Rule and its exemptions.[14] To address these concerns, in July 1996 and in August 1997, the NASD's Economic Research Department prepared two separate studies on the economic impact of the Rule, which concluded, among other things, that the Rule had no adverse impact on the market.[15] Accordingly, on August 8, 1997, the NASD submitted a proposed rule change that requested permanent approval of the Rule.[16] Additionally, on August 14, 1997, the NASD and Nasdaq submitted a proposed rule change to amend the definition of "legal" short sale in the Rule.[17]

On September 26, 1997, the Commission approved an extension of the Rule until January 15, 1998, to allow Nasdaq, to develop, and receive the required board approval for, more meaningful PMM standards.[18] On the same day, the Commission also approved on a temporary basis until January 15, 1998, the proposed amendment to the definition of "legal" short sale.[19] During its September 1997 meeting, the Nasdaq Board of Directors approved revised PMM standards, which were forwarded to, and approved by, the NASD Board of Governors at its October 9, 1997 meeting.

The NASD has had ongoing discussions with Commission staff regarding the PMM standards. In light of the foregoing, the NASD and Nasdaq are requesting an extension of the Rule until April 15, 1998. The extension of time also will allow the NASD and Nasdaq to provide Commission staff with additional information about the practical effects and the operation of the revised PMM standards, and to explore other options to PMM standards, such as a customer facilitation exemption for market makers. The NASD and Nasdaq also are requesting an extension to April 15, 1998, of the amendment to the definition of "legal" short sale, which previously was approved on a temporary basis until January 15, 1998.

The NASD believes the proposed rule change is consistent with Section 25A(b)(6) of the Act because the Rule is premised on the same anti-manipulation and investor protection concerns that underlie the SEC's own short sale rule, Rule 10a–1 under the Act. In particular, as with Rule 10a–1, the NASD believes its Rule promotes just and equitable principles of trade by permitting long sellers access to market prices at any time, while constraining the execution of potentially abusive and manipulative short sales at or below the bid in a declining market. In addition, as with Rule 10a–1, Nasdaq believes its Rule removes impediments to a free and open market for long sellers and helps to assure liquidity at bid prices that might otherwise be usurped by short sellers. Lastly, because the immediate beneficiaries of the Rule are shareholders of NNM companies, Nasdaq believes its Rule is designed to protect investors and the public interest. At the same time, given that the Rule does not constrain short sales in a raising market or prohibit the execution

[9] Securities Exchange Act Release No. 38294 (February 14, 1997), 62 FR 8289 (February 24, 1997) [File No. SR–NASD–97–07]. On October 3, 1997, the waiver of PMMs was extended until April 1, 1998. Securities Exchange Act Release No. 39198 (Oct. 3, 1997), 62 FR 53365 (Oct. 14, 1997) [SR–NASD–97–3].

[10] NASD Rule 3350(c)(2)–(8). The Rule also provides that a member not currently registered as a Nasdaq market maker in a security that has acquired the security while acting in the capacity of a block positioner shall be deemed to own such security for the purposes of the Rule notwithstanding that such member may not have a net long position in such security, if and to the extent that such member's short position in such security is subject to one or more offsetting positions created in the course of bona fide arbitrage, risk arbitrage, or bona fide hedge activities.

[11] Short Sale Rule Approval Order, *supra* note 5, at 34891.

[12] *Id.* at 34892.

[13] When the NASD's Rule was first considered by the Commission, the SEC received 397 comment letters on the proposal, with 275 comments opposed to the Rule and 122 comments in favor of the Rule. Those commenters opposed to the Rule argued that: (1) the NASD had failed to provide sufficient evidence of the need for the Rule or demonstrate the appropriateness of the Rule based on a "bid" test instead of "tick" test; (2) the PMM standards will have negative effects on both market makers and the Nasdaq market; and (3) the Rule is inconsistent with the requirements of the Act.

[14] In particular, before considering any NASD proposal to extend, modify, permanently implement or terminate the Rule, the Commission requested that the NASD examine: (1) the effects of the Rule on the amount of short selling; (2) the length of time that the Rule is in effect (*i.e.*, the duration of down bid situations); (3) the amount of non-market maker short selling permitted under the Rule; (4) the extent of short selling by market makers exempt from the Rule; (5) whether there have been any incidents of perceived "abusive short selling"; (6) the effects of the Rule on spreads and volatility; (7) whether the behavior of bid prices has been significantly altered by the Rule; and (8) the effect of permitting short selling based on a minimum increment of ⅛th.

[15] In July 1996, the NASD's Economic Analysis Department completed a study on the economic impact of the Rule, which concluded that the Rule has had no adverse impact on the market. The Economic Impact of the Nasdaq Short Sale Rule, NASD Economic Research Department (July 23, 1996) ("July 1996 Short Sale Study"). In the same month, NASD submitted a proposal to adopt the Rule on a permanent basis. Securities Exchange Act Release No. 37942 (July 29, 1996), 61 FR 40693 (Aug. 5, 1996) [SR–NASD–96–30]. Because the NASD believed additional quantitative analysis was necessary to evaluate the effects of the Rule, the NASD withdrew this rule filing. In August 1997, the NASD's Economic Analysis Department completed a second study on the economic impact of the Rule, which further concluded that the Rule has had no adverse impact on the market. The Nasdaq Stock Market Short Sale Rule: Analysis of Market Quality Effects and The Market Maker Exemption, NASD Economic Research Department (August 7, 1997) ("August 1997 Short Sale Study").

[16] Securities Exchange Act Release No. 38979 (Aug. 26, 1997), 62 FR 46537 (Sept. 3, 1997) [File No. SR–NASD–97–58].

[17] Securities Exchange Act Release No. 38975 (Aug. 26, 1997), 62 FR 46535 (Sept. 3, 1997) [File No. SR–NASD–97–59].

[18] *See* Securities Exchange Act Release No. 39140 (Sept. 26, 1997), 62 FR 52170 (Oct. 6, 1997) [File No. SR–NASD–97–65].

[19] Securities Exchange Act Release No. 39139 (Sept. 26, 1997), 62 FR 52169 (Oct. 6, 1997) [File No. SR–NASD–97–59]. The amendment provides that a "legal" short sale can be effected on a down bid: at a price of ⅛th above the bid when the inside spread is ⅛th or greater; or at a price equal to or greater than the offer price when the inside spread is less than ⅛th.

VOL 63 ISS 14 JA 22 1998 UMI

of short sales in a declining market above bid prices, Nasdaq believes the Rule does not diminish the important pricing efficiency and liquidity benefits that legitimate short selling activity provides.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The NASD requests that its proposal to extend the effectiveness of the Rule and the amendment to the definition of a "legal" short sale until April 15, 1998, be approved on an accelerated basis prior to January 15, 1998.

IV. Commission's Findings and Order Granting Accelerated Approval of the Proposed Rule Change

The Commission finds that the NASD's proposed rule change seeking to extend the pilot of the Rule and the amendment to the definition of "legal" short sale through April 15, 1998, is consistent with the Act and the rules and regulations promulgated thereunder. Specifically, the Commission finds that the proposed rule change is consistent with Section 15A(b)(6) of the Act which requires that the NASD rules be designed, among other things, to facilitate securities transactions and to protect investors and the public interest. The Commission believes that the proposed rule change is consistent with the Act because extension of the pilot and the amendment to the definition of a "legal" short sale for a short period of time will allow the Commission and the NASD to consider the potential problems associated with short selling, the changing expectations of Nasdaq market participants and the potential for competitive disparity between the exchange markets and the over-the-counter market. This extension also will afford the NASD time to submit to the Commission revised PMM standards and will allow the Commission to review on a contemporaneous basis these two integrally related rules (*i.e.*, the short sale and PMM rules). Once the NASD develops reasonable PMM standards, the Commission will be in a better position to evaluate the need for a short sale rule as well as the appropriateness of an exemption for PMMs.

The Commission also finds good cause for approving the proposed rule change prior to the 30th day after the date of publication of notice of filing thereof. The Commission believes that it is appropriate to approve on an accelerated basis the extension of the pilot program of the Rule and the amendment to the definition of "legal" short sale through April 15, 1998, because it will ensure the continuous operation of the Rule and the amendment to the definition of "legal" short sale, while the NASD addresses the Commission's questions and concerns, provides Commission staff with additional information about the practical effects and the operation of the revised PMM standards, and explores other options to PMM standards, such as a customer facilitation exemption for market makers.

V. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. People making whiten submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the NASD's principal offices. All submissions should refer to File No. SR–NASD–97–94 and should be submitted by February 11, 1998.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change, SR–NASD–97–94 be, and hereby is approved through April 15, 1998.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[20]

[20] 17 CFR 200.30–3(a)(12)(1997).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8025–01–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms and Recordkeeping Requirements Agency Information Collection Activity Under OMB Review

AGENCY: Office of the Secretary, DOT.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), this notice announces that the Information Collection (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected burden. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on October 30, 1997 [62 FR 58858].

DATES: Comments must be submitted on or before February 23, 1998.

FOR FURTHER INFORMATION CONTACT: Judith Street, ABC–100; Federal Aviation Administration; 800 Independence Avenue, S.W.; Washington, DC 20591; Telephone number (202) 267–9895.

SUPPLEMENTARY INFORMATION:

Federal Aviation Administration (FAA)

Title: Special Federal Aviation Regulation No. 71.

OMB Control Number: 2120–0620.

Type of Request: Extension of currently approved collection.

Affected Public: Individuals, business or other for-profit organizations.

Abstract: As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), the FAA submitted these requirements to OMB. As a result, an emergency clearance of the information collection requirement (No. 2120–0620) has been approved through February 28, 1998.

SFAR 71, which became effective on October 26, 1994, applies to air tour operators in the state of Hawaii. Under the SFAR, both Part 91 and Part 135 operators are required to provide a passenger safety briefing on water ditching procedures, use of required flotation equipment, and emergency egress from the aircraft in event of a water landing.

Annual Estimated Burden Hours: 6,977 hours.

Addressee: Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention FAA Desk Officer.

Comments are Invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Departments estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued in Washington, DC on January 15, 1998.

Phillip A. Leach,

Clearance Officer, United States Department of Transportation.

[FR Doc. 98–1421 Filed 1–21–98; 8:45 am]

BILLING CODE 4910–62–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Index of Administrator's Decisions and Orders in Civil Penalty Actions; Publication

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of publication.

SUMMARY: This notice constitutes the required quarterly publication of an index of the Administrator's decisions and orders in civil penalty cases. This publication ensures that the agency is in compliance with statutory indexing requirements.

FOR FURTHER INFORMATION CONTACT: James S. Dillman, Assistant Chief Counsel for Litigation (AGC–400), Federal Aviation Administration, 400 7th Street, SW., Suite PL 200–A, Washington, DC 20590; telephone (202) 366–4118.

SUPPLEMENTARY INFORMATION: The Administrative Procedure Act requires Federal agencies to maintain and make available for public inspection and copying current indexes containing identifying information regarding materials required to be made available or published. 5 U.S.C. 552(a)(2). In a notice issued on July 11, 1990, and published in the **Federal Register** (55 FR 29148; July 17, 1990), the FAA announced the public availability of several indexes and summaries that provide identifying information about the decisions and orders issued by the Administrator under the FAA's civil penalty assessment authority and the rules of practice governing hearings and appeals of civil penalty actions. 14 CFR Part 13, Subpart G.

The FAA maintains an index of the Administrator's decisions and orders in civil penalty actions organized by order number and containing identifying information about each decision or order. The FAA also maintains a cumulative subject-matter index and digests organized by order number.

The indexes are published on a quarterly basis (i.e., January, April, July, and October). This publication represents the quarter ending on December 31, 1997.

The FAA first published these indexes and digests for all decisions and orders issued by the Administrator through September 30, 1990. 55 FR 45984; October 31, 1990. The FAA announced in that notice that only the subject-matter index would be published cumulatively and that the order number index would be non-cumulative. The FAA announced in a later notice that the order number indexes published in January would reflect all of the civil penalty decisions for the previous year. 58 FR 5044; 1/19/93.

The previous quarterly publications of the indexes of the Administrator's decisions and orders in civil penalty cases have appeared in the **Federal Register** as follows:

Dates of quarter	Federal Register publication
11/1/89–9/30/90	55 FR 45984; 10/31/90.
10/1/90–12/31/90 ..	56 FR 44886; 2/6/91.
1/1/91–3/31/91	56 FR 20250; 5/2/91.
4/1/91–6/30/91	56 FR 31984; 7/12/91.

7/1/97–9/30/97	62 FR 53856; 10/16/97.

The civil penalty decisions and orders, and the indexes and digests are available in FAA offices. In addition, the Administrator's civil penalty decisions have been published by commerical publishers (Hawkins Publishing Company and Clark Boardman Callahan) and are available on computer on-line services (Westlaw, LEXIS, Compuserve and FedWorld). (The addresses of FAA offices where the civil penalty decisions may be reviewed and information regarding these commercial publications and computer databases is provided at the end of this notice.)

  Manufacturer's maintenance manual ..... 96–3 America West Airlines; 97–31 Sanford Air; 97–32 Florida Propeller.
Minimum Equipment List (MEL) (See Aircraft Maintenance)
Mootness, appeal dismissed as moot ..... 92–9 Griffin; 94–17 TCI.
National Aviation Safety Inspection Program (NASIP) ..... 90–16 Rocky Mountain.
National Transportation Safety Board:
  Administrator not bound by NTSB case law ..... 91–12 Terry & Menne; 92–49 Richardson & Shimp; 93–18 Westair Commuter.
  Lack of Jurisdiction ..... 90–11 Thunderbird Accessories; 90–17 Wilson; 92–74 Wendt.
Notice of Hearing: Receipt ..... 92–31 Eaddy.
Notice of Proposed Civil Penalty:
  Initiates Action ..... 91–9 Continental Airlines.
  Signature of agency attorney ..... 93–12 Langton.
  Withdrawal of ..... 90–17 Wilson.
Operate, generally ..... 91–12 & 91–31 Terry & Menne; 93–18 Westair Commuter; 96–17 Fenner.
  Responsibility of aircraft owner/operator for actions of pilot ..... 96–17 Fenner.
Oral Argument before Administrator on appeal:
  Decision to hold ..... 92–16 Wendt.
  Instructions for ..... 92–27 Wendt.
Order Assessing Civil Penalty:
  Appeal from ..... 92–1 Costello; 95–19 Rayner.
  Timeliness of request for hearing ..... 95–19 Rayner.
  Withdrawal of ..... 89–4 Metz; 90–16 Rocky Mountain; 90–22 USAir; 95–19 Rayner; 97–7 Stalling.
Parts Manufacturer Approval (PMA): Failure to obtain ..... 93–19 Pacific Sky Supply.
Passenger Misconduct ..... 92–3 Park.
  Assault/Battery ..... 96–6 Ignatov; 97–12 Mayer.
  Interference with a crew member ..... 96–6 Ignatov; 97–12 Mayer.
  Smoking ..... 92–37 Giuffrida.
  Stowing carry-on items ..... 97–12 Mayer.
Penalty (See Sanction; Hazardous Materials)
Person ..... 93–18 Westair Commuter.

VOL 63 ISS 14 JA 22 1998 UMI

Prima Facie Case (See also Proof & Evidence) ..... 95–26 Hereth; 96–3 America West Airlines.
Proof & Evidence (See also Federal Rules of Evidence):
  Affirmative Defense ..... 92–13 Delta Air Lines; 92–72 Giuffrida.
  Burden of Proof ..... 90–26 & 90–43 Waddell; 91–3 Lewis; 91–30 Trujillo; 92–13 Delta Air Lines; 92–72 Giuffrida; 93–29 Sweeney; 97–32 Florida Propeller.
  Circumstantial Evidence ..... 90–12, 90–19 & 91–9 Continental Airlines; 93–29 Sweeney; 96–3 America West Airlines; 97–10 Alphin; 97–11 Hampton; 97–32 Florida Propeller.
  Credibility (See Administrative Law Judges; Credibility of Witnesses)
  Criminal standard rejected ..... 91–12 Terry & Menne.
  Closing Arguments (See also Final Oral Argument) ..... 94–20 Conquest Helicopters.
  Extra-record material ..... 95–26 Hereth; 96–24 Horizon.
  Hearsay ..... 92–72 Giuffrida; 97–30 Emery Worldwide Airlines.
  Offer of proof ..... 97–32 Florida Propeller.
  Preponderance of evidence ..... 90–11 Thunderbird Accessories; 90–12 Continental Airlines; 91–12 & 91–31 Terry & Menne; 92–72 Giuffrida; 97–30 Emery Worldwide Airlines; 97–31 Sanford Air; 97–32 Florida Propeller.
  Presumption that message on ATC tape is received as transmitted. 91–12 Terry & Menne; 92–49 Richardson & Shimp.
  Presumption that a gun is deadly or dangerous ..... 90–26 Waddell; 91–30 Trujillo.
  Presumption that owner gave pilot permission ..... 96–17 Fenner.
  Prima facie case ..... 95–26 Hereth, 96–3 America West.
  Settlement offer ..... 95–16 Mulhall; 96–25 USAir.
  Subsequent remedial measures ..... 96–24 Horizon; 96–25 USAir.
  Substantial evidence ..... 92–72 Giuffrida.
Pro Se Parties:
  Special Considerations ..... 90–11 Thunderbird Accessories; 90–3 Metz; 95–25 Conquest.
Prosecutorial Discretion ..... 89–6 American Airlines; 90–23 Broyles; 90–38 Continental Airlines; 91–41 [Airport Operator]; 92–46 Sutton-Sautter; 92–73 Wyatt; 95–17 Larry's Flying Service.
Reconsideration:
  Denied by ALJ ..... 89–4 & 90–3 Metz.
  Granted by ALJ ..... 92–32 Barnhill.
  Late Request for ..... 97–14 Pacific Aviation.
  Petition based on new material ..... 96–23 Kilrain.
  Repetitious petitions ..... 96–9 [Airport Operator].
  Stay of Order Pending ..... 90–31 Carroll; 90–32 Continental Airlines.
Redundancy, enhancing safety ..... 97–11 Hampton.
Remand ..... 89–6 American Airlines; 90–16 Rocky Mountain; 90–24 Bayer; 91–51 Hagwood; 91–54 Alaska Airlines; 92–1 Costello; 92–76 Safety Equipment; 94–37 Houston.
Repair Station ..... 90–11 Thunderbird Accessories; 92–10 Flight Unlimited; 94–2 Woodhouse; 97–9 Alphin; 97–10 Alphin; 97–31 Sanford Air; 97–32 Florida Propeller.
Request for Hearing ..... 94–37 Houston; 95–19 Rayner.
  Constructive withdrawal of ..... 97–7 Stalling.
Rules of Practice (14 CFR Part 13, Subpart G):
  Applicability of ..... 90–12, 90–18 & 90–19 Continental Airlines; 91–17 KDS Aviation.
  Challenges to ..... 90–12, 90–18 & 90–19 Continental Airlines; 90–21 Carroll; 90–37 Northwest Airlines.
  Effect of Changes in ..... 90–21 Carroll; 90–22 USAir; 90–38 Continental Airlines.
  Initiation of Action ..... 91–9 Continental Airlines.
Runway incursions ..... 92–40 Wendt; 93–18 Westair Commuter.
Sanction:
  Ability to Pay ..... 89–5 Schultz; 90–10 Webb; 91–3 Lewis; 91–38 Esau; 92–10 Flight Unlimited; 92–32 Barnhill; 92–37 & 92–72 Giuffrida; 92–38 Cronberg; 92–46 Sutton-Sautter; 92–51 Koblick; 93–10 Costello; 94–4 Northwest Aircraft Rental; 94–20 Conquest Helicopters; 95–16 Mulhall; 95–17 Larry's Flying Service; 97–8 Pacific Av. d/b/a Inter-Island Helicopters; 97–11 Hampton; 97–16 Mauna Kea.
  Agency policy:
    ALJ Bound by ..... 90–37 Northwest Airlines; 92–46 Sutton-Sautter; 96–19 [Air Carrier].
    Changes after complaint ..... 97–7 & 97–17 Stallings.
    Statements of policy (e.g., FAA Order 2150.3A, Sanction Guidance Table, memoranda pertaining to). 90–19 Continental Airlines; 90–23 Broyles; 90–33 Cato; 90–37 Northwest Airlines; 92–46 Sutton-Sautter; 96–4 South Aero; 96–19 [Air Carrier]; 96–25 USAir.
  Compliance Disposition ..... 97–23 Detroit Metropolitan.
  Consistency with Precedent ..... 96–6 Ignatov; 96–26 Midtown; 97–30 Emery Worldwide Airlines.
    But when precedent is based on superceded sanction policy 96–19 [Air Carrier].
  Corrective Action ..... 91–18 [Airport Operator]; 91–40 [Airport Operator]; 91–41 [Airport Operator]; 92–5 Delta Air Lines; 93–18 Westair Commuter; 94–28 Toyota; 96–4 South Aero; 96–19 [Air Carrier]; 97–16 Mauna Kea; 97–23 Detroit Metropolitan.

  Discovery (See Discovery).
  Factors to consider ..... 89–5 Schultz; 90–23 Broyles; 90–37 Northwest Airlines; 91–3 Lewis; 91–18 [Airport Operator]; 91–40 [Airport Operator]; 91–41 [Airport Operator]; 92–10 Flight Unlimited; 92–46 Sutton-Sautter; 92–51 Koblick; 94–28 Toyota; 95–11 Horizon; 96–19 [Air Carrier]; 96–26 Midtown; 97–16 Mauna Kea.
  First-Time Offenders ..... 89–5 Schultz; 92–5 Delta Air Lines; 92–51 Koblick.
  HazMat (See Hazardous Materials).
  Inexperience ..... 92–10 Flight Unlimited.
  Installment Payments ..... 95–16 Mulhall; 95–17 Larry's Flying Service.
  Maintenance ..... 95–11 Horizon; 96–3 America West Airlines; 97–8 Pacific Av. d/b/a Inter-Island Helicopters; 97–9 Alphin; 97–10 Alphins; 97–11 Hampton; 97–30 Emery Worldwide Airlines.
  Maximum ..... 90–10 Webb; 91–53 Koller; 96–19 [Air Carrier].
  Minimum (HazMat) ..... 95–16 Mulhall; 96–26 Midtown.
  Modified ..... 89–5 Schultz; 90–11 Thunderbird Accessories; 91–38 Esau; 92–10 Flight Unlimited; 92–13 Delta Air Lines; 92–32 Barnhill.
  Partial Dismissal of Complaint/Full Sanction (See also Complaint). 94–19 Pony Express; 94–40 Polynesian Airways.
  Sanctions in specific cases:
    Passenger Misconduct ..... 97–12 Mayer.
    Person evading screening (See also Screening) ..... 97–20 Werle.
    Pilot Deviation ..... 92–8 Watkins.
    Test object detection ..... 90–18 & 90–19 Continental Airlines; 96–19 [Air Carrier].
    Unairworthy aircraft ..... 97–8 Pacific Av. d/b/a Inter-Island Helicopters; 97–9 Alphin.
    Unauthorized access ..... 90–19 Continental Airlines; 90–37 Northwest Airlines; 94–1 Delta Air Lines.
    Weapons violations ..... 90–23 Broyles; 90–33 Cato; 91–3 Lewis; 91–38 Esau; 92–32 Barnhill; 92–46 Sutton-Sautter; 92–51 Koblick; 94–5 Grant; 97–7 & 97–17 Stallings.
Screening of Persons:
  Air Carrier failure to detect weapon Sanction ..... 94–44 American Airlines.
  Entering Sterile Areas ..... 90–24 Bayer; 92–58 Hoedl; 97–20 Werle.
  Sanction for individual evading screening (See also Sanction) ..... 97–20 Werle.
Security (See Screening of Persons, Standard Security Program, Test Object Detection, Unauthorized Access, Weapons Violations):
  Sealing of Record ..... 97–13 Westair Commuter; 97–28 Continental.
Separation of Functions ..... 90–12 Continental Airlines; 90–18 Continental Airlines; 90–19 Continental Airlines; 90–21 Carroll; 90–38 Continental Airlines; 93–13 Medel.
Service (See also Mailing Rule; Receipt):
  Of NPCP ..... 90–22 USAir; 97–20 Werle.
  Of FNPCP ..... 93–13 Medel.
  Receipt of document sent by mail ..... 92–31 Eaddy.
  Return of certified mail ..... 97–7 & 97–17 Stallings.
  Valid Service ..... 92–18 Bargen.
  Settlement ..... 91–50 & 92–1 Costello; 95–16 Mulhall.
  Smoking ..... 92–37 Giuffrida; 94–18 Luxemburg.
Stale Complaint Rule:
  If NPCP not sent ..... 97–20 Werle.
Standard Security Program (SSP):
  Compliance with ..... 90–12, 90–18 & 90–19 Continental Airlines; 91–33 Delta Air Lines; 91–55 Continental Airlines; 92–13 & 94–1 Delta Air Lines; 96–19 [Air Carrier].
  Ground Security Coordinator ..... 96–16 Westair Commuter.
Statute of Limitations ..... 97–20 Werle.
Stay of Orders ..... 90–31 Carroll; 90–32 Continental Airlines.
  Pending judicial review ..... 95–14 Charter Airlines.
Strict Liability ..... 89–5 Schultz; 90–27 Gabbert; 91–18 [Airport Operator]; 91–40 [Airport Operator]; 91–58 [Airport Operator]; 97–23 Detroit Metropolitan.
Test Object Detection ..... 90–12, 90–18, 90–19, 91–9 & 91–55 Continental Airlines; 92–13 Delta Air Lines; 96–19 [Air Carrier].
  Proof of violation ..... 90–18, 90–19 & 91–9 Continental Airlines; 92–13 Delta Air Lines.
  Sanction ..... 90–18 & 90–19 Continental Airlines; 96–19 [Air Carrier].
Timeliness (See also Complaint; Mailing Rule; and Appeals):
  Of response to NPCP ..... 90–22 USAir.
  Of complaint ..... 91–51 Hagwood; 93–13 Medel; 94–7 Hereth.
  Of initial decision ..... 97–31 Sanford Air.
  Of NPCP ..... 92–73 Wyatt.
  Of reply brief ..... 97–11 Hampton.
  Of request for hearing ..... 93–12 Langton; 95–19 Rayner.
  Of EAJA application (See EAJA-Final disposition, EAJA-Jurisdiction)
Unapproved Parts (See also Parts Manufacturer Approval) ..... 93–19 Pacific Sky Supply.
Unauthorized Access:

VOL 63 ISS 14 JA 22 1998 UMI

To Aircraft	90–12 & 90–19 Continental Airlines; 94–1 Delta Air Lines.
To Air Operations Area (AOA)	90–37 Northwest Airlines; 91–18 [Airport Operator]; 91–40 [Airport Operator]; 91–58 [Airport Operator]; 94–1 Delta Air Lines.

Civil Penalty Actions—Orders Issued by The Administrator Digests

(Current as of December 31, 1997)

The digests of the Administrator's final decisions and orders are arranged by order number, and briefly summarize key points of the decision. The following compilation of digests includes all final decisions and orders issued by the Administrator from October 1, 1997, to December 31, 1997. The FAA publishes noncumulative supplements to this compilation on a quarterly basis (e.g., April, July, October, and January of each year).

These digests do not constitute legal authority, and should not be cited or relied upon as such. The digests are not intended to serve as a substitute for proper legal research. Parties, attorneys, and other interested persons should always consult the full text of the Administrator's decisions before citing them in any context.

In the Matter of Air St. Thomas

[Order No. 97–29 (10/1/97)]

Appeal Dismissed. Respondent has failed to show good cause for the lateness of its notice of appeal. As a result, its appeal is dismissed.

In the Matter of Emery Worldwide Airlines

[Order No. 97–30 (10/8/97)]

Aircraft Held Unairworthy. It was proven by the preponderance of the evidence that plexiglass light covers were missing in the cargo compartment of this DC–8–63 freighter during 21 flights. The Administrator affirmed the law judge's finding that the light covers had simply been removed while the light bulbs were being changed, were then reinstalled and were in place during the flights. The Administrator also affirmed the law judge's determination that the replacement of the missing plexiglass light covers could not be deferred under Respondent's Minimum Equipment List (MEL). The aircraft was unairworthy because, without the light covers, the aircraft deviated from its type design. The Administrator did not decide whether the aircraft was in a condition unsafe for flight due to the missing light covers. The Administrator affirms the $9,000 civil penalty assessed by the law judge.

In the Matter of Sanford Air

[Order No. 97–31 (10/8/97)]

Responsibility for repairs for which Respondent has billed the customer. If Respondent was unaware of its employee's activities, its own deficiencies in supervising the employee are the cause.

Repair Station Responsibility. Repair station is responsible for improper repairs performed by its employee, despite Respondent's argument that repairs were performed after hours and off company premises. Respondent may not evade.

Lateness of Initial Decision. Dismissal is not an appropriate remedy for law judge's failure to issue written initial decision within 30 days. If time was Respondent's real concern, its remedy was to initiate action to compel the law judge to issue his decision. Respondent did not do this, nor has it shown any prejudice resulting from the delay. The law judge's order assessing a civil penalty of $4,750 is affirmed.

In the Matter of Florida Propeller

[Order No. 97–32 (10/8/97)]

Evidence Insufficient. Complainant alleged that it was impossible for propeller blades to wear down so much in short time that passed since Respondent's overhaul of the propeller, and therefore, Respondent must have returned the propeller to service with undersized blades. It may be that it is impossible to wear down propeller blades in such a short time, but the evidence in this case is insufficient to prove this claim. Although Complainant argued it had unrebutted expert testimony that blades could not have worn down so much, the witness Complainant relied on admitted he had no expertise or training in propeller wear and tear. The law judge believed the propeller mechanic who testified that he measured the blades at the time of overhaul, and the blades were within limits. Complainant has provided insufficient reason to overturn the law judge's credibility determinations, which are entitled to deference. The law judge's dismissal of the complaint is affirmed.

Failure to Preserve Issue for Appeal. Complainant argues that the case should be remanded to permit it to introduce its rebuttal testimony, which the law judge excluded. By refusing to offer the substance of the rebuttal testimony for the record, Complainant failed to preserve this issue for appeal.

In the Matter of Daniel B. Rawlings

[Order No. 97–33 (10/21/97)]

Memo to Law Judge Construed as Notice of Appeal; Respondent Directed to File Appeal Brief. After Respondent failed to file an answer to the complaint, the law judge issued an order assessing a civil penalty. Five days later, Respondent sent the law judge a memorandum indicating that he had not received either the complaint or the law judge's initial order advising him of the need to file an answer. Respondent's memorandum can be construed as a notice of appeal from the law judge's order assessing a civil penalty. Although ordinarily a party must perfect its appeal by filing an appeal brief within 50 days of the initial decision, an exception will be made here because Respondent's memorandum was not construed as a notice of appeal until now. As a result, Respondent is given until November 25, 1997, to file an appeal brief. If Respondent fails, without good cause, to meet this deadline, the law judge's order assessing a $2,000 civil penalty will be affirmed. Respondent's appeal brief should address whether Respondent had good cause for failing to file a timely answer to the complaint. Complainant is granted 35 days from the service date of Respondent's appeal brief to file a reply brief.

In the Matter of Continental Airlines

[FAA Order No. 97–34 (10/23/97)]

Leave to File Additional Brief Denied. Complainant seeks leave to file a reply to Continental's reply brief. In Continental's reply brief, Continental attacked the validity of a security directive; Complainant had not addressed the issue of the validity of the security directive in its appeal brief.

Good cause does not exist to grant Complainant's petition for leave to file an additional brief. The Federal Courts of Appeals constitute a more appropriate forum to attack existing regulations as not consistent with the U.S. Constitution, the Administrative Procedure Act, and/or the agency's enabling act. In this case, Continental is arguing that the public should have been given notice and opportunity to comment before the security directive became effective. Whether notice and an opportunity to comment should have been afforded when the security directive was issued is a question that is better left for review by a Federal Court. Also, the question of whether the security directive is justified has nothing to do with the facts of this case, and is better directed to a Federal Court.

In the Matter of Gordon Air Services

[Order No. 97–35 (10/29/97)]

Appeal Dismissed. Respondent failed to perfect its appeal by filing an appeal brief. As a result, Respondent's appeal is dismissed.

In the Matter of Avcon Conversions, Inc.

[Order No. 97–36 (10/29/97)]

Appeal Dismissed. Respondent failed to perfect its appeal by filing an appeal brief. As a result, Respondent's appeal is dismissed.

In the Matter of David E. Roush

[Order No. 97–37 (10/29/97)]

Appeal Dismissed. Respondent failed to perfect its appeal by filing an appeal brief. As a result, Respondent's appeal is dismissed.

In the Matter of Air St. Thomas

[Order No. 97–38 (11/17/97)]

Further Briefing Ordered. In an earlier order (FAA Order No. 97–29), the Administrator dismissed Respondent's appeal due to the lateness of its notice of appeal. Respondent then filed a document captioned "Notice of Appeal to Reopen Case," which can be construed as a petition for reconsideration of the Administrator's order of dismissal.

The record of this case does not explain Respondent's reasons for failing to file a timely notice of appeal. As a result, it is unclear whether Respondent had good cause for the untimeliness. Respondent is granted until January 20, 1998, to file a brief detailing its reasons for failing to file a timely notice of appeal. As for Complainant, Complainant is granted 30 days from the service date of Respondent's brief to file a reply brief.

In the Matter of Delta Air Lines

[FAA Order No. 97–39 (12/1/97)]

Appeal Dismissed. Complainant withdrew its notice of appeal. Complainant's appeal is dismissed.

Commercial Reporting Services of the Administrator's Civil Penalty Decisions and Orders

1. *Commercial Publications:* The Administrator's decisions and orders in civil penalty cases are available in the following commercial publications:

Civil Penalty Cases Digest Service, published by Hawkins Publishing Company, Inc., P.O. Box 480, Mayo, MD 21106, (410) 798–1677;

Federal Aviation Decisions, Clark Boardman Callaghan, a subsidiary of West Information Publishing Company, 50 Broad Street East, Rochester, NY 14694, 1–800–221–9428.

2. *CD-ROM.* The Administrator's orders and decisions are available on CD-ROM through Aeroflight Publications, P.O. Box 854, 433 Main Street, Gruver, TX 79040, (806) 733–2483.

3. *On-Line Services.* The Administrator's decisions and orders in civil penalty cases are available through the following on-line services:

- Westlaw (the Database ID is FTRAN-FAA).
- LEXIS [Transportation (TRANS) Library, FAA file.].
- Compuserve.
- FedWorld.

FAA Offices

The Administrator's decisions and orders, indexes, and digests are available for public inspection and copying at the following location in FAA headquarters:

FAA Hearing Docket, Federal Aviation Administration, 800 Independence Avenue, SW., Room 924A, Washington, DC 20591; (202) 267–3641.

These materials are also available at all FAA regional and center legal offices at the following locations:

Office of the Assistant Chief Counsel for the Aeronautical Center (AMC–7), Mike Monroney Aeronautical Center, 6500 South MacArthur Blvd., Oklahoma City, OK 73125; (405) 954–3296.

Office of the Assistant Chief Counsel for the Alaskan Region (AAL–7), Alaskan Region Headquarters, 222 West 7th Avenue, Anchorage, AL 99513; (907) 271–5269.

Office of the Assistant Chief Counsel for the Central Region (ACE–7), Central Region Headquarters, 601 East 12th Street, Federal Building, Kansas City, MO 64106; (816) 426–5446.

VOL 63 ISS 14 JA 22 1998 UMI

Office of the Assistant Chief Counsel for the Eastern Region (AEA–7), Eastern Region Headquarters, JFK International Airport, Federal Building, Jamaica, NY 11430; (718) 553–3285.

Office of the Assistant Chief Counsel for the Great Lakes Region (AGL–7), 2300 East Devon Avenue, Suite 419, Des Plaines, IL 60018; (708) 294–7108.

Office of the Assistant Chief Counsel for the New England Region (ANE–7), New England Region Headquarters, 12 New England Executive Park, Room 401, Burlington, MA 01803–5299; (617) 238–7050.

Office of the Assistant Chief Counsel for the Northwest Mountain Region (ANM–7), Northwest Mountain Region Headquarters, 1601 Lind Avenue, SW, Renton, WA 98055–4056; (206) 227–2007.

Office of the Assistant Chief Counsel for the Southern Region (ASO–7), Southern Region Headquarters, 1701 Columbia Avenue, College Park, GA 30337; (404) 305–5200.

Office of the Assistant Chief Counsel for the Southwest Region (ASW–7), Southwest Region Headquarters, 2601 Meacham Blvd., Fort Worth, TX 76137–4298; (817) 222–5087.

Office of the Assistant Chief Counsel for the Technical Center (ACT–7), Federal Aviation Administration Technical Center, Atlantic City International Airport, Atlantic City, NJ 08405; (609) 485–7087.

Office of the Assistant Chief Counsel for the Western-Pacific Region (AWP–7), Western-Pacific Region Headquarters, 15000 Aviation Boulevard, Lawndale, CA 90261; (310) 725–7100.

Issued in Washington, DC on January 12, 1998.

James S. Dillman,

Assistant Chief Counsel for Litigation.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Executive Committee of the Aviation Rulemaking Advisory Committee; Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting of the Executive Committee of the Federal Aviation Administration Aviation Rulemaking Advisory Committee.

DATES: The meeting will be held on February 11, 1998, at 10 a.m.

ADDRESSES: The meeting will be held at the Aerospace Industries Association of America, 1250 Eye Street, NW., Goddard Room, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Miss Jean Casciano, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–9683; fax (202) 267–5075; e-mail Jean.Casciano@faa.dot.gov.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the Executive Committee to be held on February 11, 1998, at the Aerospace Industries Association of America, 1250 Eye Street, NW., Goddard Room, Washington, DC, 10 a.m. The agenda will include:

- A vote on a proposed Use of Digital Systems for Direct Access and Interchange of Technical Data advisory circular.
- A brief update on the status of the proposed new Fuel Tank Harmonization Working Group.
- A brief update on the status of the Overflights of the National Parks effort.
- A brief update on the Rulemaking Business Process Reengineering effort.
- Administrative issues.

Attendance is open to the interested public but will be limited to the space available. The public must make arrangements by February 2, 1998, to present oral statements at the meeting. The public may present written statements to the executive committee at any time by providing 25 copies to the Executive Director, or by bringing the copies to him at the meeting.

Sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested 10 calendar days before the meeting. Arrangements may be made by contacting the person listed under the heading **FOR FURTHER INFORMATION CONTACT**. A copy of the proposed advisory circular being put to a vote may also be obtained from that person.

Issued in Washington, DC, on January 15, 1998.

Joseph A. Hawkins,

Executive Director, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Rule on Application To Impose and Use a Passenger Facility Charge (PFC) at Fort Lauderdale-Hollywood International Airport, Fort Lauderdale, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use a PFC at Fort Lauderdale-Hollywood International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before January 23, 1998.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Orlando Airports District Office, 5950 Hazeltine National Dr., Suite 400, Orlando, Florida 32822.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to William F. Sherry, Manager of Airports of the Broward County Aviation Department at the following address: 320 Terminal Drive, Fort Lauderdale, Florida 33315.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Broward County Aviation Department under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Sandra A. Holliday, Project Manager, Orlando Airports District Office, 5950 Hazeltine National Dr., Suite 400, Orlando Florida 32822, 407–812–6331. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use a PFC at Fort Lauderdale-Hollywood International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On January 13, 1998, the FAA determined that the application to impose and use a PFC submitted by the Broward County Aviation Department was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than April 30, 1998.

The following is a brief overview of PFC Application No. 98–02–C–00–FLL.

Level of the proposed PFC: $3.00.

Proposed charge effective date: September 1, 1998.

Proposed charge expiration date: February 1, 2009.

Total estimated PFC revenue: $224,761,000.

Brief description of proposed project(s): Dual Parallel Taxiway A (now called Taxiway C); Air Cargo Apron and Drainage; Noise Monitoring System; New Terminal Development; Muck Removal—New Terminal Development; Utility Corridor; Airport Facilities Maintenance Building; Terminal Roadway Improvements; Hardstand Support Facility; EVIDS and Life Safety Improvements; Modifications of ASR–9 Radar; ARFF Facility Improvements; Interior Service Road Development; Water and Sewer Improvements; Muck Removal—Future Phases; Future Phase—Terminal Design; Aviation Easements; West Side Apron Phase 2 and 3; Decommission VOR; ARFF Vehicle; Taxiway A (now called Taxiway C)—Center Section; Rebuild 4th Avenue and Noise Buffer Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/Commercial Operators filing FAA Form 1800–31; Scheduled Foreign Flag Air Carriers filing RSPA Form T–100(f) operating scheduled intercontinental service from Fort Lauderdale-Hollywood International Airport.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT**.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Broward County Aviation Department.

Issued in Orlando, Florida on January 14, 1998.

Charles E. Blair,

Manager, Orlando Airports District Office, Southern Region.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA Docket No. 87–2, Notice. No. 6]

RIN 2130–AB20

Automatic Train Control and Advanced Civil Speed Enforcement System; Northeast Corridor Railroads

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of public hearing.

SUMMARY: The Federal Railroad Administration will hold a public hearing concerning issues raised in a November 20, 1997 proposed order of particular applicability that would require all trains operating on the north end of the Northeast Corridor (NEC) between Boston, Massachusetts and New York, New York, to be controlled by locomotives equipped to respond to a new advanced civil speed enforcement system (ACSES) in addition to the automatic train control (ATC) system that is currently required on the NEC. The proposed order contains performance standards for the cab signal/ATC and ACSES systems on the NEC and would also authorize increases in certain maximum authorized train speeds and safety requirements supporting improved rail service.

DATES: (1) The hearing will begin at 10:00 a.m. on Tuesday, February 17, 1998, Eastern Standard Time.

(2) Any party wishing to participate in the public hearing should notify the Docket Clerk by telephone or fax at the numbers provided below, or by mail at the address provided below, by February 12, 1998. The notification should include who the party represents, the particular subject(s) the party plans to address, the party's mailing address and three copies of any oral statement that he or she intends to make at the hearing. Parties who do not meet this deadline may be denied the opportunity to present oral testimony, although their written statements will be included in the record of this proceeding.

(3) Parties who do not wish to testify, but wish to submit written comments for inclusion in the hearing docket should submit them by February 24, 1998.

ADDRESSES: (1) Hearing location—9th Floor, 1120 Vermont Avenue, N.W., Washington, D.C. 20005.

(2) Ms. Renee Bridgers, Docket Clerk, FRA Docket No. 87–2, Office of the Chief Counsel, Federal Railroad Administration, Mail Stop 10, 400 7th Street, S.W., Washington, D.C. 20590 (telephone (202) 632–3198, fax (202) 632–3709).

FOR FURTHER INFORMATION CONTACT: W.E. Goodman, Staff Director, Signal and Train Control Division, Office of Safety, FRA, 400 Seventh Street, S.W., Washington, D.C. 20590 (telephone (202) 632–3353), or Patricia V. Sun, Office of Chief Counsel, FRA, 400 Seventh Street, S.W., Washington, D.C. 20590 (telephone (202) 632–3183).

Background

The notice of proposed order was published on November 20, 1997 (62 FR 62097). In response to the proposed order, two commenters, the American Public Transit Association, and the Providence and Worcester Railroad, requested a public hearing. FRA is holding this public hearing in lieu of a previously scheduled Northeast Corridor Safety Committee meeting, which will be rescheduled and announced in a separate **Federal Register** notice.

Issued in Washington, D.C., on January 9, 1998.

S. Mark Lindsey,

Chief Counsel.

[FR Doc. 98–1075 Filed 1–21–98; 8:45 am]

BILLING CODE 4910–06–M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–55 (Sub-No. 558X)]

CSX Transportation, Inc.—Abandonment Exemption—in Franklin County, TN

CSX Transportation, Inc. (CSXT) has filed a notice of exemption under 49 CFR part 1152 Subpart F—*Exempt Abandonments* to abandon approximately 1.41 miles of its line of railroad between milepost OJC–0.30 and milepost OJC–1.71 at the end of track, in Decherd, Franklin County, TN. The line traverses United States Postal Service Zip Code 37324.

CSXT has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) there is no overhead traffic moving over the line; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7

VOL 63 ISS 14 JA 22 1998 UMI

(environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment— Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed. Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on February 21, 1998, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29 must be filed by February 2, 1998. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by February 11, 1998, with: Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423.

A copy of any petition filed with the Board should be sent to applicant's representative: Charles M. Rosenberger, Senior Counsel, CSX Transportation, Inc., 500 Water Street J150, Jacksonville, FL 32202.

If the verified notice contains false or misleading information, the exemption is void *ab initio*.

CSXT has filed an environmental report which addresses the abandonment's effects, if any, on the environment and historic resources. The Section of Environmental Analysis (SEA) will issue an environmental assessment (EA) by January 27, 1998. Interested persons may obtain a copy of the EA by writing to SEA (Room 500, Surface Transportation Board, Washington, DC 20423) or by calling SEA, at (202) 565–1545. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), CSXT shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the line. If consummation has not been effected by CSXT's filing of a notice of consummation by January 22, 1999, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Decided: January 12, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 98–1527 Filed 1–21–98; 8:45 am]

BILLING CODE 4915–00–P

[1] The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Section of Environmental Analysis in its independent investigation) cannot be made before the exemption's effective date. See *Exemption of Out-of-Service Rail Lines*, 5 I.C.C.2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

[2] Each offer of financial assistance must be accompanied by the filing fee, which currently is set at $900. See 49 CFR 1002.2(f)(25).

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

January 12, 1998.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Special Request

In order to begin the survey described below in early February 1998, the Department of the Treasury is requesting that the Office of Management and Budget (OMB) review and approve this information collection by January 15, 1998. To obtain a copy of this study, please contact the Internal Revenue Service Clearance Officer at the address listed below.

Internal Revenue Service (IRS)

OMB Number: 1545–1432.
Project Number: M:SP:V 98–001G.
Type of Review: Revision.
Title: Revenue Agent Competencies Structured Group Interviews.
Description: The objective of these structured group interviews is to gather feedback from Tax Practitioners to assist IRS in developing a complete list of the performance competencies required of Revenue Agents. Because Tax Practitioners work intimately with Revenue Agents on audits, their input is vital in developing a complete picture of the competencies required. Corporate Education will conduct a series of four structured groups which will be held in Philadelphia, Pa., Jacksonville, Fl., St. Louis, Mo. and Oakland, Ca.
Respondents: Business or other for-profit.
Estimated Number of Respondents: 32.
Estimated Burden Hours Per Response: 3 hours.
Frequency of Response: Other (one-time only).
Estimated Total Reporting Burden: 51 hours.
Clearance Officer: Garrick Shear, (202) 622–3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, N.W., Washington, DC 20224.
OMB Reviewer: Alexander T. Hunt, (202) 395–7860, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

[FR Doc. 98–1500 Filed 1–21–98; 8:45 am]

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Submission to OMB for Review; Comment Request

January 13, 1998.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

Internal Revenue Service (IRS)

OMB Number: New.
Form Number: None.
Type of Review: New collection.
Title: 1988 Electronic Tax Administration Attitudinal Tracking Study.
Description: The survey is being conducted to establish a baseline measure of public knowledge and acceptance of Electronic Tax

Administration programs and to provide the IRS with quantitative data and analysis to assist with making policy decisions on how to expand the programs.
Respondents: Individuals or households.
Estimated Number of Respondents: 1,030.
Estimated Burden Hours Per Respondent: 20 minutes.
Frequency of Response: Annually.
Estimated Total Reporting Burden: 379 hours.
OMB Number: 1545–0073.
Form Number: IRS Form 1310.
Type of Review: Extension.
Title: Statement of Person Claiming Refund Due a Deceased Taxpayer.
Description: Form 1310 is used by a claimant to secure payment of a refund on behalf of a deceased taxpayer. The information enables IRS to send the refund to the correct person.
Respondents: Individuals or households.
Estimated Number of Respondents/ Recordkeepers: 7,500.
Estimated Burden Hours Per Respondent/Recordkeeper:
Recordkeeping—7 min.
Learning about the law or the form—3 min.
Preparing the form—16 min.
Copying, assembling, and sending the form to the IRS—17 min.
Frequency of Response: On occasion.
Estimated Total Reporting/ Recordkeeping Burden: 5,325 hours.
OMB Number: 1545–0138.
Form Number: IRS Form 2063.
Type of Review: Revision.
Title: U.S. Departing Alien Income Tax Statement.
Description: Form 2063 is used by a departing resident alien against whom a termination assessment has not been made, or a departing nonresident alien who has no taxable income from United States sources, to certify that they have satisfied all U.S. income tax obligations. The data is used by IRS to certify that departing aliens have complied with U.S. income tax laws.
Respondents: Individuals or households.
Estimated Number of Respondents/ Recordkeepers: 20,540.
Estimated Burden Hours Per Respondent/Recordkeeper:
Recordkeeping—7 min.
Learning about the law or the form—3 min.
Preparing the form—26 min.
Copying, assembling, and sending of the form to the IRS—14 min.
Frequency of Response: On occasion.
Estimated Total Reporting/ Recordkeeping Burden: 17,048 hours.
OMB Number: 1545–0159.
Form Number: IRS Form 3520.
Type of Review: Extension.
Title: Annual Return to Report Transactions with Foreign Trusts and Receipt of Certain Foreign Gifts.
Description: Form 3520 is filed by U.S. persons who create a foreign trust, transfer property to a foreign trust, receive a distribution from a foreign trust, or receive a large gift from a foreign source. IRS uses the form to identify the U.S. persons who may have transactions that may trigger a taxable event in the future.

	Form 8275	Form 8275–R
Recordkeeping	2 hr., 23 min	2 hr., 38 min.
Learning about the law or the form	47 min	35 min.
Preparing and sending the form to the IRS	52 min	40 min.

Frequency of Response: Annually.
Estimated Total Reporting/ Recordkeeping Burden: 3,970,000 hours.
OMB Number: 1545–1305.
Form Number: IRS Forms 9460 (cat# 14762P) and 9477 (cat# 14891T).
Type of Review: Extension.
Title: Tax Forms Inventory Report.
Description: These forms are designed to collect tax forms inventory information from banks, post offices, and libraries that distribute federal tax forms. Data is collected detailing the quantities and types of tax forms remaining at the end of the filing season. The data is combined with shipment data for each account and used to establish forms distribution guidelines for the following year. Source code data is collected to verify that the different entities received tax forms with the correct code.
Respondents: Business or other for-profit, Not-for-profit institutions, Federal Government.
Estimated Number of Respondents: 10,720.
Estimated Burden Hours Per Respondent:
Form 9460 (cat# 14762P)—10 min.
Form 9477 (cat# 14891T)—15 min.
Frequency of Response: Annually.
Estimated Total Reporting Burden: 2,600 hours.
OMB Number: 1545–1455.
Regulation Project Number: PS–80–93 Final.
Type of Review: Extension.
Title: Rules for Certain Rental Real Estate Activities.
Description: The information required by these regulations will be used by the Internal Revenue Service to aid in the administration of the law and to determine whether a taxpayer that qualifies for treatment under section 469(c)(7) has made the election under section 469(c)(7)(A).
Respondents: Individuals and households, Business or other for-profit.
Estimated Number of Respondents: 20,100.
Estimated Burden Hours Per Respondent: 9 minutes.
Frequency of Response: On occasion.
Estimated Total Reporting Burden: 3,015 hours.
Respondents: Business or other for-profit.
Estimated Number of Respondents/ Recordkeepers: 2,000.
Estimated Burden Hours Per Respondent/Recordkeeper.
Recordkeeping—50 hr., 28 min.
Learning about the law or the form—4 hr., 44 min.
Preparing the form—6 hr., 42 min.
Sending the form to the IRS—16 min.
Frequency of Response: Annually.
Estimated Total Reporting/ Recordkeeping Burden: 124,320 hours.
OMB Number: 1545–0889.
Form Number: IRS Forms 8275 and 8275–R.
Type of Review: Extension.
Title: Disclosure Statement and Regulation Disclosure Statement.
Description: Internal Revenue Code (IRC) section 6662 imposes accuracy related penalties for substantial understatement of tax liability or negligence or disregard of rules and regulations. Section 6694 imposes similar penalties on return preparers. Regulations sections 1.6662–4(e)&(f) provide for reduction of these penalties if adequate disclosure of the tax treatment is made on Form 8275 or if the position is contrary to a regulation, Form 8275–R.
Respondents: Individuals or households, Farms, Business or other for-profit.
Estimated Number of Respondents/ Recordkeepers: 595,000.
Estimated Burden Hours Per Respondent/Recordkeeper:

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPPTS–50628; FRL–5720–3]

RIN 2070–AB27

Significant New Uses of Certain Chemical Substances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is promulgating significant new use rules (SNURs) under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for 163 chemical substances which were the subject of premanufacture notices (PMNs) and subject to TSCA section 5(e) consent orders issued by EPA. Today's action requires persons who intend to manufacture, import, or process these substances for a significant new use to notify EPA at least 90 days before commencing the manufacturing or processing of the substance for a use designated by this SNUR as a significant new use. The required notice will provide EPA with the opportunity to evaluate the intended use, and if necessary, to prohibit or limit that activity before it occurs. EPA is promulgating this SNUR using direct final procedures.

DATES: The effective date of this rule is March 23, 1998. This rule shall be promulgated for purposes of judicial review at 1 p.m. (e.s.t.) on February 5, 1998.

If EPA receives notice before February 23, 1998 that someone wishes to submit adverse or critical comments on EPA's action in establishing a SNUR for one or more of the chemical substances subject to this rule, EPA will withdraw the SNUR for the substance for which the notice of intent to comment is received and will issue a proposed SNUR providing a 30-day period for public comment.

ADDRESSES: Each comment or notice of intent to submit adverse or critical comment must bear the docket control number OPPTS–50628 and the name(s) of the chemical substance(s) subject to the comment. All comments should be sent in triplicate to: OPPT Document Control Officer (7407), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M Street, SW., Room G–099, East Tower, Washington, DC 20460.

Comments and data may also be submitted electronically to: oppt.ncic@epamail.epa.gov. Follow the instructions under Unit X of this document. No Confidential Business Information (CBI) should be submitted through e-mail.

All comments which contain information claimed as CBI must be clearly marked as such. Three sanitized copies of any comments containing information claimed as CBI must also be submitted and will be placed in the public record for this rulemaking. Persons submitting information on any portion of which they believe is entitled to treatment as CBI by EPA must assert a business confidentiality claim in accordance with 40 CFR 2.203(b) for each portion. This claim must be made at the time that the information is submitted to EPA . If a submitter does not assert a confidentiality claim at the time of submission, EPA will consider this as a waiver of any confidentiality claim and the information may be made available to the public by EPA without further notice to the submitter.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–543A, 401 M St., SW., Washington, DC 20460, telephone: (202) 554–1404, TDD: (202) 554–0551; e-mail: TSCA-Hotline@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Availability: Electronic copies of this document are available from the EPA Home Page at the **Federal Register**-Environmental Documents entry for this document under "Laws and Regulations" (http://www.epa.gov/fedrgstr/).

This SNUR will require persons to notify EPA at least 90 days before commencing manufacturing or processing a substance for any activity designated by this SNUR as a significant new use. The supporting rationale and background to this rule are more fully set out in the preamble to EPA's first direct final SNURs published in the **Federal Register** of April 24, 1990 (55 FR 17376). Consult that preamble for further information on the objectives, rationale, and procedures for the rules and on the basis for significant new use designations including provisions for developing test data.

I. Authority

Section 5(a)(2) of TSCA (15 U.S.C. 2604(a)(2)) authorizes EPA to determine that a use of a chemical substance is a "significant new use." EPA must make this determination by rule after considering all relevant factors, including those listed in TSCA section 5(a)(2). Once EPA determines that a use of a chemical substance is a significant new use, section 5(a)(1)(B) of TSCA requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. The mechanism for reporting under this requirement is established under 40 CFR 721.10.

II. Applicability of General Provisions

General provisions for SNURs appear under 40 CFR part 721, subpart A. These provisions describe persons subject to the rule, recordkeeping requirements, exemptions to reporting requirements, and applicability of the rule to uses occurring before the effective date of the final rule. Provisions relating to user fees appear at 40 CFR part 700. Persons subject to this SNUR must comply with the same notice requirements and EPA regulatory procedures as submitters of PMNs under section 5(a)(1)(A) of TSCA. In particular, these requirements include the information submission requirements of TSCA section 5(b) and 5(d)(1), the exemptions authorized by section 5 (h)(1), (2), (3), and (5), and the regulations at 40 CFR part 720. Once EPA receives a SNUR notice, EPA may take regulatory action under TSCA section 5(e), 5(f), 6, or 7 to control the activities on which it has received the SNUR notice. If EPA does not take action, EPA is required under TSCA section 5(g) to explain in the **Federal Register** its reasons for not taking action.

Persons who intend to export a substance identified in a proposed or final SNUR are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret section 12(b) appear at 40 CFR part 707. Persons who intend to import a chemical substance identified in a final SNUR are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. Such persons must certify that they are in compliance with SNUR requirements. The EPA policy in support of the import certification appears at 40 CFR part 707.

III. Substances Subject to This Rule

EPA is establishing significant new use and recordkeeping requirements for the following chemical substances under 40 CFR part 721, subpart E. In this unit, EPA provides a brief description for each substance, including its PMN number, chemical name (generic name if the specific name is claimed as CBI), CAS number (if assigned and and the specific chemical identity is not claimed as CBI), basis for the action taken by EPA in the TSCA section 5(e) consent order or as a non-

section 5(e) SNUR for the substance (including the statutory citation and specific finding), toxicity concern, and the CFR citation assigned in the regulatory text section of this rule. The specific uses which are designated as significant new uses are cited in the regulatory text section of this document by reference to 40 CFR part 721, subpart B where the significant new uses are described in detail. Certain new uses, including production limits and other uses designated in the rule are claimed as CBI. The procedure for obtaining confidential information is set out in Unit VII. of this preamble.

Where the underlying TSCA section 5(e) order prohibits the PMN submitter from exceeding a specified production limit without performing specific tests to determine the health or environmental effects of a substance, the tests are described in this unit. As explained further in Unit VI. of this preamble, the SNUR for such substances contains the same production limit, and exceeding the production limit is defined as a significant new use. Persons who intend to exceed the production limit must notify the Agency by submitting a significant new use notice (SNUN) at least 90 days in advance. In addition, this unit describes tests that are recommended by EPA to provide sufficient information to evaluate the substance, but for which no production limit has been established in the TSCA section 5(e) order. Descriptions of recommended tests are provided for informational purposes.

Data on potential exposures or releases of the substances, testing other than that specified in the TSCA section 5(e) order for the substances, or studies on analogous substances, which may demonstrate that the significant new uses being reported do not present an unreasonable risk, may be included with significant new use notification. Persons submitting a SNUN must comply with the same notice requirements and EPA regulatory procedures as submitters of PMNs, as stated in 40 CFR 721.1(c), including submission of test data on health and environmental effects as described in 40 CFR 720.50.

EPA is not publishing SNURs for PMNs P–95–266, 95–615/616, P–95–941, P–95–973, P–95–1046, P–95–1115, P–95–1827, P–95–1854, P–95–2075, P–96–262, P–96–291, P–96–317, P–96–576 through P–96–581, P–96–726 through P–96–744, P–96–803/804, P–96–1277/78, P–96–1482/1483, P–96–1708, P–96–1509/1519, P–96–1548 through P–96–1551, P–97–205 through P–97–208, and P–97–276/277 which are subject to a final TSCA section 5(e) consent order. The TSCA section 5(e) consent orders for these substances are derived from an exposure finding based solely on substantial production volume and significant or substantial human exposure and/or release to the environment of substantial quantities. For these cases there were limited or no toxicity data available for the PMN substances. In such cases, EPA regulates the new chemical substances under TSCA section 5(e) by requiring certain toxicity tests. For instance, chemical substances with potentially substantial releases to surface waters would be subject to toxicity testing of aquatic organisms and chemicals with potentially substantial human exposures would be subject to health effects testing for mutagenicity, acute effects, and subchronic effects. However, for these substances, the short-term toxicity testing required by the TSCA section 5(e) order is usually completed within 1 to 2 years of notice of commencement (NOC). EPA's experience with exposure-based SNURs requiring short-term testing is that the SNUR is often revoked within 1 to 2 years when the test results are received. Rather than issue and revoke SNURs in such a short span of time, EPA will defer publication of exposure-based SNURs until either a NOC or data demonstrating risk are received unless the toxicity testing required is long-term. EPA is issuing this explanation and notification as required in 40 CFR 721.160(a)(2) as it has determined that SNURs are not needed at this time for these substances which are subject to a final TSCA section 5(e) consent order under TSCA.

PMN Number P–87–323

Chemical name: (generic) Poly(oxy-1,2-ethanediyl), alpha substituted-omega-hydroxy-, C_{16-20} alkyl ethers.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on submitted fish, daphnia, and algae tests on the PMN substance, EPA expects toxicity to aquatic organisms at surface water concentrations as low as 20 parts per billion (ppb). EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance did not exceed a concentration of 20 ppb when released to surface waters. EPA has determined that other uses may result in releases to surface waters above 20 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(i).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.3488.

PMN Number P–88–1108

Chemical name: (generic) Alcohols, C_{6-12}, ethoxylated, reaction product with maleic anhydride.
CAS number: Not available.
Basis for action: The PMN substance will be used as a plastics additive. Based on analogy to anionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 300 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.524.

PMN Number P–90–581

Chemical name: (generic) Brominated phthalate ester.
CAS number: Not available.
Effective date of section 5(e) consent order: March 21, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health and the environment.
Toxicity concern: Similar chemicals have been shown to form dibenzodioxins and dibenzofurans when incinerated under combustion conditions of municipal incinerators.

VOL 63 ISS 14 JA 22 1998 UMI

Recommended testing: An incineration simulation study is required to help characterize the potential for the formation of dibenzodioxins or dibenzofurans when plastics or resins containing the PMN substance are incinerated. The PMN submitter has agreed not to exceed the production volume limit without performing this study.
CFR citation: 40 CFR 721.3085.

PMN Numbers P–91–1131 and P–90–564

Chemical name: (generic) Imidazolethione.
CAS number: Not available.
Effective date of section 5(e) consent order: October 25, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Based on the submitted 90-day subchronic study, the PMN substance causes thyroid and other systemic effects in test animals. Based on the submitted developmental toxicity study, the PMN substance causes developmental toxicity in test animals. Based on analogy to structurally similar substances the PMN substance may cause thyroid cancer.
Recommended testing: A 2-year, two-species oral bioassay in rats (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) is recommended to help characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.4469.

PMN Number P–92–314

Chemical name: (generic) Aryloxyarene.
CAS number: Not available.
Effective date of section 5(e) consent order: March 11, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to the environment.
Toxicity concern: Based on test data on this substance, there is concern for toxicity to aquatic organisms, particularly effects on daphnid reproduction, at concentrations as low as 1 ppb in surface waters.
Recommended testing: A 28-day chironomid sediment toxicity study (OPPTS 850.1790 test guideline (public draft; 61 FR 16486, April 15, 1996)) (FRL–5363–1) is recommended to help characterize the toxicity of the PMN substance to benthic organisms.
CFR citation: 40 CFR 721.977.

PMN Numbers P–93–204 and P–94–1870 through P–94–1874

Chemical name: (generic) Phenyl substituted triazolinones.
CAS numbers: Not available.
Effective date of section 5(e) consent order: July 23, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that these substances may present an unreasonable risk of injury to human health and the environment.
Toxicity concern: Data on several of the PMN substances and a chemical similar to P–94–1870 have shown developmental and reproductive effects, blood and liver effects, and neurotoxicity in test animals.
Recommended testing: An oral developmental toxicity study in rats (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the human health effects. A semi-continuous activated sludge (SCAS) study (OPPTS 835.3210 test guideline (public draft; 61 FR 16486, April 15, 1996)) (FRL–5363–1), a ready biodegradability study (OPPTS 835.3110 test guideline (public draft; 61 FR 16486, April 15, 1996)) (FRL–5363–1), and a soil sediment adsorption isotherm (40 CFR 796.2750 or OPPTS 835.1220 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1) would help characterize the environmental effects of the substance.
CFR citation: 40 CFR 721.9825.

PMN Number P–93–568

Chemical name: (generic) Polysubstituted piperidine.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on submitted test data, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 30 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters above a level of 30 ppb. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(i).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.6165.

PMN Number P–93–761

Chemical name: 2-Pyrrolidinone, 1,1'-(2-methyl-1,5-pentanediyl)bis-.
CAS number: 146453–62–5.
Effective date of section 5(e) consent order: September 6, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Test data on the PMN substance and similar chemicals have shown that these types of chemicals cause systemic toxicity and neurotoxicity in test animals.
Recommended testing: A 90-day oral subchronic study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) with additional neurotoxicity endpoints following NTIS–PB91–154617 (functional observation battery, neurohistopathology and motor activity) would help to characterize the systemic and neurotoxicity effects. The PMN submitter has agreed not to exceed the production volume limit without performing this test.
CFR citation: 40 CFR 721.9005.

PMN Number P–93–1369

Chemical name: (generic) *N,N'*-di(alkyl heteromonocycle)amino chlorotriazine.
CAS number: Not available.
Effective date of section 5(e) consent order: June 13, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health and the environment.
Toxicity concern: Similar chemicals have been shown to cause systemic toxicity, developmental toxicity, and cancer in test animals. In addition, similar chemicals have been shown to be toxic to aquatic organisms.
Recommended testing: EPA has determined that a 90-day subchronic toxicity test in rats via gavage (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), a two-species developmental study (rodent and non-rodent) (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) and a 2-year, one-species bioassay (rats) (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the human health effects of the PMN substance. The 90-day subchronic toxicity test should include special emphasis on hematology; weight of the spleen and thymus; cellularity of the bone marrow, thymus, and spleen; and histopathology of the liver, kidney, heart, and all endocrine glands for which weight changes are observed. In addition natural killer cell activity should be evaluated on the same population of test animals, and IgM antibody plaque-forming cells should be enumerated in two satellite groups of animals (10 in the high-dose group and 10 in the control group). EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance. The consent order contains two production volume limits. The PMN submitter has agreed not to exceed the first production volume limit without performing the 90-day subchronic toxicity test. The PMN submitter has also agreed not to exceed the second higher production volume limit without performing the two-species developmental study and the 2-year, one-species bioassay if the results of the 90-day test indicate biological activity at low levels (i.e., activity levels comparable to those for triazines).
CFR citation: 40 CFR 721.2094.

PMN Number P–93–1631

Chemical name: (generic) Substituted naphtholazo-substituted naphthalenyl-substituted azonaphthol chromium complex.
CAS number: Not available.
Basis for action: The PMN substance will be used as a dye. Based on analogy to structurally similar substances, EPA is concerned that cancer will occur in exposed workers. Based on submitted test data, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance did not present an unreasonable risk because significant worker or environmental exposure is not expected because the substance was used as a liquid and was not manufactured domestically. EPA has determined that domestic manufacture of the substance and use as a solid may result in significant worker or environmental exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(4)(i) and (b)(1)(i)(D).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance and a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.981.

PMN Number P–93–1654

Chemical name: (generic) Substituted polyoxyethylene.
CAS number: Not available.
Basis for action: The PMN substance will be used as an emulsifier for paint and adhesives. Based on submitted test data and analogy to nonionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 9 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface water at concentrations above 9 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(i).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.7378.

PMN Number P–94–209

Chemical name: Phenol, 2,4-dimethyl-6-(1-methylpentadecyl)-.
CAS number: 134701–20–5.
Basis for action: The PMN substance will be used as an antioxidant. Based on submitted test data, there is concern for liver toxicity, kidney toxicity, adrenal toxicity, and blood toxicity. Based on submitted test data and analogy to phenols, EPA is also concerned that toxicity to aquatic organisms will occur at concentrations as low as 1 ppb. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be subject to significant dermal exposures and there were no significant environmental releases. EPA has determined that other uses of the substance may result in significant dermal exposures to workers and significant environmental releases. Based on this information the PMN substance meet the concern criteria at § 721.170 (b)(3)(i) and (b)(4)(i).
Recommended testing: EPA has determined that a dermal absorption study, a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the health and environmental effects of the PMN substance.
CFR citation: 40 CFR 721.5725.

PMN Number P–94–921

Chemical name: Phenol, 4,4'-methylenebis[2,6-dimethyl-.
CAS number: 5384–21–4.
Effective date of section 5(e) consent order: July 5, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health and the environment.
Toxicity concern: Similar phenols have been shown to cause kidney and liver toxicity, and blood effects in test animals. In addition, chronic fish and daphnid tests and a high bioconcentration potential indicated a concern concentration of 6 ppb.
Recommended testing: EPA has determined that a 90-day subchronic

VOL 63 ISS 14 JA 22 1998 UMI

oral toxicity test in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help to characterize the human health effects of the PMN substance. EPA has also determined that a modified SCAS test (OPPTS 835.3210 test guideline (public draft; 61 FR 16486, April 15, 1996)) (FRL–5363–1), an aerobic aquatic biodegradation test (40 CFR 796.3100 or OPPTS 835.3100 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1), and an anaerobic biodegradability of organic chemicals (OPPTS 835.3400 test guideline (public draft; 61 FR 16486, April 15, 1996)) (FRL–5363–1) would help to charactarize the environmental effects. The PMN submitter has agreed not to exceed the production volume limit without performing the 90-day subchronic toxicity test.
CFR citation: 40 CFR 721.5730.

PMN Number P–94–1017

Chemical name: Urea, tetraethyl-.
CAS number: 1187–03–7.
Basis for action: The PMN substance will be used as an intermediate. Based on submitted test data EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppm of the PMN substance in surface waters. Based on analogy to similar ureas and submitted test data EPA is concerned that acute toxicity, mutagenicity, developmental effects, and reproductive effects could occur to exposed workers. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters and exposed workers would wear adequate protective equipment to prevent dermal exposure. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration or dermal exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(2), (b)(3)(ii), and (b)(4)(i).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance. EPA has determined that a dermal developmental toxicity test in rabbits and rats (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) and a chromosome aberration assay in mice (40 CFR 798.9538) (62 FR 43850, August 15, 1997) (FRL–5719–5) or a micronucleus assay in mice (40 CFR 798.9539) (62 FR 43853, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance. The PMN submitter has agreed to conduct the health tests before reaching the production volume limit in the SNUR.
CFR citation: 40 CFR 721.9928.

PMN Number P–94–1018

Chemical name: Guanidine, pentaethyl-.
CAS number: 13439–89–9.
Basis for action: The PMN substance will be used as an intermediate. Based on submitted test data, EPA is concerned that acute toxicity, corrosivity, and neurotoxicity could occur to exposed workers. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because exposed workers would wear adequate protective equipment to prevent dermal exposure. EPA has determined that other uses of the substance may result in exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(2) and (b)(3)(i).
Recommended testing: None.
CFR citation: 40 CFR 721.4085.

PMN Number P–94–1019

Chemical name: Ethanaminium, N-[bis(diethylamino)-methylene]-*N*-ethyl-, bromide.
CAS number: 89610–32–2.
Basis for action: The PMN substance will be used as a catalyst. Based on submitted test data, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(i).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.4090.

PMN Number P–94–1143

Chemical name: Butanoic acid, antimony (3+) salt.
CAS number: 53856–17–0.
Effective date of section 5(e) consent order: July 7, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health.
Toxicity concern: Similar chemicals have been shown to cause cancer, dermal and ocular irritation, cardiovascular effects, neurotoxic effects, reproductive toxicity, and developmental toxicity in test animals.
Recommended testing: A pharmacokinetic test (OPPTS 870.8223 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) is recommended to help determine the bioavailability of the PMN substance after dermal administration. The PMN submitter has agreed not to exceed the production volume limit without performing this test.
CFR citation: 40 CFR 721.1930.

PMN Number P–94–1743

Chemical name: (generic) Isophorone diisocyanate neopentyl glycol adipate polyurethane prepolymer.
CAS number: Not available.
Effective date of section 5(e) consent order: December 8, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Test data on the substance and similar diisocyanates have shown them to cause skin sensitization and chronic lung toxicity in test animals.
Recommended testing: EPA has determined that the results of an acute inhalation study (OPPTS 870.1300 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), a 28-day subchronic inhalation study in rats, (Organization for Economic Cooperation and Development (OECD) guideline no. 412), and a 90-day subchronic inhalation toxicity study in rats (40 CFR 798.2450 or OPPT 870.3465 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help to characterize the health effects caused by the substance. The PMN submitter has agreed not to exceed the production volume limit without performing these tests.
CFR citation: 40 CFR 721.8079.

PMN Number P–94–2159

Chemical name: (generic) Anthraquinone dye.
CAS number: Not available.
Basis for action: The PMN substance will be used as described in the PMN. Based on submitted test data and analogy to aliphatic amines EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 2 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(4)(i).
Recommended testing: EPA has determined that a fish acute toxicity study modified with humic acid (40 CFR 797.1400 or OPPTS 850.1085 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.723.

PMN Number P–95–168

Chemical name: Phosphonic acid, methylenebis-, tetrakis(1-methylethyl) ester.
CAS number: 1660–95–3.
Effective date of section 5(e) consent order: September 20, 1995.
Basis for section 5(e) consent order: The Order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Similar dimethyl methyl phosphonate (DMMP) and diisopropyl methylphosphonate (DIMP) chemical substances have been shown to cause oncogenicity in test animals. In addition the PMN substance was demonstrated to be a chromosome mutagen in a mouse lymphoma study.
Recommended testing: The Agency has determined that the results of a 2-year bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help to characterize possible human effects of the substance.
CFR citation: 40 CFR 721.6075.

PMN Number P–95–243

Chemical name: Phenol, 4-(1,1-dimethylethyl)-, homopolymer.
CAS number: 30813–81–1.
Effective date of section 5(e) consent order: October 5, 1995.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to the aquatic environment.
Toxicity concern: The PMN substance has been shown to be toxic to aquatic organisms. However, the substance also has the advantages of eliminating or reducing volatile organic solvents, and reducing exposures to residual monomers. EPA has evaluated two processor/use sites where releases sometimes exceed the concern level. In light of the benefits of the substance, EPA determined these releases did not constitute an unreasonable risk and will allow releases at these sites in the section 5(e) consent order and SNUR.
Recommended testing: EPA has determined that an activated sludge adsorption isotherm study (OPPTS 835.1110 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1), a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), or a chironomid sediment toxicity test (OPPTS 850.1790 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize possible effects of the PMN substance in the aquatic environment. The consent order contains two production limits. The PMN submitter has agreed not to exceed the first production limit without performing the activated sludge adsorption isotherm test. The PMN submitter has also agreed not to exceed the second higher production limit without performing either the fish early life stage with rainbow trout and the daphnid chronic toxicity tests, or the chironomid sediment toxicity test, depending on the results of the activated sludge adsorption isotherm test.
CFR citation: 40 CFR 721.538.

PMN Number P–95–535

Chemical name: Reaction products of formalin (37%) with amine C_{12}.
CAS number: Not available.
Basis for action: The PMN substance will be used as an oilfield chemical. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 20 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.9285.

PMN Numbers P–95–605/606

Chemical name: (generic) Trifunctional ketoximino silane.
CAS number: Not available.
Basis for action: The PMN substance will be used as described in the PMN. Based on analogy of the hydrolysis product of the PMN substances to similar compounds, EPA is concerned that cancer and blood effects could occur to exposed workers. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because exposed workers would wear adequate protective equipment to prevent dermal exposure. EPA has determined that other uses of the substance may result in dermal exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(D) and (b)(3)(iii).
Recommended testing: EPA has determined that a 90-day subchronic study in rats by the oral route (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) and a 2-year, two-species bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.9497.

PMN Number P–95–633

Chemical name: (generic) Sodium salt of azo acid dye.
CAS number: Not available.
Basis for action: The PMN substance will be used in a non-dispersive use.

VOL

Based on analogy of the azo reduction products to structurally similar substances, EPA is concerned that cancer and systemic toxicity will occur in exposed workers. EPA determined that use of the substance did not present an unreasonable risk because significant worker exposure is not expected because the substance was not manufactured, processed, or used as a powder. EPA has determined that manufacture, processing, and use of the substance as a powder may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(D) and (b)(3)(iii).
Recommended testing: EPA has determined that a 90-day subchronic study in rats by the oral route with special attention to the liver, kidney, spleen, and blood (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the substance.
CFR citation: 40 CFR 721.980.

PMN Number P–95–637

Chemical name: 2-Pentene, 1,1,1,2,3,4,4,5,5,5-decafluoro-.
CAS number: 72804–49–0.
Basis for action: The PMN substance will be used as an intermediate. Based on toxicity data submitted with the PMN, EPA identified health concerns for neurotoxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance other than as described in the PMN may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(3)(i).
Recommended testing: None.
CFR citation: 40 CFR 721.5708.

PMN Number P–95–638

Chemical name: Pentane 1,1,1,2,2,3,4,5,5,5,-decafluoro.
CAS number: 138495–42–8.
Basis for action: The PMN substance will be used as described in the PMN. Based on toxicity data submitted with the PMN, EPA identified health concerns for neurotoxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance other than as described in the PMN may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(i).
Recommended testing: None.
CFR citation: 40 CFR 721.5645.

PMN Number P–95–666

Chemical name: (generic) Polyether acrylate.
CAS number: Not available.
Basis for action: The PMN substance will be used in a radiation curing formulation. Based on analogy to acrylates, EPA identified concerns for toxicity to aquatic organisms. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant environmental exposure is not expected. EPA has determined that other uses may result in releases to water which are significant environmental exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.405.

PMN Numbers P–95–677/724

Chemical name: (generic) Antimony double oxide.
CAS number: Not available.
Effective date of section 5(e) consent order: March 12, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health and the environment.
Toxicity concern: Similar chemicals have been shown to cause cancer, lung toxicity and ocular effects in test animals. In addition to human health concerns, an aquatic toxicity concern has been identified if the substance is released to surface waters. A concern concentration of 5 ppb has been established.
Recommended testing: EPA has determined that a 2-year, one-species rat inhalation bioassay, which has an additional holding period, analyses of lung burdens, and determination of clearance rates of particles (as described at (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the carcinogenicity, lung toxicity and ocular effects of the PMN substance. In addition, EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.5547.

PMN Numbers P–95–1103, P–95–1104, and P–96–1235

Chemical name: (generic) Substituted resorcinols.
CAS number: Not available.
Basis for action: The PMN substances will be used as components of a material for integrated circuit fabrication. Based on submitted toxicity data and analogy to phenols, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 9 ppb of P–95–1103/P–95–1104 and 1 ppb of P–96–1235 in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances would not be released to surface waters in significant quantities. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(i) and (b)(4)(ii).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of P–95–1103 and P–95–1104. EPA has also determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of P–96–1235.
CFR citation: 40 CFR 721.9488.

PMN Number P–95–1128

Chemical name: (generic) Brominated aromatic ester.
CAS number: Not available.
Effective date of section 5(e) consent order: November 5, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and 5(e)(1)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health and the environment.
Toxicity concern: Similar chemicals have been shown to: (1) Degrade in the environment resulting in substances that may cause aquatic toxicity, and (2) form dibenzodioxins and dibenzofurans when incinerated under combustion conditions of municipal incinerators. EPA has determined that halogenated dioxins and furans are probable human carcinogens and may cause toxic effects in aquatic and terrestrial organisms.
Recommended testing: The consent order contains two production volume limits. The PMN submitter has agreed not to exceed the first production volume limit without performing an incineration simulation study (guidelines available from EPA) to help characterize the potential for the formation of dibenzodioxins or dibenzofurans when plastics or resins containing the substance are incinerated, and a porous pot test (OPPTS 835.3220 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1) to determine the extent of environmental degradation of the substance. The PMN submitter has also agreed not to exceed the second, higher production volume limit without performing a shake flask die-away test (OPPTS 835.3170 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1), a fish bioconcentration test (OPPTS 850.1730 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1))
CFR citation: 40 CFR 721.2925.

PMN Number P–95–1213

Chemical name: (generic) Hydroxy terminated polyester.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to esters, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 200 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface water at concentrations above 200 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.6485.

PMN Number P–95–1235

Chemical name: 2-Naphthalenesulfonic acid, 3-[[4-[(2,4-dimethyl-6-sulfophenyl)azo]-2-methoxy-5-methylphenyl]azo]-4-hydroxy-7-(phenylamino)-, sodium salt, compd. With 2,2′,2″-nitrilotris [ethanol] (9CI).
CAS number: 94213–53–3.
Basis for action: The PMN substance will be used in an open non-dispersive use. Based on analogy of the azo reduction products to similar substances, EPA is concerned that cancer, systemic toxicity, developmental toxicity, methemoglobinemia, and skin sensitization will occur in exposed workers. EPA determined that use of the substance did not present an unreasonable risk because significant worker exposure is not expected because the substance was not manufactured, processed, or used as a powder or manufactured domestically. EPA has determined that manufacture, processing, and use of the substance as a powder or domestic manufacture may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(iii).
Recommended testing: EPA has determined that an Ames assay with the Prival modification with a concurrent positive control would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.5281.

PMN Number P–95–1282

Chemical name: (generic) Reaction product of dichlorobenzidine and substituted alkylamide.
CAS number: Not available.
Effective date of section 5(e) consent order: July 29, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and 5(e)(1)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health.
Toxicity concern: 3,3′-dichlorobenzidine (DCB) and possible reduction products have been shown to cause oncogenicity and mutagenicity in test animals.
Recommended testing: The following studies would help characterize the health effects of the PMN substance: Monitoring data to detect the presence of DCB under actual conditions of use in polymer coloration or sheet metal coating use (Az, R., Dewald B. and Scnaitmann, D. 1991. Pigment Decomposition in Polymers in Applications at Elevated Temperatures (*Dyes and Pigments* 15:1–14). Monitoring data would include the following elements: Extrusion or other process), monitoring data to detect airborne concentrations of DCB during high-temperature coloration or sheet metal coating use (see TSCA section 8(e) data e.g., section 8(e)-962 supp.), radio-labeled pharmacokinetic study (oral) in rats on the pigment (with the radio-label on the DCB) (OPPTS 870.7485 test guideline (public draft; 60 FR 45158, August 30, 1995) (FRL–4973–2)) plus radio-label), and a 2-year, two-species bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5).
CFR citation: 40 CFR 721.9265.

PMN Number P–95–1288

Chemical name: 2-Naphthalenol, mono and dioctyl derivs.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to phenols, EPA is concerned that toxicity to aquatic organisms may occur at a concentrations as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance did not exceed a concentration of 1 ppb when released to surface waters. EPA has determined that increased production

VOL 63 ISS 14 JA 22 1998 UMI

volume may result in releases to surface waters above 1 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.5255.

PMN Number P–95–1317

Chemical name: (generic) Hydrochlorofluorocarbon.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on toxicity data submitted with the PMN, EPA identified health concerns for neurotoxicity. Based on analogy to structurally similar chemicals, EPA identified health concerns for cardiac sensitization, liver toxicity, kidney toxicity, and skin irritation. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance other than as described in the PMN may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(3)(i) and (b)(3)(ii).
Recommended testing: None.
CFR citation: 40 CFR 721.4462.

PMN Number P–95–1326

Chemical name: 3,8-Dioxa-4,7-disiladecane, 4,4,7,7-tetraethoxy-.
CAS number: 16068–37–4.
Basis for action: The PMN substance will be used in treatment of laminates for printed circuit boards and sol-gel ceramics. Based on analogy to alkoxysilanes, EPA is concerned that a significant risk of lung toxicity and severe irritation to skin, eyes, and mucous membranes could occur. EPA determined that use of the substance did not present an unreasonable risk because the substance would not be manufactured, processed, or used in a manner that generated a vapor, mist, or aerosol and significant worker inhalation exposure is not expected. EPA has determined that manufacture, processing, or use of the substance in a manner that generated a vapor, mist, or aerosol may result in significant worker inhalation exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic inhalation study in rats (40 CFR 798.2450 or OPPTS 870.3465 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.3155.

PMN Number P–95–1347

Chemical name: (generic) Aliphatic polyisocyanate.
CAS number: Not available.
Basis for action: The PMN substance will be used in an open non-dispersive use. Based on analogy to diisocyanates, there is concern for lung toxicity, pulmonary sensitization, and irritation to mucous membranes. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be subject to significant inhalation exposures. EPA has determined that uses of the substance that generate a mist, aerosol, or vapor may result in significant inhalation exposures to workers. Based on this information the PMN substance meet the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has also determined that a 90-day subchronic inhalation study in rats (40 CFR 799.9346) (62 FR 43828, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.6495.

PMN Number P–95–1356

Chemical name: (generic) Silylated polyurethane.
CAS Number: Not available.
Basis for action: The PMN substance will be used as a moisture curable polymer. Based on analogy of the PMN substance to alkoxysilanes, EPA expects irritation to mucous membranes and lung toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because there were no significant inhalation exposures. EPA has determined that use of the substance generating an aerosol or a mist may result in significant inhalation exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic inhalation study in rats (40 CFR 798.2450 or OPPTS 870.3465 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.8095.

PMN Number P–95–1386

Chemical name: Benzene, 1,1'-methylanebis[4-isocyanato-, homopolymer, Bu alc.-blocked.
CAS number: 186321–98–2.
Basis for action: The PMN substance will be used as described in the PMN. Based on analogy to diisocyanates, EPA is concerned that a significant risk of oncogenicity, respiratory sensitization, and chronic lung effects could occur. EPA determined that use of the substance did not present an unreasonable risk because the substance would not be manufactured, processed, or used in a manner that generated a vapor, mist, or aerosol and significant worker inhalation exposure is not expected. EPA has determined that manufacture, processing, or use of the substance in a manner that generated a vapor, mist, or aerosol may result in significant worker inhalation exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(3)(ii).
Recommended testing: EPA has determined that a 90-day inhalation study in rats (40 CFR 799.9346) (62 FR 43828, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.2535.

PMN Number P–95–1411

Chemical name: Propanedioic acid, [(4-methoxyphenyl)methylene]-, bis(1,2,2,6,6-pentamethyl-4-piperidinyl) ester (9CI).
CAS number: 147783–69–5.
Effective date of section 5(e) consent order: November 22, 1995.
Basis for section 5(e) consent order: The order was issued under section 5(e)(1)(A)(i) and 5(e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Similar chemicals have been shown to cause toxicity to the immune system, liver, blood, the male reproductive system and the G.I. tract in test animals.
Recommended testing: A 90-day subchronic oral toxicity study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the human health effects. The PMN submitter has agreed not to exceed the production volume limit without performing this test.

CFR citation: 40 CFR 721.4589.

PMN Number P–95–1466

Chemical name: (generic) Substituted aromatic aldehyde.
CAS number: Not available.
Basis for action: The PMN substance will be used as described in the PMN. Based on analogy to phenols and aldehydes EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 3 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMNs did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.526.

PMN Number P–95–1467

Chemical name: Benzaldehyde, 2-hydroxy-5-nonyl-, oxime, branched.
CAS number: 174333–80–3.
Basis for action: The PMN substance will be used as described in the PMN. Based on analogy to phenols, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.4476.

PMN Numbers P–95–1575/1576/1577

Chemical name: Chromate(3-), bis[3-[[5-(aminosulfonyl)-2-hydroxyphenyl]azo]-4-hydroxy-7-[[2-oxo-1-[(phenylamino)carbonyl] propyl]azo]-2-naphthalenesulfonato(3-)]-, trisodium (9CI) (P–95–1575), Chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxyphenyl]azo]-4-hydroxy-2-naphthalene-sulfonato (3-)]-, trisodium (9CI) (P–95–1576), Chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxyphenyl] azo]-4-hydroxy-2-naphthalenesulfonato (3-)]-,[[5-(aminosulfonyl) -2-hydroxyphenyl]azo]-4-hydroxy-7-[[2-hydroxy-1-[(phenylamino) carbonyl]-1-propenyl]azo]-2-naphthalenesulfonato(3-)]-, trisodium (9CI) (P–95–1577).
CAS number: 119535–63–6 (P–95–1575), 118716–62–4 (P–95–1576), and 118716–61–3 (P–95–1577).
Basis for action: The PMN substances will be used as leather dyes. Based on analogy to similar substances, EPA is concerned that cancer, developmental, kidney, and liver toxicity will occur in exposed workers. EPA determined that use of the substances did not present an unreasonable risk because significant worker exposure is not expected because the substances were not manufactured, processed, or used as a powder. EPA has determined that manufacture, processing, and use of the substances as a powder may result in significant worker exposure. Based on this information the PMN substances meet the concern criteria at § 721.170 (b)(1)(i)(B), (b)(1)(i)(C), (b)(3)(i), and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), an oral 2-generation reproduction study in rats (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5), and a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substances.
CFR citation: 40 CFR 721.9575 (P–95–1575), 40 CFR 721.9576 (P–95–1576), and 40 CFR 721.9577 (P–95–1577).

PMN Number P–95–1578

Chemical name: (generic) Hydrofluorocarbon alkyl ether.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to similar substances, EPA identified concerns for cancer, cardiotoxicity, cardiosensitization, respiratory failure, neurotoxicity, and irritation to membranes. Based on submitted test data EPA identified concerns for acute toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance without the worker protection cited in the PMN or if the substance is used other than as an intermediate may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C), (b)(3)(i), and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species bioassay (40 CFR 799.9420) (62 FR

VOL
63

JA
22
1998
UMI

43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) will address the potential health effects of the PMN substance.
CFR citation: 40 CFR 721.3485.

PMN Numbers P–95–1650/1651/1652/1653

Chemical name: (generic) Alkyl phenyl polyetheramines.
CAS number: Not available.
Basis for action: The PMN substances will be used as intermediates. Based on analogy to aliphatic amines EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 3 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances would not be released to surface waters. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.6490.

PMN Number P–95–1750

Chemical name: (generic) Pentanediol light residues.
CAS number: Not available.
Basis for action: The PMN substance will be used as a solvent. Based on potential consumer exposures, EPA has determined that the PMN substance may cause significant or substantial human exposure. EPA determined that use of the substance as described in the PMN did not cause significant or substantial exposure from use as an industrial solvent. EPA has determined that exposures from consumer use may result in significant or substantial human exposures. Based on this information activities other than those described in the PMN may result in significant changes in human exposure.
Recommended testing: EPA has determined that a 28-day oral study in rats (OECD guideline no. 407), an acute rat oral study (OPPTS 870.1100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), an ames assay (40 CFR 798.5265 or OPPTS 870.5265 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), a mouse micronucleus assay by the intraperitoneal route (40 CFR 799.9539) (62 FR 43853, August 15, 1997) (FRL–5719–5), and a developmental toxicity study in one species by the oral route (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would help characterize possible health effects of the substance. EPA will require any manufacturer importer, or processor who distributes this substance for use in a consumer product to perform this testing.
CFR citation: 40 CFR 721.5650.

PMN Number P–95–1772

Chemical name: (generic) Polyalkyl phosphate.
CAS number: Not available.
Basis for action: The PMN substance will be used as a specialty additive. Based on analogy to neutral organic substances, EPA expects toxicity to aquatic organisms at surface water concentrations as low as 1 ppb. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance did not exceed a concentration of 1 ppb when released to surface waters. EPA has determined that other uses may result in releases to surface waters above 1 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.5995.

PMN Number P–95–1806

Chemical name: (generic) Quaternary ammonium hydroxide.
CAS number: Not available.
Basis for action: The PMN substance will be used as an additive. Based on analogy to cationic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 4 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters above the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.4467.

PMN Number P–95–1825

Chemical name: Thieno[3,4-b]-1,4-dioxin, 2,3-dihydro- (9CI).
CAS number: 126213–50–1.
Basis for action: The PMN substance will be used in an open non-dispersive use. Based on analogy to structurally similar substances, EPA identified concerns for cancer and based on submitted test data EPA identified concerns for liver toxicity and neurotoxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance without the worker protection cited in the PMN or if the substance is manufactured domestically may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C) and (b)(3)(i).
Recommended testing: EPA has determined that a 2-year, two-species bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) will address the potential health effects of the PMN substance.
CFR citation: 40 CFR 721.9662.

PMN Number P–95–1891

Chemical name: Siloxanes and silicones, Me hydrogen, reaction products with 2,2,6,6-tetramethyl-4-(2-propenyloxy)piperdine.
CAS number: 182635–99–0.
Basis for action: The PMN substance will be used as an ultraviolet light stabilizer for polymers. Based on analogy to hindered amines, there is concern for toxicity to the immune system and the G.I. tract, liver toxicity, blood toxicity, and toxicity to the male reproductive system. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be exposed by inhalation. EPA determined that use as a powder may result in inhalation exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.6170.

PMN Number P–95–1950

Chemical name: (generic) Substituted ethoxyethylamine phosphonate.
CAS number: Not available.
Basis for action: The PMN substance will be used as a scale inhibitor. Based on analogy to polyanionic monomers, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 30 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters above 30 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.6078.

PMN Number P–95–2101

Chemical name: Hydrazine, (2-fluorophenyl).
CAS Number: 2368–80–1.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy of the PMN substance to hydrazines EPA is concerned that oncogenicity, liver and kidney effects, lung effects, and blood effects will occur to exposed workers and that toxicity will occur to aquatic organisms. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because there were no significant worker or environmental exposures. EPA has determined that domestic manufacture of the substance may result in significant worker and environmental exposures. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C), (b)(3)(ii), and (b)(4)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance. A fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.4257.

PMN Number P–96–19

Chemical name: Lithiated metal oxide ($LiNiO_2$).
CAS number: 12031–65–1.
Effective date of section 5(e) consent order: June 26, 1996.
Basis for section 5(e) consent order: The order was issued under section 5(e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health and the environment.
Toxicity concern: Similar chemicals have been shown to cause cancer and systemic toxicity in test animals. In addition, based on Structure Activity Relationship (SAR) analysis derived from test data on structurally similar compounds, EPA expects toxicity to aquatic organisms to occur at a concentration of 30 ppb PMN substance in surface waters.
Recommended testing: The results of a 90-day subchronic inhalation toxicity study in rats (40 CFR 799.9346) (62 FR 43828, August 15, 1997) (FRL–5719–5) and a 2-year, two-species bioassay via inhalation (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the human health concerns. The results of a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) conducted using static method and nominal concentrations, would help to characterize the toxicity of the substance. The consent order contains two production volume limits. The PMN submitter has agreed not to exceed the first production volume limit without performing the 90-day subchronic toxicity test. The PMN submitter has also agreed not to exceed the second higher production volume limit without performing the bioassay.
CFR citation: 40 CFR 721.5549.

PMN Number P–96–33

Chemical name: Cyclopropanecarboxaldehyde.
CAS number: 1489–69–6.
Effective date of section 5(e) consent order: November 27, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health.
Toxicity concern: Similar aldehydes have been shown to cause lung irritation, carcinogenicity, mutagenicity, and liver toxicity in test animals. Developmental effects are possible based on the acid.
Recommended testing: EPA has determined that an *in vitro* mouse lymphoma assay (40 CFR 799.9530) (62 FR 43846, August 15, 1997) (FRL–5719–5) and an *in vivo* mouse micronucleus assay (40 CFR 799.9539) (62 FR 43853, August 15, 1997) (FRL–5719–5), a 90-day inhalation test in rats (OECD guideline no. 413), a 2-year, one-species bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the human health effects. The consent order contains two production volume limits.

VOL 63 ISS 14 JA 22 1998 UMI

The PMN submitter has agreed not to exceed the first production volume limit without performing the *in vitro* mouse lymphoma, *in vivo* mouse micronucleus assays, and the 90-day inhalation test in rats. The PMN submitter has also agreed not to exceed the second production volume limit without performing a 2-year, one-species bioassay, which EPA may elect not to require depending on the results of the mutagenicity studies and the 90-day test.
CFR citation: 40 CFR 721.2280.

PMN Number P–96–92

Chemical name: (generic) 1,4-benzenediol, 2-(1,1,3,3-tetramethylbutyl) and Bis(dimethylamino substituted) carbomonocycle.
CAS number: Not available.
Basis for action: The PMN substance will be used in a consumer article. Based on analogy to hydroquinones, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.1155.

PMN Number P–96–93

Chemical name: Benzenamine, 4,4'-methylenebis[2-methyl-6-(1-methylethyl)]-.
CAS number: 16298–38–7.
Basis for action: The PMN substance will be used in a non-dispersive use. Based on submitted test data EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 20 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.1105.

PMN Number P–96–236

Chemical name: 1-Tridecyn-3-ol, 3-methyl.
CAS Number: 100912–15–0.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy of the PMN substance to 1-hexyn-3-ol and other structurally similar substances, EPA is concerned that liver toxicity, kidney toxicity, neurotoxicity, reproductive toxicity, and cardiotoxicity will occur to exposed workers. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant worker exposures were not expected. EPA has determined that domestic manufacture of the substance or use of the substance without dermal protective equipment may result in significant worker exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that an oral 2-generation reproduction study in rats (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.9830.

PMN Number P–96–238

Chemical name: (generic) Azo monochloro triazine reactive dye.
CAS number: Not available.
Basis for action: The PMN substance will be used as a dye. Based on analogy to structurally similar substances and submitted test data, EPA is concerned that liver toxicity, blood toxicity, oncogenicity, neurotoxicity, and developmental toxicity will occur in exposed workers. EPA determined that use of the substance did not present an unreasonable risk because significant worker exposure is not expected because the substance was manufactured, processed, or used as liquids. EPA has determined that manufacture, processing, or use of the substance as a solid may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(3)(i), (b)(3)(ii), and (b)(3)(iii).
Recommended testing: EPA has determined that an oral two-species developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPT 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.9717.

PMN Number P–96–273

Chemical name: (generic) Chloroalkane.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on toxicity data submitted with the PMN and by analogy to chlorinated solvents, EPA identified health concerns for liver toxicity, kidney toxicity, neurotoxicity, and oncogenicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance other than as described in the PMN may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C), (b)(3)(i), and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPT 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.2091.

PMN Number P–96–346

Chemical name: (generic) Aminofunctional alkoxy alkyl siloxane.
CAS number: Not available.
Basis for action: The PMN substance will be used as an adhesion promoter. Based on analogy to aliphatic amines and ethoxysilanes, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters above 10 ppb. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.9515.

PMN Numbers P–96–399/400/401/402/403/404

Chemical name: (generic) Alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols, reaction products with maleic anhydride.
CAS number: Not available.
Basis for action: The PMN substances will be used as site-limited production intermediates. Based on analogy to nonionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 9 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances were not released to surface waters. EPA has determined that other uses may result in releases to surface waters. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.2350.

PMN Numbers P–96–554/555/556/557/558/559/560/561/564/565

Chemical name: (generic) Alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols.
CAS number: Not available.
Basis for action: The PMN substances will be used as intermediates. Based on analogy to nonionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 20 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because the substances would not be released to surface waters. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.6477.

PMN Numbers P–96–406/407/408

Chemical name: (generic) Alkyltri, tetra, and pentaamines.
CAS number: Not available.
Basis for action: The PMN substances will be used as industrial lubricants and fuel additives. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances were not released to surface waters. EPA has determined that other uses may result in releases to surface waters. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.6475.

PMN Number P–96–573

Chemical name: (generic) Ethoxylated alkyl quaternary ammonium compound.
CAS Number: Not available.
Basis for action: The PMN substance will be used in an open dispersive use. Based on analogy of the PMN substance to cationic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because there were no significant environmental exposures. EPA has determined that any use of the substance other than for the specific use described in the PMN may result in significant environmental exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.655.

PMN Number P–96–585

Chemical name: (generic) Salt of a substituted polyalkylenepolyamine.
CAS number: Not available.
Basis for action: The PMN substance will be used as a processing aid. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in

VOL 63 ISS 14 JA 22 1998 UMI

releases to surface waters. Based on this information the PMN substance meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.6197.

PMN Number P–96–702

Chemical name: (generic) Substituted phenyl azo substituted sulfo carbopolycycle.
CAS number: Not available.
Basis for action: The PMN substance will be used in an open nondispersive use. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because it did not result in significant human or environmental exposure. EPA has determined that increased use of the substance may result in significant environmental and human exposure.
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an activated sludge adsorption isotherm (OPPTS 835.1110 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1) would help characterize the environmental effects of the PMN substance. A murine immune allergic response study (*Toxicology and Applied Pharmacology* 112:190–197 (1992)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.2122.

PMN Numbers P–96–767/773

Chemical name: (generic) Substituted pyridine azo substituted phenyl.
CAS number: Not available.
Basis for action: The PMN substances will be used as textile dyes. Based on analogy to structurally similar substances, EPA is concerned that liver toxicity, kidney toxicity, oncogenicity, blood toxicity, neurotoxicity, and developmental toxicity will occur in exposed workers. EPA determined that use of the substances did not present an unreasonable risk because significant worker exposure is not expected because the substances were not manufactured domestically. EPA has determined that domestic manufacture of the substances may result in significant worker exposure. Based on this information the PMN substances meet the concern criteria at § 721.170 (b)(1)(i)(C) and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a two-species oral developmental toxicity study (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5), and a subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substances.
CFR citation: 40 CFR 721.8780.

PMN Number P–96–795

Chemical name: (generic) Mixed fatty alkylamines, salt.
CAS number: Not available.
Basis for action: The PMN substance will be used as a processing aid. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters. Based on this information the PMN substance meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.567.

PMN Number P–96–813

Chemical name: (generic) Phenothiazine derivative.
CAS number: Not available.
Basis for action: The PMN substance will be used as a mediator in enzyme catalyzed reactions. Based on analogy to phenothiazines and submitted toxicity data, EPA is concerned that blood toxicity, liver toxicity, kidney effects, adrenal toxicity, spleen toxicity, reproductive toxicity, and neurotoxicity will occur in exposed workers. Based on submitted test data EPA is also concerned that toxicity to aquatic organisms will occur at concentrations as low as 7 ppb. EPA determined that use of the substance did not present an unreasonable risk because the use as described in the PMN would not result in significant worker exposure or environmental release. EPA has determined that domestic manufacture of the substance as a powder may result in significant worker exposure or environmental release. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(3)(i), (b)(3)(ii), and (b)(4)(i).
Recommended testing: EPA has determined that a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) and a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the health and environmental effects of the PMN substance.
CFR citation: 40 CFR 721.5913.

PMN Number P–96–824

Chemical name: (generic) Acrylate ester.
CAS number: Not available.
Basis for action: The PMN substance will be used as a monomer. Based on analogy to acrylates, EPA identified concerns for toxicity to aquatic organisms at concentrations as low as 6 ppb. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant environmental exposure is not expected. EPA has determined that other uses may result in releases to water which are significant environmental exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.2805.

PMN Number P–96–866

Chemical name: (generic) Derivative of substituted carbomonocyclic carboxylic acid-amine distillation stream byproduct reaction product.
CAS number: Not available.
Basis for action: The PMN substance will be used as a processing aid. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters. Based on this information the PMN substance meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.9635.

PMN Number P–96–941

Chemical name: (generic) Ceteareth-25 sorbate.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to nonionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as an intermediate did not present an unreasonable risk because the substance would not be released to surface waters in significant amounts. EPA has determined that other uses of the substance may result in releases to surface waters which significantly exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.2082.

PMN Number P–96–897

Chemical name: (generic) Terpene residue distillates.
CAS number: Not available.
Basis for action: The PMN substance will be used as an odor enhancer. Based on analogy to neutral organic substances, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters above a level of 10 ppb. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.2145.

PMN Number P–96–942

Chemical name: Methanone, [5-[[3-(2H-benzotriazol-2-yl)-2-hydroxy-5-(1,1,3,3-tetramethylbutyl)phenyl]methyl]-2-hydroxy-4-(octyloxy)phenyl]phenyl-.
CAS number: 162245–07–0.
Effective date of section 5(e) consent order: September 24, 1996.
Basis for section 5(e) consent order: The order was issued under section 5 (e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to human health. Toxicity concern: Section 8(e) data and data on analogous hindered phenol benzotriazoles have shown similiar substances to cause increased organ weight (liver and kidney, with associated histopathology at higher doses); hematological effects (decreased hemoglobin, packed cell volume, and erythrocytes); and immune systems effects(weight changes in thymus, spleen, lymph nodes; decreased leukocytes) in test animals.
Recommended testing: EPA has determined that a 90-day gavage study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) with special attention to hematology would help characterize systemic toxicity and reproductive toxicity. The PMN submitter has agreed not to exceed the production volume limit without performing this test.
CFR citation: 40 CFR 721.4885.

PMN Numbers P–96–945/946/947/948

Chemical name: (generic) Mixture of hydrochlorofluoro alkanes and hydrochlorofluoro alkene.
CAS number: Not available.
Basis for action: The PMN substances will be used as intermediates. Based on analogy to similar substances, EPA is concerned that lung toxicity, neurotoxicity, irritation, oncogenicity, liver toxicity, kidney toxicity, and cardiac sensitization will occur in exposed workers. EPA determined that use of the substance as an intermediate did not present an unreasonable risk because it did not result in significant worker exposure. EPA has determined that use other than an intermediate may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) and a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.4464.

PMN Numbers P–96–950/951

Chemical name: (generic) Polymers of $C_{13}C_{15}$ oxoalcohol ethoxolate, ammonia, and maleic anhydride.

UMI

CAS number: Not available.
Basis for action: The PMN substances will be used as described in the PMN. Based on structure activity relationships to nonionic surfactants-alkylethoxylates, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 9 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances would not be released to surface waters. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.6505.

PMN Number P–96–1176

Chemical name: Cyclohexanamine, *N,N*-dimethyl-, compd. with alpha-isotridecyl-omega-hydroxypoly(oxy-1,2-ethanediyl) phosphate.
CAS Number: 164383–18–0.
Basis for action: The PMN substance will be used as a pigment dispersant for color dispersion. Based on analogy to phosphate based anionic surfactants, EPA expects toxicity to aquatic organisms at surface water concentrations as low as 20 ppb. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because there were no significant environmental exposures. EPA has determined that any use of the substance other than for the specific use described in the PMN may result in significant exposures. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance
CFR citation: 40 CFR 721.2222.

PMN Number P–96–1177

Chemical name: Tungstate (W12(OH)2O386-) hexasodium (9CI).
CAS Number: 12141–67–2.
Basis for action: The PMN substance will be used in an open non-dispersive use. Based on submitted test data, EPA is concerned that hepatotoxicity, kidney toxicity, neurotoxicity, reproductive toxicity, eye and skin irritation, and toxicity to the GI tract, spleen, lungs, pancreas, urinary bladder, and the lymph system may occur. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because there were no significant inhalation exposures. EPA has determined that any use of the substance other than for the specific use described in the PMN may result in significant inhalation exposures. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(i).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.9840.

PMN Number P–96–1216

Chemical name: Benzoic acid, 3-amino-, diazotized, coupled with 6-amino-4-hydroxy-2-naphthalenesulfonic acid, diazotized, (3-aminophenyl)phosphonic acid and diazotized 2,5-diethoxybenzenamine.
CAS number: 163879–69–4.
Basis for action: The PMN substance will be used as a coloring material. Based on submitted toxicity data on the PMN substance and analogy to the azo reduction products, EPA is concerned that eye irritation, skin sensitization, reproductive toxicity in males, blood toxicity, liver toxicity, kidney toxicity, reproductive toxicity, spleen effects, oncogenicity, neurotoxicity, and developmental toxicity will occur in workers exposed via inhalation. EPA determined that use of the substance as described in the PMN does not present an unreasonable risk. Significant worker inhalation exposure is not expected because the substance will not be manufactured, processed, or used as a powder. EPA has determined that manufacture, processing, and use of the substance as a powder may result in significant worker inhalation exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(D), (b)(3)(i), and (b)(3)(iii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 2-generation reproductive toxicity study (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5) would help characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.1705.

PMN Number P–96–1233

Chemical name: (generic) Reaction product of epoxy with anhydride and glycerol and glycol.
CAS number: Not available.
Basis for action: The PMN substance will be used as molding compound. Based on analogy to diepoxides and esters EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 30 ppb of the PMN substance in surface waters. Based on analogy to similar substances there is concern for oncogenicity, developmental toxicity, reproductive toxicity, and neurotoxicity to exposed workers. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters and workers would not be exposed by inhalation. EPA has determined that other uses or uses as a powder may result in releases to surface waters which exceed the concern concentration or inhalation exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(c), (b)(3)(ii), and (b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance. EPA has also determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.9270.

PMN Number P–96–1239

Chemical name: (generic) Aliphatic polyisocyanate homopolymer.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to structurally similar substances, EPA is concerned that pulmonary sensitization and irritation will occur in exposed workers. EPA determined that use of the substance did not present an unreasonable risk because significant worker exposure is not expected because the substance was used as an intermediate. EPA has determined that use other than an intermediate may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day inhalation study in rats (40 CFR 799.9346) (62 FR 43828, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.4259.

PMN Number P–96–1240

Chemical name: Poly(oxy-1,2-ethanediyl), α-sulfo-ω-[1-[(4-nonylphenoxy)methyl]-2-(2-propenyloxy)ethoxy]-, branched, ammonium salts.
CAS number: 184719–88–8.
Basis for action: The PMN substance will be used as an emulsifier. Based on analogy to structurally similar substances and submitted test data, EPA is concerned that kidney toxicity, reproductive toxicity, developmental toxicity, and oncogenicity will occur in exposed workers. EPA determined that use of the substance did not present an unreasonable risk because significant worker exposure is not expected because the substance was not manufactured domestically. EPA has determined that domestic manufacture of the substance may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C), (b)(3)(i), (b)(3)(ii), and (b)(3)(iii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5), and a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.539.

PMN Number P–96–1263

Chemical name: (generic) Substituted phenyl azo substituted sulfocarbopolycle, sodium salt.
CAS number: Not available.
Basis for action: The PMN substance will be used in a destructive use. Based on analogy to structurally similar substances, EPA is concerned that oncogenicity, blood effects, developmental toxicity, and neurotoxicity will occur in workers exposed via inhalation. EPA determined that use of the substance as described in the PMN does not present an unreasonable risk. Significant worker inhalation exposure is not expected because the substance will not be manufactured, processed, or used as a powder. EPA has determined that manufacture, processing, and use of the substance as a solid may result in significant worker inhalation exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(iii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.9545.

PMN Numbers P–96–1280/1281/1504/1505/1506/1507/1508

Chemical name: (generic) Quaternary ammonium alkyletherpropyl trialkylamine halides.
CAS number: Not available.
Basis for action: The PMN substances will be used as industrial production aids. Based on analogy to aliphatic amines and cationic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 2 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because the substances would not be released to surface waters. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.4095.

PMN Number P–96–1288

Chemical name: (generic) Hydrofluoroalkene.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to structurally similar substances, EPA is concerned that lung toxicity, neurotoxicity, irritation, oncogenicity, liver toxicity, kidney toxicity, and cardiac sensitization will occur in exposed workers. EPA determined that use of the substance as an intermediate did not present an unreasonable risk because it did not result in significant worker exposure. EPA has determined that use other than an intermediate may result in significant worker exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) and a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would help characterize the health and environmental effects of the PMN substance.
CFR citation: 40 CFR 721.4465.

PMN Number P–96–1315

Chemical name: 9H-Thioxanthen-9-one, 2,4-diethyl.
CAS number: 82799–44–8.

VOL 63 ISS 14 JA 22 1998 UMI

Basis for action: The PMN substance will be used as a photopolymerization initiator. Based on analogy to neutral organic substances, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.9664.

PMN Number P–96–1319

Chemical name: (generic) Nitro methyl quinoline.
CAS number: Not available.
Basis for action: The PMN substance will be used in a destructive use. Based on analogy to structurally similar substances, there is concern for oncogenicity, mutagenicity, blood toxicity, and neurotoxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant amounts and workers would not be exposed by inhalation. EPA has determined that use without appropriate respiratory protection may result in significant inhalation exposure to workers and disposal other than by incineration may result in significant drinking water exposures to exposed populations. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C) and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.9080.

PMN Numbers P–96–1337/1338/1339

Chemical name: (generic) Amine substituted metal salts.
CAS number: Not available.
Basis for action: The PMN substances will be used as catalysts. Based on analogy to structurally similar compounds, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 4 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because the substances would not be released to surface waters in significant quantities. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.640.

PMN Number P–96–1410

Chemical name: (generic) Substituted bisaniline.
CAS number: Not available.
Basis for action: The PMN substance will be used as paper dye intermediate. Based on analogy to neutral organics, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 4 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.1805.

PMN Number P–96–1427

Chemical name: (generic) Stilbene diglycidyl ether.
CAS number: Not available.
Effective date of section 5(e) consent order: March 14, 1997.
Basis for section 5(e) consent order: The order was issued under section 5(e)(1)(A)(i) and (e)(1)(A)(ii)(I) of TSCA based on a finding that this substance may present an unreasonable risk of injury to health.
Toxicity concern: Diglycidyl ether of bisphenol A (DGEBA), other similar chemicals, and epoxides have been shown to cause mutagenicity, oncogenicity, male reproductive toxicity and mucous membrane irritation in test animals.
Recommended testing: EPA has determined that a 90-day subchronic oral toxicity study with attention to the male and female reproductive organs (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would help to characterize the reproductive toxicity. The PMN submitter has agreed not to exceed the production volume limit without performing this test. A 2-year bioassay on bisphenol A-diglycidyl ether (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) would be required to evaluate the carcinogenicity effects which may be caused by the PMN substance. This study will serve as a surrogate for a carcinogenicity study on the PMN substance. The order does not require submission of the oncogenicity study at any specified time or production volume. However, the order's restrictions on manufacture, import, processing, distribution in commerce, use, and disposal of the PMN substance will remain in effect until the order is modified or revoked by EPA based on submission of that study or other relevant information.
CFR citation: 40 CFR 721.3465.

PMN Number P–96–1430

Chemical name: (generic) Alkylpoly(oxyalkylene)amine.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to aliphatic amines EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. EPA determined that use of the substance as an intermediate did not present an unreasonable risk because it did not result in significant environmental exposure. EPA has determined that use other than an intermediate may result in significant environmental exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.641.

PMN Number P–96–1478

Chemical name: (generic) Ethoxylated alcohol, phosphated, amine salt.
CAS number: Not available.
Basis for action: The PMN substance will be used as a polymer suspension agent. Based on analogy to phosphate ester surfactants EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 8 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant releases of the substance is not expected to surface waters. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.
CFR citation: 40 CFR 721.643.

PMN Numbers P–96–1510/1511/1512/1513/1514

Chemical name: (generic) Alkyletherpropyl dialkylamine.
CAS number: Not available.
Basis for action: The PMN substances will be used as intermediates. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 1 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because there was not significant releases of the substances to surface waters. EPA has determined that uses other than as an intermediate may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.2345.

PMN Number P–96–1536

Chemical name: 2-pyrrolidone, 1-ethenyl-3-ethylidene-, (E)-.
CAS number: 153954–47–3.
Basis for action: The PMN substance will be used as a crosslinker in a polymerization reaction. Based on analogy to structurally similar chemicals, EPA identified health concerns for oncogenicity, mutagenicity, neurotoxicity, and developmental toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant human exposure is not expected. EPA has determined that use of the substance without impervious gloves may result in significant human exposure. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(C) and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) will address the potential health effects of the PMN substance as there is concern and potential from all routes of exposure.
CFR citation: 40 CFR 721.9010.

PMN Number P–96–1588

Chemical name: (generic) Hydrochloride salt of a mixed fatty amidoamine.
CAS number: Not available.
Basis for action: The PMN substance will be used as a processing aid. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 2 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance was not released to surface waters. EPA has determined that other uses may result in releases to surface waters. Based on this information the PMN substance meet the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.637.

PMN Number P–96–1649

Chemical name: (generic) Modified silicone resin.
CAS number: Not available.
Basis for action: The PMN substance will be used as a polymerization initiator. Based on analogy to neutral organic chemicals, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 5 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be

VOL 63 ISS 14 JA 22 1998 UMI

released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meet the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.9499.

PMN Number P–96–1652

Chemical name: Phosphinothioic acid, bis(2,4,4-trimethylpentyl)- (9Cl).

CAS number: 132767–86–3.

Basis for action: The PMN substance will be used as a solvent extraction reagent. Based on analogy to phosphate-based dialkyl anionic surfactants and neutral organics, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that a chronic 60-day fish early life stage toxicity test in rainbow trout (40 CFR 797.1600 or OPPTS 850.1400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a 21-day daphnid chronic toxicity test (40 CFR 797.1330 or OPPTS 850.1300 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.6045.

PMN Numbers P–96–1661/95–1654

Chemical name: (generic) Alkoxysilane ester.

CAS number: Not available.

Basis for action: The PMN substance will be used in coatings and as a filler. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because it did not result in significant human exposure. EPA has determined that increased use of the substance may result in significant human exposure.

Recommended testing: EPA has determined that a 90-day subchronic inhalation toxicity study in rats (40 CFR 799.9346) (62 FR 43828, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.

CFR citation: 40 CFR 721.537.

PMN Numbers P–97–57/58/59/60/61

Chemical name: (generic) Alkyl substituted quaternary ammonium chloride.

CAS number: Not available.

Basis for action: The PMN substances will be used as surface active agents. Based on submitted test data and analogy to monoalkyl quaternary surfactants EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 4 ppb of the PMN substances in surface waters. EPA determined that use of the substances as described in the PMNs did not present an unreasonable risk because the substances would not be released to surface waters during manufacturing and processing. EPA has determined that other uses of the substances may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substances meet the concern criteria at § 721.170 (b)(4)(i) and (b)(4)(ii).

Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substances.

CFR citation: 40 CFR 721.658.

PMN Number P–97–131

Chemical name: 2,7-Naphthalenedisulfonic acid, 4-amino-3-[[4′[[2-amino-4-[(3-butoxy-2-hydroxypropyl)amino]phenyl]azo]-3,3′-dimethyl[1,1′-biphenyl]-4-yl]azo]-5-hydroxy-6-(phenylazo)-, disodium salt.

CAS number: 103580–64–9.

Basis for action: The PMN substance will be used in ball point pen ink. Based on potential dimethylbenzidine, aniline, and triaminobenzene azo reduction products there is concern for oncogenicity, mutagenicity, developmental toxicity, liver toxicity, blood toxicity, and neurotoxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant amounts and workers would not be exposed by inhalation. EPA has determined that domestic manufacture, use as a powder, or additional releases to surface water may result in drinking water exposure or inhalation exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(D) and (b)(3)(iii).

Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substance.

CFR citation: 40 CFR 721.5279.

PMN Number P–97–136

Chemical name: (generic) Alkoxylated fatty acid amide alkylsulfate salt.

CAS number: Not available.

Basis for action: The PMN substance will be used to soften cellulose. Based on analogy to dialkyl cationic surfactants EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 2 ppb of the PMN substance in surface waters. EPA determined that industrial uses of the substance did not present an unreasonable risk because it did not result in significant environmental exposure. EPA has determined that non-industrial uses may result in significant environmental exposure. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–

1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.

CFR citation: 40 CFR 721.720.

PMN Numbers P–97–143/144

Chemical name: (generic) Polymers of styrene, cyclohexyl methacrylate and substituted methacrylate.

CAS number: Not available.

Basis for action: The PMN substances will be used as coating resins. Based on analogy to structurally similar substances, there is concern for oncogenicity, mutagenicity, reproductive toxicity in males, developmental toxicity, lung and skin sensitization, and membrane irritation. EPA determined that use of the substances as described in the PMN did not present an unreasonable risk because significant worker exposure is not expected. EPA has determined that domestic manufacture may result in significant inhalation exposure to workers. Based on this information the PMN substances meets the concern criteria at § 721.170(b)(1)(i)(C) and (b)(3)(ii).

Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substances.

CFR citation: 40 CFR 721.9492.

PMN Number P–97–193

Chemical name: 2,7-Naphthalenedisulfonic acid, 4-amino-5-hydroxy-, coupled with diazotized 4-butylbenzenamine, diazotized 4,4′-cyclohexylidenebis[benzenamine] and m-phenylenediamine, sodium salt.

CAS number: 182238–09–1.

Basis for action: The PMN substance will be used in ink. Based on potential aniline and triaminobenzene azo reduction products and submitted test data, there is concern for oncogenicity, mutagenicity, and blood toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be exposed by inhalation. EPA has determined that domestic manufacture and use as a powder, may result in inhalation exposure to workers. Based on this information the PMN substance meets the concern criteria at § 721.170 (b)(1)(i)(D) and (b)(3)(iii).

Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5) and a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) would characterize the human health effects of the PMN substance.

CFR citation: 40 CFR 721.5280.

PMN Number P–97–217

Chemical name: 1H-Imidazole, 2-ethyl-4,5-dihydro-4-methyl-.

CAS number: 931–35–1.

Basis for action: The PMN substance will be used as an epoxy catalyst. Based on analogy to aliphatic amines, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 40 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters in significant quantities. EPA has determined that other uses of the substance may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).

Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance. EPA has also determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and an oral reproductive toxicity test in rats (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.

CFR citation: 40 CFR 721.9503.

PMN Number P–97–264

Chemical name: Silane, (3,3,4,4,5,5,6,6,7,7,8,8,9,9,10,10,10-heptadecafluorodecyl)trimethoxy-.

CAS number: 83048–65–1.

Basis for action: The PMN substance will be used in coatings, plastics, and greases. Based on analogy to alkoxysilanes, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 10 ppb of the PMN substance in surface waters. Based on analogy to alkoxysilanes and perfluoro compounds, there is concern for lung toxicity, irritation to mucuous membranes, liver toxicity, blood toxicity, immunosuppression, and reproductive toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because the substance would not be released to surface waters and workers would not be exposed by inhalation. EPA has determined that other uses of the substance may result in inhalation exposures to workers and releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meet the concern criteria at § 721.170 (b)(3)(ii) and (b)(4)(ii).

Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance. EPA has also determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic inhalation study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), and an oral reproductive toxicity test in rats (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.

CFR citation: 40 CFR 721.9503.

PMN Number P–97–302

Chemical name: Hexadecanoic acid, ethenyl ester.

CAS number: 693–38–9.

Basis for action: The PMN substance will be used as a component in adhesive formulations. Based on analogy to vinyl acetate and other similar substances, there is concern for neurotoxicity, mutagencity, oncogenicity, liver toxicity, developmental toxicity and reproductive toxicity. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be subject to significant exposures. EPA has determined that other use of the substance may result in significant exposures to workers. Based on this information the PMN substance

VOL 63 ISS 14 JA 22 1998 UMI

meets the concern criteria at § 721.170 (b)(1)(i)(C) and (b)(3)(ii).
Recommended testing: EPA has determined that a 2-year, two-species oral bioassay (40 CFR 799.9420) (62 FR 43838, August 15, 1997) (FRL–5719–5), a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)), an oral two-species developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5), and an oral reproductive toxicity test in rats (40 CFR 799.9380) (62 FR 43834, August 15, 1997) (FRL–5719–5) would help characterize the health effects of the PMN substance.
CFR citation: 40 CFR 721.4158.

PMN Number P–97–304

Chemical name: (generic) Disubstituted thiadiazolsulfone.
CAS number: Not available.
Basis for action: The PMN substance will be used in an enclosed use. Based on analogy to *N*-heterocycles there are concerns for developmental toxicity. Based on submitted toxicity data there are concerns for neurotoxicity, mutagenicity, and irritation to eyes, lungs, and mucous membranes . EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be subject to significant exposures. EPA has determined that uses of the substance in a non-enclosed process and other than for the specific use designated in the PMN may result in significant exposures to workers. Based on this information the PMN substance meet the concern criteria at § 721.170 (b)(3)(i) and (b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.9659.

PMN Number P–97–314

Chemical name: (generic) Disubstituted thiadiazole.
CAS number: Not available.
Basis for action: The PMN substance will be used in an enclosed use. Based on analogy to *N*-heterocycles there are concerns for developmental toxicity. Based on submitted toxicity data there are concerns for neurotoxicity, mutagenicity, and irritation to eyes, lungs, and mucous membranes. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because workers would not be subject to significant exposures. EPA has determined that uses of the substance in a non-enclosed process and other than for the specific use designated in the PMN may result in significant exposures to workers. Based on this information the PMN substance meet the concern criteria at § 721.170 (b)(3)(i) and (b)(3)(ii).
Recommended testing: EPA has determined that a 90-day subchronic oral study in rats (40 CFR 798.2650 or OPPTS 870.3100 test guideline (public draft; 61 FR 31522, June 20, 1996) (FRL–5367–7)) and a two-species oral developmental toxicity test (40 CFR 799.9370) (62 FR 43832, August 15, 1997) (FRL–5719–5) would characterize the human health effects of the PMN substance.
CFR citation: 40 CFR 721.9657.

PMN Number P–97–328

Chemical name: (generic) Ethylenediamine, substituted, sodium salt.
CAS number: Not available.
Basis for action: The PMN substance will be used as an intermediate. Based on analogy to polyanionic monomers and *n*-halo-nitro compounds, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 30 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant releases of the substance is not expected to surface waters. EPA has determined that uses other than as an intermediate may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.3565.

PMN Number P–97–417

Chemical name: (generic) Potassium salt of polyolefin acid.
CAS number: Not available.
Basis for action: The PMN substance will be used as a fuel additive. Based on analogy to fatty acid anionic surfactants, EPA is concerned that toxicity to aquatic organisms may occur at a concentration as low as 800 ppb of the PMN substance in surface waters. EPA determined that use of the substance as described in the PMN did not present an unreasonable risk because significant releases of the substance is not expected to surface waters. EPA has determined that uses other than as a fuel additive may result in releases to surface waters which exceed the concern concentration. Based on this information the PMN substance meets the concern criteria at § 721.170(b)(4)(ii).
Recommended testing: EPA has determined that a fish acute toxicity study (40 CFR 797.1400 or OPPTS 850.1075 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), a daphnid acute toxicity study (40 CFR 797.1300 or OPPTS 850.1010 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)), and an algal acute toxicity study (40 CFR 797.1050 or OPPTS 850.5400 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1)) would help characterize the environmental effects of the PMN substance.
CFR citation: 40 CFR 721.7375.

IV. Objectives and Rationale of the Rule

During review of the PMNs submitted for the chemical substances that are subject to this SNUR, EPA concluded that for 25 of the 163 substances, regulation was warranted under section 5(e) of TSCA, pending the development of information sufficient to make reasoned evaluations of the health or environmental effects of the substances. The basis for such findings is outlined in Unit III. of this preamble. Based on these findings, TSCA section 5(e) consent orders requiring the use of appropriate controls were negotiated with the PMN submitters; the SNUR provisions for these substances designated herein are consistent with the provisions of the TSCA section 5(e) orders.

In the other 138 cases for which the proposed uses are not regulated under a TSCA section 5(e) order, EPA determined that one or more of the criteria of concern established at 40 CFR 721.170 were met.

EPA is issuing this SNUR for specific chemical substances which have undergone premanufacture review to ensure that:

(1) EPA will receive notice of any company's intent to manufacture,

import, or process a listed chemical substance for a significant new use before that activity begins.

(2) EPA will have an opportunity to review and evaluate data submitted in a SNUR notice before the notice submitter begins manufacturing, importing, or processing a listed chemical substance for a significant new use.

(3) When necessary to prevent unreasonable risks EPA will be able to regulate prospective manufacturers, importers, or processors of a listed chemical substance before a significant new use of that substance occurs.

(4) All manufacturers, importers, and processors of the same chemical substance which is subject to a TSCA section 5(e) order are subject to similar requirements. Issuance of a SNUR for a chemical substance does not signify that the substance is listed on the TSCA Inventory. Manufacturers, importers, and processors are responsible for ensuring that a new chemical substance subject to a final SNUR is listed on the TSCA Inventory.

V. Direct Final Procedures

EPA is issuing these SNURs as direct final rules, as described in 40 CFR 721.160(c)(3) and 721.170(d)(4). In accordance with 40 CFR 721.160(c)(3)(ii), this rule will be effective March 23, 1998, unless EPA receives a written notice by February 23, 1998 that someone wishes to make adverse or critical comments on EPA's action. If EPA receives such a notice, EPA will publish a notice to withdraw the direct final SNUR for the specific substance to which the adverse or critical comments apply. EPA will then propose a SNUR for the specific substance providing a 30-day comment period.

This action establishes SNURs for a number of chemical substances. Any person who submits a notice of intent to submit adverse or critical comments must identify the substance and the new use to which it applies. EPA will not withdraw a SNUR for a substance not identified in a notice.

VI. Test Data and Other Information

EPA recognizes that section 5 of TSCA does not require developing any particular test data before submission of a SNUN. Persons are required only to submit test data in their possession or control and to describe any other data known to or reasonably ascertainable by them. In cases where a TSCA section 5(e) order requires or recommends certain testing, Unit III. of this preamble lists those recommended tests.

However, EPA has established production limits in the TSCA section 5(e) orders for several of the substances regulated under this rule, in view of the lack of data on the potential health and environmental risks that may be posed by the significant new uses or increased exposure to the substances. These production limits cannot be exceeded unless the PMN submitter first submits the results of toxicity tests that would permit a reasoned evaluation of the potential risks posed by these substances. Under recent consent orders, each PMN submitter is required to submit each study at least 14 weeks (earlier orders required submissions at least 12 weeks) before reaching the specified production limit. Listings of the tests specified in the TSCA section 5(e) orders are included in Unit III. of this preamble. The SNURs contain the same production volume limits as the consent orders. Exceeding these production limits is defined as a significant new use.

The recommended studies may not be the only means of addressing the potential risks of the substance. However, SNUNs submitted for significant new uses without any test data may increase the likelihood that EPA will take action under TSCA section 5(e), particularly if satisfactory test results have not been obtained from a prior submitter. EPA recommends that potential SNUN submitters contact EPA early enough so that they will be able to conduct the appropriate tests.

SNUN submitters should be aware that EPA will be better able to evaluate SNUNs which provide detailed information on:

(1) Human exposure and environmental release that may result from the significant new use of the chemical substances.

(2) Potential benefits of the substances.

(3) Information on risks posed by the substances compared to risks posed by potential substitutes.

VII. Procedural Determinations

EPA is establishing through this rule some significant new uses which have been claimed as CBI subject to Agency confidentiality regulations at 40 CFR part 2. EPA is required to keep this information confidential to protect the CBI of the original PMN submitter. EPA promulgated a procedure to deal with the situation where a specific significant new use is CBI. This procedure appears in 40 CFR 721.1725(b)(1) and is similar to that in § 721.11 for situations where the chemical identity of the substance subject to a SNUR is CBI. This procedure is cross-referenced in each of these SNURs.

A manufacturer or importer may request EPA to determine whether a proposed use would be a significant new use under this rule. Under the procedure incorporated from § 721.1725(b)(1), a manufacturer or importer must show that it has a *bona fide* intent to manufacture or import the substance and must identify the specific use for which it intends to manufacture or import the substance. If EPA concludes that the person has shown a *bona fide* intent to manufacture or import the substance, EPA will tell the person whether the use identified in the *bona fide* submission would be a significant new use under the rule. Since most of the chemical identities of the substances subject to these SNURs are also CBI, manufacturers and processors can combine the *bona fide* submission under the procedure in § 721.1725(b)(1) with that under § 721.11 into a single step.

If a manufacturer or importer is told that the production volume identified in the *bona fide* submission would not be a significant new use, i.e. it is below the level that would be a significant new use, that person can manufacture or import the substance as long as the aggregate amount does not exceed that identified in the *bona fide* submission to EPA. If the person later intends to exceed that volume, a new *bona fide* submission would be necessary to determine whether that higher volume would be a significant new use. EPA is considering whether to adopt a special procedure for use when CBI production volume is designated as a significant new use. Under such a procedure, a person showing a *bona fide* intent to manufacture or import the substance, under the procedure described in § 721.11, would automatically be informed of the production volume that would be a significant new use. Thus the person would not have to make multiple *bona fide* submissions to EPA for the same substance to remain in compliance with the SNUR, as could be the case under the procedures in § 721.1725(b)(1).

VIII. Applicability of Rule to Uses Occurring Before Effective Date of the Final Rule

To establish a significant "new" use, EPA must determine that the use is not ongoing. The chemical substances subject to this rule have recently undergone premanufacture review. TSCA section 5(e) orders have been issued for 24 substances and notice submitters are prohibited by the TSCA section 5(e) orders from undertaking activities which EPA is designating as significant new uses. In cases where EPA has not received a NOC and the substance has not been added to the TSCA Inventory, no other person may commence such activities without first submitting a PMN. For substances for which an NOC has not been submitted

VOL 63 ISS 14 JA 22 1998 UMI

at this time, EPA has concluded that the uses are not ongoing. However, EPA recognizes in cases when chemical substances identified in this SNUR are added to the TSCA Inventory prior to the effective date of the rule, the substances may be manufactured, imported, or processed by other persons for a significant new use as defined in this rule before the effective date of the rule. However, 123 of the 163 substances contained in this rule have CBI chemical identities, and since EPA has received a limited number of post-PMN *bona fide* submissions, the Agency believes that it is highly unlikely that any of the significant new uses described in the following regulatory text are ongoing.

As discussed in the **Federal Register** of April 24, 1990 (55 FR 17376), EPA has decided that the intent of section 5(a)(1)(B) is best served by designating a use as a significant new use as of the date of publication rather than as of the effective date of the rule. Thus, persons who begin commercial manufacture, import, or processing of the substances regulated through this SNUR will have to cease any such activity before the effective date of this rule. To resume their activities, these persons would have to comply with all applicable SNUR notice requirements and wait until the notice review period, including all extensions, expires.

EPA has promulgated provisions to allow persons to comply with this SNUR before the effective date. If a person were to meet the conditions of advance compliance under § 721.45(h), the person would be considered to have met the requirements of the final SNUR for those activities. If persons who begin commercial manufacture, import, or processing of the substance between publication and the effective date of the SNUR do not meet the conditions of advance compliance, they must cease that activity before the effective date of the rule. To resume their activities, these persons would have to comply with all applicable SNUR notice requirements and wait until the notice review period, including all extensions, expires.

IX. Economic Analysis

EPA has evaluated the potential costs of establishing significant new use notice requirements for potential manufacturers, importers, and processors of the chemical substance subject to this rule. EPA's complete economic analysis is available in the public record for this rule (OPPTS–50628).

X. Public Record and Electronic Submissions

The official record for this rulemaking, as well as the public version, has been established for this rulemaking under docket control number OPPTS–50628 (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 12 noon to 4 p.m., Monday through Friday, excluding legal holidays. The official rulemaking record is located in the TSCA Nonconfidential Information Center, Rm. NE–B607, 401 M St., SW., Washington, DC.

Electronic comments can be sent directly to EPA at:

oppt.ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1/6.1 or ASCII file format. All comments and data in electronic form must be identified by the docket control number OPPTS–50628. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries.

The OPPTS harmonized test guidelines referenced in this document are available on EPA's World Wide Web site under "Researchers and Scientists," "Environmental Test Methods & Guidelines" (http://www.epa.gov/epahome/research.htm).

XI. Regulatory Assessment Requirements

Under Executive Order 12866, entitled "Regulatory Planning and Review" (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" subject to review by the Office of Management and Budget (OMB). In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described in the Unfunded Mandates Reform Act (UMRA) of 1995 (Pub. L. 104–4), or require prior consultation with State officials as also specified in Executive Order 12875, entitled "Enhancing the Intergovernmental Partnership" (58 FR 58093, October 28, 1993). Nor does it involve special considerations of environmental justice related issues as required by Executive Order 12898, entitled "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations" (59 FR 7629, February 16, 1994), or additional OMB review in accordance with Executive Order 13045, entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997).

According to the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information that requires OMB approval under the PRA, unless it has been approved by OMB and displays a currently valid OMB control number. The OMB control numbers for EPA's regulations, after initial display in the preamble of the final rules, are listed in 40 CFR part 9. The information collection requirements related to this action have already been approved by OMB pursuant to the PRA under OMB control number 2070–0012 (EPA ICR No. 574). This action does not impose any burden requiring additional OMB approval.

If an entity were to submit a significant new use notice to the Agency, the annual burden is estimated to average between 30 and 170 hours per response. This burden estimate includes the time needed to review instructions, search existing data sources, gather and maintain the data needed, and complete, review and submit the required significant new use notice.

Send any comments about the accuracy of the burden estimate, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques, to the Director, OPPE Regulatory Information Division, U.S. Environmental Protection Agency (Mail Code 2137), 401 M Street, S.W., Washington, D.C. 20460, with a copy to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., N.W., Washington, DC 20503, marked "Attention: Desk Officer for EPA." Please remember to include the OMB control number in any correspondence, but do not submit any completed forms to these addresses.

In addition, pursuant to section 605(b) of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agency has previously certified, as a generic matter, that the promulgation of a SNUR does not have a significant adverse economic impact on a substantial number of small entities. The Agency's generic certification for promulgation of new SNURs appears on June 2, 1997 (62 FR 29684) (FRL–5597–1), and was provided to the Chief Counsel for Advocacy of the Small Business Administration.

XII. Submission to Congress and the General Accounting Office

Under 5 U.S.C. 801(a)(1)(A), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, the Agency has submitted a report containing this rule and other required

information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the General Accounting Office prior to publication of this rule in today's **Federal Register**. This is not a major rule as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Reporting and recordkeeping requirements.

Dated: January 6, 1998.

Charles M. Auer,

Director, Chemical Control Division, Office of Pollution Prevention and Toxics.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 continues to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

2. By adding new § 721.405 to subpart E to read as follows:

§ 721.405 Polyether acrylate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a polyether acrylate (PMN P–95–666) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

3. By adding new § 721.524 to subpart E to read as follows:

§ 721.524 Alcohols, C_{6-12}, ethoxylated, reaction product with maleic anhydride.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as alcohols, C_{6-12}, ethoxylated, reaction product with maleic anhydride (PMN P–88–1108) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modifind by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

4. By adding new § 721.526 to subpart E to read as follows:

§ 721.526 Substituted aromatic aldehyde.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted aromatic aldehyde (PMN P–95–1466) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modifind by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

5. By adding new § 721.528 to subpart E to read as follows:

§ 721.528 Benzaldehyde, 2-hydroxy-5-nonyl-, oxime, branched.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as benzaldehyde, 2-hydroxy-5-nonyl-, oxime, branched (PMN P–95–1467; CAS No. 174333–80–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

6. By adding new § 721.537 to subpart E to read as follows:

§ 721.537 Organosilane ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an organosilane ester (PMN P–96–1661/P–95–1654) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(r) (370,000 kilogram (kg)) (90-day subchronic inhalation study in rats-(40 CFR 799.9346) [62 FR 43828, August 15, 1997) (FRL–5719–5). A person may not manufacture or import the substance beyond the aggregate production volume limit, unless that person conducts this study on the substance and submits all final reports and underlying data in accordance with the procedures and criteria specified in paragraphs (a)(2)(i)(A), (a)(2)(i)(B), (a)(2)(i)(C), and (a)(2)(i)(D) of this section.

(A) Each study required to be performed pursuant to this section must be scientifically valid. *Scientific valid* means that the study was conducted according to:

(*1*) The test guidelines specified in paragraph (a)(2)(i) of this section.

(*2*) An EPA-approved protocol.

(*3*) TSCA Good Laboratory Practice Standards at 40 CFR part 792.

(*4*) Using methodologies generally accepted at the time the study is initiated.

(*5*) Any deviation from these requirements must be approved in writing by EPA.

(B) Before starting to conduct any of the studies in paragraph (a)(2)(i) of this section, the person must obtain approval of test protocols from EPA by submitting written protocols. EPA will respond to the person within 4 weeks of receiving the written protocols. Published test guidelines specified in paragraph (a)(2)(i) of this section (e.g., 40 CFR part 797 or part 798) provide

VOL 63 ISS 14 JA 22 1998 UMI

general guidance for development of test protocols, but are not themselves acceptable protocols.

(C) The person shall:

(*1*) Conduct each study in good faith with due care.

(*2*) Promptly furnish to EPA the results of any interim phase of each study.

(*3*) Submit, in triplicate (with an additional sanitized copy, if confidential business information is involved), the final report of each study and all underlying data ("the report and data") to EPA no later than 14 weeks prior to exceeding the applicable production volume limit. The final report shall contain the contents specified in 40 CFR 792.185.

(D)(*1*) Except as described in paragraph (a)(2)(i)(D)(*2*) of this section, if, within 6 weeks of EPA's receipt of a test report and data, the person receives written notice that EPA finds that the data generated by a study are scientifically invalid, the person is prohibited from further manufacture and import of the PMN substance beyond the applicable production volume limit.

(*2*) The person may continue to manufacture and import the PMN substance beyond the applicable production limit only if so notified, in writing, by EPA in response to the person's compliance with either of the following paragraphs (a)(2)(i)(D)(*2*)(*i*) or (a)(2)(i)(D)(*2*)(*ii*) of this section.

(*i*) The person may reconduct the study. If there is sufficient time to reconduct the study and submit the report and data to EPA at least 14 weeks before exceeding the production limit as required by paragraph (a)(2)(i)(C)(*3*) of this section, the person shall comply with paragraph (a)(2)(i)(C)(*3*) of this section. If there is insufficient time for the person to comply with paragraph (a)(2)(ii)(C)(*3*) of this section, the person may exceed the production limit and shall submit the report and data in triplicate to EPA within a reasonable period of time, all as specified by EPA in the notice described in paragraph (a)(2)(i)(D)(*1*) of this section. EPA will respond to the person in writing, within 6 weeks of receiving the person's report and data.

(*ii*) The person may, within 4 weeks of receiving from EPA the notice described in paragraph (a)(2)(i)(D)(*1*) of this section, submit to EPA a written report refuting EPA's finding. EPA will respond to the person in writing, within 4 weeks of receiving the person's report.

(E) The person is not required to conduct a study specified in paragraph (a)(2)(i) of this section if notified in writing by EPA that it is unnecessary to conduct that study.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

7. By adding new § 721.538 to subpart E to read as follows:

§ 721.538 Phenol, 4-(1,1-dimethylethyl)-, homopolymer.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as phenol, 4-(1,1-dimethylethyl)-, homopolymer (PMN P–95–243; CAS No. 30813–81–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(3) of this section.

(2) *High molecular weight exemption.* A batch of the chemical substance may be exempt from the provisions of this rule if the average number molecular weight of the substance is greater than 1,000 and the low molecular weight species below 1,000 and 500 are less than 25 percent and 10 percent, respectively. To be eligible for this exemption, the batch must be individually measured.

(3) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (d), (f), (g)(3)(i), (g)(4)(i), and (g)(5). The label and material safety data sheet (MSDS) as required by this paragraph shall also include the following statement: This substance is toxic to aquatic invertebrate.

(ii) *Industrial, commercial, and consumer activites.* Requirements as specified in § 721.80(q).

(iii) *Release to water.* Requirements as specified in § 721.90 (a)(4) and (b)(4) (N = 9). When calculating the surface water concentrations according to the instructions in § 721.91, the statement that the amount of the substance that will be released will be calculated before the substance enters control technology does not apply. Instead, if the waste stream containing the substance will be treated using primary and secondary wastewater treatment with control of suspended solids, before release, then the amount of the substance reasonably likely to be removed from the waste stream by such treatment may be subtracted in calculating the number of kilograms released. No more than 95 percent removal efficiency may be attributed to such treatment. These requirements do not apply to the sites specifically exempted in the TSCA section 5(e) consent order for this substance.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

8. By adding new § 721.539 to subpart E to read as follows:

§ 721.539 Poly(oxy-1,2-ethanediyl), α-sulfo-ω-[1-[(4-nonylphenoxy)methyl]-2-(2-propenyloxy)ethoxy]-, branched, ammonium salts.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as Poly(oxy-1,2-ethanediyl), α-sulfo-ω-[1-[(4-nonylphenoxy)methyl]-2-(2-propenyloxy)ethoxy]-, branched, ammonium salts (PMN P–96–1240; CAS No. 184719–88–8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

9. By adding new § 721.567 to subpart E to read as follows:

§ 721.567 Mixed fatty alkylamines, salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as mixed fatty alkylamines (PMN P–96–795) is subject to reporting under this

section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

10. By adding new § 721.637 to subpart E to read as follows:

§ 721.637 Hydrochloride salt of a mixed fatty amidoamine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a hydrochloride salt of a mixed fatty amidoamine (PMN P–96–1588) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

11. By adding new § 721.640 to subpart E to read as follows:

§ 721.640 Amine substituted metal salts.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as amine substituted metal salts (PMNs P–96–1337/1338/1339) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 4).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

12. By adding new § 721.641 to subpart E to read as follows:

§ 721.641 Alkylpoly(oxyalkylene)amine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a alkylpoly(oxyalkylene)amine (PMN P–96–1430) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

13. By adding new § 721.643 to subpart E to read as follows:

§ 721.643 Ethoxylated alcohol, phosphated, amine salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as an ethoxylated alcohol, phosphated, amine salt (PMN P–96–1478) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 8).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

14. By adding new § 721.655 to subpart E to read as follows:

§ 721.655 Ethoxylated alkyl quaternary ammonium compound.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an ethoxylated alkyl quaternary ammonium compound (PMN P–96–573) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

15. By adding new § 721.658 to subpart E to read as follows:

§ 721.658 Alkyl substituted quaternary ammoniums.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as alkyl substituted quaternary ammoniums (PMNs P–97–57/58/59/60/61) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (b)(1) and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

VOL 63 ISS 14 JA 22 1998 UMI

16. By adding new § 721.720 to subpart E to read as follows:

§ 721.720 Alkoxylated fatty acid amide, alkylsulfate salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an alkoxylated fatty acid amide, alkylsulfate salt (PMN P–97–136) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(l).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

17. By adding new § 721.723 to subpart E to read as follows:

§ 721.723 Anthraquinone dye.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an anthraquinone dye (PMN P–94–2159) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

18. By adding new § 721.977 to subpart E to read as follows:

§ 721.977 Aryloxyarene.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as aryloxyarene (PMN P–92–314) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (f), (g)(3)(ii), (g)(4)(iii), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statement: This substance may be toxic to sediment organisms.

(ii) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

19. By adding new § 721.980 to subpart E to read as follows:

§ 721.980 Sodium salt of azo acid dye.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a sodium salt of azo acid dye (PMN P–95–633) is subject to eporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

20. By adding new § 721.981 to subpart E to read as follows:

§ 721.981 Substituted naphtholoazo-substituted naphthalenyl-substituted azonaphthol chromium complex.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted naphtholoazo-substituted naphthalenyl-substituted azonaphthol chromium complex (PMN P–93–1631) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f), (v)(2), (w)(2), and (x)(2).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

21. By adding new § 721.1105 to subpart E to read as follows:

§ 721.1105 Benzenamine, 4,4'-methylenebis[2-methyl-6-(1-methylethyl)]-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as benzenamine, 4,4'-methylenebis[2-methyl-6-(1-methylethyl)]- (PMN P–96–93; CAS No. 16298–38–7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

22. By adding new § 721.1155 to subpart E to read as follows:

§ 721.1155 1,4-benzenediol, 2-(1,1,3,3-tetramethylbutyl)-and Bis(dimethylamino substituted)carbomonocycle.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as 1,4-benzenediol, 2-(1,1,3,3-tetramethylbutyl)- and Bis (dimethylamino substituted)carbomonocycle (PMN P–96–92) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

23. By adding new § 721.1705 to subpart E to read as follows:

§ 721.1705 Benzoic acid, 3-amino-, diazotized, coupled with 6-amino-4-hydroxy-2-naphthalenesulfonic acid, diazotized, (3-aminophenyl)phosphonic acid and diazotized 2,5-diethoxybenzenamine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance generically identified as benzoic acid, 3-amino-, diazotized, coupled with 6-amino-4-hydroxy-2-naphthalenesulfonic acid, diazotized, (3-aminophenyl)phosphonic acid and diazotized 2,5-diethoxybenzenamine (PMN P–96–1216; CAS No. 163879–69–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

24. By adding new § 721.1805 to subpart E to read as follows:

§ 721.1805 Substituted bisaniline.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted bisaniline (PMN P–96–1410) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 4).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

25. By adding new § 721.1930 to subpart E to read as follows:

§ 721.1930 Butanoic acid, antimony (3+) salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as butanoic acid, antimony (3+) salt (PMN P–94–1143; CAS No. 53856–17–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(3), (b) (concentration set at 0.1 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 0.1 percent), (g)(1)(i), (g)(1)(vi), (g)(1)(vii), (g)(1)(ix), (g)(2)(i), (g)(2)(v), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statement: This substance may cause neurologic effects. This substance may cause cardiovascular effects. This substance may cause ocular irritation.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(p) (675,000 kg).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

26. By adding new § 721.2082 to subpart E to read as follows:

§ 721.2082 Derivative of substituted carbomonocyclic carboxylic acid-amine distillation stream byproduct reaction product.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a derivative of substituted carbomonocyclic carboxylic acid-amine distillation stream byproduct reaction product (PMN P–96–866) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

27. By adding new § 721.2091 to subpart E to read as follows:

§ 721.2091 Chloroalkane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a chloroalkane (PMN P–96–273) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

VOL 63 ISS 14 JA 22 1998 UMI

28. By adding new § 721.2094 to subpart E to read as follows:

§ 721.2094 N,N'-di(alkyl heteromonocycle)amino chlorotriazine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as *N,N'*-di(alkyl heteromonocycle)amino chlorotriazine (PMN P–93–1369) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(i) (this respirator meets the minimum requirement for persons exposed via inhalation during manufacture), (a)(5)(ii), (a)(5)(iv), (a)(5)(v) (these three respirators meet the minimum requirements for persons exposed via inhalation during processing and use), (a)(6)(i), (a)(6)(ii), (a)(6)(iii), (a)(6)(iv), (b) (concentration set at 0.1 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72(a), (b), (c), (d), (e) (concentration set at 0.1 percent), (f), (g)(1)(iv), (g)(1)(vii), (g)(1)(viii), (g)(1)(ix), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), (g)(3)(i), (g)(3)(ii), (g)(4)(iii), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(iv) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

29. By adding new § 721.2122 to subpart E to read as follows:

§ 721.2122 Substituted phenyl azo substituted sulfo carbopolycycle.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted phenyl azo substituted sulfo carbopolycycle (PMN P–96–702) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(r) (204,000 kg) (activated sludge adsorption isotherm-OPPTS 835.1110 test guideline (public draft; 61 FR 16486, April 15, 1996) (FRL–5363–1), daphnid acute toxicity-§ 797.1300, fish acute toxicity-§ 797.1400, murine immune allergic response study (*Toxicology and Applied Pharmacology* 112:190–197 (1992)). A person may not manufacture or import the substance beyond the following aggregate production volume limits, unless that person conducts the following corresponding studies on the substance and submits all final reports and underlying data in accordance with the procedures and criteria specified in paragraphs (a)(2)(i)(A), (a)(2)(i)(B), (a)(2)(i)(C), and (a)(2)(i)(D) of this section.

(A) Each study required to be performed pursuant to this section must be scientifically valid. *Scientifically valid* means that the study was conducted according to:

(*1*) The test guidelines specified in paragraph (a)(2)(i) of this section.

(*2*) An EPA-approved protocol.

(*3*) TSCA Good Laboratory Practice Standards at 40 CFR part 792.

(*4*) Using methodologies generally accepted at the time the study is initiated.

(*5*) Any deviation from these requirements must be approved in writing by EPA.

(B) Before starting to conduct any of the studies in paragraph (a)(2)(i) of this section, the person must obtain approval of test protocols from EPA by submitting written protocols. EPA will respond to the person within 4 weeks of receiving the written protocols. Published test guidelines specified in paragraph (a)(2)(i) of this section (e.g., 40 CFR part 797 or part 798) provide general guidance for development of test protocols, but are not themselves acceptable protocols.

(C) The person shall:

(*1*) Conduct each study in good faith with due care.

(*2*) Promptly furnish to EPA the results of any interim phase of each study.

(*3*) Submit, in triplicate (with an additional sanitized copy, if confidential business information is involved), the final report of each study and all underlying data ("the report and data") to EPA no later than 14 weeks prior to exceeding the applicable production volume limit. The final report shall contain the contents specified in 40 CFR 792.185.

(D)(*1*) Except as described in paragraph (a)(2)(i)(D)(*2*) of this section, if, within 6 weeks of EPA's receipt of a test report and data, the person receives written notice that EPA finds that the data generated by a study are scientifically invalid, the person is prohibited from further manufacture and import of the PMN substance beyond the applicable production volume limit.

(*2*) The person may continue to manufacture and import the PMN substance beyond the applicable production limit only if so notified, in writing, by EPA in response to the person's compliance with either of the following paragraph (a)(2)(i)(D)(*2*)(*i*) or (a)(2)(i)(D)(*2*)(*ii*) of this section.

(*i*) The person may reconduct the study. If there is sufficient time to reconduct the study and submit the report and data to EPA at least 14 weeks before exceeding the production limit as required by paragraph (a)(2)(i)(C)(*3*) of this section, the person shall comply with paragraph (a)(2)(i)(C)(*3*) of this section. If there is insufficient time for the person to comply with paragraph (a)(2)(i)(C)(*3*) of this section, the person may exceed the production limit and shall submit the report and data in triplicate to EPA within a reasonable period of time, all as specified by EPA in the notice described in paragraph (a)(2)(i)(D)(*1*) of this section. EPA will respond to the person in writing, within 6 weeks of receiving the person's report and data.

(*ii*) The person may, within 4 weeks of receiving from EPA the notice described in paragraph (a)(2)(i)(D)(*1*) of this section, submit to EPA a written report refuting EPA's finding. EPA will respond to the person in writing, within 4 weeks of receiving the person's report.

(E) The person is not required to conduct a study specified in paragraph (a)(2)(i) of this section if notified in writing by EPA that it is unnecessary to conduct that study.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

30. By adding new § 721.2145 to subpart E to read as follows:

§ 721.2145 Ceteareth-25 sorbate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as ceteareth-25 sorbate (PMN P–96–941) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provision of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

31. By adding new § 721.2222 to subpart E to read as follows:

§ 721.2222 Cyclohexanamine, N,N-dimethyl-, compd. with alpha-isotridecyl-omega-hydroxypoly(oxy-1,2-ethanediyl) phosphate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as cyclohexanamine, *N,N*-dimethyl-, compd. with alpha-isotridecyl-omega-hydroxypoly(oxy-1,2-ethanediyl) phosphate (PMN P–96–1176; CAS No. 164383–18–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

32. By adding new § 721.2280 to subpart E to read as follows:

§ 721.2280 Cyclopropanecarboxaldehyde.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as cyclopropanecarboxaldehyde (PMN P–96–33) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(i), (a)(5)(ii), (a)(5)(iii), (a)(5)(xii), (a)(5)(xiii), (a)(5)(xiv), (a)(6)(v), (b) (concentration set at 1.0 percent), and (c). Each person who is reasonsonably likely to be exposed by inhalation to the PMN substance in vapor form during loading of rail cars is provided with, and is required to wear, at a minimum, a National Institute for Occupational Safety and Health (NIOSH) approved category 19C Type C supplied-air respirator operated in pressure demand or other positive pressure mode and equipped with a full facepiece with an assigned protection factor (APF) of 200. As an alternative to the respiratory requirements in this section, manufacturers, importers, and processors may use the new chemical exposure limits provisions, including sampling and analytical methods which have previously been approved by EPA for this substance, found in the TSCA section 5(e) consent order for this substance.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(1)(iv), (g)(1)(ix), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activites.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

33. By adding new § 721.2345 to subpart E to read as follows:

§ 721.2345 Alkyletherpropyl dialkylamines.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified as alkyletherpropyl dialkylamines (PMNs P–96–1510/1511/1512/1513/1514) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

34. By adding new § 721.2350 to subpart E to read as follows:

§ 721.2350 Alkyltri, tetra, and pentaamines.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as alkyltri, tetra, and pentaamines (PMNs P–96–406/407/408) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

35. By adding new § 721.2535 to subpart E to read as follows:

§ 721.2535 Benzene, 1,1'-methylenebis[4-isocyanato-, homopolymer, Bu alc.-blocked.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as benzene, 1,1'-methylenebis[4-isocyanato-, homopolymer, Bu alc.-blocked (PMN P–95–1386; CAS No. 186321–98–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

VOL 63 ISS 14 JA 22 1998 UMI

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(y)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

36. By adding new § 721.2805 to subpart E to read as follows:

§ 721.2805 Acrylate ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an acrylate ester (PMN P–96–824) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

37. By adding new § 721.2925 to subpart E to read as follows:

§ 721.2925 Brominated aromatic ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a brominated aromatic ester (PMN P–95–1128) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (f), (g)(3)(1), (g)(3)(ii), (g)(4)(iii), and (g)(5).

(ii) [Reserved]

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(iv) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

38. By adding new § 721.3085 to subpart E to read as follows:

§ 721.3085 Brominated phthalate ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as brominated phthalate ester (PMN P–90–581) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(ii) *Hazard communication program.* A significant new use of this substance is any manner or method of manufacture, import, or processing associated with any use of these substances without providing risk notification as follows.

(A) If as a result of the test data required under the TSCA section 5(e) consent order for this substance, the employer becomes aware that this substance may present a risk of injury to human health or the environment the employer must incorporate this new information, and any information on methods for protecting against such risk, into a MSDS as described in § 721.72(c) within 90 days from the time the employer becomes aware of the new information. If this substance is not being manufactured, imported, processed, or used in the employer's workplace, the employer must add the new information to an MSDS before the substances are reintroduced into the workplace.

(B) The employer must ensure that persons who will receive, or who have received the substance from the employer within 5 years from the date the employer becomes aware of the new information described in paragraph (a)(2)(i)(A) of this section, are provided an MSDS as described in § 721.72(c) containing the information required under paragraph (a)(2)(i)(A) of this section within 90 days from the time the employer becomes aware of the new information.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

39. By adding new § 721.3155 to subpart E to read as follows:

§ 721.3155 3,8-Dioxa-4,7-disiladecane, 4,4,7,7-tetraethoxy-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 3,8-dioxa-4,7-disiladecane, 4,4,7,7-tetraethoxy- (PMN P–95–1326; CAS No. 16068–37–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(y)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

40. By adding new § 721.3465 to subpart E to read as follows:

§ 721.3465 Stilbene diglycidyl ether.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as stilbene diglycidyl ether (PMN P–96–1427) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(3), (a)(4), (a)(5)(ii), (a)(5)(iv), (a)(5)(v), (a)(6)(i), (b) (concentration set at 0.1 percent), and (c). As an alternative to the respiratory protection requirements of this section, manufacturers, importers, and processors of this substance may follow the terms of the new chemical exposure limits section in the TSCA section 5(e) consent order for this substance.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(ii), (g)(1)(vi), (g)(1)(vii), (g)(2)(i), (g)(2)(ii), (g)(2)(iv), (g)(2)(v), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statement: When using this substance use respiratory protection or maintain workplace airborne concentrations at or below an 8-hour time-weighted average of 0.5 milligram (mg)/meter (m^3).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

41. By adding new § 721.3485 to subpart E to read as follows:

§ 721.3485 Hydrofluorocarbon alkyl ether.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a hydrofluorocarbon alkyl ether (PMN P–95–1578) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. Non-spray uses are exempt from the provisions of this rule.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(iii), and (a)(6)(v).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

42. By adding new § 721.3488 to subpart E to read as follows:

§ 721.3488 Poly(oxy-1,2-ethanediyl), alpha substituted-omega-hydroxy-, C_{16-20} alkyl ethers.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as poly(oxy-1,2-ethanediyl), alpha substituted-omega-hydroxy-, C_{16-20} alkyl ethers (PMN P–87–323) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 20).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

43. By adding new § 721.3565 to subpart E to read as follows:

§ 721.3565 Ethylenediamine, substituted, sodium salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as ethylenediamine, substituted, sodium salt (PMN P–97–328) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

44. By adding new § 721.4085 to subpart E to read as follows:

§ 721.4085 Guanidine, pentaethyl-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as guanidine, pentaethyl- (PMN P–94–1018; CAS No. 13439–89–9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), and (a)(3).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (e) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

45. By adding new § 721.4090 to subpart E to read as follows:

§ 721.4090 Ethanaminium, N-[bis(diethylamino)-methylene]-N-ethyl-, bromide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as ethanaminium, *N*-[bis(diethylamino)-methylene]-*N*-ethyl-, bromide (PMN P–94–1019; CAS No. 89610–32–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

46. By adding new § 721.4095 to subpart E to read as follows:

VOL 63 ISS 14 JA 22 1998 UMI

§ 721.4095 Quaternary ammonium alkyltherpropyl trialkylamine halides.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as quaternary ammonium alkyltherpropyl trialkylamine halides (PMNs P–96–1280/81/1504/1505/1506/1507/1508) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

47. By adding new § 721.4158 to subpart E to read as follows:

§ 721.4158 Hexadecanoic acid, ethenyl ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as hexadecanoic acid, ethenyl ester (PMN P–97–302; CAS No. 693–38–9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(2)(i) and (a)(3).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f) and (j).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

48. By adding new § 721.4257 to subpart E to read as follows:

§ 721.4257 Hydrazine, (2-fluorophenyl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as hydrazine, (2-fluorophenyl) (PMN P–95–2101; CAS No. 2368–80–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

49. By adding new § 721.4259 to subpart E to read as follows:

§ 721.4259 Aliphatic polyisocyanate homopolymer.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an aliphatic polyisocyanate homopolymer (PMN P–96–1239) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

50. By adding new § 721.4462 to subpart E to read as follows:

§ 721.4462 Hydrochlorofluorocarbon.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a hydrochlorofluorocarbon (PMN P–95–1317) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

51. By adding new § 721.4464 to subpart E to read as follows:

§ 721.4464 Mixture of hydrofluoro alkanes and hydrofluoro alkene.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as a mixture of hydrofluoro alkanes and hydrofluoro alkene (PMNs P–96–945/946/947/948) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements specified as in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

52. By adding new § 721.4465 to subpart E to read as follows:

§ 721.4465 Hydrofluoroalkane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a hydrofluoroalkane (PMN P–96–1288) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(h).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

53. By adding new § 721.4467 to subpart E to read as follows:

§ 721.4467 Quaternary ammonium hydroxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a quaternary ammonium hydroxide (PMN P–95–1806) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

54. By adding new § 721.4468 to subpart E to read as follows:

§ 721.4468 1H-Imidazole, 2-ethyl-4,5-dihydro-4-methyl-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 1H-imidazole, 2-ethyl-4,5-dihydro-4-methyl- (PMN P–97–217; CAS No. 931–35–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 40).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

55. By adding new § 721.4469 to subpart E to read as follows:

§ 721.4469 Imidazolethione.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an imidazolethione (PMNs P–91–1131 and P–90–564) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. Formulations or mixtures containing the PMN substance in concentrations at or below 10 percent by weight or volume are exempt from the provisions of this rule.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(3), (b) (concentration set at 0.1 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 0.1 percent), (f), (g)(1)(ix), (g)(2)(i), (g)(2)(v), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statements: This substance may cause thyroid cancer. This substance may cause thyroid effects.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), and (h) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

56. By adding new § 721.4476 to subpart E to read as follows:

§ 721.4476 Substituted imines.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as substituted imines (PMNs P–95–1557/1558) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

57. By adding new § 721.4589 to subpart E to read as follows:

§ 721.4589 Propanedioic acid, [(4-methoxyphenyl)methylene]-, bis(1,2,2,6,6-pentamethyl-4-piperidinyl) ester (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as propanedioic acid, [(4-methoxyphenyl)methylene]-, bis(1,2,2,6,6-pentamethyl-4-piperidinyl) ester (9Cl) (PMN P–95–1411; CAS No. 147783–69–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(i), (a)(5)(ii), (a)(5)(iii), (a)(6)(i), (b) (concentration set at 1.0 percent), and (c). As an alternative to the respiratory protection requirements of this section, manufacturers, importers, and processors of this substance may follow the terms of the new chemical exposure limits section in the TSCA section 5(e) consent order for this substance.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e), (f), (g)(1)(iv), (g)(1)(vi), (g)(1)(viii), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(iv) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

58. By adding new § 721.4885 to subpart E to read as follows:

VOL 63 ISS 14 JA 22 1998 UMI

§ 721.4885 Methanone, [5-[[3-(2H-benzotriazol-2-yl)-2-hydroxy-5-(1,1,3,3-tetramethylbutyl)phenyl]methyl]-2-hydroxy-4-(octyloxy) phenyl]phenyl-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as methanone, [5-[[3-(2H-benzotriazol-2-yl)-2-hydroxy-5-(1,1,3,3-tetramethylbutyl)phenyl]methyl]-2-hydroxy-4-(octyloxy)phenyl]phenyl- (PMN P–96–942; CAS No.162245–07–0) is subject to the reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(ii), (a)(5)(iii), (a)(5)(iv), (a)(5)(v), (a)(6)(i), (b) (concentration set at 1.0 percent), and (c). As an alternative to the respiratory protection requirements of this section, manufacturers, importers, and processors of this substance may follow the terms of the new chemical exposure limits section in the TSCA section 5(e) consent order for this substance.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(iv), (g)(1)(vi), (g)(1)(viii), (g)(2)(ii), (g)(2)(iv), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

59. By adding new § 721.5255 to subpart E to read as follows:

§ 721.5255 2-Naphthalenol, mono and dioctyl derivs.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2-naphthalenol, mono and dioctyl derivs (PMN P–95–1288) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (where N = 1). When calculating the surface water concentrations according to the instructions in § 721.91, the statement that the amount of the substance that will be released will be calculated before the substance enters control technology does not apply. Instead, if the waste stream containing the substance will be treated before release, then the amount of the substance reasonably likely to be removed from the waste stream by such treatment may be subtracted in calculating the number of kilograms released. No more than 90 percent removal efficiency may be attributed to such treatment.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

60. By adding new § 721.5279 to subpart E to read as follows:

§ 721.5279 2,7-Naphthalenedisulfonic acid, 4-amino-3-[[4′2-amino-4-[(3-butoxy-2-hydroxypropyl)amino]phebyl]azo]-3,3′-dimethyl[1,1′-biphenyl]-4-yl]azo]-5-hydroxy-6-(phenylazo)-, disodium salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2,7-naphthalenedisulfonic acid, 4-amino-3-[[4′2-amino-4-[(3-butoxy-2-hydroxypropyl)amino]phebyl]azo]-3,3′-dimethyl[1,1′-biphenyl]-4-yl]azo]-5-hydroxy-6-(phenylazo)-, disodium salt (PMN P–97–131; CAS No. 103580–64–9) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f), (v)(1), (w)(1), and (x)(1).

(ii) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 40).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

61. By adding new § 721.5280 to subpart E to read as follows:

§ 721.5280 2,7-Naphthalenedisulfonic acid, 4-amino-5-hydroxy-, coupled with diazotized 4-butylbenzenamine, diazotized 4,4′-cyclohexylidenebis[benzenamine] and m-phenylenediamine, sodium salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2,7-naphthalenedisulfonic acid, 4-amino-5-hydroxy-, coupled with diazotized 4-butylbenzenamine, diazotized 4,4′-cyclohexylidenebis[benzenamine] and m-phenylenediamine, sodium salt (PMN P–97–193; CAS No. 182238–09–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f), (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

62. By adding new § 721.5281 to subpart E to read as follows:

§ 721.5281 2-Naphthalenesulfonic acid, 3-[[4-[(2,4-dimethyl-6-sulfophenyl)azo]-2-methoxy-5-methylphenyl]azo]-4-hydroxy-7-(phenylamino)-, sodium salt, compd. With 2,2′,2″-nitrilotris [ethanol] (9CI).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2-Naphthalenesulfonic acid, 3-[[4-[(2,4-dimethyl-6-sulfophenyl)azo]-2-methoxy-5-methylphenyl]azo]-4-hydroxy-7-(phenylamino)-, sodium salt, compd. With 2,2′,2″-nitrilotris [ethanol] (9CI) (PMN P–95–1235; CAS No. 94213–53–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f), (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part

apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

63. By adding new § 721.5547 to subpart E to read as follows:

§ 721.5547 Antimony double oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as antimony double oxide (PMNs P–95–677 and P–95–724) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 0.1 percent), (f), (g)(1)(vii), (g)(2)(ii), (g)(2)(iii), (g)(3)(ii), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statements: These substances may cause lung toxicity. When using these substances avoid any applications of these substances which could cause inhalation exposures. When using these substances keep in liquid form only.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (f), (v)(1), (v)(2), (w)(1), (w)(2), (x)(1), (x)(2), (y)(1), and (y)(2). Manufacturing, processing or use in any form which could cause inhalation exposures.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements specified in § 721.125 (a), (b), (c), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

64. By adding new § 721.5549 to subpart E to read as follows:

§ 721.5549 Lithiated metal oxide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as lithiated metal oxide ($LiNiO_2$) (PMN P–96–19; CAS No. 12031–65–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(3), (a)(4), (a)(5)(i), (a)(6)(i), (a)(6)(iv), (b) (concentration set at 0.1 percent), and (c). As an alternative to the respiratory requirements listed here, a manufacturer, importer, or processor may choose to follow the new chemical exposure limit (NCEL) provisions listed in the TSCA section 5(e) consent order for this substance.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 0.1 percent), (f) (g)(1)(iv), (g)(1)(vii), (g)(1)(viii), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), (g)(2)(v), (g)(3)(i), (g)(3)(ii), (g)4)(i), and (g)(5).

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(q).

(iv) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 30).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a), (b), (c), (d), (e), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

65. By adding new § 721.5645 to subpart E to read as follows:

§ 721.5645 Pentane 1,1,1,2,3,4,4,5,5,5,-decafluoro.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as pentane 1,1,1,2,3,4,4,5,5,5,-decafluoro (PMN P–95–638 and SNUN P–97–79; CAS No. 138495–42–8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j) and uses other than as described in the significant new use notice.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

66. By adding new § 721.5650 to subpart E to read as follows:

§ 721.5650 Pentanediol light residues.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as pentanediol light residues (PMN P–95–1750) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial and consumer activities.* Requirements as specified in § 721.80(o).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

67. By adding new § 721.5708 to subpart E to read as follows:

§ 721.5708 2-Pentene, 1,1,1,2,3,4,4,5,5,5-decafluoro-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2-Pentene, 1,1,1,2,3,4,4,5,5,5-decafluoro- (PMN P–95–637; CAS No.72804–49–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

VOL 63 ISS 14 JA 22 1998 UMI

68. By adding new § 721.5725 to subpart E to read as follows:

§ 721.5725 Phenol, 2,4-dimethyl-6-(1-methylpentadecyl)-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as phenol, 2,4-dimethyl-6-(1-methylpentadecyl)-) (PMN P–94–209; CAS No. 134701–20–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(2)(i) and (a)(3).

(ii) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

69. By adding new § 721.5730 to subpart E to read as follows:

§ 721.5730 Phenol, 4,4′-methylenebis[2,6-dimethyl-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as phenol, 4,4′-methylenebis[2,6-dimethyl- (PMN P–94–921) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(3), (a)(4), (a)(5)(ii), (a)(5)(iv), (a)(5)(v), (a)(6)(i), (b) (concentration set at 1 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1 percent), (f), (g)(1)(iv), (g)(2)(iv), (g)(2)(v), (g)(3)(ii), (g)(4)(iii), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statements: This substance may cause blood effects. This substance may cause chronic effects.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (g), (l), and (q).

(iv) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

70. By adding new § 721.5913 to subpart E to read as follows:

§ 721.5913 Phenothiazine derivative.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a phenothiazine derivative (PMN P–96–813) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers, and importers of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

71. By adding new § 721.5995 to subpart E to read as follows:

§ 721.5995 Polyalkyl phosphate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a polyalkyl phosphate (PMN P–95–1772) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Releases to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 1 ppb).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

72. By adding new § 721.6045 to subpart E to read as follows:

§ 721.6045 Phosphinothioic acid, bis(2,4,4-trimethylpentyl)- (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as phosphinothioic acid, bis(2,4,4-trimethylpentyl)- (9Cl) (PMN P–96–1652; CAS No. 132767–86–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 10). When calculating the surface water concentrations according to the instructions in § 721.91, the statement that the amount of the substance that will be released will be calculated before the substance enters control technology does not apply. Instead, if the waste stream containing the substance will be treated using carbon adsorption treatment before release, then the amount of the substance reasonably likely to be removed from the waste stream by such treatment may be subtracted in calculating the number of kilograms released. No more than 99 percent removal efficiency may be attributed to such treatment.

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

73. By adding new § 721.6075 to subpart E to read as follows:

§ 721.6075 Phosphonic acid, 1,1-methylenebis-tetrakis(1-methylethyl) ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as phosphonic acid, 1,1-methylenebis-tetrakis(1-methylethyl) ester (PMN P–95–168) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(2)(iii), (a)(2)(iv), (a)(3), (b) (concentration set at 0.1 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 0.1 percent), (f), (g)(2)(i), (g)(2)(v), and (g)(5). The label and MSDS required by this paragraph shall also include the following statement: This substance may cause mutagenicity.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) through (h) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

74. By adding new § 721.6078 to subpart E to read as follows:

§ 721.6078 Substituted ethoxyethylamine phosphonate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted ethoxyethylamine phosphonate (PMN P–95–1950) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

75. By adding new § 721.6165 to subpart E to read as follows:

§ 721.6165 Polysubstituted piperidine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a polysubstituted piperdine (PMN P–93–568) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(2)(iii), (a)(2)(iv), (a)(3), (b) (concentration set at 0.1 percent), and (c).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

76. By adding new § 721.6170 to subpart E to read as follows:

§ 721.6170 Siloxanes and silicones, Me hydrogen, reaction products with 2,2,6,6-tetramethyl-4-(2-propenyloxy)piperdine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as siloxanes and silicones, Me hydrogen, reaction products with 2,2,6,6-tetramethyl-4-(2-propenyloxy)piperdine (PMN P–95–1891; CAS No. 182635–99–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

77. By adding new § 721.6197 to subpart E to read as follows:

§ 721.6197 Salt of a substituted polyalkylenepolyamine.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a salt of a substituted polyalkylenepolyamine (PMN P–96–585) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

78. By adding new § 721.6475 to subpart E to read as follows:

§ 721.6475 Alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols (PMNs P–96–554/555/556/557/558/559) are subject to reporting under this section for the significant new uses described in paragraph (a)(1)(i) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial and consumer activities.* Requirements as specified in § 721.80(g).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Chemical substance and significant new uses subject to reporting.* The chemical substances identified generically as alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols (PMN P–96–560/561/564/565) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(i) The significant new uses are:

(A) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(B) [Reserved]

(ii) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

VOL 63 ISS 14 JA 22 1998 UMI

(A) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(B) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

79. By adding new § 721.6477 to subpart E to read as follows:

§ 721.6477 Alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols, reaction products with maleic anhydride.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as alkyl polycarboxylic acids, esters with ethoxylated fatty alcohols, reaction products with maleic anhydride (PMNs P–96–399/400/401/402/403/404) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

80. By adding new § 721.6485 to subpart E to read as follows:

§ 721.6485 Hydroxy terminated polyester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a hydroxy terminated polyester (PMN P–95–1213) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

81. By adding new § 721.6490 to subpart E to read as follows:

§ 721.6490 Alkyl phenyl polyetheramines.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as alkyl phenyl polyetheramines (PMNs P–95–1650/1651/1652/1653) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

82. By adding new § 721.6495 to subpart E to read as follows:

§ 721.6495 Aliphatic polyisocyanate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an aliphatic polyisocyanate (PMN P–95–1347) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(y)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

83. By adding new § 721.6505 to subpart E to read as follows:

§ 721.6505 Polymers of $C_{13}C_{15}$ oxoalcohol ethoxolates.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as polymers of $C_{13}C_{15}$ oxoalcohol ethoxolates (PMNs P–96–950/951) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

84. By adding new § 721.7375 to subpart E to read as follows:

§ 721.7375 Potassium salt of polyolefin acid.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a potassium salt of polyolefin acid (PMN P–97–417) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

85. By adding new § 721.7378 to subpart E to read as follows:

§ 721.7378 Substituted polyoxyethylene.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted polyoxyethylene (PMN P–93–1654) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j) (use as an emulsifier for paint and adhesives).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

86. By adding new § 721.8079 to subpart E to read as follows:

§ 721.8079 Isophorone diisocyanate neopentyl glycol adipate polyurethane prepolymer.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as isophorone diisocyanate neopentyl glycol adipate polyurethane prepolymer (PMN P–94–1743) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section. Non-spray uses are exempt from the provisions of this rule.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(i), (a)(5)(ii), (a)(5)(iii), (a)(5)(viii), (a)(5)(ix), (a)(5)(x), (a)(5)(xi), (a)(6)(i), (a)(6)(ii), (a)(6)(iv), and (b) (concentration set at 1.0 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(i), (g)(1)(ii), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), (g)(2)(v), and (g)(5). Manufacturers, importers, and processors who implement the product stewardship provisions of the TSCA section 5(e) consent order for these substances are exempt from the requirements of § 721.63 and § 721.72.

(iii) *Industrial, commercial and consumer activities.* Requirements as specified in § 721.80(q).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) through (i) are applicable to manufacturers, importers, and processors of this substance. Manufacturers, importers, and processors who implement the product stewardship provisions and keep records as required by the TSCA section 5(e) consent order for these substances are exempt from the requirements of § 721.125.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

(4) *Applicability of § 721.5.* The provisions of § 721.5 do not apply to manufacturers, importers, and processors, implementing the product stewardship provisions in the TSCA section 5(e) consent order for this substance.

87. By adding new § 721.8095 to subpart E to read as follows:

§ 721.8095 Silylated polyurethane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a silylated polyurethane (PMN P–95–1356) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(y)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

88. By adding new § 721.8780 to subpart E to read as follows:

§ 721.8780 Substituted pyridine azo substituted phenyl.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as substituted pyridine azo substituted phenyl (PMNs P–96–767 and P–96–773) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers and importers of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

89. By adding new § 721.9005 to subpart E to read as follows:

§ 721.9005 2-Pyrrolidinone, 1,1′-(2-methyl-1,5-pentanediyl)bis-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2-pyrrolidinone, 1,1′-(2-methyl-1,5-pentanediyl)bis- (PMN P–93–761; CAS No. 146453–62–5) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i) (There must be no permeation of the PMN substance greater than 0.08 grams (g)/minutes (min) centimeter (cm^2) after 8 hours of testing in accordance with the most current version of the American Society for Testing and Materials (ASTM) F739 "Standard Test Method for Resistance of Protective Clothing Materials to Permeation by Liquids or Gases." The results of all glove permeation testing must be reported in accordance with the most current version of (ASTM) F1194 "Guide for Documenting the Results of Chemical Permeation Testing of Protective Clothing Materials." Manufacturers, importers, and processors must submit such glove test data to the Agency and must receive written Agency approval for each type of glove tested prior to use of such gloves. The following gloves have been tested in accordance with the ASTM F739 method and found to satisfy the requirements for use by EPA: Ansell Edmond/8–352/Neoprene rubber, 0.097 cm thick. Gloves may not be used for a time period longer than they are actually tested and must be replaced at the end of each work shift), (a)(2)(ii), (a)(2)(iii), (a)(3), (b) (concentration set at 1.0 percent), and (c).

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at

VOL 63 ISS 14 JA 22 1998 UMI

1.0 percent), (f), (g)(l)(iii), (g)(l)(iv), (g)(2)(i), (g)(2)(iii), (g)(2)(v), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statement: This substance is expected to enhance the absorption of other chemicals into skin or other materials.

(iii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (o), (q), and (k) (use other than as a heat transfer fluid).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to this section.

90. By adding new § 721.9010 to subpart E to read as follows:

§ 721.9010 2-pyrrolidone, 1-ethenyl-3-ethylidene-, (E)-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 2-pyrrolidone, 1-ethenyl-3-ethylidene-, (E)- (PMN P–96–1536; CAS No. 153954–47–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(2)(i) and (a)(3).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (e) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

91. By adding new § 721.9080 to subpart E to read as follows:

§ 721.9080 Nitro methyl quinoline.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as nitro methyl quinoline (PMN P–96–1319) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(ii), (a)(5)(iv), (a)(5)(v), and (a)(6)(i).

(ii) *Disposal.* Requirements as specified in § 721.85 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (j) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

92. By adding new § 721.9265 to subpart E to read as follows:

§ 721.9265 Reaction product of dichlorobenzidine and substituted alkylamide.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a reaction product of dichlorobenzidine and substituted alkylamide (PMN P–95–1282) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e), (f), and (g)(5). The label and MSDS as required by this paragraph shall also include the following statements: At temperatures above 200 °C, this substance decomposes to produce a suspect human carcinogen, 3',3' dichlorobenzidine. Do not heat above 200 °C or 392 °F.

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and processing or use of the PMN substance at temperatures above 200 °C.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (f), (g), (h), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

93. By adding new § 721.9270 to subpart E to read as follows:

§ 721.9270 Reaction product of epoxy with anhydride and glycerol and glycol.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as reaction product of epoxy with anhydride and glycerol and glycol (PMN P–96–1233) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), (x)(1) and (y)(2).

(ii) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

94. By adding new § 721.9285 to subpart E to read as follows:

§ 721.9285 Reaction products of formalin (37%) with amine C_{12}.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as reaction products of formalin (37%) with amine C_{12} (PMN P–95–535) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

95. By adding new § 721.9488 to subpart E to read as follows:

§ 721.9488 Substituted resorcinols.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as substituted resorcinols (PMNs P–95–1103, P–95–1104, and P–96–1235) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 9).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* The recordkeeping requirements specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

96. By adding new § 721.9492 to subpart E to read as follows:

§ 721.9492 Polymers of styrene, cyclohexyl methacrylate and substituted methacrylate.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as polymers of styrene, cyclohexyl methacrylate and substituted methacrylate (PMNs P–97–143/144) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a) and (i) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

97. By adding new § 721.9497 to subpart E to read as follows:

§ 721.9497 Trifunctional ketoximino silane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as trifunctional ketoximino silane (PMNs P–95–605 and P–95–606) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), and (a)(3).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (e) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

98. By adding new § 721.9499 to subpart E to read as follows:

§ 721.9499 Modified silicone resin.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a modified silicone resin (PMN P–96–1649) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 5).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

99. By adding new § 721.9503 to subpart E to read as follows:

§ 721.9503 Silane, (3,3,4,4,5,5,6,6,7,7,8,8,9,9,10,10,10-heptadecafluorodecyl)trimethoxy-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as silane, (3,3,4,4,5,5,6,6,7,7,8,8,9,9,10,10,10-heptadecafluorodecyl) trimethoxy- (PMN P–97–264; CAS No. 83048–65–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(4), (a)(5)(iii), (a)(5)(xii), (a)(5)(xiii), (a)(5)(xv), (a)(6)(ii), and (a)(6)(v).

(ii) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 10).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

100. By adding new § 721.9515 to subpart E to read as follows:

§ 721.9515 Aminofunctional alkoxy alkyl siloxane.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an aminofunctional alkoxy alkyl siloxane (PMN P–96–346) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

101. By adding new § 721.9545 to subpart E to read as follows:

§ 721.9545 Substituted phenyl azo substituted sulfocarbopolycle, sodium salt.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a substituted phenyl azo substituted sulfocarbopolycle, sodium salt (PMN P–96–1263) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as

VOL 63 ISS 14 JA 22 1998 UMI

specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

103. By adding new § 721.9576 to subpart E to read as follows:

§ 721.9576 Chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxyphenyl]azo]-4-hydroxy-2-naphthalene-sulfonato (3-)]-, trisodium (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxyphenyl]azo]-4-hydroxy-2-naphthalene-sulfonato (3-)]-, trisodium (9Cl) (PMN P–95–1576; CAS No. 118716–62–4) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

104. By adding new § 721.9577 to subpart E to read as follows:

§ 721.9577 Chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxyphenyl] azo]-4-hydroxy-2-naphthalene sulfonato (3-)]-,-[[5-(aminosulfonyl) -2-hydroxyphenyl]azo]-4-hydroxy-7-[[2-hydroxy-1-(phenylamino) carbonyl]-1-propenyl]azo]-2-naphthalenesulfonato(3-)]-, trisodium (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as chromate(3-), bis[7-[(aminohydroxyphenyl)azo]-3-[[5-(aminosulfonyl)-2-hydroxy phenyl] azo]-4-hydroxy-2-naphthalenesulfonato (3-)]-,-[[5-(aminosulfonyl) -2-hydroxyphenyl]azo]-4-hydroxy-7-[[2-hydroxy-1-(phenylamino) carbonyl]-1-propenyl]azo]-2-naphthalene sulfonato(3-)]-, trisodium (9Cl) (PMN P–95–1577; CAS No. 118716–61–3) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(1), (w)(1), and (x)(1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

105. By adding new § 721.9635 to subpart E to read as follows:

§ 721.9635 Terpene residue distillates.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as terpene residue distillates (PMN P–96–897) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 10).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

106. By adding new § 721.9657 to subpart E to read as follows:

§ 721.9657 Disubstituted thiadiazole.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a disubstituted thiadiazole (PMN P–97–314) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (a),(b), (c), and (j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

107. By adding new § 721.9659 to subpart E to read as follows:

§ 721.9659 Disubstituted thiadiazosulfone.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as a disubstituted thiadiazosulfone (PMN P–97–304) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (a),(b), (c), and (j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

108. By adding new § 721.9662 to subpart E to read as follows:

§ 721.9662 Thieno[3,4-b]-1,4-dioxin, 2,3-dihydro- (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as thieno[3,4-b]-1,4-dioxin, 2,3-dihydro-(9Cl) (PMN P–95–1825; CAS No. 126213–50–1) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(4), (a)(5)(xiii), (a)(5)(xiv), and (a)(6)(v).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

109. By adding new § 721.9664 to subpart E to read as follows:

§ 721.9664 9H-Thioxanthen-9-one,2,4-diethyl.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 9H-thioxanthen-9-one,2,4-diethyl (PMN P–96–1315; CAS No. 82799–44–8) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 1).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

110. By adding new § 721.9717 to subpart E to read as follows:

§ 721.9717 Azo monochloro triazine reactive dye.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as an azo monochloro triazine reactive dye (PMN P–96–238) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80 (v)(2), (w)(2), and (x)(2).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

111. By adding new § 721.9825 to subpart E to read as follows:

§ 721.9825 Phenyl substituted triazolinones.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substances identified generically as phenyl substituted triazolinones (PMNs P–93–204, P–94–1870, P–94–1871, P–94–1872, P–94–1873, and P–94–1874) are subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), (a)(3), (a)(4), (a)(5)(iii), (a)(5)(iv), (a)(5)(v), (a)(5)(vi), (a)(6)(i), (b) (concentration set at 1.0 percent), and (c). The imperviousness of the gloves selected pursuant to (a)(2)(i) of this section must be demonstrated by actual testing under (a)(3)(i) of this section and not by manufacturer specifications. In addition, there must be no permeation of the chemical substance greater than 15 μg/day-cm² as a daily cumulative total when tested in accordance with the most current version of the American Society for Testing and Materials (ASTM) F739 "Standard Test Method for Resistance of Protective Clothing Materials to Permeation by Liquids or Gases" or ASTM F1383 "Standard Test Method for Resistance of Protective Clothing Materials to Permeation by Liquids or Gases Under Conditions of Intermittent Contact."

(A) For conditions of exposure which are intermittent, gloves may be tested in accordance with the most current version of ASTM F1383 "Standard Test Method for Resistance of Protective Clothing Materials to Permeation by Liquids or Gases Under Conditions of Intermittent Contact," provided the contact time in testing is greater than or equal to the expected duration of dermal contact, and the purge time used in the testing is less than or equal to the expected duration of non-contact during the intermittent cycle of dermal exposure in the workplace. If ASTM F1383 is used for testing, the company must submit to the Agency a description of worker activities involving the chemical substance which includes daily frequencies and durations of potential worker exposures.

(B) The results of all glove permeation testing must be reported in accordance with the most current version of (ASTM) F1194 "Guide for Documenting the Results of Chemical Permeation Testing of Protective Clothing Materials." The company must submit all test data to the Agency and must receive written Agency approval for each type of glove tested prior to use of such gloves. Gloves must be discarded and replaced with such frequency as to ensure that they will reliably provide an impervious barrier to the chemical substances under normal and expected conditions of exposure within the work area. Gloves that have been damaged or are defective shall not be used. For PMNs P–94–1871 through P–94–1874, EPA has approved North Safety Butyl Rubber gloves (32 mils thick). For P–93–204 and P–94–1870, EPA has approved North Safety Butyl Rubber gloves (32 mils thick) only if used in combination with a chemical-resistant glove that has been demonstrated (EPA review not required) impermeable to the solvent,

VOL 63 ISS 14 JA 22 1998 UMI

e.g., North Silvershield gloves and North 4H gloves.

(ii) *Hazard communication program.* Requirements as specified in § 721.72 (a), (b), (c), (d), (e) (concentration set at 1.0 percent), (f), (g)(1)(iv), (g)(1)(ix), (g)(2)(i), (g)(2)(ii), (g)(2)(iii), (g)(2)(iv), (g)(2)(v), (g)(3)(i), (g)(3)(ii), (g)(4)(i), and (g)(5).

(iii) *Release to water.* Requirements as specified in § 721.90 (a)(4), (b)(4), and (c)(4) (N = 5 for all the chemical substances subject to the provisions of this rule combined). However, contrary to the requirements specified in § 721.91, if the waste stream containing the chemical substances will be treated using activated carbon adsorption, then the amount of chemical substances reasonably likely to be removed from the waste stream by such treatment may be subtracted in calculating the number of kilograms released. No more than the following percent removal efficiencies may be attributed to such treatment for each PMN: P–93–204, 99 percent; P–94–1870, 98 percent; P–94–1871, 97 percent; P–94–1872, 92 percent; P–94–1873, 90 percent; P–94–1874, 73 percent.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (f), (g), (h), and (k) are applicable to manufacturers, importers, and processors of these substances.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

112. By adding new § 721.9830 to subpart E to read as follows:

§ 721.9830 1-Tridecyn-3-ol, 3-methyl.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as 1-tridecyn-3-ol, 3-methyl (PMN P–96–236; CAS No. 100912–15–0) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Worker protection.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), and (a)(3).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

113. By adding new § 721.9840 to subpart E to read as follows:

§ 721.9840 Tungstate (W12(OH)2O386-) hexasodium (9Cl).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as tungstate (W12(OH)2O386-) hexasodium (9Cl) (PMN P–96–1177; CAS No. 12141–67–2) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), and (i) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

114. By adding new § 721.9928 to subpart E to read as follows:

§ 721.9928 Urea, tetraethyl-.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified as urea, tetraethyl- (PMN P–94–1017; CAS No. 1187–03–7) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Protection in the workplace.* Requirements as specified in § 721.63 (a)(1), (a)(2)(i), and (a)(3).

(ii) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(r) (445,000 kg) (a dermal developmental toxicity study in mice and rats and either a chromosome aberration assay in mice (40 CFR 798.5385) or a micronucleus assay in mice (40 CFR 798.5395)). A person may not manufacture or import the substance beyond the following aggregate production volume limits, unless that person conducts the following corresponding studies on the substance and submits all final reports and underlying data in accordance with the procedures and criteria specified in paragraphs (a)(2)(i)(A), (a)(2)(i)(B), (a)(2)(i)(C), and (a)(2)(i)(D) of this section.

(A) Each study required to be performed pursuant to this section must be scientifically valid. *Scientific valid* means that the study was conducted according to:

(*1*) The test guidelines specified in paragraph (a)(2)(i) of this section.

(*2*) An EPA-approved protocol.

(*3*) TSCA Good Laboratory Practice Standards at 40 CFR part 792.

(*4*) Using methodologies generally accepted at the time the study is initiated.

(*5*) Any deviation from these requirements must be approved in writing by EPA.

(B) Before starting to conduct any of the studies in paragraph (a)(2)(i) of this section, the person must obtain approval of test protocols from EPA by submitting written protocols. EPA will respond to the person within 4 weeks of receiving the written protocols. Published test guidelines specified in paragraph (a)(2)(i) of this section (e.g., 40 CFR part 797 or part 798) provide general guidance for development of test protocols, but are not themselves acceptable protocols.

(C) The person shall:

(*1*) Conduct each study in good faith with due care.

(*2*) Promptly furnish to EPA the results of any interim phase of each study.

(*3*) Submit, in triplicate (with an additional sanitized copy, if confidential business information is involved), the final report of each study and all underlying data ("the report and data") to EPA no later than 14 weeks prior to exceeding the applicable production volume limit. The final report shall contain the contents specified in 40 CFR 792.185.

(D)(*1*) Except as described in paragraph (a)(2)(ii)(D)(*2*) of this section, if, within 6 weeks of EPA's receipt of a test report and data, the person receives written notice that EPA finds that the data generated by a study are scientifically invalid, the person is prohibited from further manufacture and import of the PMN substance beyond the applicable production volume limit.

(*2*) The person may continue to manufacture and import the PMN substance beyond the applicable production limit only if so notified, in writing, by EPA in response to the person's compliance with either of the following paragraph (a)(2)(ii)(D)(*2*)(*i*) or (a)(2)(ii)(D)(*2*)(*ii*) of this section.

(*i*) The person may reconduct the study. If there is sufficient time to reconduct the study and submit the report and data to EPA at least 14 weeks before exceeding the production limit as required by paragraph (a)(2)(ii)(C)(*3*) of this section, the person shall comply with paragraph (a)(2)(ii)(C)(*3*) of this section. If there is insufficient time for the person to comply with paragraph (a)(2)(ii)(C)(*3*) of this section, the person may exceed the production limit and shall submit the report and data in triplicate to EPA within a reasonable period of time, all as specified by EPA in the notice described in paragraph (a)(2)(ii)(D)(*1*) of this section. EPA will respond to the person in writing, within 6 weeks of receiving the person's report and data.

(*ii*) The person may, within 4 weeks of receiving from EPA the notice described in paragraph (a)(2)(ii)(D)(*1*) of this section, submit to EPA a written report refuting EPA's finding. EPA will respond to the person in writing, within 4 weeks of receiving the person's report.

(E) The person is not required to conduct u study specified in paragraph (a)(2)(i) of this section if notified in writing by EPA that it is unnecessary to conduct that study.

(iii) *Release to water.* Requirements as specified in § 721.90 (a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph.

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125 (a), (b), (c), (d), (e), (i), and (k) are applicable to manufacturers, importers, and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

Title 3—

The President

Notice of January 21, 1998

Continuation of Emergency Regarding Terrorists Who Threaten To Disrupt the Middle East Peace Process

On January 23, 1995, by Executive Order 12947, I declared a national emergency to deal with the unusual and extraordinary threat to the national security, foreign policy, and economy of the United States constituted by grave acts of violence committed by foreign terrorists that disrupt the Middle East peace process. By Executive Order 12947 of January 23, 1995, I blocked the assets in the United States, or in the control of United States persons, of foreign terrorists who threaten to disrupt the Middle East peace process. I also prohibited transactions or dealings by United States persons in such property. In 1996 and 1997, I transmitted notices of the continuation of this national emergency to the Congress and the **Federal Register**. Last year's notice of continuation was published in the **Federal Register** on January 22, 1997. Because terrorist activities continue to threaten the Middle East peace process and vital interests of the United States in the Middle East, the national emergency declared on January 23, 1995, and the measures that took effect on January 24, 1995, to deal with that emergency must continue in effect beyond January 23, 1998. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to foreign terrorists who threaten to disrupt the Middle East peace process.

This notice shall be published in the **Federal Register** and transmitted to the Congress.

William J. Clinton

THE WHITE HOUSE,
January 21, 1998.

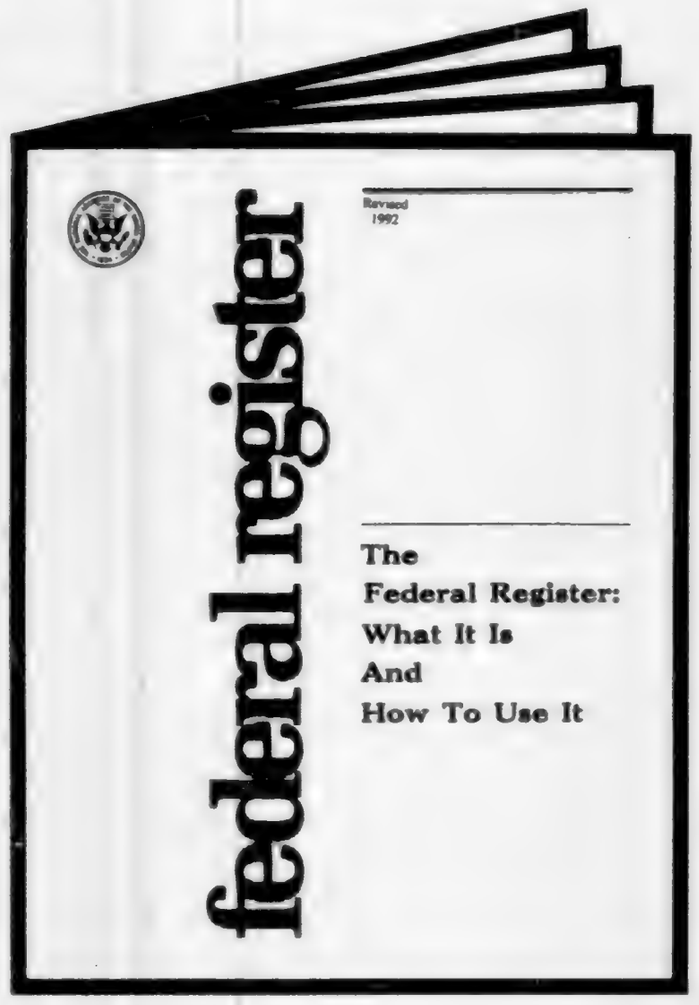
LIST OF PUBLIC LAWS

The List of Public Laws for the 105th Congress, First Session, has been completed. It will resume when bills are enacted into Public Law during the second session of the 105th Congress, which convenes on January 27, 1998.

Note: A Cumulative List of Public Laws was published in the **Federal Register** on December 31, 1997.



Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service for newly enacted public laws. To subscribe, send E-mail to **LISTPROC@ETC.FED.GOV** with the message:

SUBSCRIBE PUBLAWS-L FIRSTNAME LASTNAME

Note: This service is strictly for E-mail notification of new public laws only. The text of laws is not available through this service. We cannot respond to specific inquiries sent to this address.

Announcing the Latest Edition

The Federal Register: What It Is and How to Use It

A Guide for the User of the Federal Register—Code of Federal Regulations System

This handbook is used for the educational workshops conducted by the Office of the Federal Register. For those persons unable to attend a workshop, this handbook will provide guidelines for using the *Federal Register* and related publications, as well as an explanation of how to solve a sample research problem.

Price $7.00

P.O. Box 371954, Pittsburgh, PA 15250-7954

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFR  SMITH212J                DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFRDO  SMITH212J              DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

For information on briefings in Washington, DC, see announcement on the inside cover of this issue.

Now Available Online

Code of Federal Regulations

via

GPO Access

(Selected Volumes)

Free, easy, online access to selected *Code of Federal Regulations (CFR)* volumes is now available via *GPO Access*, a service of the United States Government Printing Office (GPO). *CFR* titles will be added to *GPO Access* incrementally throughout calendar years 1996 and 1997 until a complete set is available. GPO is taking steps so that the online and printed versions of the *CFR* will be released concurrently.

The *CFR* and *Federal Register* on *GPO Access*, are the official online editions authorized by the Administrative Committee of the Federal Register.

New titles and/or volumes will be added to this online service as they become available.

http://www.access.gpo.gov/nara/cfr

For additional information on ***GPO Access*** products, services and access methods, see page II or contact the *GPO Access* User Support Team via:

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The Federal Register is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
[Two Sessions]

WHEN: January 27, 1998 at 9:00 am, and February 17, 1998 at 9:00 am.

WHERE: Office of the Federal Register
Conference Room
800 North Capitol Street NW.,
Washington, DC
(3 blocks north of Union Station Metro)

Title 3—

The President

Presidential Determination No. 98–10 of January 12, 1998

Certification Pursuant to Section (b)(1) of Public Law 99–183 and to Section 902(a)(6)(B) of Public Law 101–246

Memorandum for the Secretary of State

Pursuant to section (b)(1) of Public Law 99–183 of December 16, 1985, relating to the approval and implementation of the Agreement for Cooperation Between the United States and the People's Republic of China, I hereby certify that:

(A) the reciprocal arrangements made pursuant to Article 8 of the Agreement have been designed to be effective in ensuring that any nuclear material, facilities, or components provided under the Agreement shall be utilized solely for intended peaceful purposes as set forth in the Agreement;

(B) the Government of the People's Republic of China has provided additional information concerning its nuclear nonproliferation policies and that, based on this and all other information available to the United States Government, the People's Republic of China is not in violation of paragraph (2) of section 129 of the Atomic Energy Act of 1954; and

(C) the obligation to consider favorably a request to carry out activities described in Article 5(2) of the Agreement shall not prejudice the decision of the United States to approve or disapprove such a request.

Pursuant to section 902(a)(6)(B)(i) of Public Law 101–246, I hereby certify that the People's Republic of China has provided clear and unequivocal assurances to the United States that it is not assisting and will not assist any nonnuclear-weapon state, either directly or indirectly, in acquiring nuclear explosive devices or the material and components for such devices.

You are authorized and directed to publish this determination in the **Federal Register**.

William J. Clinton

Rules and Regulations

Federal Register
Vol. 63, No. 15
Friday, January 23, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

7 CFR Part 1730

RIN 0572–AA74

Electric System Operations and Maintenance

AGENCY: Rural Utilities Service, USDA.

ACTION: Final rule.

SUMMARY: The Rural Utilities Service (RUS) is amending its regulations by adding a new part on electric system operations and maintenance. This action codifies and clarifies RUS policy relating to the operations and maintenance of electric systems by RUS electric borrowers. This rule also contains provisions relating to the review and evaluation of borrowers' electric systems and facilities operations and maintenance practices. These policies are presently contained in RUS Bulletin 161–5, which will be rescinded when the final rule becomes effective. This action clarifies the policies, procedures, and requirements, facilitates understanding and compliance, and improves program effectiveness with respect to electric system operations and maintenance.

EFFECTIVE DATE: This rule is effective February 23, 1998.

FOR FURTHER INFORMATION CONTACT: Mr. Fred J. Gatchell, Deputy Director, Electric Staff Division, Rural Utilities Service, U.S. Department of Agriculture, Stop 1569, 1400 Independence Ave., SW., Washington, DC 20250–1569, telephone (202) 720–1398, e-mail fgatchel@rus.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This rule has been determined to be not significant for the purposes of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget (OMB).

Regulatory Flexibility Act Certification

The Administrator of RUS has determined that a rule relating to the RUS electric loan program is not a rule as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), and, therefore, the Regulatory Flexibility Act does not apply to this rule.

National Environmental Policy Act Certification

The Administrator has determined that this rule will not significantly affect the quality of the human environment as defined by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Therefore, this action does not require an environmental impact statement or assessment.

Catalog of Federal Domestic Assistance

The program described by this rule is listed in the Catalog of Federal Domestic Assistance programs under No. 10.850, Rural Electrification Loans and Loan Guarantees. This catalog is available on a subscription basis from the Superintendent of Documents, the United States Government Printing Office, Washington, DC 20402–9325.

Executive Order 12372

This rule is excluded from the scope of Executive Order 12372, Intergovernmental Consultation, which may require consultation with State and local officials. A Final Rule-Related Notice entitled, "Department Programs and Activities Excluded from Executive Order 12372," (50 Fed. Reg. 47034) exempted RUS loans and loan guarantees from coverage under this order.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. RUS has determined that this rule meets the applicable standards in section 3 of the Executive Order.

National Performance Review

This regulatory action is being taken as part of the National Performance Review program to eliminate unnecessary regulations and improve those that remain in force.

Information Collection and Recordkeeping Requirements

The recordkeeping and reporting burdens contained in this rule were approved by OMB pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) under control number 0572–0025.

Unfunded Mandates

This rule contains no Federal mandates (under the regulatory provision of Title II of the Unfunded Mandates Reform Act) for State, local, and tribal governments or the private sector. Thus, this rule is not subject to the requirements of section 202 and 205 of the Unfunded Mandates Reform Act.

Background

RUS has promulgated policies and procedures regarding the review and evaluation of the operations and maintenance practices of RUS financed electric systems. These policies and procedures are presently contained in RUS Bulletin 161–5, Electric System Review and Evaluation. The security instrument and loan contract between RUS and electric borrowers set certain standards for the operation and maintenance of each borrower's electric system. The purpose of this rule is to implement the operations and maintenance provisions of the security instrument and loan contract between RUS and electric borrowers and to consolidate and clarify RUS policies and procedures with respect to electric system operations and maintenance. Most of the provisions of this rule represent policies and requirements that have been in effect for some time. One new provision expands the requirement for electric system review and evaluation of borrower's electric systems to include power supply borrowers in addition to the distribution borrowers presently covered by Bulletin 161–5. Proper operation and maintenance practices are equally significant for power supply borrowers, so RUS believes that power supply borrowers' operation and maintenance practices should be covered under the review and evaluation requirements of this rule. RUS Form 300, Review Rating Summary, has also been updated and revised based on RUS' experience using this form.

Comments

On April 16, 1997, RUS published a proposed rule at 62 Fed. Reg. 18544. Comments were received from ten parties, including two cooperative associations, a borrower engineering committee, two distribution borrowers, and five power supply borrowers. RUS considered all comments received. The significant and most commonly made comments are addressed herein.

Several commenters requested that RUS provide more guidance and supplemental information regarding these requirements, especially the ratings of the items on RUS Form 300, Review Rating Summary. RUS is currently preparing Bulletin 1730–1, "Electric System Operation and Maintenance (O&M)," which will provide guidelines related to O&M, including a rating guide for RUS Form 300.

Some commenters requested that RUS provide for an "alternative dispute resolution" procedure if a borrower disagrees with a rating or determination made by RUS. This type of disagreement has rarely occurred, and RUS believes that an adequate appeal avenue already exists. Any disagreements with the RUS staff's rating can always be appealed with the Regional Director or the Administrator.

One commenter requested that this rule address more operational concerns, such as momentary interruptions, voltage stability, job training and safety, and lightning protection. It was also suggested that RUS require that an O&M survey be completed prior to beginning a new construction work plan (CWP) or long-range engineering plan (LRP). RUS encourages borrowers to expand and elaborate on the O&M requirements prescribed by this rule to meet their specific needs; however, RUS has decided not to expand the requirements of this rule in these areas.

Some commenters recommended that the O&M reviews be limited to specific areas where a borrower has experienced problems, to borrowers with specific financial problems, or to certain specific types of facilities. RUS believes that all aspects of all borrowers' O&M should be reviewed periodically and these reviews should cover all facilities. These reviews can reveal potential problem areas that can be corrected before they manifest themselves as operational or financial difficulties. Therefore, RUS has not changed the scope of this rule.

Several commenters pointed out that the proposed rule does not adequately address borrowers who own but do not operate certain facilities. The rule has been changed to address this situation.

Several commenters requested that the frequency of inspection and test be determined giving due consideration to the manufacturer's recommendations, but that borrowers should not be specifically required to blindly follow such recommendations. RUS agrees and has revised the rule accordingly.

Some commenters requested that RUS clarify the requirement to evaluate compliance with the prior editions of the National Electrical Safety Code (NESC) and the National Electrical Code (NEC), when applicable. The rule has been clarified with respect to the NEC. Since the NESC itself specifically addresses facilities that comply with prior editions of the NESC, no change is needed in the rule with respect to the NESC.

Several commenters requested that RUS eliminate duplication of reviews made by other Federal agencies and State commissions, etc. The rule has been changed to indicate that RUS will not duplicate these reviews, but may review the reports of these other reviewers. Since some of these other reviews may target a specific area (e.g., safety), and the RUS' review covers a wider range of areas (e.g., safety, reliability, economy, etc.), the RUS review may partially overlap the reviews of others.

Several commenters requested that RUS eliminate the requirement for an explanation of the borrower's rating of acceptable items. It is not RUS' intent to require an extensive discussion of these items, but simply an explanation of how the borrower arrived at its rating. RUS believes that this should involve little extra effort and should improve the overall value of the review, so no change has been made to this requirement.

One commenter suggested that RUS require that the borrower's Board of Directors be appraised of the findings of the O&M review. Item 15 of RUS Form 300 calls for the date that the O&M review was reviewed by the Board of Directors. For purposes of clarifying the rule, a specific provision has been added to the rule requiring discussion of the O&M review with the Board of Directors.

One commenter suggested that RUS not require a corrective action plan (CAP) in all cases where there is an unsatisfactory (i.e., 0 or 1) rating. RUS considers any unsatisfactory rating to be a potentially serious problem, so a CAP should be prepared. However, if the correction of the deficiency is already underway or can be accomplished in a short time or simply, the CAP may be very short and simple, such as referring to an item in an approved CWP. The rule does not specify the format or amount of detail required for a CAP, so that borrowers have sufficient flexibility to tailor it to the seriousness and complexity of the problem. No change has been made to this requirement.

A number of commenters requested that RUS clarify or eliminate various items on the RUS Form 300. RUS has reviewed these items and has determined that requiring "Staff Hours" under part IV, Operations and Maintenance Budgets, is confusing, burdensome, and of limited benefit. This item has been deleted. RUS believes that Bulletin 1730–1, "Electric System Operation and Maintenance (O&M)," should provide additional guidance.

Some commenters are concerned that RUS requirements with respect to O&M may require excessive and unavailable funding. RUS recognizes that correcting operating and maintenance deficiencies may indeed be expensive, especially if the system has been allowed to deteriorate. Nevertheless, proper O&M of borrowers' systems is essential to the success of the rural electric program and to protecting the property that is the security for the Government's loans and guarantees. It is essential that each borrower budget sufficient resources to operate and maintain its system efficiently and properly.

One commenter stated that "this wasteful activity [the proposed rule] is unneeded, unnecessary and without common sense." RUS disagrees. As stated above, proper O&M of borrowers' systems is essential to the success of the rural electric program and to protecting the property that is the security for the Government's loans and guarantees. This rule is intended to clearly outline RUS policies and procedures and the borrowers' responsibilities with respect to O&M.

List of Subjects in 7 CFR Part 1730

Electric power, Loan programs—energy, Reporting and recordkeeping requirements, Rural areas.

In view of the above, RUS hereby amends 7 CFR chapter XVII by adding part 1730 to read as follows:

PART 1730—ELECTRIC SYSTEM OPERATIONS AND MAINTENANCE

Subpart A—General

Sec.

1730.1 Introduction.
1730.2 RUS policy.
1730.3 RUS addresses.
1730.4 Definitions.
1730.5–1730.19 [Reserved]

Subpart B—Operations and Maintenance Requirements

1730.20 General.
1730.21 Inspections and tests.
1730.22 Borrower analysis.
1730.23 Review rating summary, RUS Form 300.
1730.24 RUS review and evaluation.
1730.25 Corrective action.
1730.26 Engineer's certification.
1730.27–1730.99 [Reserved]
Appendix A to Subpart B of Part 1730—Review Rating Summary, RUS Form 300

Authority: 7 U.S.C. 901 *et seq.*, 1921 *et seq.*, 6941 *et seq.*

Subpart A—General

§ 1730.1 Introduction.

(a) This part contains the policies and procedures of the Rural Utilities Service (RUS) related to electric borrowers' operation and maintenance practices and RUS' review and evaluation of such practices.

(b) The policies and procedures included in this part apply to all electric borrowers (both distribution borrowers and power supply borrowers) and are intended to clarify and implement certain provisions of the security instrument and loan contract between RUS and electric borrowers regarding operations and maintenance. This part is not intended to waive or supersede any provisions of the security instrument and loan contract between RUS and electric borrowers.

(c) The Administrator may waive, for good cause, on a case by case basis, certain requirements and procedures of this part.

§ 1730.2 RUS policy.

It is RUS policy to require that all property of a borrower be operated and maintained properly in accordance with the requirements of each borrower's loan documents. It is also RUS policy to provide financial assistance only to borrowers whose operations and maintenance practices and records are satisfactory or to those who are taking corrective actions expected to make their operations and maintenance practices and records satisfactory to RUS.

§ 1730.3 RUS addresses.

(a) Persons wishing to obtain forms referred to in this part should contact: Program Support and Regulatory Analysis, Rural Utilities Service, U.S. Department of Agriculture, Stop 1522, 1400 Independence Ave., SW., Washington, DC 20250–1522, telephone (202) 720–8674. Borrowers or others may reproduce any of these forms in any number required.

(b) Documents required to be submitted to RUS under this part are to be sent to the office of the borrower's assigned RUS General Field Representative (GFR) or such other office as designated by RUS.

§ 1730.4 Definitions.

Terms used in this part have the meanings set forth in 7 CFR Part 1710.2. References to specific RUS forms and other RUS documents, and to specific sections or lines of such forms and documents, shall include the corresponding forms, documents, sections and lines in any subsequent revisions of these forms and documents. In addition to the terms defined in 7 CFR Part 1710.2, the term *Prudent Utility Practice* has the meaning set forth in Article 1, Section 1.01 of Appendix A to Subpart B of 7 CFR Part 1718—Model Form of Mortgage for Electric Distribution Borrowers, for the purposes of this Part.

§§ 1730.5–1730.19 [Reserved]

Subpart B—Operations and Maintenance Requirements

§ 1730.20 General.

Each distribution borrower and power supply borrower shall operate and maintain its system in compliance with Prudent Utility Practice, in compliance with its loan documents, and in compliance with all applicable laws, regulations and orders, shall maintain its systems in good repair, working order and condition, and shall make all needed repairs, renewals, replacements, alterations, additions, betterments and improvements, in accordance with applicable provisions of the borrower's security instrument. Each borrower is responsible for on-going operations and maintenance programs, for maintaining records of the physical and electrical condition of its electric system and for the quality of services provided to its customers. The borrower is also responsible for all necessary inspections and tests of the component parts of its system, and for maintaining records of such inspections and tests. Each borrower shall budget sufficient resources to operate and maintain its system in accordance with the requirements of this part. For portions of the borrower's system that are not operated by the borrower, if any, the borrower is responsible for ensuring that the operator is operating and maintaining the system properly in accordance with the operating agreement.

§ 1730.21 Inspections and tests.

(a) Each borrower shall conduct all necessary inspections and tests of the component parts of its electric system, and maintain adequate records of such inspections and tests.

(b) The frequency of inspection and testing will be determined by the borrower in conformance with applicable laws, regulations, national standards, and Prudent Utility Practice. The frequency of inspection and testing will be determined giving due consideration to the type of facilities or equipment, manufacturer's recommendations, age, operating environment and hazards to which the facilities are exposed, consequences of failure, and results of previous inspections and tests. The records of such inspections and tests will be retained in accordance with applicable regulatory requirements and Prudent Utility Practice. The retention period should be of a sufficient time period to identify long-term trends. Records must be retained at least until the applicable inspections or tests are repeated.

(c) Inspections of facilities must include a determination of whether the facility complies with the National Electrical Safety Code, National Electrical Code (as applicable), and applicable State or local regulations. Any serious or life-threatening deficiencies shall be promptly repaired, disconnected, or isolated in accordance with applicable codes or regulations. Any other deficiencies found as a result of such inspections and tests are to be recorded and those records are to be maintained until such deficiencies are corrected or for the retention period required by paragraph (b) of this section, whichever is longer.

§ 1730.22 Borrower analysis.

(a) Each borrower shall periodically analyze in writing its operations and maintenance policies, practices, and procedures to determine if they are appropriate and if they are being followed. The records of inspections and tests are also to be reviewed and analyzed to identify any trends which could indicate deterioration in the physical condition or the operational effectiveness of the system or suggest a need for changes in operations or maintenance practices. For portions of the borrower's system that are not operated by the borrower, if any, the borrower's written analysis would also include a review of the operator's performance under the operating agreement.

(b) When a borrower's operations and maintenance policies, practices, and procedures are to be reviewed and evaluated by RUS, the borrower shall:

(1) Conduct the analysis required by paragraph (a) of this section not more

VOL 63 ISS 15 JA 23 1998 UMI

than 90 days prior to the scheduled RUS review;

(2) Complete RUS Form 300, Review Rating Summary, and other related forms, prior to RUS' review and evaluation; and

(3) Make available to RUS the borrower's completed RUS Form 300 (including a written explanation of the basis for each rating) and records related to the operations and maintenance of the borrower's system.

(c) For those facilities not included on the RUS Form 300 (e.g., generating plants), the borrower shall prepare and complete an appropriate supplemental form for such facilities.

§ 1730.23 Review rating summary, RUS Form 300.

RUS Form 300 in Appendix A shall be used when required by this part.

§ 1730.24 RUS review and evaluation.

RUS will initiate and conduct a periodic review and evaluation of the operations and maintenance practices of each borrower for the purpose of assessing loan security and determining borrower compliance with RUS policy as outlined in this part. This review will normally be done at least once every three years. The borrower will make available to RUS the borrower's policies, procedures, and records related to the operations and maintenance of its complete system. Reports made by other inspectors (e.g., other Federal agencies, State inspectors, etc.) will also be made available, as applicable. RUS will not duplicate these other reviews but will use their reports to supplement its own review. RUS may inspect facilities, as well as records, and may also observe construction and maintenance work in the field. Key borrower personnel responsible for the facilities being inspected are to accompany RUS during such inspections, unless otherwise determined by RUS. RUS personnel may prepare an independent summary of the operations and maintenance practices of the borrower. The borrower's management will discuss this review and evaluation with its Board of Directors.

§ 1730.25 Corrective action.

(a) For any items on the RUS Form 300 rated unsatisfactory (i.e., 0 or 1) by the borrower or by RUS, the borrower shall prepare a corrective action plan (CAP) outlining the steps (both short term and long term) the borrower will take to improve existing conditions and to maintain an acceptable rating. The CAP must include a time schedule and cost estimate for corrective actions, and must be approved by the borrower's Board of Directors. The CAP must be submitted to RUS for approval within 90 days after the completion of RUS' evaluation noted in § 1730.24.

(b) The borrower must periodically report to RUS in writing progress under the CAP. This report must be submitted to RUS every six months until all unsatisfactory items are corrected unless RUS prescribes a different reporting schedule.

§ 1730.26 Engineer's certification.

Where provided for in the borrower's loan documents, RUS may require the borrower to provide an "Engineer's Certification" as to the condition of the borrower's system (including, but not limited to, all mortgaged property.) Such certification shall be in form and substance satisfactory to RUS and shall be prepared by a professional engineer satisfactory to RUS. If RUS determines that the Engineer's Certification discloses a need for improvements to the condition of its system or any other operations of the borrower, the borrower shall, upon notification by RUS, promptly undertake to accomplish such improvements.

§§ 1730.27–1730.99 [Reserved]

Appendix—A to Subpart B of Part 1730—Review Rating Summary, RUS Form 300

Borrower Designation _____
Date Prepared _____

Ratings on form are:

0: Unsatisfactory—no records
1: Unsatisfactory—corrective action needed
2: Acceptable, but should be improved—see attached recommendations
3: Satisfactory—no additional action required at this time
N/A: Not applicable

PART I—TRANSMISSION and DISTRIBUTION FACILITIES

1. Substations (Transmission and Distribution)
   a. Safety, Clearance, Code Compliance—Rating: _____
   b. Physical Condition: Structure, Major Equipment, Appearance—Rating: _____
   c. Inspection Records Each Substation—Rating: _____
   d. Oil Spill Prevention—Rating: _____
2. Transmission Lines
   a. Right-of-Way: Clearing, Erosion, Appearance, Intrusions—Rating: _____
   b. Physical Condition: Structure, Conductor, Guying—Rating: _____
   c. Inspection Program and Records—Rating: _____
3. Distribution Lines—Overhead
   a. Inspection Program and Records—Rating: _____
   b. Compliance with Safety Codes: Clearances—Rating: _____
   Compliance with Safety Codes: Foreign Structures—Rating: _____
   Compliance with Safety Codes: Attachments—Rating: _____
   c. Observed Physical Condition from Field Checking: Right-of-Way—Rating: _____
   Observed Physical Condition from Field Checking: Other—Rating: _____
4. Distribution—Underground Cable
   a. Grounding and Corrosion Control—Rating: _____
   b. Surface Grading, Appearance—Rating: _____
   c. Riser Poles: Hazards, Guying, Condition—Rating: _____
5. Distribution Line Equipment: Conditions and Records
   a. Voltage Regulators—Rating: _____
   b. Sectionalizing Equipment—Rating: _____
   c. Distribution Transformers—Rating: _____
   d. Pad Mounted Equipment—Safety: Locking, Dead Front, Barriers—Rating: _____
   Pad Mounted Equipment—Appearance: Settlement, Condition—Rating: _____
   e. Kilowatt-hour and Demand Meter Reading and Testing—Rating: _____

PART II—OPERATION AND MAINTENANCE

6. Line Maintenance and Work Order Procedures
   a. Work Planning and Scheduling—Rating: _____
   b. Work Backlogs: Right-of-Way Maintenance—Rating: _____
   Work Backlogs: Poles—Rating: _____
   Work Backlogs: Retirement of Idle Services—Rating: _____
   Work Backlogs: Other—Rating: _____
7. Service Interruptions
   a. Average Annual Hours/Consumer by Cause (Complete for each of the previous 5 years)
   1. Power Supplier _____
   2. Major Storm _____
   3. Scheduled _____
   4. All Other _____
   5. Total _____
   Rating: _____
   b. Emergency Restoration Plan—Rating: _____
8. Power Quality
   General Freedom from Complaints—Rating: _____
9. Loading and Load Balance
   a. Distribution Transformer Loading—Rating: _____
   b. Load Control Apparatus—Rating: _____
   c. Substation and Feeder Loading—Rating: _____
10. Maps and Plant Records
   a. Operating Maps: Accurate and Up-to-Date—Rating: _____
   b. Circuit Diagrams—Rating: _____
   c. Staking Sheets—Rating: _____

PART III—ENGINEERING

11. System Load Conditions and Losses
   a. Annual System Loses, _____%—Rating: _____
   b. Annual Load Factor, _____%—Rating: _____
   c. Power Factor at Monthly Peak, _____%—Rating: _____
   d. Ratio of Individual Substation Peak kW to kVA, _____—Rating: _____
12. Voltage Conditions
   a. Voltage Surveys—Rating: _____
   b. Substation Transformer Output Voltage Spread—Rating: _____
13. Load Studies and Planning
   a. Long Range Engineering Plan—Rating: _____
   b. Construction Work Plan—Rating: _____
   c. Sectionalizing Study—Rating: _____
   d. Load Data for Engineering Studies—Rating: _____
   e. Load Forecasting Data—Rating: _____

FEDERAL HOUSING FINANCE BOARD

12 CFR Parts 900, 932 and 933

[No. 97–83]

RIN 3069–AA65

Membership Eligibility

AGENCY: Federal Housing Finance Board.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Board (Finance Board) is amending the definition of the term "State" in its Membership Regulation to include the U.S. Territory of American Samoa (American Samoa) and the U.S. Commonwealth of the Northern Mariana Islands (the Northern Mariana Islands). Institutions organized under the laws of American Samoa and the Northern Mariana Islands, therefore, will be eligible to apply for Federal Home Loan Bank (Bank) membership. In accordance with these changes, the Finance Board also is clarifying in its regulations that the Seattle Bank District includes American Samoa and the Northern Mariana Islands. In addition, the Finance Board is designating Hawaii as the State in which members with a principal place of business in American Samoa, the Northern Mariana Islands, or Guam, shall be deemed to be located for purposes of election of Bank directors.

DATES: The final rule is effective on February 23, 1998.

FOR FURTHER INFORMATION CONTACT: Sharon B. Like, Senior Attorney-Adviser, (202) 408–2930, Office of General Counsel, Federal Housing Finance Board, 1777 F Street, N.W., Washington, D.C. 20006.

SUPPLEMENTARY INFORMATION:

I. Statutory and Regulatory Background

A. Membership Eligibility Requirement—Definition of "State"

Under the Federal Home Loan Bank Act (Act), the Finance Board is responsible for the supervision and regulation of the 12 Banks, which provide advances and other financial services to their member institutions. *See* 12 U.S.C. 1422a(a). Institutions may become members of a Bank if they meet certain membership eligibility and minimum stock purchase criteria set forth in the Act and the Finance Board's implementing Membership Regulation. *See id.* sections 1424, 1426, 1430(e)(3); 12 CFR part 933.

Specifically, under the Act and the Membership Regulation, applicants for Bank membership must satisfy, among other requirements, the requirement that they are "duly organized under the laws of any State or of the United States." *See* 12 U.S.C. 1424(a)(1)(A); 12 CFR 933.6(a)(1), 933.7. Section 2(3) of the Act defines the term "State" as follows:

The term "State" includes the District of Columbia, Guam, Puerto Rico, and the Virgin Islands of the United States.

See 12 U.S.C. 1422(3). Guam and the U.S. Virgin Islands are U.S. Territories, while Puerto Rico is a U.S. Commonwealth.

Section 933.1(cc) of the Finance Board's Membership Regulation implements the statutory definition by defining the term "State" as follows:

State means a State, the District of Columbia, Guam, Puerto Rico, and the Virgin Islands of the United States.

See 12 CFR 933.1(cc). The regulatory definition does not specifically include any other U.S. Territories, Commonwealths or Dependencies within the meaning of "State." Therefore, financial institutions organized under the laws of such other jurisdictions currently are not eligible for Bank membership under the regulation, unless other specific laws or agreements executed by the United States and these jurisdictions make the Act applicable to such jurisdictions.

On September 24, 1997, the Finance Board published a proposed rule to amend the definition of the term "State" in § 933.1(c) of the Membership Regulation to include American Samoa and the Northern Mariana Islands. *See* 62 FR 49943 (Sept. 24, 1997). The Finance Board received six comment letters on the proposed rule. Commenters included: one Bank; a representative of a Guamanian housing counseling/advocacy organization who serves on the Bank's Advisory Council; the Congressional representative for American Samoa; the Governor of American Samoa; an American Samoan commercial bank that is a member of the Federal Reserve System with deposits insured by the Federal Deposit Insurance Corporation; and a Northern Mariana Islands public housing corporation.

In the proposed rule, the Finance Board stated that it believes that the term "State" under the Membership Regulation should be defined comprehensively to include all other U.S. Territories, Commonwealths and Dependencies that share a political status similar to that of the specified entities in the statute, *i.e.*, Guam, the U.S. Virgin Islands, and Puerto Rico. In addition, if any specific laws or agreements executed by the United States and particular jurisdictions make the Act applicable to such jurisdictions, then the regulatory definition of the term "State" should be amended to include those jurisdictions, consistent with the laws or agreements.

Accordingly, as described in the proposed rule, the Finance Board undertook a broad analysis of existing and former U.S. Territories, Commonwealths and Dependencies to determine whether any of the jurisdictions satisfy the above requirements. The research revealed that only American Samoa and the Northern Mariana Islands meet the requirements, as further discussed below. In order to ensure that all eligible jurisdictions were included in the

VOL 63 ISS 15 JA 23 1998 UMI

revised definition of "State" for membership purposes, the Finance Board requested commenters to identify any other jurisdictions not included in proposed § 933.1(cc) that have U.S. Territory, Commonwealth, or Dependency status, or that have laws or agreements with the United States that make the Act applicable to such jurisdictions. No other jurisdictions were identified by the commenters as meeting any of these criteria.

B. Designation of Member's State Location for Purposes of Election of Bank Directors

The Act sets forth specific procedures for the election of directors by the members to the boards of the Banks. *See* 12 U.S.C. 1427; 12 CFR 932. Each elective directorship is designated by the Finance Board as representing the members located in a particular State. *See* 12 U.S.C. 1427(b). If the principal place of business of a member is located in a "State" as defined in section 7(e) of the Act, the Finance Board must designate such State as the State in which the member is located for director election purposes. *See id.* section 1427(c). Section 7(e) defines "State," for purposes of section 7, as "the States of the Union, the District of Columbia, and the Commonwealth of Puerto Rico." *See id.* section 1427(e). For members whose principal place of business is not located in a "State" as defined in section 7(e), the Finance Board is required to designate a State in which such members shall be deemed to be located for director election purposes. *See id.* section 1427(c).

American Samoa and the Northern Mariana Islands are not included in the section 7(e) definition of "State." Accordingly, the Finance Board is required to designate a "State" where members with a principal place of business located in American Samoa or the Northern Mariana Islands shall be deemed to be located. The proposed rule amended § 932.11(b) of the Finance Board's regulations to designate Hawaii as that State.

II. Analysis of the Final Rule

A. American Samoa—Section 933.1(cc)

American Samoa is a Territory of the United States that is administered by the U.S. Department of Interior, and which has enacted its own banking laws. *See* 48 U.S.C. 1661; Executive Order No. 10264, 16 FR 6419 (June 29, 1951); Title 28, American Samoa Code Ann. (Book 1988). As a U.S. Territory, American Samoa has a political status similar to that of the U.S. Territories of Guam and the U.S. Virgin Islands, which are included as "States" under the Act and the current Membership Regulation. *See* 12 U.S.C. 1422(3); 12 CFR 933.1(cc).[1]

Five commenters specifically supported the proposed amendment of the term "State" in § 933.1(c) to include American Samoa. One commenter noted that the condition of much of the private housing in American Samoa is deplorable, household incomes are extremely low, and very little new construction or rehabilitation of housing is occurring. The commenter stated that there is a need for home loans at affordable interest rates in this remote, rural area, and that the Bank System was intended to address such problems. Another commenter stated that by becoming a member of the Seattle Bank, the commenter would gain access to a wide array of competitively priced wholesale funding, as well as community lending programs designed to help meet the low- and moderate-income housing and economic development needs of American Samoa.

For the reasons discussed above, the final rule adopts the proposed amendment without change.

B. The Northern Mariana Islands—Section 933.1(cc)

The Northern Mariana Islands is a former U.S.-administered Trust Territory that is now a Commonwealth of the United States. As a U.S. Commonwealth, the Northern Mariana Islands has a political status similar to that of the Commonwealth of Puerto Rico, which is included as a "State" under the Act and the current Membership Regulation. *See id.* Moreover, specific provisions of the Covenant Agreement executed by the United States and the Northern Mariana Islands make the Act applicable to the Northern Mariana Islands. *See* "Covenant To Establish A Commonwealth Of The Northern Mariana Islands In Political Union With The United States Of America," sections 502(a)(1), 502(a)(2) (1986); "The Second Interim Report of the Northern Mariana Islands Commission on Federal Laws to the Congress of the United States," at 278–79 (Aug. 1985); Presidential Proclamation No. 5207, 49 FR 24365 (June 7, 1984) (set forth at 48 U.S.C. 1681 note).

Four commenters specifically supported the proposed amendment of the term "State" in § 933.1(cc) to include the Northern Mariana Islands. One commenter noted that the Northern Mariana Islands Government and financial institutions operating in the Northern Mariana Islands have limited financial resources available for affordable housing and community development projects. The commenter stated that the proposed amendment would expand opportunities for access to funding assistance for such projects in the Northern Mariana Islands.

For the reasons discussed above, the final rule adopts the proposed amendment without change.

C. Other Pacific Islands

As discussed in the **SUPPLEMENTARY INFORMATION** section of the proposed rule, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau were once U.S.-administered Trust Territories in the Pacific, but now have the status of independent, self-governing foreign nations. Nor do there appear to be any laws or contractual provisions in the Compacts of Free Association executed by the United States and these nations, respectively, that make the Act applicable to these nations. Other existing U.S. Pacific Island Territories generally are either uninhabited or contain tiny, nonpermanent military populations closed to the public. No other jurisdictions were identified by the commenters as having U.S. Territory, Commonwealth, or Dependency status, or having laws or agreements with the United States making the Act applicable to such jurisdictions. Accordingly, the Act would not be applicable to the nations and Territories discussed above, and these jurisdictions are not included in § 933.1(cc) of the final rule.

D. Inclusion of American Samoa and the Northern Mariana Islands in the Seattle Bank District—Appendix to Subpart A of Part 900

The Appendix to Subpart A of Part 900 of the Finance Board's regulations lists the States which comprise each of the 12 Bank Districts, with a reference to "Pacific Islands" included under Federal Home Loan Bank District 12 (the Seattle Bank District). *See* Appendix to Subpart A of Part 900—Federal Home Loan Banks. Consistent with the amendments discussed above, the final rule amends the Appendix by replacing the reference to the "Pacific Islands" under the Seattle Bank District with specific references to American Samoa and the Northern Mariana Islands.

[1] There do not appear to be any laws or contractual provisions in the cession agreements executed by the United States and American Samoa making the Act applicable to American Samoa.

E. Designation of State Location for Members With Principal Place of Business in American Samoa, the Northern Mariana Islands, or Guam—Section 932.11(b)

For the reasons discussed above, the proposed amendment of § 932.11(b) provided that members with a principal place of business located in American Samoa or the Northern Mariana Islands shall be deemed to be located in Hawaii for purposes of election of Bank directors. One commenter specifically supported this designation. The final rule adopts the proposed amendment without change. The final rule also adopts, without change, the proposed amendment codifying the Finance Board's existing designation of Hawaii as the State where members with a principal place of business in Guam are deemed to be located for director election purposes.

III. Regulatory Flexibility Act

The final rule implements statutory requirements binding on all Banks and on all applicants for Bank membership, regardless of their size. The Finance Board is not at liberty to make adjustments to those requirements to accommodate small entities. The final rule does not impose any additional regulatory requirements that will have a disproportionate impact on small entities. Therefore, in accordance with section 605(b) of the Regulatory Flexibility Act, *see* 5 U.S.C. 605(b), the Finance Board hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

IV. Paperwork Reduction Act

The final rule does not contain any collections of information pursuant to the Paperwork Reduction Act of 1995. *See* 44 U.S.C. 3501 *et seq.* Consequently, the Finance Board has not submitted any information to the Office of Management and Budget for review.

List of Subjects

12 CFR Part 900

Organizations and functions (Government agencies).

12 CFR Part 932

Conflicts of interest, Federal home loan banks.

12 CFR Part 933

Credit, Federal home loan banks, Reporting and recordkeeping requirements.

Accordingly, the Finance Board hereby amends title 12, chapter IX, parts 900, 932 and 933, *Code of Federal Regulations*, as follows:

PART 900—DESCRIPTION OF ORGANIZATION AND FUNCTIONS

1. The authority citation for part 900 is revised to read as follows:

Authority: 5 U.S.C. 552; 12 U.S.C. 1422b(a), 1423.

2. The appendix to subpart A of part 900 is designated as appendix A to subpart A of part 900, the appendix heading is revised, and the parenthetical under Federal Home Loan Bank District 12 is revised to read as follows:

Appendix A to Subpart A of Part 900—Federal Home Loan Banks

BILLING CODE 6725–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–CE–150–AD; Amendment 39–10287; AD 98–01–01]

RIN 2120–AA64

Airworthiness Directives; Cessna Aircraft Company Models 172R and 182S Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting Airworthiness Directive (AD) 98–01–01, which was sent previously to all known U.S. owners and operators of certain Cessna Aircraft Company (Cessna) Models 172R and 182S airplanes. This AD requires fabricating and installing placards to prohibit operation in instrument flight rules (IFR) conditions and use of the alternate static air source; inspecting the alternate static air source valve to assure that the alternate static air source port is not restricted by the identification placard and to assure that the valve body does not separate from the valve flange; and reworking or replacing as necessary. The AD was the result of reports of improper installation of the identification placard on the alternate static air source. The actions specified by this AD are intended to prevent erroneous indications from the altimeter, airspeed, and vertical speed indicators, which could cause the pilot to react to incorrect flight information and possibly result in loss of control of the airplane.

DATES: Effective February 2, 1998, to all persons except those to whom it was made immediately effective by priority letter AD 98–01–01, issued December 22, 1997, which contained the requirements of this amendment.

The incorporation by reference of certain publications listed in the regulations is approved by the Director

VOL 63 ISS 15 JA 23 1998 UMI

of the Federal Register as of February 2, 1998.

Comments for inclusion in the Rules Docket must be received on or before March 16, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–CE–150–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Service information that applies to this AD may be obtained from the Cessna Aircraft Company, Product Support, P.O. Box 7706, Wichita, Kansas 67277. This information may also be examined at the Rules Docket at the address above, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Joel Ligon, Aerospace Engineer, Wichita Aircraft Certification Office, FAA, 1801 Airport Road, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946–4138; facsimile (316) 946–4407.

SUPPLEMENTARY INFORMATION:

Discussion

On December 22, 1997, the FAA issued priority letter AD 98–01–01, which applies to Cessna Models 172R and 182S airplanes. That AD resulted from reports of improper installation of the identification placard on the alternate static air source. This placard was installed on the valve body in a location that covers the external orifice, which is the inlet for static air reference into the valve.

Cessna discovered the problem during a preflight static check on a Model 172R airplane. Further investigation and a purge of stock at the manufacturing facility revealed 21 valve assemblies having the identification placard installed over the static air reference orifice. Cessna has no way of verifying how many of these assemblies were manufactured and sent to the field with the identification placard installed over the static air reference orifice.

Several of these assemblies have been identified and corrected on the above-referenced airplanes. The FAA has no way of determining which airplanes have the remaining problem alternate static air source assemblies installed without having all of the affected airplanes inspected.

These assemblies are required for flight into instrument flight rules (IFR) conditions as defined in § 91.411 of the Federal Aviation Regulations (14 CFR 91.411). Use of these assemblies is optional in visual flight rules (VFR) conditions.

If these assemblies are not identified and reworked or replaced, selection of the alternate air source will cause the altimeter, airspeed, and vertical speed indicators to display erroneous indications. This could cause the pilot to react to incorrect flight information and possibly result in loss of control of the airplane.

Relevant Service Information

Cessna has issued Service Bulletin No. SB97–34–02, Revision 1, dated December 22, 1997, which includes:

—Procedures for inspecting the alternate static air source valve to assure that the alternate static air source port is not restricted by the identification placard and to assure that the valve body does not separate from the valve flange;

—Procedures for reworking the alternate static air source valve if the port is restricted; and

—Reference to replacing the alternate static air valve assembly if the valve body separates from the valve flange in accordance with the maintenance manual.

Cessna is providing warranty credit for both labor and parts for required inspections, reworks, and replacements.

The FAA's Determination and Explanation of the AD

Since an unsafe condition has been identified that is likely to exist or develop in other Cessna Models 172R and 182S of the same type design, the FAA issued priority letter AD 98–01–01 to prevent erroneous indications from the altimeter, airspeed, and vertical speed indicators, which could cause the pilot to react to incorrect flight information and possibly result in loss of control of the airplane. The AD requires the following:

—Immediately fabricating placards that prohibit operation in IFR conditions and prohibit use of the alternate static air source, and installing these placards in the cockpit within the pilot's clear view;

—Eventually inspecting the alternate static air source valve to assure that the alternate static air source port is not restricted by the identification placard and to assure that the valve body does not separate from the valve flange;

—Reworking the alternate static air source assembly if the port is restricted; and

—Replacing the alternate static air source assembly if the valve body separates from the valve flange.

Accomplishment of the inspection and rework is required in accordance with the previously referenced service information. Accomplishment of the replacement is required in accordance with the applicable maintenance manual.

Determination of the Effective Date of the AD

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on December 22, 1997, to all known U.S. operators of certain Cessna Models 172R and 182S airplanes. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) to make it effective as to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting immediate flight safety and, thus, was not preceded by notice and opportunity to comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–CE–150–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

98–01–01 Cessna Aircraft Company: Amendment 39–10287; Docket No. 97–CE–150–AD.

Applicability: The following airplane models and serial numbers, certificated in any category:

Model 172R Airplanes: serial numbers 17280003 through 17280171, 17280173 through 17280175, 17280177 through 17280179, 17280182 through 17280184, 17280186, 17280189, 17280190, 17280192 through 17280212, 17280214, 17280216 through 17280221, 17280223 through 17280236, 17280239 through 17280251, 17280253 through 17280263, 17280265, 17280268, 17280270 through 17280272, 17280283, 17280297, and 17280301; and

Model 182S Airplanes: serial numbers 18280001, 18280002, 18280004 through 18280045, 18280048 through 18280060, 18280062 through 18280064, 18280067, and 18280070.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (h) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated in the body of this AD, unless already accomplished, except to those operators receiving this action by priority letter issued December 22, 1997, which made these actions effective immediately upon receipt.

To prevent erroneous indications from the altimeter, airspeed, and vertical speed indicators, which could cause the pilot to react to incorrect flight information and possibly result in loss of control of the airplane, accomplish the following:

(a) Prior to further flight after the effective date of this AD, fabricate placards with the following words, using letters at least ⅛-inch in height, and install these placards in the cockpit within the pilot's clear view:

(1) "IFR operation is prohibited."

(2) "Use of the alternate static air source is prohibited."

(b) Within the next 100 hours time-in-service (TIS) after the effective date of this AD or within the next 4 calendar months after the effective date of this AD, whichever occurs first, inspect the alternate static air source valve to assure that the alternate static air source valve is not restricted by the identification placard and to assure that the valve body does not separate from the valve flange in accordance with Cessna Service Bulletin No. SB97–34–02, Revision 1, dated December 22, 1997.

(1) If the alternate static air source valve is restricted, prior to further flight after the inspection required by paragraph (b) of this AD, rework the alternate static air source assembly in accordance with Cessna Service Bulletin No. SB97–34–02, Revision 1, dated December 22, 1997.

(2) If the valve body separates from the valve flange, replace the alternate static air source assembly in accordance with the maintenance manual at one of the compliance times presented below (paragraph (b)(2)(i) or (b)(2)(ii) of this AD):

(i) Prior to further flight to eliminate the operating limitations required by the placards in paragraphs (a), (a)(1), and (a)(2) of this AD; or

(ii) Within the next 25 hours TIS after the inspection provided the operating limitations required by the placards in paragraphs (a), (a)(1), and (a)(2) of this AD are adhered to.

(c) The placard requirements of paragraphs (a), (a)(1), and (a)(2) of this AD may be eliminated when the inspection, rework, and replacement requirements are accomplished as specified in paragraphs (b), (b)(1), and (b)(2) of this AD.

(d) The inspection, rework, and replacement requirements specified in paragraphs (b), (b)(1), and (b)(2) of this AD may be accomplished at any time prior to "within the next 100 hours TIS after the effective date of this AD or within the next 4 calendar months after the effective date of this AD, whichever occurs first."

(e) Within 10 days after the inspection required by paragraph (b) of this AD, send the results of the inspection in writing to the FAA at the address specified in paragraph (h) of this AD. Include the serial number of the airplane and state whether the alternate static air source assembly needed to be reworked or replaced. (Reporting approved by the Office of Management and Budget under OMB No. 2120–0056).

(f) Fabricating and installing the placards as required by paragraph (a) of this AD may be performed by the owner/operator holding at least a private pilot certificate as authorized by section 43.7 of the Federal Aviation Regulations (14 CFR 43.7), and must be entered into the aircraft records showing compliance with this AD in accordance with section 43.9 of the Federal Aviation Regulations (14 CFR 43.9).

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(h) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita ACO.

(i) The inspection and rework required by this AD shall be done in accordance with Cessna Service Bulletin No. SB97–34–02, Revision 1, dated December 22, 1997. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the Cessna Aircraft Company, Product Support, P.O. Box 7706, Wichita, Kansas 67277. Copies may be inspected at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW, suite 700, Washington, DC.

(j) This amendment (39–10287) becomes effective on February 2, 1998, to all persons except those persons to whom it was made immediately effective by priority letter AD 98–01–01, issued December 22, 1997, which contained the requirements of this amendment.

Issued in Kansas City, Missouri, on January 12, 1998.

Michael Gallagher,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 98–1297 Filed 1–22–98; 8:45 am]

BILLING CODE 4910–13–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–335–AD; Amendment 39–10288; AD 98–02–06]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 777–200 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 777–200 series airplanes. This action requires repetitive visual inspections to determine the presence and condition of the nut and cotter pin of the lock link mechanism on the side struts and drag struts on the main landing gear (MLG); and corrective action, if necessary. This amendment is prompted by reports of missing or damaged components on the lock link mechanism. The actions specified in this AD are intended to prevent failure of the lock link mechanism to lock the MLG in the down position, and consequent collapse of the MLG during ground operation.

DATES: Effective February 9, 1998.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of February 9, 1998.

Comments for inclusion in the Rules Docket must be received on or before March 24, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 97–NM–335–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Stan Wood, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2772; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: Boeing has advised the FAA of the recent discovery of discrepancies of the lock link mechanism on the side struts and drag struts on the main landing gear (MLG) on several Model 777–200 series airplanes. The discrepancies included missing cotter pins, a missing cotter pin and nut with the bolt migrating out of the joint, and a cotter pin migrating from the bolt end through the nut. Such discrepancies, if not corrected, could result in failure of the lock link mechanism to lock the MLG in the down position, and consequent collapse of the MLG during ground operation.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 777–32A0015, dated September 4, 1997, which describes procedures for repetitive visual inspections to determine the presence and condition of the nut and cotter pin of the lock link mechanism on the side struts and drag struts on the left- and right-hand MLG. The alert service bulletin also describes procedures for corrective action for missing or damaged parts.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other Boeing Model 777–200 series airplanes of the same type design, this AD requires accomplishment of the actions specified in the alert service bulletin described previously.

Interim Action

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–335–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive

Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

98–02–06 Boeing: Amendment 39–10288. Docket 97–NM–335–AD.

Applicability: Model 777–200 series airplanes, line positions 1 through 40 inclusive, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the lock link mechanism to lock the main landing gear (MLG) in the down position, and consequent collapse of the MLG during ground operation, accomplish the following:

(a) Within 30 days after the effective date of this AD, perform a visual inspection to determine the presence and condition of the cotter pin and nut of the lock link mechanism on the side struts and drag struts on the left- and right-hand MLG, in accordance with Boeing Alert Service Bulletin 777–32A0015, dated September 4, 1997. If any discrepancy is found, prior to further flight, correct the discrepancy in accordance with the service bulletin. Repeat the inspection thereafter at intervals not to exceed 75 days or 400 flight cycles, whichever occurs first.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The actions shall be done in accordance with Boeing Alert Service Bulletin 777–32A0015, dated September 4, 1997. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on February 9, 1998.

Issued in Renton, Washington, on January 15, 1998.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 98–1543 Filed 1–22–98; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

15 CFR Part 806

[Docket No. 970918231–7231–01]

RIN 0691–AA29

Direct Investment Surveys: BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1997

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Final rule.

SUMMARY: These final rules revise 15 CFR 806.17 to set forth reporting requirements for the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1997, and to delete the rules now in 15 CFR 806.17, which were for the last benchmark survey covering 1992.

The BE–12 benchmark survey is conducted by the Bureau of Economic Analysis (BEA), U.S. Department of Commerce, under Section 3103(b) of the International Investment and Trade in Services Survey Act, which requires that a benchmark survey of foreign direct investment in the United States be conducted every five years. The last benchmark survey was conducted for 1992. The benchmark survey will obtain universe data on the financial and operating characteristics of, and on positions and transactions between, U.S. affiliates and their foreign parents. The data from the quinquennial survey will provide benchmarks for deriving current universe estimates of foreign direct investment from sample data collected in other BEA surveys in nonbenchmark years. The data are needed to measure the economic significance of foreign direct investment in the United States, measure changes in such investment, assess its impact on the U.S. economy, and based upon this assessment, make informed policy decisions regarding foreign direct investment in the United States. They are also required for compiling the U.S. international transactions, input-output, and national income and product accounts, and for preparing estimates of the international investment position of the United States.

Key changes from the previous benchmark survey include reducing respondent burden, particularly for small companies, by: increasing the exemption level for reporting on the survey to $3 million (measured by the company's total assets, sales, or net income) from $1 million in the 1992 survey; increasing the exemption level at which reporting on the long form version of the survey is required from $50 million to $100 million; and requiring reporting companies with assets, sales, or net income between $3 million and $30 million to report only selected data items on the short form version. In addition, the survey bases industry coding of reporting companies on the new North American Industry Classification System (NAICS) in place of the previous system which was based on the U.S. Standard Industrial Classification system; it collects new information on affiliated services transactions by type of service; and it modifies the detail collected on the

VOL 63 ISS 15 JA 23 1998 UMI

composition of external financing of the reporting enterprise, on exports and imports of goods by product, and on the operations of foreign-owned businesses in individual States.

Forms for the 1997 benchmark survey are scheduled to be mailed out at the end of February 1998. Completed reports will be due to BEA on May 31, 1998.

EFFECTIVE DATE: These rules will be effective February 23, 1998.

FOR FURTHER INFORMATION CONTACT: R. David Belli, Chief, International Investment Division (BE–50), Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; phone (202) 606–9800.

SUPPLEMENTARY INFORMATION: In the October 8, 1997 **Federal Register,** Volume 62, No 195, pages 52515–52518, the Bureau of Economic Analysis published a notice of proposed rulemaking to revise 15 CFR 806.17 to set forth reporting requirements for the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1997. No comments on the proposed rule were received. Thus, this final rule is the same as the proposed rule.

The benchmark survey is to be conducted by the Bureau of Economic Analysis, U.S. Department of Commerce, under the International Investment and Trade in Services Survey Act (Pub. L. 94–472, 90 Stat. 2059, 22 U.S.C. 3101–3108, as amended by P.L. 98–573 and P.L. 101–533), hereinafter, "the Act." Section 3103(b) of the Act, as amended, requires that "With respect to foreign direct investment in the United States, the President shall conduct a benchmark survey covering year 1980, a benchmark survey covering year 1987, and benchmark surveys covering every fifth year thereafter * * *." In conducting surveys pursuant to this subsection, the President shall, among other things and to the extent he determines necessary and feasible—

(1) Identify the location, nature, and magnitude of, and changes in the total investment by any parent in each of its affiliates and the financial transactions between any parent and each of its affiliates;

(2) Obtain (A) information on the balance sheet of parents and affiliates and related financial data, (B) income statements, including the gross sales by primary line of business (with as much product line detail as necessary and feasible) of parents and affiliates in each country in which they have significant operations, and (C) related information regarding trade, including trade in both goods and services, between a parent and each of its affiliates and between each parent or affiliate and any other person;

(3) Collect employment data showing both the number of United States and foreign employees of each parent and affiliate and the levels of compensation, by country, industry, and skill level;

(4) Obtain information on tax payments by parents and affiliates by country; and

(5) Determine, by industry and country, the total dollar amount of research and development expenditures by each parent and affiliate, payments or other compensation for the transfer of technology between parents and their affiliates, and payments or other compensation received by parents or affiliates from the transfer of technology to other persons.

Reporting in the survey is mandatory. The responsibility for conducting benchmark surveys of foreign direct investment in the United States has been delegated to the Secretary of Commerce, who has redelegated it to BEA.

The benchmark surveys are BEA's censuses, intended to cover the universe of foreign direct investment in the United States in value terms. Foreign direct investment in the United States is defined as the ownership or control, directly or indirectly, by one foreign person of 10 percent or more of the voting securities of an incorporated U.S. business enterprise or an equivalent interest in an unincorporated U.S. business enterprise, including a branch.

The purpose of the benchmark survey is to obtain data on the amount, types, and financial and operating characteristics of foreign direct investment in the United States.

The data from the survey will be used to measure the economic significance of such investment and to analyze its effects on the U.S. economy. They will also be used in formulating, and assessing the impact of, U.S. policy on foreign direct investment.

They will provide benchmarks for deriving current universe estimates of direct investment from sample data collected in other BEA surveys. In particular, they will serve as benchmarks for the quarterly direct investment estimates included in the U.S. international transactions, input-output, and natural income and product accounts, and for preparing estimates of the international investment position of the United States.

The benchmark surveys are also the most comprehensive of BEA's surveys in terms of subject matter in order that they obtain the detailed information on foreign direct investment needed for policy purposes. As specified in the Act, policy areas of particular interest that should be addressed by the survey include, among other things, trade in both goods and services, employment and employee compensation, taxes, and technology.

The survey consists of an instruction booklet, a claim for not filing the BE–12, and the following report forms:

1. Form BE–12(LF) (Long Form) for reporting by nonbank U.S. affiliates with assets, sales, or net income of more than $100 million;

2. Form BE–12(SF) (Short Form) for reporting by nonbank U.S. affiliates with assets, sales, or net income of more than $3 million, but not more than $100 million;

3. Form BE–12 Bank for reporting by U.S. affiliates that are banks with assets, sales, or net income of more than $3 million.

Although the survey is intended to cover the universe of foreign direct investment in the United States, in order to minimize the reporting burden, U.S. affiliates with assets, sales, and net income each equal to or less than $3 million are exempt from reporting on Forms BE–12(LF), BE–12(SF), and BE–12 Bank, but are required to file, on Form BE–12(X), a claim for exemption from filing in the benchmark survey.

Key changes from the previous benchmark survey include reducing respondent burden, particularly for small companies, by: increasing the exemption level for reporting on the survey to $3 million (measured by the company's total assets, sales, or net income) from $1 million in the 1992 survey; increasing the exemption level at which reporting on Form BE–12(LF) (Long Form) is required from $50 million to $100 million; and requiring reporting companies with assets, sales, or net income between $3 million and $30 million to report only selected data items on Form BE–12(SF) (Short Form). In addition, industry coding of reporting companies will be based on the new North American Industry Classification System (NAICS) in place of the system which is based on the U.S. Standard Industrial Classification system; new information will be collected on affiliated services transactions by type of service; and the detail collected on the composition of external financing of the reporting enterprise will be modified, along with exports and imports of goods by product, and the operations of foreign-owned businesses in individual States.

Executive Order 12612

These rules do not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under E.O. 12612.

Executive Order 12866

These rules have been determined to be not significant for purposes of E.O. 12866.

Paperwork Reduction Act

The collection of information required in these final rules has been approved by OMB (OMB No. 0608–0042).

Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection-of-information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid Office of Management and Budget Control Number; such a Control Number (0608–0042) has been displayed.

Public reporting burden for this collection of information is estimated to vary from 1 to 715 hours per response, with an average of 22 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Director, Bureau of Economic Analysis (BE–1), U.S. Department of Commerce, Washington, DC 20230; and to the Office of Management and Budget, O.I.R.A., Paperwork Reduction Project 0608–0042, Washington, DC 20503.

Regulatory Flexibility Act

The Assistant General Counsel for Legislation and Regulation, Department of Commerce, has certified to the Chief Counsel for Advocacy, Small Business Administration, under provisions of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that these rules will not have a significant economic impact on a substantial number of small entities. Most small businesses are not foreign owned, and many that are will not be required to report in the benchmark survey because their assets, sales, and net income are each equal to or less than the $3 million exemption level below which reporting is not required. Also, under these rules, companies with assets, sales, or net income above $3 million, but not above $100 million, will report on the abbreviated BE–12 short form, rather than on the BE–12 long form. In addition, companies with assets, sales, or net income between $3 million and $30 million will report only selected data items on the BE–12 short form. These provisions are intended to significantly reduce the reporting burden on smaller companies.

List of Subjects in 15 CFR Part 806

Balance of payments, Economic statistics, Foreign investments in the United States, Reporting and recordkeeping requirements.

Dated: December 22, 1997.

J. Steven Landefeld,

Director, Bureau of Economic Analysis.

For the reasons set forth in the preamble, BEA amends 15 CFR part 806 as follows:

PART 806—DIRECT INVESTMENT SURVEYS

1. The authority citation for 15 CFR part 806 continues to read as follows:

Authority: 5 U.S.C. 301; 22 U.S.C. 3101–3108; and E.O. 11961 (3 CFR, 1977 Comp., p. 86), as amended by E.O. 12013 (3 CFR, 1977 Comp., p. 147), E.O. 12318 (3 CFR, 1981 Comp., p. 173), and E.O. 12518 (3 CFR, 1985 Comp., p. 348).

2. Section 806.17 is revised to read as follows:

§ 806.17 Rules and regulations for BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1997.

A BE–12, Benchmark Survey of Foreign Direct Investment in the United States will be conducted covering 1997. All legal authorities, provisions, definitions, and requirements contained in §§ 806.1 through 806.13 and § 806.15 (a) through (g) are applicable to this survey. Specific additional rules and regulations for the BE–12 survey are given in this section.

(a) *Response required.* A response is required from persons subject to the reporting requirements of the BE–12, Benchmark Survey of Foreign Direct Investment in the United States—1997, contained in this section, whether or not they are contacted by BEA. Also, a person, or their agent, contacted by BEA concerning their being subject to reporting, either by sending them a report form or by written inquiry, must respond in writing pursuant to § 806.4. This may be accomplished by completing and returning either Form BE–12(X) within 30 days of its receipt if Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank do not apply, or by completing and returning Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank, whichever is applicable, by May 31, 1998.

(b) *Who must report.* A BE–12 report is required for each U.S. affiliate, i.e., for each U.S. business enterprise in which a foreign person owned or controlled, directly or indirectly, 10 percent or more of the voting securities if an incorporated U.S. business enterprise, or an equivalent interest if an unincorporated U.S. business enterprise, at the end of the business enterprise's 1997 fiscal year. A report is required even though the foreign person's ownership interest in the U.S. business enterprise may have been established or acquired during the reporting period. Beneficial, not record, ownership is the basis of the reporting criteria.

(c) *Forms to be filed.* (1) Form BE–12(LF)—Benchmark Survey of Foreign Direct Investment in the United States—1997 (Long Form) must be completed and filed by May 31, 1998, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1997 fiscal year, if:

(i) It is not a bank, and

(ii) On a fully consolidated, or, in the case of real estate investment, an aggregated basis, one or more of the following three items for the U.S. affiliate (not just the foreign parent's share) exceeded $100 million (positive or negative) at the end of, or for, its 1997 fiscal year:

(A) Total assets (do not net out liabilities);

(B) Sales or gross operating revenues, excluding sales taxes; or

(C) Net income after provision for U.S. income taxes.

(2) Form BE–12(SF)—Benchmark Survey of Foreign Direct Investment in the United States—1997 (Short Form) must be completed and filed by May 31, 1998, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1997 fiscal year; if:

(i) It is not a bank, and

(ii) On a fully consolidated, or, in the case of real estate investments, an aggregated basis, one or more of the following three items for the U.S. affiliate (not just the foreign parent's share) exceeded $3 million, but no one item exceeded $100 million (positive or negative) at the end of, or for, its 1997 fiscal year:

(A) Total assets (do not net out liabilities);

(B) Sales or gross operating revenues, excluding sales taxes; or

(C) Net income after provision for U.S. income taxes.

(3) Form BE–12 Bank—Benchmark Survey of Foreign Direct Investment in the United States—1997 BANK must be completed and filed by May 31, 1998, by each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1997 fiscal year, if:

(i) The U.S. affiliate is in "banking", which, for purposes of the BE–12

VOL 63 ISS 15 JA 23 1998 UMI

survey, covers business enterprises engaged in deposit banking or closely related functions, including commercial banks, Edge Act corporations engaged in international or foreign banking, U.S. branches and agencies of foreign banks whether or not they accept domestic deposits, savings and loans, savings banks, and bank holding companies, i.e., holding companies for which over 50 percent of their total income is from banks which they hold, and

(ii) On a fully consolidated basis, one or more of the following three items for the U.S. affiliate (not the foreign parent's share) exceeded $3 million (positive or negative) at the end of, or for, its 1997 fiscal year:

(A) Total assets (do not net out liabilities);

(B) Sales or gross operating revenues, excluding sales taxes; or

(C) Net income after provision for U.S. income taxes.

(4) Form BE–12(X)—Benchmark Survey of Foreign Direct Investment in the United States—1997, Claim for Exemption from Filing BE–12(LF), BE–12(SF), and BE–12 Bank must be completed and filed within 30 days of the date it was received, or by May 31, 1998, whichever is sooner, by:

(i) Each U.S. business enterprise that was a U.S. affiliate of a foreign person at the end of its 1997 fiscal year (whether or not the U.S. affiliate, or its agent, is contacted by BEA concerning its being subject to reporting in the 1997 benchmark survey), but is exempt from filing Form BE–12(LF), Form BE–12(SF), and Form BE–12 Bank; and

(ii) Each U.S. business enterprise, or its agent, that is contacted, in writing, by BEA concerning its being subject to reporting in the 1997 benchmark survey but that is not otherwise required to file the Form BE–12(LF), Form BE–12(SF), or Form BE–12 Bank.

(d) *Aggregation of real estate investments.* All real estate investments of a foreign person must be aggregated for the purpose of applying the reporting criteria. A single report form must be filed to report the aggregate holdings, unless written permission has been received from BEA to do otherwise. Those holdings not aggregated must be reported separately.

(e) *Exemption.* (1) A U.S. affiliate as consolidated, or aggregated in the case of real estate investments, is not required to file a Form BE–12(LF), BE–12(SF), or Form BE–12 Bank if each of the following three items for the U.S. affiliate (not just the foreign parent's share) did not exceed $3 million (positive or negative) at the end of, or for, its 1997 fiscal year:

(i) Total assets (do not net out liabilities);

(ii) Sales or gross operating revenues, excluding sales taxes; and

(iii) Net income after provision for U.S. income taxes.

(2) If a U.S. business enterprise was a U.S. affiliate at the end of its 1997 fiscal year but is exempt from filing a completed Form BE–12(LF), BE–12(SF), or Form BE–12 Bank, it must nevertheless file a completed and certified Form BE–12(X).

(f) *Due date.* A fully completed and certified Form BE–12(LF), Form BE–12(SF), or BE–12 Bank is due to be filed with BEA not later than May 31, 1998. A fully completed and certified Form BE–12(X) is due to be filed with BEA within 30 days of the date it was received, or by May 31, 1998, whichever is sooner.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 232

[Release Nos. 33–7495; 34–39558; 35–25818; 39–2361; IC–23002]

RIN 3235–AG96

Adoption of Updated EDGAR Filer Manual

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting an updated edition of the EDGAR Filer Manual and is providing for its incorporation by reference into the Code of Federal Regulations.

DATES: Effective: The amendment to 17 CFR part 232 (Regulation S–T) will be effective on January 26, 1998.

Other dates: The new edition of the EDGAR Filer Manual (Release 5.40) will be effective on January 26, 1998. The incorporation by reference of the EDGAR Filer Manual is approved by the Director of the Federal Register as of January 26, 1998.

FOR FURTHER INFORMATION CONTACT: In the Office of Information Technology, Michael E. Bartell at (202) 942–8800; for questions concerning investment company filings, Ruth Armfield Sanders, Senior Counsel, Division of Investment Management, at (202) 942–0633; and for questions concerning Corporation Finance company filings, Margaret R. Black at (202) 942–2933.

SUPPLEMENTARY INFORMATION: The Commission today announces the adoption of an updated EDGAR Filer Manual ("Filer Manual"), which sets forth the technical formatting requirements governing the preparation and submission of electronic filings through the Electronic Data Gathering, Analysis, and Retrieval ("EDGAR") system.[1] Compliance with the provisions of the Filer Manual is required in order to assure the timely acceptance and processing of filings made in electronic format.[2] Filers should consult the Filer Manual in conjunction with the Commission's rules governing mandated electronic filing when preparing documents for electronic submission.[3]

In this edition of the EDGAR System and the Filer Manual (Release 5.40), filers will be able to specify either an Internet address or a CompuServe address or both to receive messages on the status of an electronic filing. Since messages sent through Internet may not be as secure as messages sent via CompuServe, certain company information will be omitted from Internet messages for suspended filings and test filings.

Release 5.40 adds two EDGAR submission types for filings submitted by investment companies and deletes or changes the header information of several existing submission types. These changes are being made to accommodate the recent rule and form amendments changing the method by which certain investment companies calculate and pay registration fees.[4] The following submission types have been added for the filing of initial registration statements and pre-effective amendments on Form N–14 by closed-end investment companies: N–14 8C and N–14 8C/A. In addition, the following investment company submission types will no longer be subject to fees and the fee-related tags have been removed: N–1, N–1/A, N–1A, N–1A/A, N–3, N–3/A, N–4, N–4/A, N–14, N–14/A, N–14AE, N–14AE/A, S–6, S–6/A, and 487. Finally, submission types 24F–2NT and 24F–3NT (and their amendments) must be filed within 90 days of the registrant's fiscal year end. This is a change from the 60-day requirement in effect prior to October 11, 1997.

The following investment company submission types will no longer be accepted by the EDGAR system: 24F–1, 24F–2EL, 24F–2EL/A, 24F–2TM, 24F–2TM/A, N–1A EL, N–1A EL/A, N–3 EL, N–3 EL/A, N–4 EL, N–4 EL/A, S–6EL24, S–6EL24/A, 485A24E, 485A24F, 485B24E, 485B24F, 485BXTE, 485BXTF, N14EL24, N14EL24/A, N14AE24, and N14AE24/A.

Rule 301 of Regulation S–T also is being amended to provide for the incorporation by reference of the Filer Manual into the Code of Federal Regulations, which incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. The revised Filer Manual and the amendment to Rule 301 will be effective on January 26, 1998.

Paper copies of the updated Filer Manual may be obtained at the following address: Public Reference Room, U.S. Securities and Exchange Commission, Mail Stop 1–2, 450 Fifth Street, N.W., Washington, D.C. 20549. Electronic format copies will be available on the EDGAR electronic bulletin board and posted to the SEC's Web Site. The SEC's Web Site address for the Manual is http://www.sec.gov/asec/ofis/filerman.htm. Copies also may be obtained from Disclosure Incorporated, the paper and microfiche contractor for the Commission, at (800) 638–8241.

Since the Filer Manual relates solely to agency procedure or practice, publication for notice and comment is not required under the Administrative Procedure Act.[5] It follows that the requirements of the Regulatory Flexibility Act[6] do not apply.

The effective date for the updated Filer Manual and the rule amendments is January 26, 1998. In accordance with the Administrative Procedure Act 5 U.S.C. 553(d)(3), the Commission finds that there is good cause to establish an effective date less than 30 days after publication of these rules. The EDGAR system is scheduled to be upgraded to Release 5.40 on January 24, 1998. The Commission believes that it is necessary to coordinate the effectiveness of the updated Filer Manual with the scheduled system upgrade in order to avoid confusion to EDGAR filers.

Statutory Basis

The amendment to Regulation S–T is being adopted under Sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933,[7] Sections 3, 12, 13, 14, 15, 23, and 35A of the Securities Exchange Act of 1934,[8] Section 20 of the Public Utility Holding Company Act of 1935,[9] Section 319 of the Trust Indenture Act of 1939,[10] and Sections 8, 30, 31, and 38 of the Investment Company Act.[11]

List of Subjects in 17 CFR Part 232

Incorporation by reference, Investment companies, Registration requirements, Reporting and recordkeeping requirements, Securities.

Text of the Amendment

In accordance with the foregoing, Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

1. The authority citation for Part 232 continues to read as follows:

Authority: 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 77sss(a), 78c(b), 78*l*, 78m, 78n, 78o(d), 78w(a), 78*ll*(d), 79t(a), 80a–8, 80a–29, 80a–30 and 80a–37.

2. Section 232.301 is revised to read as follows:

§ 232.301 EDGAR Filer Manual.

Electronic filings shall be prepared in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets out the technical formatting requirements for electronic submissions. The January 1998 edition of the *EDGAR Filer Manual: Guide for Electronic Filing with the U.S. Securities and Exchange Commission (Release 5.40)* is incorporated into the Code of Federal Regulations by reference, which action was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Compliance with the requirements found therein is essential to the timely receipt and acceptance of documents filed with or otherwise submitted to the Commission in electronic format. Paper copies of the EDGAR Filer Manual may be obtained at the following address: Public Reference Room, U.S. Securities and Exchange Commission, Mail Stop 1–2, 450 5th Street, N.W., Washington, D.C. 20549. They also may be obtained from Disclosure Incorporated by calling (800) 638–8241. Electronic format copies are available through the EDGAR electronic bulletin board and posted to the SEC's Web Site. The SEC's Web Site address for the Manual is http://www.sec.gov/asec/ofis/filerman.htm. Information on becoming an EDGAR E-mail/electronic bulletin board subscriber is available by contacting CompuServe Inc. at (800) 576–4247.

By the Commission.

Dated: January 20, 1998.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 175 and 178

[Docket No. 95F–0210]

Indirect Food Additives: Adhesives and Components of Coatings; Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of 2,2′-(2,5-thiophenediyl)-bis(5-*tert*-butylbenzoxazole) as an optical brightener in pressure-sensitive adhesives and in all polymers used in contact with food. This action is in response to a petition filed by Ciba-Geigy Corp.

DATES: The regulation is effective January 23, 1998. Submit written objections and requests for a hearing by February 23, 1998.

ADDRESSES: Submit written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

---

[1] The Filer Manual originally was adopted on April 1, 1993, and became effective on April 26, 1993. Release No. 33–6986 (Apr. 1, 1993) [58 FR 18638]. The most recent update to the Filer Manual was implemented on August 23, 1997. *See* Release No. 33–7432 (July 29, 1997) [62 FR 41841].

[2] *See* Rule 301 of Regulation S–T (17 CFR 232.301).

[3] *See* Release Nos. 33–6977 (Feb. 23, 1993) [58 FR 14628], IC–19284 (Feb. 23, 1993) [58 FR 14848], 35–25746 (Feb. 23, 1993) [58 FR 14999], and 33–6980 (Feb. 23, 1993) [58 FR 15009] for a comprehensive treatment of the rules adopted by the Commission governing mandated electronic filing. *See also* Release No. 33–7122 (Dec. 19, 1994) [59 FR 67752], in which the Commission made the EDGAR rules final and applicable to all domestic registrants, Release No. 33–7427 (July 1, 1997) [62 FR 36450], adopting the most recent minor amendments to the EDGAR rules; and Release No. 33–7472 (Oct. 24, 1997) [62 FR 58647], in which the Commission announced that, as of January 1, 1998, it would not accept paper filings required to be filed electronically.

[4] *See* Release No. 33–7448 (Sep. 10, 1997) [62 FR 47934]. The rule amendments adopted in that release provided for automatic registration of an indefinite number of securities by all open-end management investment companies and unit investment trusts. As a result, election by these issuers of registration of an indefinite number of shares is no longer necessary or appropriate. Accordingly, all EDGAR submission types used for making that election are being eliminated.

VOL 63 ISS 15 JA 23 1998 UMI

FOR FURTHER INFORMATION CONTACT: John R. Bryce, Center for Food Safety and Applied Nutrition (HFS–215), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3023.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of August 18, 1995 (60 FR 43157), FDA announced that a food additive petition (FAP 5B4471) had been filed by Ciba-Geigy Corp., Seven Skyline Dr., Hawthorne, NY 10532–2188. The petition proposed to amend the food additive regulations in § 178.3297 *Colorants for polymers* (21 CFR 178.3297) to provide for the safe use of 2,2′-(2,5-thiophenediyl)-bis(5-*tert*-butylbenzoxazole) in all polymers intended for use in food packaging and in adhesives complying with § 175.125 *Pressure-sensitive adhesives* (21 CFR 175.125).

In order to clarify the use of this additive as an optical brightener, the petition also proposed to list the use of the additive in adhesives complying with § 175.105 (21 CFR 175.105) in § 178.3297. Because the additive is currently listed in § 175.105 without limitation, use of the additive as an optical brightener in adhesives complying with § 175.105 is a currently permitted use that requires no further safety evaluation. Accordingly, this final rule lists the use of the additive in adhesives complying with § 175.105 in § 178.3297 *Colorants for polymers*.

FDA has evaluated data in the petition and other relevant material. Based on this information, the agency concludes that the proposed use of the additive as an optical brightener in pressure-sensitive adhesives in § 175.125, and in all polymers intended for use in food packaging in § 178.3297, is safe; that the additive will have the intended technical effect; and that therefore, the regulations in §§ 175.125 and 178.3297 should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in § 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before February 23, 1998, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects

21 CFR Part 175

Adhesives, Food additives, Food packaging.

21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR parts 175 and 178 are amended to read as follows:

PART 175—INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS

1. The authority citation for 21 CFR part 175 continues to read as follows:

Authority: 21 U.S.C. 321, 342, 348, 379e.

2. Section 175.125 is amended by adding paragraph (a)(7) and by revising paragraph (b)(1) to read as follows:

§ 175.125 Pressure-sensitive adhesives.

* * * * *

(a) * * *

(7) 2,2′-(2,5-Thiophenediyl)-bis(5-*tert*-butylbenzoxazole) (CAS Reg. No. 7128–64–5) as an optical brightener at a level not to exceed 0.05 percent by weight of the finished pressure-sensitive adhesive.

* * * * *

(b) * * *

(1) Substances listed in paragraphs (a)(1), (a)(2), (a)(3), (a)(5), (a)(6), and (a)(7) of this section, and those substances prescribed by paragraph (a)(4) of this section that are not identified in paragraph (b)(2) of this section.

* * * * *

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

3. The authority citation for 21 CFR part 178 continues to read as follows:

Authority: 21 U.S.C. 321, 342, 348, 379e.

4. Section 178.3297 is amended in the table in paragraph (e) by revising the entry for "2,2′-(2,5-Thiophenediyl)-bis(5-*tert*-butylbenzoxazole)" under the headings "Substances" and "Limitations" to read as follows:

§ 178.3297 Colorants for polymers.

* * * * *

(e) * * *

Substances	Limitations
2,2′-(2,5-Thiophenediyl)-bis(5-*tert*-butylbenzoxazole) (CAS Reg. No. 7128–64–5).	For use as an optical brightener: 1. In all polymers at levels not to exceed 0.015 percent by weight of the polymer. The finished articles are to contact food only under conditions of use A through H described in Table 2 of § 176.170(c) of this chapter. 2. In all polymers at levels not to exceed 0.05 percent by weight of the polymer. The finished articles shall contact foods only of the types identified in Table 1 of § 176.170(c) of this chapter, under Categories I, II, IV–B, VI–A, VI–B, VI–C, VII–B, and VIII under conditions of use A through H described in Table 2 of § 176.170(c) of this chapter. 3. In adhesives complying with § 175.105 of this chapter and in pressure-sensitive adhesives complying with § 175.125 of this chapter.

Dated: January 5, 1998.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

Quality System Design Control; Open Public Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Announcement of public meeting.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following meeting: Quality System Design Control open public meeting. The topic to be discussed is the midcourse review of the new design control requirements. This action is being taken in accordance with the current good manufacturing (CGMP) final rule that appeared in the **Federal Register** of October 7, 1996.

DATES: The meeting will be held on, February 2, 1998, from 8:30 a.m. to 4:30 p.m. Written requests for oral presentations by January 28, 1998.

ADDRESSES: The meeting will be held at the National Institutes of Health (NIH), Natcher Auditorium, 45 Center Dr., Bldg. 45, Bethesda, MD. Contact for any changes: (1) Via Internet at http://www.fda.gov/cdrh/gmp, or (2) telephone toll-free at 1–800–638–2041.

FOR FURTHER INFORMATION CONTACT:

For information regarding registration: Mary Ann Fitzgerald, or

For information regarding the meeting or requests for oral presentations: Kimberly A. Trautman, Center for Devices and Radiological Health (HFZ–341), Food and Drug Administration, 2094 Gaither Rd., Rockville, MD 20850, 301–594–4648, FAX 301–594–4672.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of October 7, 1996 (61 FR 52602), FDA stated that it would hold an open public meeting in early 1998 to discuss, and to further explore any concerns industry might be having in implementing the new design control requirements. Specifically, the results of the first several months of design control inspections will be reviewed and any adjustments to the designated inspectional strategy of guidances will be addressed. Also, FDA will evaluate the information gathered at this point and determine if design control requirements, as written in the final rule, are appropriate to obtain the goals expressed in the preamble. Particular attention will be paid to clarity of information obtained, the appropriateness of the information collected with respect to the design control requirements, the manner in which the investigators are writing their observations, and any requirements that seem to be giving manufacturers a problem or where there might be misunderstandings as to what the regulation requires. It is important to note that only the requirements and issues surrounding design controls codified will be addressed.

Fax written requests for oral presentations, (including name, title, firm name, address, telephone, and fax number), and an outline of your presentation to the contact person listed above by January 28, 1998. No telephone requests will be accepted. You will be notified by facsimile whether or not the speaker's list is full. If you cannot be reached by facsimile, please note that in your request.

If you need special accommodations due to a disability, please contact Georgette Smith, NIH Conference Center, 301–496–9966, at least 7 days in advance.

Dated: January 20, 1998.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

32 CFR Part 104

[DoD Instruction 1205.12]

RIN 0790–AG52

Civilian Employment and Reemployment Rights of Applicants for, and Service Members and Former Service Members of the Uniformed Services

AGENCY: Department of Defense.

ACTION: Final rule.

SUMMARY: This part identifies DoD guidelines for implementing policy, assigns responsibilities, and prescribes procedures for informing Service members of their reemployment protections. It updates, codifies, and strengthens the civilian employment rights and benefits of Service members and individuals who apply for uniformed service, and specifies the

VOL 63 ISS 15 JA 23 1998 UMI

obligations of Service members and applicants for uniformed service.

DATES: This part is effective February 1, 1998. Comments must be received no later than March 24, 1998.

FOR FURTHER INFORMATION CONTACT: Colonel Rowan W. Bronson, OASD/RA (M&P), (703) 693–7490.

SUPPLEMENTARY INFORMATION:

Executive Order 12866, "Regulatory Planning and Review"

It has been determined that 32 CFR part 104 does not pertain to a military or foreign affairs function of the United States. It is not a significant regulatory action. This final rule does not:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy; a section of the economy; productivity; competition; jobs; the environment; public health or safety; or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs, or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Public Law 96–354, "Regulatory Flexibility Act" (5 U.S.C. 601)

It has been determined that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it is related to a military or foreign affairs function of the United States. It would not, if promulgated, have a significant economic impact on a substantial number of small entities. The law provides employment and reemployment protections for Active and Reserve Component members, as well as individuals who apply to be members of the Uniformed Services.

Public Law 96–511, "Paperwork Reduction Act" (44 U.S.C. Chapter 35)

It has been determined that this part does not impose any reporting or recordkeeping requirements on the public under the Paperwork Reduction Act of 1995.

List of Subjects in 32 CFR Part 104

Government employees, Military personnel.

Accordingly, Title 32, Chapter 1, 32 CFR part 104, is added to read as follows:

PART 104—CIVILIAN EMPLOYMENT AND REEMPLOYMENT RIGHTS OF APPLICANTS FOR, AND SERVICE MEMBERS AND FORMER SERVICE MEMBERS OF THE UNIFORMED SERVICES

Sec.

104.1 Purpose.
104.2 Applicability.
104.3 Definitions.
104.4 Policy.
104.5 Responsibilities.
104.6 Procedures.
Appendix A to part 104—Civilian Employment And Reemployment Rights, Benefits And Obligations For Applicants For, And Service Members And Former Service Members Of The Uniformed Services
Appendix B to part 104—Sample Employer Notification Of Uniformed Service

Authority: 10 U.S.C. 1161.

§ 104.1 Purpose.

This part:

(a) Updates implementation policy, assigns responsibilities, and prescribes procedures for informing Service members who are covered by the provisions of 38 U.S.C chapter 43 and individuals who apply for uniformed service, of their civilian employment and reemployment rights, benefits and obligations.

(b) Implements 38 U.S.C. chapter 43, which updated, codified, and strengthened the civilian employment and reemployment rights and benefits of Service members and individuals who apply for uniformed service, and specifies the obligations of Service members and applicants for uniformed service.

§ 104.2 Applicability.

This part applies to the Office of the Secretary of Defense; the Military Departments, including the Coast Guard when it is not operating as a Military Service in the Department of the Navy by agreement with the Department of Transportation; the Chairman of the Joint Chiefs of Staff; and the Defense Agencies (referred to collectively in this part as "the DoD Components"). The term "Military Departments," as used in this part, refers to the Departments of the Army, Navy, and Air Force. The term "Secretary concerned" refers to the Secretaries of the Military Departments and the Secretary of Transportation with respect to the Coast Guard when it is not operating as a Service in the Department of the Navy. The term "Military Services" refers to the Army, the Navy, the Air Force, the Marine Corps, and the Coast Guard.

§ 104.3 Definitions.

Critical mission. An operational mission that requires the skills or resources available in a Reserve component or components.

Critical requirement. A requirement in which the incumbent possesses unique knowledge, extensive experience, and specialty skill training to successfully fulfill the duties or responsibilities in support of the mission, operation or exercise. Also, a requirement in which the incumbent must gain the necessary experience to qualify for key senior leadership positions within his or her Reserve component.

Escalator position. This is established by the principle that the returning Service member is entitled to the position of civilian employment that he or she would have attained had he or she remained continuously employed by that civilian employer. This may be a position of greater or lesser responsibilities, to include a layoff status, when compared to the employees of the same seniority and status employed by the company.

Impossible or unreasonable. For the purpose of determining when providing advance notice of uniformed service to an employer is impossible or unreasonable, the unavailability of an employer or employer representative to whom notification can be given, an order by competent military authority to report for uniformed service within forty-eight hours of notification, or other circumstances that the Office of the Assistant Secretary of Defense for Reserve Affairs may determine are impossible or unreasonable are sufficient justification for not providing advance notice of pending uniformed service to an employer.

Military necessity. For the purpose of determining when providing advance notice of uniformed service is not required, a mission, operation, exercise or requirement that is classified, or a pending or ongoing mission, operation, exercise or requirement that may be compromised or otherwise adversely affected by public knowledge is sufficient justification for not providing advance notice to an employer.

Non-career service. The period of active uniformed service required to complete the initial uniformed service obligation: a period of active duty or full-time National Guard duty that is for a specified purpose and duration with no expressed or implied commitment for continued active duty; or participation in a Reserve component as a member of the Ready Reserve performing annual training, active duty for training or inactive duty training.

Continuous or repeated active uniformed service or full-time National Guard duty that results in eligibility for a regular retirement from the Armed Forces is not considered non-career service.

Officer. For determining those Service officials authorized to provide advance notice to a civilian employer of pending uniformed service by a Service member or an individual who has applied for uniformed service, an officer shall include all commissioned officers, warrant officers, and non-commissioned officers authorized by the Secretary concerned to act in this capacity.

Uniformed service. Performance of duty on a voluntary or involuntary basis in the Army, the Navy, the Air Force, the Marine Corps or the Coast Guard, including their Reserve components, when the Service member is engaged in active duty, active duty for special work, active duty for training, initial active duty for training, inactive duty training, annual training or full-time National Guard duty, and, for purposes of this part, a period for which a person is absent from a position of employment for the purpose of an examination to determine the fitness of the person to perform such duty.

§ 104.4 Policy.

It is DoD policy to support non-career service by taking appropriate actions to inform and assist uniformed Service members and former Service members who are covered by the provisions of 38 U.S.C. chapter 43, and individuals who apply for uniformed service of their rights, benefits, and obligations under 38 U.S.C. Chapter 43. Such actions include:

(a) Advising non-career Service members and individuals who apply for uniformed service of their employment and reemployment rights and benefits provided in 38 U.S.C. chapter 43, as implemented by this part, and the obligations they must meet to exercise those rights.

(b) Providing assistance to Service members, former Service members and individuals who apply for uniformed service in exercising employment and reemployment rights and benefits.

(c) Providing assistance to civilian employers of non-career Service members in addressing issues involving uniformed service as it relates to civilian employment or reemployment.

(d) Considering requests from civilian employers of members of the National Guard and Reserve to adjust a Service member's scheduled absence from civilian employment because of uniformed service or make other accommodations to such requests, when it is reasonable to do so.

(e) Documenting periods of uniformed service that are exempt from a Service member's cumulative 5-year absence from civilian employment to perform uniformed service as provided in 38 U.S.C. chapter 43 and implemented by this part.

(f) Providing, at the Service member's request, necessary documentation concerning a period or periods of service, or providing a written statement that such documentation is not available, that will assist the Service member in establishing civilian reemployment rights, benefits and obligations.

§ 104.5 Responsibilities.

(a) The Assistant Secretary of Defense for Reserve Affairs, under the Under Secretary of Defense for Personnel and Readiness, shall:

(1) In conjunction with the Departments of Labor (DoL) and Veterans Affairs, the Office of Personnel Management (OPM), and other appropriate Departments and activities of the executive branch, determine actions necessary to establish procedures and provide information concerning civilian employment and reemployment rights, benefits and obligations.

(2) Establish procedures and provide guidance to the Secretaries concerned about civilian employment and reemployment rights, benefits and obligations of Service members who are covered by the provisions of 38 U.S.C. chapter 43 and individuals who apply for uniformed service as provided in 38 U.S.C. chapter 43. This responsibility shall be carried out in coordination with DoL, OPM, and the Federal Retirement Thrift Investment Board.

(3) Monitor compliance with 38 U.S.C. chapter 43 and this part.

(4) Publish in the **Federal Register**, DoD policies and procedures established to implement 38 U.S.C. chapter 43.

(b) The Secretaries of the Military Departments and the Commandant of the Coast Guard shall establish procedures to:

(1) Ensure compliance with this part.

(2) Inform Service members who are covered by the provisions of 38 U.S.C. chapter 43 and individuals who apply for uniformed service of the provisions of 38 U.S.C. chapter 43 as implemented by this part.

(3) Provide available documentation, upon request from a Service member or former Service member, that can be used to establish reemployment rights of the individual.

(4) Specify, as required, and document those periods of active duty that are exempt from the 5-year cumulative service limitation that a Service member may be absent from a position of civilian employment while retaining reemployment rights.

(5) Provide assistance to Service members and former Service members who are covered by the provisions of 38 U.S.C. chapter 43, and individuals who apply for uniformed service in exercising employment and reemployment rights.

(6) Provide assistance, as appropriate, to civilian employers of Service members who are covered by the provisions of 38 U.S.C. chapter 43 and individuals who apply for uniformed service.

(7) Cooperate with the DoL in discharging its responsibilities to assist persons with employment and reemployment rights and benefits.

(8) Cooperate with OPM in carrying out its placement responsibilities under 38 U.S.C. chapter 43.

§ 104.6 Procedures.

The Secretaries of the Military Departments and the Commandant of the Coast Guard shall:

(a) Inform individuals who apply for uniformed service and members of a Reserve component who perform or participate on a voluntary or involuntary basis in active duty, active duty for special work, initial active duty for training, active duty for training, inactive duty training, annual training and full-time National Guard duty, of their employment and reemployment rights, benefits, and obligations as provided under 38 U.S.C. chapter 43 and described in Appendix A of this part. Other appropriate materials may be used to supplement the information contained in Appendix A of this part.

(1) Persons who apply for uniformed service shall be advised that DoD strongly encourages applicants to provide advance notice in writing to their civilian employers of pending uniformed service or any absence for the purpose of an examination to determine the person's fitness to perform uniformed service. Providing written advance notice is preferable to verbal advance notice since it is easier to establish that this basic prerequisite to retaining reemployment rights was fulfilled. Regardless of the means of providing advance notice, whether verbal or written, it should be provided as early as practicable.

(2) Annually and whenever called to duty for a contingency operation, advise Service members who are participating in a Reserve component of:

VOL 63 ISS 15 JA 23 1998 UMI

(i) The requirement to provide advance written or verbal notice to their civilian employers for each period of military training, active and inactive duty, or full-time National Guard duty.

(A) Reserve component members shall be advised that DoD strongly encourages that they provide advance notice to their civilian employers in writing for each period of pending uniformed service. Providing written advance notice is preferable to verbal advance notice since it easily establishes that this prerequisite to retaining reemployment rights was fulfilled.

(B) Regardless of the means of providing advance notice, whether written or verbal, it should be provided as early as practicable. DoD strongly recommends that advance notice to civilian employers be provided at least 30 days prior to departure for uniformed service when it is feasible to do so.

(C) The advance notice requirement can be met by providing the employer with a copy of the unit annual training schedule or preparing a standardized letter. The sample employer notification letter in Appendix B of this part may be used for this purpose.

(ii) The 5-year cumulative limit on absences from their civilian employment due to uniformed service and exemptions to that limit.

(iii) The requirements for reporting or submitting application to return to their position of civilian employment.

(iv) Their general reemployment rights and benefits.

(v) The option for continuing employer provided health care, if the employer provides such a benefit.

(vi) The opportunity to use accrued leave in order to perform uniformed service.

(vii) Who they may contact to obtain assistance with employment and reemployment questions and problems.

(b) Inform Service members who are covered by the provisions of 38 U.S.C. Chapter 43, upon completion of an extended period of active duty and before separation from active duty of their employment and reemployment rights, benefits, and obligations as provided under 38 U.S.C. Chapter 43. This shall, as a minimum, include notification and reporting requirements for returning to employment with their civilian employer. While Appendix A of this part provides the necessary information to satisfy this requirement, other appropriate materials may be used to supplement this information.

(c) Issue orders that span the entire period of service when ordering a member of the National Guard or Reserve to active duty for a mission or requirement. Order modifications shall be initiated, as required, to ensure continuous active duty should the period required to complete the mission or requirement change.

(d) Document the length of a Service member's initial period of military service obligation performed on active duty.

(e) Determine and certify in writing those additional training requirements not already exempt for the 5-year cumulative service limit which are necessary for the professional development, or skill training or retraining for members of the National Guard or Reserve. Once the Secretary concerned certifies those training requirements, performance of uniformed service to complete a certified training requirement is exempt from the 5-year cumulative service limit.

(f) Determine those periods of active duty when a Service member is ordered to, or retained on, active duty (other than for training) under any provision of law because of a war or national emergency declared by the President or Congress. If the purpose of the order to, or retention on, active duty is for the direct or indirect support of the war or national emergency, then the orders of the Service member should be so annotated, since that period of service is exempt from the 5-year cumulative service limit established in 38 U.S.C. Chapter 43.

(g) Determine those periods of active duty performed by a member of the National Guard or Reserve that are designated by the Secretary concerned as a critical mission or critical requirement, and for that reason are exempt form the 5-year cumulative service limit. The authority for determining what constitutes a critical mission or requirement shall not be delegated below the Assistant Secretary level or the Commandant of the Coast Guard. The designation of a critical requirement to gain the necessary experience to qualify for key senior leadership positions shall be used judiciously, and the necessary experience and projected key leadership positions fully documented. This authority shall not be used to grant exemptions to avoid the cumulative 5-year service limit established by 38 U.S.C. Chapter 43 or to extend individuals in repeated statutory tours. The Assistant Secretary of Defense for Reserve Affairs shall be notified in writing of all occasions in which a Service member is granted more than one exemption for a critical requirement when the additional exemption(s) extend the Service member beyond the 5-year cumulative service limit established in 38 U.S.C. Chapter 43.

(h) When appropriate, ensure that orders to active duty or orders retaining members on active duty specify the statutory or Secretarial authority for those orders when such authority meets one or more of the exemptions from the 5-year cumulative service limit provided in 38 U.S.C. Chapter 43. If circumstances arise that prevent placing this authority on the orders, the authority shall be included in a separation document and retained in the Service member's personnel file.

(i) Ensure that appropriate documents verifying any period of service exempt from the 5-year cumulative service limit are place in the Service member's personnel record or other appropriate record.

(j) Document those circumstances that prevent a Service member from providing advance notification of uniformed service to a civilian employer because of military necessity or when advance notification is otherwise impossible or unreasonable, as defined in § 104.3.

(k) Designate those officers, as defined in § 104.3, who are authorized by the Secretary concerned to provide advance notification of service to a civilian employer on behalf of a Service member or applicant for uniformed service.

(l) Provide documentation, upon request from a Service member or former Service member, that may be used to satisfy the Service member's entitlement to statutory reemployment rights and benefits. Appropriate documentation may include, as necessary:

(1) The inclusive dates of the initial period of military service obligation performed on active duty.

(2) Any period of service during which a Service member was required to serve because he or she was unable to obtain a release from active duty though no fault of the Service member.

(3) The cumulative length of all periods of active duty performed.

(4) The authority under which a Service member was ordered to active duty when such service was exempt from the 5-year cumulative service limit.

(5) The date the Service member was last released from active duty, active duty for special work, initial active duty for training, active duty for training, inactive duty training, annual training or full-time National Guard duty. This documentation establishes the timeliness of reporting to, or submitting application to return to, a position of civilian employment.

(6) Whether service requirements prevent providing a civilian employer with advance notification of pending service.

(7) That the Service member's entitlement to reemployment benefits has not been terminated because of the character of service as provided in 38 U.S.C. 4304.

(8) When appropriate, a statement that sufficient documentation does not exist.

(m) Establish a central point of contact at a headquarters or regional command who can render assistance to active duty Service members and applicants for uniformed service about employment and reemployment rights, benefits and obligations.

(n) Establish points of contact in each Reserve component headquarters or Reserve regional command, and each National Guard State headquarters who can render assistance to:

(1) Members of the National Guard or Reserve about employment and reemployment rights, benefits and obligations.

(2) Employers of National Guard and Reserve members about duty or training requirements arising from a member's uniformed service or service obligation.

(o) A designated Reserve component representative shall consider, and accommodate when it does not conflict with military requirements, a request from a civilian employer of a National Guard and Reserve member to adjust a Service member's absence from civilian employment due to uniformed service when such service has an adverse impact on the employer. The representative may make arrangements other than adjusting the period of absence to accommodate such a request when it serves the best interest of the military and is reasonable to do so.

Appendix A to Part 104—Civilian Employment and Reemployment Rights, Benefits and Obligations for Applicants for, and Service Members and Former Service Members of the Uniformed Services

A. Scope of Coverage

1. The Uniformed Services Employment and Reemployment Rights Act (USERRA) which is codified in 38 U.S.C. Chapter 43 provides protection to anyone absent from a position of civilian employment because of uniformed service if:

a. Advance written or verbal notice was given to the civilian employer.

(1) Advance notice is not required if precluded by military necessity, or is otherwise unreasonable or impossible.

(2) DoD strongly encourages Service members and or applicants for service to provide advance notice to their civilian employer in writing for each period of pending uniformed service. Providing written advance notice is preferable to verbal advance notice since it easily establishes that this prerequisite to retaining reemployment rights was fulfilled. Regardless of the means of providing advance notice, whether written or verbal, it should be provided as early as practicable. Also, DoD strongly recommends that Reserve component members provide advance notice to their civilian employers at least 30 days in advance when it is feasible to do so. The advance notice requirement can be met by providing the employer with a copy of the unit annual training schedule or preparing a standardized letter. The sample employer notification letter in Appendix B of this part may be used for this purpose;

b. The cumulative length of absences does not exceed 5 years;

c. The individual reports to, or submits an application for reemployment, within the specified period based on duration of services as described in section D of this Appendix; and,

d. The person's character of service was not disqualifying as described in paragraphs A.2.d. and e. of this appendix.

2. A civilian employer is not required to reemploy a person if:

a. The civilian employment was for a brief, non-recurrent period and there was no reasonable expectation that the employment would continue indefinitely or for a significant period.

b. The employer's circumstances have so changed as to make reemployment impossible or unreasonable.

c. The reemployment imposes an undue hardship on the employer in the case of an individual who:

(1) Has incurred a service connected disability; or,

(2) Is not qualified for the escalator position or the position last held, and cannot become qualified for any other position of lesser status and pay after a reasonable effort by the employer to qualify the person for such positions.

d. The Service member or former Service member was separated from a uniformed service with a dishonorable or bad conduct discharge, or separated from a uniformed service under other than honorable conditions.

e. An officer dismissed from any Armed Force or dropped from the rolls of any Armed Force as prescribed under 10 U.S.C. 1161.

f. The cumulative length of service exceeds five years and no portion of the cumulative five years of uniformed service falls within the exceptions described in section C. of this Appendix.

g. An employer asserting that he or she is not required to reemploy an individual because the employment was for a brief, non-recurrent period, or reemployment is impossible or unreasonable, or reemployment imposes an undue hardship on the employer, that employer has the burden of proving his or her assertion.

3. Entitlement to protection under 38 U.S.C. Chapter 43 does not depend on the timing, frequency, and duration of training or uniformed service.

B. Prohibition Against Discrimination and Acts of Reprisal

1. A person who is a member of, applies to be a member of, has performed, applies to perform, or has an obligation to perform service in a uniformed service shall not be denied initial employment, reemployment, retention in employment, promotion, or any employment benefit by an employer on the basis of that membership, an application for membership, performance of service, or an obligation for service in the uniformed services.

2. A person, including a non-Service member, shall not be subject to employment discrimination or any adverse employment action because he or she has taken an action to enforce a protection afforded a Service member, has testified or made a statement in or in connection with any proceeding concerning employment and reemployment rights of a service member, has assisted or participated in an investigation, or has otherwise exercised any right provided by 38 U.S.C. Chapter 43.

3. An employer shall be considered to have engaged in an act of discrimination if an individual's membership, application for membership, service, application for service, or obligation for service in the uniformed services is a motivating factor in the employer's action, unless the employer can prove that the action would have been taken in the absence of such membership, application for membership, performance of service, application for service or obligation.

C. Exceptions to the Maximum Period of Service for Coverage

In order to retain reemployment rights and benefits provided by 38 U.S.C. Chapter 43, the cumulative length of absences from the same employer cannot exceed 5 years. Not counted toward this limit is:

1. Service beyond 5 years if required to complete an initial service obligation;

2. Service during which an individual was unable to obtain release orders before the expiration of the 5-year cumulative service limit through no fault of his or her own;

3. Inactive duty training; annual training; ordered to active duty for unsatisfactory participation; active duty by National Guardsmen for encampments, maneuvers, field operations or coastal defense; or to fulfill additional training requirements, as determined by the Secretary concerned, for professional skill development, or to complete skill training or retraining;

4. Involuntary order or call to active duty, or retention on active duty;

5. Ordered to or retained on active duty during a war or national emergency declared by the President or Congress;

6. Ordered to active duty in support of an operational mission for which personnel have been involuntarily called to active duty;

7. Performing service in support of a critical mission or requirement, as determined by the Secretary concerned;

8. Performing service in the National Guard when ordered to active duty by the President to suppress an insurrection or rebellion, repel an invasion, or execute laws of the United States; and,

9. Voluntary recall to active duty of retired regular Coast Guard officers or retired enlisted Coast Guard members.

D. Applications for Reemployment

1. For service of 30 days or less, or for an absence for an examination to determine the individual's fitness to perform uniformed service, the Service member or applicant must report to work not later than the beginning of the first full regularly scheduled work period on the first full calendar day following the completion of service or the examination, after allowing for an eight hour rest period following safe transportation to his or her residence.

2. For service of 31 days or more but less that 181 days, the Service member must submit an application for reemployment not later than 14 days after completion of service, or by the next full calendar day when submitting an application within the 14 day limit was impossible or unreasonable through no fault of the Service member.

3. For service of 181 days or more, the Service member must submit an application for reemployment not later than 90 days after the completion of service.

4. If hospitalized or convalescing from an illness or injury incurred or aggravated during service, the Service member must, at the end of the period necessary for recovery, follow the same procedures, based on length of service, as described in sections D.1. through D.3. of this appendix. The period of hospitalization or convalescence may not normally exceed 2 years.

5. Anyone who fails to report or apply for reemployment within the specified period shall not automatically forfeit entitlement to reemployment rights and benefits, but is subject to the rules of conduct, established policies, general practices of the employer pertaining to explanations and discipline because of an absence from scheduled work.

E. Documentation Upon Return

1. If service is for 31 days or more, a Service member must provide documentation, upon request from the employer, that establishes:

a. He or she made application to return to work within the prescribed time period;

b. He or she has not exceeded the 5-year cumulative service limit; and

c. His or her reemployment rights were not terminated because of character of service as described in paragraphs A.2.d. and e. of this appendix.

2. Failure to provide documentation cannot serve as a basis for denying reemployment to the Service member, former Service member, or applicant if documentation does not exist or is not readily available at the time of the employer's request. However, if after reemployment, documentation becomes available that establishes that the Service member or former Service member does not meet one or more of the requirements contained in section E.1. of this appendix, the employer may immediately terminate the employment.

F. Position To Which Entitled Upon Reemployment

1. Reemployment position for service of 90 days or less:

a. The position the person would have attained if continuously employed (the "escalator" position) and if qualified to perform the duties; or,

b. The position in which the person was employed in when he or she departed for uniformed service, but only if the person is not qualified to perform the duties of the escalator position, despite the employer's reasonable efforts to qualify the person for the escalator position.

2. Reemployment position for service of 91 days or more:

a. The escalator position, or a position of like seniority, status and pay, the duties of which the person is qualified to perform; or,

b. The position in which the person was employed in when he or she departed for uniformed service or a position of like seniority, status and pay, the duties of which the person is qualified to perform, but only if the person is not qualified to perform the duties of the escalator position after the employer has made a reasonable effort to qualify the person for the escalator position.

3. If a person cannot become qualified, after reasonable efforts by the employer to qualify the person, for either the escalator position or the position formerly occupied by the employee as provided in sections F.1. and F.2. of this appendix, for any reason (other than disability), the person must be employed in any other position of lesser status and pay that the person is qualified to perform, with full seniority.

G. Position To Which Entitled if Disabled

If a person who is disabled because of service cannot (after reasonable efforts by the employer to accommodate the disability) be employed in the escalator position, he or she must be reemployed:

1. In any other position that is equivalent to the escalator position in terms of seniority, status, and pay that the person is qualified or can become qualified to perform with reasonable efforts by the employer; or,

2. In a position, consistent with the person's disability, that is the nearest approximation to the position in terms of seniority, status, and pay to the escalator or equivalent position.

H. Reemployment by the Federal Government

1. A person who was employed by a Federal Executive Agency when he or she departed for uniformed service must be reemployed using the same order of priorities as prescribed in sections F. and G. of this appendix as appropriate. If the Director of OPM determines that the Federal Executive Agency that employed the person no longer exists and the functions have not been transferred to another Federal Executive Agency, or it is impossible or unreasonable for the agency to reemploy the person, the Director of OPM shall identify a position of like seniority, status, and pay at another Federal Executive Agency that satisfies the reemployment criteria established for private sector employers, sections F. and G. of this appendix, and for which the person is qualified and ensure that the person is offered such position.

2. If a person was employed by the Judicial Branch or the Legislative Branch of the Federal Government when he or she departed for uniformed service, and the employer determines that it is impossible or unreasonable to reemploy the person, the Director of OPM shall, upon application by the person, ensure that an offer of employment in a Federal Executive Agency is made.

3. If the Adjutant General of a State determines that it is impossible or unreasonable to reemploy a person who was employed as a National Guard technician, the Director of OPM shall, upon application by the person, ensure that an offer of employment in a Federal Executive Agency is made.

I. Reemployment by Certain Federal Agencies

1. The heads of the Federal Bureau of Investigation, the Central Intelligence Agency, the Defense Intelligence Agency, the National Imagery and Mapping Agency, the National Security Agency, and, as determined by the President, any Executive Agency or unit thereof, the principal function of which is to conduct foreign intelligence or counterintelligence activities, shall prescribe procedures for reemployment rights for their agency that are similar to those prescribed for private and other Federal agencies.

2. If an appropriate officer of an agency referred to in subsection I.1. of this appendix determines that reemployment of a person who was an employee of that agency when he or she departed for uniformed service is impossible or unreasonable, the agency shall notify the person and the Director of OPM. The Director of OPM shall, upon application by that person, ensure that the person is offered employment in a position in a Federal Executive Agency.

J. General Rights and Benefits

1. A person who is reemployed under 38 U.S.C. Chapter 43 is entitled to the seniority, and other rights and benefits determined by seniority that the person had upon commencing uniformed service, and any additional seniority, and rights and benefits he or she would have attained if continuously employed.

2. A person who is absent by reason of uniformed service shall be deemed to be on furlough or leave of absence from his or her civilian employer and is entitled to such other rights and benefits not determined by seniority as generally provided by the employer to employees on furlough or leave of absence having similar seniority, status and pay who are also on furlough or leave of absence, as provided under a contract, policy, agreement, practice or plan in effect during the Service member's absence because of uniformed service.

3. The individual may be required to pay the employee cost, if any, of any funded benefit continued to the same extent other employees on furlough or leave of absence are required to pay.

K. Loss of Rights and Benefits

If, after being advised by his or her employer of the specific rights and benefits to be lost, a Service member, former Service member or applicant of uniformed service knowingly provided written notice of intent not to seek reemployment after completion of uniformed service, he or she is no longer entitled to any non-seniority based rights and benefits. This includes all non-seniority based rights and benefits provided under any contract, plan, agreement, or policy in effect at the time of entry into uniformed service or established while performing such service, and are generally provided by the employer to employees having similar seniority, status and pay who are on furlough or leave of absence.

L. Retention Rights

A person who is reemployed following uniformed service cannot be discharged from employment, except for cause:

1. Within 1 year after the date of reemployment if that person's service was 181 days or more; or,

2. Within 180 days after the date of reemployment if such service was 31 days or more but less than 181 days.

M. Accrued Leave

During any period of uniformed service, a person may, upon request, use any vacation, annual leave, or similar leave with pay accrued before the commencement of that period of service.

N. Health Plans

An employer who provides employee health plan coverage, including group health plans, must allow the Service member to elect to continue personal coverage, and coverage for his or her dependents under the following circumstances:

1. The maximum period of coverage of a person and the person's dependents under such an election shall be the lesser of:

a. The 18 month period beginning on the date on which the person's absence begins; or

b. The day after the date on which the person was required to apply for or return to a position or employment as specified in section D. of this appendix, and fails to do so.

2. A person who elects to continue health plan coverage may be required to pay up to 102 percent of the full premium under the plan, except a person on active duty for 30 days or less cannot be required to pay more than the employee's share, if any, for the coverage.

3. An exclusion or waiting period may not be imposed in connection with the reinstatement of coverage upon reemployment if one would not have been imposed had coverage not been terminated because of service. However, an exclusion or waiting period may be imposed for coverage of any illness or injury determined by the Secretary of Veterans Affairs to have been incurred in, or aggravated during, the performance of uniformed service.

O. Employee Pension Benefit Plans

1. This section applies to individuals whose pension benefits are not provided by the Federal Employees' Retirement System (FERS) or the Civil Service Retirement System (CSRS), or a right provided under any Federal or State law governing pension benefits for governmental employees.

2. A person reemployed after uniformed service shall be treated as if no break in service occurred with the employer(s) maintaining the employee's pension benefit plan. Each period of uniformed service, upon reemployment, shall be deemed to constitute service with the employer(s) for the purpose of determining the nonforfeitability of accrued benefits and accrual of benefits.

3. An employer reemploying a Service member or former Service member under 38 U.S.C. Chapter 43 is liable to the plan for funding any obligation attributable to the employer of the employee's pension benefit plan that would have been paid to the plan on behalf of that employee but for his or her absence during a period of uniformed service.

4. Upon reemployment, a person has three times the period of military service, but not to exceed five years after reemployment, within which to contribute the amount he or she would have contributed to the pension benefit plan if he or she had not been absent for uniformed service. He or she is entitled to accrued benefits of the pension plan that are contingent on the making of, or are derived from, employee contributions or elective deferrals only to the extent the person makes payment to the plan.

P. Federal Employees' Retirement System (FERS)

1. Federal employees enrolled in FERS who are reemployed with the Government are allowed to make up contributions to the Thrift Savings Fund over a period specified by the employee. However, the makeup period may not be shorter than two times nor longer than four times the period of absence for uniformed service.

2. Employees covered by the FERS are entitled to have contributions made to the Thrift Savings Fund on their behalf by the employing agency for their period of absence in an amount equal to one percent of the employee's basic pay. If an employee covered by FERS makes contributions, the employing agency must make matching contributions on the employee's behalf.

3. The employee shall be credited with a period of civilian service equal to the period of uniformed service, and the employee may elect, for certain purposes, to have his or her separation treated as if it had never occurred.

4. This benefit applies to any employee whose release from uniformed service, discharge from hospitalization, or other similar event make him or her eligible to seek reemployment under 38 U.S.C. Chapter 43 on or after August 2, 1990.

5. Additional information about Thrift Saving Plan (TSP) benefits is available in TSP Bulletins 95–13 and 95–20. A fact sheet is included in TSP Bulletin 95–20 which describes benefits and procedures for eligible employees. Eligible employees should contact their personnel office for information and assistance.

Q. Civil Service Retirement System (CSRS)

1. Employees covered by CSRS may make up contributions to the TSP, as in section P.1. of this appendix. However, no employer contributions are made to the TSP account of CSRS employees.

2. This benefit applies to any employee whose release from uniformed service, discharge from hospitalization, or other similar event makes him or her eligible to seek reemployment under 38 U.S.C. Chapter 43 on or after August 2, 1990.

3. Additional information about TSP benefits is available in TSP Bulletins 95–13 and 95–20. A fact sheet is included in TSP Bulletin 95–20 which describes benefits and procedures for eligible employees. Eligible employees should contact their personnel office for information and assistance.

R. Information and Assistance

Information and informal assistance concerning civilian employment and reemployment is available through the National Committee for Employer Support of the Guard and Reserve (NCESGR). NCESGR representatives can be contacted by calling 1–800–336–4590.

S. Assistance in Asserting Claims

1. A person may file a complaint with the Secretary of Labor if an employer, including any Federal Executive Agency or OPM, has failed or refused, or is about to fail or refuse, to comply with employment or reemployment rights and benefits. The complaint must be in writing, and include the name and address of the employer, and a summary of the allegation(s).

2. The Secretary of Labor shall investigate each complaint and, if it is determined that the allegation(s) occurred, make reasonable efforts to ensure compliance. If these efforts are unsuccessful, the Secretary of Labor shall notify the complainant of the results and advise the complainant of his or her entitlement to pursue enforcement.

3. The Secretary of Labor shall, upon request, provide technical assistance to a claimant and, when appropriate, to the claimant's employer.

T. Enforcement

1. State or Private Employers.

a. A person may request that the Secretary of Labor refer a complaint to the Department of Justice. If the Department of Justice is reasonably satisfied that the person is entitled to the rights or benefits sought, the Department of Justice may appear on behalf of, and act as attorney for, the complainant, and commence an action for appropriate relief, or the individual may commence an action on his or her own behalf in the appropriate Federal district court.

b. The district court hearing the complaint can require the employer to:

(1) Comply with the law;

(2) Compensate the person for any loss of wages or benefits suffered; and

(3) If the court determines that the employer willfully failed to comply with the law, pay the person an amount equal to the amount of lost wages or benefits as liquidated damages.

c. A person may file a private suit against an employer without the Secretary of Labor's assistance if he or she:

(1) Has chosen not to seek the Secretary's assistance;

(2) Has chosen not to request that the Secretary refer the complaint to the Department of Justice; or

(3) Has refused the Department of Justice's representation of his or her complaint.

d. No fees or court costs shall be charged or taxed against any person filing a claim.

VOL 63 ISS 15 JA 23 1998 UMI

The court may award the person who prevails reasonable attorney fees, expert witness fees, and other litigation expenses.

2. Federal Government as the Employer.

a. The same general enforcement procedures established for private employers are applied to Federal Executive Agencies as an employer; however, if unable to resolve the complaint, the Secretary of Labor shall refer the complaint to the Office of Special Counsel, which shall represent the individual in a hearing before the Merit Systems Protection Board if reasonably satisfied that the individual is entitled to the rights and benefits sought. The claimant also has the option of directly filing a complaint with the Merit Systems Protection Board on his or her own behalf.

b. A person who is adversely affected or aggrieved by a final order or decision of the Merit Systems Protection Board may petition the United States Court of Appeals for the Federal Circuit to review the final order or decision.

3. Federal Intelligence Agency as the Employer. An individual employed by a Federal Intelligence Agency listed in subparagraph I.1. of this appendix, may submit a claim to the inspector general of the agency.

Appendix B to Part 104—Sample Employer Notification of Uniformed Service

This is to inform you that (insert applicant or Service member's name) must report for military training or duty on (insert date). My last period of work will be on (insert date), which will allow me sufficient time to report for military duty. I will be absent from my position of civilian employment for approximately (enter expected duration of duty as specified on your orders, and include the applicable period you have to return or submit notification of your return to work) while performing military training or duty unless extended by competent military authority or delayed by circumstances beyond my control. I otherwise expect to return to work on (insert date).

Signature and date

Employer acknowledgment and date

Dated: January 16, 1998.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 98–1583 Filed 1–22–98; 8:45 am]

BILLING CODE 5000–04–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 270

RIN 0790–AG43

Compensation of Certain Former Operatives Incarcerated by the Democratic Republic of Vietnam

AGENCY: Office of Under Secretary of Defense for Personnel and Readiness, DoD.

ACTION: Final rule.

SUMMARY: This part implements section 657 of the National Defense Authorization Act for Fiscal Year 1997, which authorizes the Secretary of Defense to make payments to persons captured and incarcerated by the Democratic Republic of Vietnam. This part establishes policy and procedures concerning the payments to these persons.

EFFECTIVE DATE: This rule is effective May 15, 1997.

FOR FURTHER INFORMATION CONTACT: Alan Ridenour (703) 604–0821 or David Pronchick (703) 693–1066, Directorate of Compensation, Office of the Secretary of Defense, 4000 Defense Pentagon, Washington, D.C., 20301–4000.

SUPPLEMENTARY INFORMATION:

Executive Order 12866, "Regulatory Planning and Review"

It has been determined that this is not a significant rule as defined under section 3(f)(1) through 3(f)(4) of Executive Order 12866.

Public Law 96–354, "Regulatory Flexibility Act" (5 U.S.C. 601)

It has been determined that this rule will not have a significant economic impact on a substantial number of small entities because it affects only a limited number of Vietnamese Commandos who were incarcerated in North Vietnam, and as such, does not affect small entities.

Public Law 96–511, "Paperwork Reduction Act" (44 U.S.C. Chapter 35)

It has been certified that this rule does not impose reporting and recordkeeping requirements under the Paperwork Reduction Act of 1995. The reporting and recordkeeping requirements are exempt from this Act, as it directly involves active litigation in which the U.S. is a party. The specific exemption from the Paperwork Reduction Act is found in 5 CFR part 1320. The information collection in this final rule is exempt from OMB approval under Sec. 1320.4(a)(2), "Controlling Paperwork Burdens on the Public; Regulatory Changes Reflecting Recodification of the Paperwork Reduction Act".

Public Law 104–4, "Unfunded Mandates Report Act of 1995 (UMRA)"

It has been determined that this rule does not contain a federal mandate that may result in expenditures of $100 million or more for state, local, and tribal governments, in the aggregate, or the private sector in any one year.

List of Subjects in 32 CFR Part 270

Military personnel, Payments, Prisoners of war, Vietnam.

Accordingly, 32 CFR part 270 is revised to read as follows:

PART 270—COMPENSATION OF CERTAIN FORMER OPERATIVES INCARCERATED BY THE DEMOCRATIC REPUBLIC OF VIETNAM

Subpart A—General

Sec.
270.1 Purpose.
270.2 Definitions.
270.3 Effective date.

Subpart B—Commission

270.4 Membership.
270.5 Staff.

Subpart C—Standards and Verification of Eligibility

270.6 Standards of eligibility.
270.7 Verification of eligibility.

Subpart D—Payment

270.8 Authorization of payment.
270.9 Amount of payment.
270.10 Time limitations.
270.11 Limitation on disbursements.
270.12 Payment in full satisfaction of all claims against the United States.
270.13 No right to judicial review or legal cause of action.
270.14 Limitation on attorneys fees.
270.15 Waiver of notary requirement.

Subpart E—Appeal Procedures

270.16 Notice of the Commission's determinations.
270.17 Procedures for filing petitions for reconsideration.
270.18 Action on reconsideration.

Subpart F—Reports to Congress

270.19 Reports to Congress.

Appendix A to Part 270—Application for Compensation of Vietnamese Commandos

Authority: Sec. 657, Pub. L. 104–201, 110 Stat. 2422.

Subpart A—General

§ 270.1 Purpose.

The purpose of this part is to implement section 657 of the National Defense Authorization Act for Fiscal Year 1997 (Pub. L. 104–201), which authorizes the Secretary of Defense to make payments to persons who demonstrate to the satisfaction of the Secretary of Defense that the persons were captured and incarcerated by the Democratic Republic of Vietnam as a result of the participation by the persons in certain operations conducted by the Republic of Vietnam.

§ 270.2 Definitions.

(a) *Applicant.* A person applying for payments under this part.

(b) *Child of an eligible person.* A recognized natural child, an adopted child, or a stepchild who lived with the eligible person in a regular parent-child relationship.

(c) *The Commission.* The Commission authorized to oversee payments to certain persons captured and incarcerated by the Democratic Republic of Vietnam, established under this part.

(d) *Eligible person.* A person determined by the Commission as eligible for payment under subpart C of this part.

(e) *OPLAN 34A.* The operation carried out under the auspices of the government of South Vietnam and the U.S. Military Assistance Command Vietnam, Studies and Observations Group (MACV/SOG), starting in 1964, which inserted commandos into North Vietnam for the purpose of conducing intelligence and other military activities. OPLAN 34A also refers to predecessor operations which were precursors to OPLAN 34A operations. OP 35 refers to the small military units which were sent to conduct sabotage, reconnaissance, exploitation and other intelligence missions on or around the borders of Vietnam and Laos.

(f) *North Vietnam.* The Democratic Republic of Vietnam.

(g) *OSD.* The Office of the Secretary of Defense.

(h) *The Secretary.* The Assistant Secretary of Defense (Force Management Policy).

(i) *South Vietnam.* The Republic of Vietnam.

(j) *Spouse of an eligible person.* Someone who was married to that eligible person for at least 1 year immediately before the death of the eligible person.

(k) *Required declaration.* The statements to be signed and notarized in Appendix A to this part. All applicants must sign Part C and either Part A or Part B of Appendix A to this part.

§ 270.3 Effective date.

This part is effective on May 15, 1997.

Subpart B—Commission

§ 270.4 Membership.

The Secretary shall establish within OSD a Commission that is composed of the following voting members: one representative from the Office of the Under Secretary of Defense for Personnel and Readiness, who shall be the chairman of the Commission, one representative from the Office of the Under Secretary of Defense for Policy, and one representative from each of the military departments. Members of the Commission may be either military or civilian and all members must possess, at a minimum, a Secret clearance.

§ 270.5 Staff.

(a) The Commission will have a support staff, which will include staff members sufficient to expeditiously and efficiently process the applications for payments under this part. All members of the staff will possess, as a minimum, a Top Secret clearance because of the sensitive nature of the information that may require review in determining eligibility of claimants.

(b) The Secretary will ensure that the Commission has all administrative support, including space, office and automated equipment and translation services, needed for the efficient and expeditious review and payment of claims. The Secretary may task appropriate Department of Defense elements to provide such support, either through assignment of personnel or the hiring of independent contractors.

Subpart C—Standards and Verification of Eligibility

§ 270.6 Standards of eligibility.

(a) A person is eligible for payments under this part if such person:

(1) Was captured and incarcerated by North Vietnam as a result of his participation in operations conducted under OPLAN 34A or its predecessor operation; or

(2) Served as a Vietnamese operative under OP 35, and was captured and incarcerated by North Vietnamese forces as a result of the participation by the person in operations in Laos or along the Lao-Vietnamese border pursuant to OP 35, and

(i) Was captured and incarcerated by the North Vietnamese, and remained in captivity after 1973 (or died in captivity) after participation in OP 35, and

(ii) Has not previously received payment for the United States Government after 1972 from the period spent in captivity.

(b) In the case of a decedent who would have been eligible for a payment under this part if alive, payment will be made to the survivors of the decedent in the following order:

(1) To the surviving spouse of an eligible person; or

(2) If there is no surviving spouse of an eligible person, to the surviving children of an eligible person, in equal shares.

(c) A payment may not be made under this part to, or with respect to, a person who the Commission determines, based on the available evidence, served in the People's Army of North Vietnam or provided active assistance to the Government of North Vietnam or forces opposed to the Government of South Vietnam or the United States during any period from 1958 through 1975.

(d) The Commission will make reasonable efforts to publicize the availability of payments involved in this procedure, using existing public affairs channels.

§ 270.7 Verification of eligibility.

(a) All persons applying for payment under this part shall first submit a properly completed, signed and notarized Application for Compensation of Vietnamese Commandos as set out in Appendix A to this part, along will all corroborating documents and information required, to the Commission on Compensation, Office of the Secretary of Defense, 4000 Defense Pentagon, Washington, D.C. 20301–4000. Submission of an Application for Compensation of Vietnamese Commandos without properly signed and notarized declarations will automatically render the application ineligible for consideration by the Commission for payment. All applicants must sign and have notarized the declarations in Part C of the Application for Compensation of Vietnamese Commandos. In addition, all applicants must sign and have notarized the declaration in either Part A or Part B of the Application for Compensation of Vietnamese Commandos. If portions of the Application for Compensation of Vietnamese Commandos are not completed, the Commission may draw adverse inferences from the portions left incomplete.

(b) Staff Functions in the Verification of Eligibility Process. The Staff Director shall:

(1) Establish a database for logging and tracking Applications for Compensation of Vietnamese Commandos throughout the claims process, including appellate actions and final payment or denial of claims.

(2) Maintain a liaison with on-site personnel at the National Archives Center, College Park, Maryland, to organize and translate finance records for review.

(3) Upon receipt of each Application for Compensation of Vietnamese Commandos, research cases to verify eligibility of claimant to include reviewing and analyzing existing records.

(4) Forward applications (including support documentation) to other U.S. Government agencies as required (e.g., CIA, INS) for review of their records, as needed to acquire documentation that may aid in determining the eligibility of claimants to receive payments.

VOL 63 ISS 15 JA 23 1998 UMI

(5) Present any information or comments resulting from the research and review of cases, plus any reasonably available and probative information, to the Commission with a recommendation on the eligibility of applicants.

(6) If eligibility is favorably approved by the Commission, forward written requests to DFAS to effectuate payments.

(7) Prepare notification letters, on behalf of the Commission, for forwarding to claimants notifying them of the final determination concerning approval or disapproval of their applications.

(8) In coordination with the Army Budget Office and OSD, determine appropriate fund cite that will be used for payments.

(9) Assist in the preparation of required Reports to Congress.

(10) Determine administrative budgetary support requirements and submit funding request to OSD.

(11) Provide clerical and administrative support to the Commission.

(12) Create and maintain a system of records to manage all information generated by the processing of Applications for Compensation of Vietnamese Commandos under this part and to create an administrative record of actions by the Commission. All information received or originated from other Departments and agencies of the U.S. government will be retained, stored, and further disseminated only in accordance with pertinent law (e.g., 5 U.S.C. section 552(FOIA) and 5 U.S.C. section 552a (Privacy Act)) and conditions set by those originating Departments and agencies.

(c) Claims will be processed expeditiously. Within 18 months of actual receipt by the Commission of an Application for Compensation of Vietnamese Commandos, the Commission will determine the eligibility of the applicant. The standard for finding eligibility is whether the information reasonably available to the Commission indicates that the applicant is more likely than not to be eligible for a payment under this part. The burden of making a showing of eligibility shall be on the applicant. Upon determination of eligibility, the payment should be promptly accomplished.

(d) Applicants may request to appear in person before the Commission, which will retain discretion whether to grant such requests. The Commission may request the personal appearance or interview of any applicant as a condition of further consideration of his or her application if such appearance would significantly aid the Commission in its determination. All appearances shall be at the expense of the applicant.

Subpart D—Payment

§ 270.8 Authorization of payment.

Subject to the availability of appropriated funds, upon determination by the Commission of the eligibility of a person for payment, the Commission will authorize the Defense Finance and Accounting Service (DFAS) to make payments out of the funds appropriated for this purpose. Any payment authorized to a person under a legal disability, may, in the discretion of the Commission, be paid for the use of the person, to the natural or legal guardian, committee, conservator, or curator, or, if there is no such natural or legal guardian, committee, conservator, or curator, to any other person, including the spouse or children of such person, who the Commission determines is charged with the care of the person. The Commission will notify eligible persons of the process for disbursements.

§ 270.9 Amount of payment.

The amount payable to, or with respect to, an eligible person under this part is $40,000. If an eligible person can demonstrate to the satisfaction of the Commission that confinement or incarceration exceeded 20 years, the Commission may authorize payment of an additional $2,000 for each full year in excess of 20 (and a proportionate amount for a partial year), but the total amount paid to, or with respect to, an eligible person under this part may not exceed $50,000.

§ 270.10 Time limitations.

To be eligible for payments under this part, applicants must file Applications for Compensation of Vietnamese Commandos with the Commission within 18 months of the effective date of these regulations, May 15, 1997.

§ 270.11 Limitation on disbursements.

The Commission may, in its discretion, direct that the actual disbursement of a payment under this part be made only to the person who is authorized to receive the payment, and only upon the appearance of that person, in person, at any designated Defense Finance Accounting Service disbursement office in the United States. Upon approval of the Commission, payment may be made at such other location or in such other manner as the person authorized to receive payment may request in writing. In the case of an application authorized for payment but not disbursed as a result of the foregoing, the Secretary will hold the funds in trust for the person authorized to receive payment in an interest bearing account until such time as the person complies with the conditions for disbursement set out in this part.

§ 270.12 Payment in full satisfaction of all claims against the United States.

The acceptance of payment by, or with respect to, an eligible person under this part shall constitute full satisfaction of all claims by or on behalf of that person against the United States arising from the person's participation in operations under OPLAN 34A or OP35.

§ 270.13 No right to judicial review or legal cause of action.

Subject to subpart E of this part, all determinations by the Commission pursuant to this part are final and conclusive, notwithstanding any other regulation. Applicants under this part have no right to judicial review, and such review is specifically precluded. This part does not create or acknowledge any legal right or obligation whatsoever.

§ 270.14 Limitation on attorneys fees.

Notwithstanding any contract or agreement, the representative of a person authorized to receive payment under this part may not receive, for services rendered in connection with the claim of, or with respect to, a person under this part, more than 10 percent of a payment made under this part on such claim.

§ 270.15 Waiver of notary requirement.

In exceptional circumstances (e.g., overseas claimant) the requirement for notarizations may be waived at the discretion of the Commission.

Subpart E—Appeal Procedures

§ 270.16 Notice of the Commission's determinations.

Applicants whose claims for payment are denied in whole or in part by the Commission will be notified in writing of the determination. Applicants may petition the Assistant Secretary of Defense, Force Management Policy (or his designee) for a reconsideration of the Commission's determinations, and may submit any documentation in support of such petitions.

§ 270.17 Procedures for filing petitions for reconsideration.

A request for reconsideration must be made to the Secretary, care of the Staff Director of the Commission at the address of the Commission set out in § 270.7, within 45 days of receipt of the notice from the Commission of ineligibility. The Commission may waive that time limit for good cause shown.

§ 270.18 Action on reconsideration.

(a) The Assistant Secretary of Defense, Force Management Policy (or his designee) will:

(1) Review the Commission's administrative record of the original determination.

(2) Review additional information or documentation submitted by the applicant to support his or her petition for reconsideration.

(3) Determine whether the decision of the Commission should be affirmed, modified, or reversed.

(b) When there is a decision affirming the Commission's determinations, the Staff Director will notify the applicant in writing and include a statement of the reason for the affirmance.

(c) A decision of affirmance shall constitute the final action of the Department of Defense. The Secretary (or his designee) may decline to consider any subsequent petitions for reconsideration.

(d) When there is a decision modifying or reversing the Commission's determination, the notification should be immediately made to the Staff Director so as to implement the final action.

Subpart F—Reports to Congress

§ 270.19 Reports to Congress.

Not later than September 23, 1998, the Commission will prepare and the Secretary will submit to Congress a report on the payment of claims under this part. Subsequent to that initial report, the Commission will prepare and the Secretary will submit to Congress annual reports on the status of payment of claims.

Appendix A to Part 270—Application for Compensation of Vietnamese Commandos

All persons applying for payment shall submit a properly completed, signed and notarized Application for Compensation of Vietnamese Commandos, along with corroborating documents and information, to: Commission on Compensation, Office of the Secretary of Defense, 4000 Defense Pentagon, Washington, D.C. 20301–4000.

All applicants must sign and have notarized the declaration in Part C of the application. In addition, all applicants must sign and have notarized the declaration in either Part A or Part B of the application (as applicable).

Applicants must file applications within 18 months of the effective date of this part (15 May 1997): that is, *not later than 15 November 1998.*

Privacy Act Statement:

Authority: National Defense Authorization Act for Fiscal Year 1997, Public Law 104–201, Section 657.

Principal Purpose: To evaluate applications for cash payments for those individuals, or their surviving spouse or children, who were captured and incarcerated by North Vietnam as a result of participating in specified joint United States-South Vietnamese operations.

Routine Uses: To the Immigration and Naturalization Service and the Central Intelligence Agency for purposes of verifying information relating to the claimant's eligibility for payment. To the Department of Justice for purposes of representing the Department of Defense in *Au Dong Quy, et al./Lost Commandos* v. *The United States.*

Disclosure: Voluntary. However, if portions are not completed the Commission may draw adverse inferences from the incomplete portions.

Social Security Number: Providing a social security number is voluntary. If one is not provided, the application for payment will still be processed.

This application shall be executed by the person applying for eligibility, or his surviving spouse or children, or designated representatives of such persons.

Part A—Complete the following information on the person whose status as a former operative is the basis for applying for payment:

(1) Current legal name or legal name at death: _____

(a) Aliases: _____

(b) Former, or other legal names used: _____

(2) Current address or last address prior to death: _____

(3) Mailing address for compensation check in the event compensation is approved (may be different from commando's current/last address): _____

Part C—Required Documents:

All documents submitted in support of an application for payment should be originals when possible, or copies of the originals certified by the official custodian of the documents. If certified copies cannot be obtained, uncertified copies should be submitted. If uncertified copies cannot be obtained, submit sworn affidavits from two or more persons who have personal knowledge of the information sought.

For the Commando/Operative (Person Described in Part A, Above)

(1) Identification. A document with his current legal name and address (or legal name and address at death if deceased).

(2) Two or more sworn affidavits from individuals having personal knowledge of the person's identity (these should be submitted in addition to the document with current name and address).

(3) One document of date of birth. A birth certificate, or if unavailable, other proof of birth (e.g., passport).

(4) One document of name change, *if* the person's current legal name is not the same as when he was sent on the OPLAN 34A or OP 35 missions.

(5) One document of evidence of guardianship. This is only required if you are executing this document as the guardian of the person identified in PART A. If you are a legally-appointed guardian, submit a certificate executed by the proper official of the court appointment. If you are not such a legally-appointed guardian, submit an affidavit describing your relationship to the person and the extent to which you are responsible for the care of the person, or your position as an officer of the institution in which the person is institutionalized.

(6) One document of evidence of imprisonment. This should be a document issued by the government of North Vietnam showing the dates of the person's imprisonment.

(7) Any documents of evidence of participation in covered operations. These documents should be contracts, orders, or other operational documentation corroborating participation in clandestine operations under OPLAN 34A (or its predecessor) or OP 35.

For a Spouse or Surviving Child of a Deceased Person Described in Part A, Above

In addition to documents (1) through (7) above concerning the deceased person described in PART A, submit the following:

(8) One of the following documents as evidence of the Commando's death:

(a) A certified copy of extract from the public records of death, coroner's report of death, or verdict of a coroner's jury;

(b) A certificate by the custodian of the public record of death;

(c) A statement of the funeral director or attending physician or intern of the institution where death occurred;

(d) A certified copy, or extract from an official report or finding of death made by an agency or department of the United States government; or

(e) If death occurred outside the United States, an official report of death by a United States Consul or other employee of the State Department, or a copy of public record of death in the foreign country.

(f) If you cannot obtain any of the above evidence of the commando/operative's death, you must submit other convincing evidence, such as signed sworn statements of two or more persons with personal knowledge of the death, giving the place, date, and cause of death.

(g) If you are submitting an application as a surviving spouse, submit another document of the same type as evidence of the Commando's spouse's death.

For the Spouse of a Deceased Person Described in Part A Above

In addition to documents described in PART C items (1) through (8), above, each surviving spouse should submit the following:

(9) One of the following documents as evidence of your marriage to the deceased person:

(a) A copy of the public records of marriage, certified or attested, or an abstract of the public records, containing sufficient information to identify the parties, the date and place of marriage, and the number of prior marriages by either party if shown on the official record, issued by the officer having custody of the record or other public official authorized to certify the record, or a certified copy of the religious record of marriage;

(b) An official report from a public agency as to a marriage which occurred while the deceased person was employed by such agency;

(c) An affidavit of the clergyman or magistrate who officiated;

(d) The certified copy of a certificate of marriage attested to by the custodian of the records;

(e) The affidavits of two or more eyewitnesses to the ceremony; or

(f) In jurisdictions where "common law" marriages are recognized, an affidavit by the surviving spouse setting forth all of the facts and circumstances concerning the alleged marriage, such as the agreement between the parties at the beginning of their cohabitation, places and dates of residences, and whether children were born as the result of the relationship. This evidence should be supplemented by affidavits from two or more persons who know as the result of personal observation the reputed relationship which existed between the parties to the alleged marriage, including the period of cohabitation, places of residences, whether the parties held themselves out as husband and wife and whether they were generally accepted as such in the communities in which they lived.

(g) If you cannot obtain any of the above evidence of your marriage, you must submit any other evidence that would reasonably support a belief that a valid marriage actually existed.

(10) In addition, submit the following documents about ourself:

(a) Identification. A document with your current legal name and address plus two or more sworn affidavits from individuals having personal knowledge of your identity (these should be submitted in addition to the document with current name and address).

(b) One document of date of birth. A birth certificate, or if unavailable, other proof of birth (e.g. passport).

(c) One document of name change. If your current legal name is the same as that during the marriage, this section does not apply. Spouses whose current legal name is different than that used when married should submit a document or affidavits to corroborate the name change.

(d) One document of evidence of guardianship. If you are executing this document as the guardian of the spouse, you must submit evidence of your authority. If you are a legally-appointed guardian, submit a certificate executed by the proper official of the court appointment. If you are not such a legally-appointed guardian, submit an affidavit describing your relationship to the spouse and the extent to which you are responsible for the care of the spouse or your position as an officer of the institution in which the spouse is institutionalized.

For the Surviving Children

In addition to documents described in PART C items (1) through (8), above, each surviving child should submit the following:

(11) One document as evidence of your relationship to your parent (the deceased person described in PART A, above), as follows:

If A Natural Child:

(a) Birth certificate showing that the deceased person was your parent.

(b) If the birth certificate does not show the deceased person as your parent, a certified copy of:

(i) An acknowledgment in writing signed by the deceased person;

(ii) A judicial decree ordering the deceased person to contribute to your support;

(iii) The public record of birth or a religious record showing that the deceased person was named as your parent;

(iv) Affidavit of a person who knows that the deceased person accepted you as his child; or

(v) Public records, such as records of school or welfare agencies, which show that with the deceased person's knowledge, the deceased individual was named as your parent.

If An Adopted Child:

An adopted child must submit a certified copy of the decree of adoption.

If a Step-Child:

Submit all three of the following documents as evidence of the step-child relationship:

(a) One document as evidence of birth to the spouse of the deceased person, or other evidence that reasonably supports the existence of a parent-child relationship between you and the spouse of the deceased person;

(b) One document as evidence that you were either living with or in a parent-child relationship with the deceased person at the time of his death; and

(c) One document as evidence of the marriage of the deceased person and the spouse, such as a certified copy of the record of marriage, or an abstract of the public records containing sufficient information to identify the parties and the date and place of marriage issued by the officer having custody of the record, or a certified copy of a religious record of marriage.

(12) In addition, submit the following documents about yourself:

(a) Identification. A document with your current legal name and address plus two or more sworn affidavits from individuals having personal knowledge of your identify (these should be submitted in addition to the document with current name and address).

(b) One document of date of birth. A Birth certificate, or if unavailable, other proof of birth (e.g., passport).

(c) One document of name change. If your current legal name is the same as that shown on documents attesting to your birth, this section does not apply. Persons whose current legal name is different than that used on such documents should submit a document or affidavit to corroborate the name change.

(d) One document of evidence of guardianship. If you are executing this document as the guardian of the person identified as a surviving child of a deceased person, you must submit evidence of your authority. If you are a legally-appointed guardian, submit a certificate executed by the proper official of the court appointment. If you are not such a legally-appointed guardian, submit an affidavit describing your relationship to the child and the extent to which you are responsible for the care of the child, or your position as an officer of the institution in which the child is institutionalized.

Read the following statement carefully before signing this document. A false statement may be grounds for punishment by fine or imprisonment or both. This sworn declaration must accompany all documents submitted to the Commission, whether with or separate from the application.

For All Applicants

I declare under penalty of perjury under the laws of the United States of America that the foregoing documents provided in Part C are true and correct.

[Docket No. 971015246–7293–02; I.D. 010798C]

Fisheries of the Northeastern United States; Summer Flounder and Scup Fisheries; Adjustments to the 1998 Quotas; Commercial Summer Period Scup Quota Harvested for Massachusetts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Commercial quota adjustment, notice of commercial quota harvest.

SUMMARY: NMFS issues this notification announcing preliminary adjustments to the 1998 summer flounder commercial state quotas and the 1998 scup Summer period state quotas. This action complies with regulations that implement the Fishery Management Plan for the Summer Flounder, Scup, and Black Sea Bass Fisheries (FMP), which require that landings in excess of a state's annual summer flounder commercial quota and Summer period scup commercial quota be deducted from a state's respective quota the following year. The public is advised that preliminary quota adjustments have been made and is informed of the revised quotas for the affected states.

DATES: January 16, 1998, through December 31, 1998.

FOR FURTHER INFORMATION CONTACT: Regina L. Spallone, Fishery Policy Analyst, 508–281–9221.

SUPPLEMENTARY INFORMATION:

Summer Flounder

Regulations implementing summer flounder management measures are found at 50 CFR part 648, subparts A and G. The regulations require annual specification of a commercial quota that is apportioned among the Atlantic coastal states from North Carolina through Maine. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.100. The final specifications for the 1998 summer flounder fishery, adopted to ensure achievement of a fishing mortality rate (F) of 0.24 for 1998, set a commercial quota equal to 11,105,636 lb (5.0 million kg) (62 FR 66304, December 18, 1997).

Section 648.100(d)(2) provides that all landings for sale in a state shall be applied against that state's annual commercial quota. Any landings in excess of the state's quota must be deducted from that state's annual quota for the following year. NMFS published final specifications and noted that associated adjustments to states' 1998 quotas as a result of 1997 overages would be made. These data are presented as preliminary because some states remained open to 1997 summer flounder landings when these data were assembled by NMFS for the purposes of this notice. Since it is likely that additional data will be received from the states that would alter the figures, including late landings reported from either federally permitted dealers or state statistical agencies in a state that is currently closed to landings, an additional adjustment will be necessary.

The final quota figures reflect the approval of a commercial summer flounder quota transfer of 24,118 lb (10,940 kg) from New Jersey to Connecticut. The notification of approval of that transfer was filed with the **Federal Register** prior to the end of the 1997 quota year and was published on January 6, 1998 (63 FR 444).

Based on dealer reports and other available information, NMFS has determined that the States of Maine, Massachusetts, New York, Delaware, Maryland, and North Carolina exceeded their 1997 quotas. The remaining States of Rhode Island, Connecticut, New Jersey, and Virginia did not exceed their 1997 quotas. The final preliminary 1997 landings and resulting overages for all states are given in Table 1. The resulting adjusted 1998 commercial quota for each state is given in Table 2.

[3] Parentheses indicate a negative number.

Scup

Regulations implementing scup management measures are found at 50 CFR part 648, subparts A and H. The regulations require annual specification of a commercial quota that is allocated into three periods: Winter I, Summer, and Winter II. During Winter I and Winter II periods, the commercial quota is distributed to the coastal states from Maine through North Carolina on a coastwide basis. During the Summer period, the commercial quota is apportioned among the Atlantic coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state during the Summer period is described in § 648.120. The final specifications for the 1998 scup fishery, adopted to ensure achievement in 1998 of a target exploitation rate of 47 percent, the rate associate with F=0.72, set a commercial quota equal to 4,572,000 lb (2.07 million kg) and a Summer period allocation equal to 1,780,794 lb (0.81 million kg) (62 FR 66304, December 18, 1997).

Section 648.120(d)(4) provides that all landings for sale in a state shall be applied against that state's annual commercial quota. Section 648.120(d)(6) provides that any overages of the commercial quota landed in any state during the Summer period will be deducted from that state's Summer period quota for the following year. NMFS published final specifications and noted that associated adjustments to states' 1998 Summer period quotas as a result of 1997 overages would be made. If additional data are received from any state that would alter the figures, including late landings reported from either federally permitted dealers or state statistical agencies, an additional adjustment will be necessary.

Based on dealer reports and on other available information, NMFS has determined that the Commonwealth of Massachusetts and the State of North Carolina have exceeded their 1997 Summer period quotas for scup. The remaining States of Maine, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia did not exceed their 1997 Summer period quotas. The final preliminary 1997 landings and resulting state overages are given in Table 3. The resulting adjusted 1998 commercial Summer period quota for each state is given in Table 4.

TABLE 3.—PRELIMINARY 1997 SUMMER PERIOD COMMERCIAL LANDINGS AND RESULTING OVERAGES BY STATE FOR SCUP

NC	479	217	219	99
Total	1,780,794	807,755	714,380	324,037

[1] Kilograms, converted from pounds, may not necessarily add due to rounding.
[2] Parentheses indicate a negative number.

Section 648.121(b) requires the Administrator, Northeast Region, NMFS (Regional Administrator) to monitor the Summer period state commercial quotas and determine the date when a state's commercial quota is harvested. NMFS is required to publish notification in the **Federal Register** advising a state and notifying vessel and dealer permit holders that, effective upon a specific date, a state's Summer period commercial quota has been harvested and that no Summer period commercial quota is available for landing scup for the remainder of the period.

Since this adjustment reduces the 1998 Massachusetts Summer period commercial quota allocation from 275,866 lb (125,131 kg) to −790,288 lb (−358,469 kg), this notification also serves to announce that the Summer period quota available to Massachusetts has been harvested and that no commercial quota is available for landings during the 1998 Summer period.

The regulations at § 648.4(b) provide that Federal scup commercial permit holders agree as a condition of the permit not to land scup in any state that the Regional Administrator has determined no longer has commercial quota available. Therefore, effective 0001 hours May 1, 1998, until 2400 hours October 31, 1998, landings of scup in Massachusetts by vessels holding Federal commercial scup fisheries permits are prohibited, unless additional quota becomes available through a transfer and is announced in the **Federal Register**. Federally permitted dealers are also advised that they may not purchase scup from federally permitted scup vessels that land in Massachusetts for the Summer period, or until additional quota becomes available through a transfer. If Massachusetts fails to obtain this quota transfer, it is probable that the scup fishery in the Commonwealth will remain closed for additional Summer periods beyond 1998. The fishery may remain closed until its allocated quota is sufficient to allow the fishery to reopen.

Classification

This action is required by 50 CFR part 648 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 15, 1998.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 63, No. 15
Friday, January 23, 1998

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of Procurement and Property Management

7 CFR Part 3200

RIN 0500–AA00

Uniform Procedures for the Acquisition and Transfer of Excess Personal Property

AGENCY: Office of Procurement and Property Management, USDA.

ACTION: Notice of proposed rule making.

SUMMARY: The proposed rulemaking sets forth uniform procedures for the acquisition and transfer of excess personal property to the 1890 Land Grant Institutions (including Tuskegee University), the 1994 Land Grant Institutions and the Hispanic-Serving Institutions in support of research, educational, technical, and scientific activities or for related programs as authorized by section 923 of the Federal Agriculture Improvement and Reform Act (FAIR) of 1996 (Pub. L. No. 104–127), 7 U.S.C. 2206a.

DATES: Comments are due by February 23, 1998.

ADDRESSES: Send your comments to Linda W. Oliphant, U.S. Department of Agriculture, Office of Procurement and Property Management (OPPM), Property Management Division, (PMD), Room 1520 South Building, 1400 Independence Avenue, SW., Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Denise R. Hayes or Linda W. Oliphant, U.S. Department of Agriculture, Office of Procurement and Property Management, Property Management Division, Room 1520 South Building, 1400 Independence Avenue, SW., Washington, DC 20250, (202) 720–3141.

SUPPLEMENTARY INFORMATION: Section 923 of the FAIR Act, 7 U.S.C. 2206a, authorizes the Secretary of Agriculture to convey title to excess personal property, with or without monetary compensation to the 1994 Institutions (as defined in section 532 of the Equity in Educational Land-Grant Status Act of 1994, 7 U.S.C. 301 note); to any Hispanic-Serving Institution (as defined in section 316(b)) of the Higher Education Act of 1965, 20 U.S.C. 1059c(b); and to any college or university eligible to receive funds under the Act of August 30, 1890, 7 U.S.C. 321 *et seq.*, including Tuskegee University. Pursuant to the authority provided in section 923 USDA proposes to add part 3200 to title 7 of Code of Federal Regulations to establish uniform procedures for the acquisition and transfer of excess personal property to the designated institutions. This document includes not only the Department of Agriculture (USDA) procedures to implement 7 U.S.C. 2206a, but draws upon the General Services Administration (GSA) regulations concerning the disposal of excess personal property.

Paperwork Reduction

The information collection and recordkeeping requirements to implement these procedures have been cleared by the Office of Management and Budget (OMB), under 0505–0019, in accordance with the Paperwork Reduction Act, 44 U.S.C. 3500 *et seq.*

Classification

This proposed rule was reviewed under Executive Order 12866, and it has been determined that it is not a significant regulatory action because it will not have an annual effect on the economy of $100 million or more or adversely and materially affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, Local, or Tribal governments or communities. This proposed rule will not create any serious inconsistencies or otherwise interfere with any actions taken or planned by another agency. It will not materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof.

Regulatory Flexibility

The Department of Agriculture certifies that this proposed rule will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

Executive Order 12988

The proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. The proposed rule meets the applicable standards in section 3 of Executive Order 12988.

List of Subjects in 7 CFR Part 3200

Excess government property, Government property, Government property management.

For the reasons set forth in the preamble, the Department of Agriculture proposes to establish chapter XXXII in title 7 of the Code of Federal Regulations to read as follows:

CHAPTER 32—OFFICE OF PROCUREMENT AND PROPERTY MANAGEMENT, DEPARTMENT OF AGRICULTURE

Part 3200 Department of Agriculture guidelines for the acquisition and transfer of excess personal property

3201—3299 [Reserved]

PART 3200—DEPARTMENT OF AGRICULTURE GUIDELINES FOR THE ACQUISITION AND TRANSFER OF EXCESS PERSONAL PROPERTY

Sec.
3200.1 Purpose.
3200.2 Eligibility.
3200.3 Definitions.
3200.4 Procedures.
3200.5 Dollar limitation.
3200.6 Restrictions.
3200.7 Title.
3200.8 Costs.
3200.9 Accountability and recordkeeping.
3200.10 Disposal.
3200.11 Liabilities and losses.

Authority: 5 U.S.C. 301; 7 U.S.C. 2206a.

§ 3200.1 Purpose.

This part sets forth the procedures to be utilized by USDA, Office of Procurement and Property Management (OPPM) in the acquisition and transfer of excess property to the 1890 Land Grant Institutions (including Tuskegee University), 1994 Land Grant Institutions, and the Hispanic-Serving Institutions in support of research, educational, technical, and scientific activities or for related programs as authorized by 7 U.S.C. 2206a. Title to the personal property shall pass to the institution.

§ 3200.2 Eligibility.

Institutions that are eligible to receive Federal excess personal property

VOL 63 ISS 15 JA 23 1998 UMI

pursuant to the provision of this part are the 1890 Land Grant Institutions (including Tuskegee University), 1994 Land Grant Institutions, and the Hispanic-Serving Institutions conducting research, educational, technical, and scientific activities or related programs.

§ 3200.3 Definitions.

(a) *1890 Land grant institutions*—any college or university eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et.seq.), including Tuskegee University.

(b) *1994 Land grant institutions*—any of the tribal colleges or universities as defined in Section 532 of the Equity in Educational Land-Grant Status Act of 1994.

(c) *Hispanic-serving institutions*—institutions of higher education as defined in section 316(b) of the Higher Education Act of 1965 (20 U.S.C. 1059c (b)).

(d) *Property management officer*—is an authorized Department of Agriculture or institution official responsible for property management.

(e) *Screener*—is an individual designated by an eligible institution and authorized by the General Services Administration (GSA) to visit property sites for the purpose of inspecting personal property intended for use by the institution.

(f) *Excess personal property*—is any personal property under the control of a Federal agency that is no longer needed.

(g) *Cannibalization*—is the dismantling of equipment for parts to repair or enhance other equipment.

§ 3200.4 Procedures.

(a) To receive information concerning the availability of Federal excess personal property, an eligible institution's property management officer may contact their regional GSA, Accountable Utilization Officer. All property management officers of eligible institutions will be placed on the Department of Agriculture's mailing list for information on the availability of property. USDA excess property first will be screened by USDA agencies through the Departmental Excess Personal Property Coordinator (DEPPC) using the PMIS/PROP system.

(b) Excess property selected by screeners of eligible institutions should be inspected whenever possible, or the holding agency should be contacted to verify the condition of the items, because interpretation of condition codes varies among agencies.

(c) If the condition of the item is acceptable, the institution should "freeze" (reserve) items by calling the appropriate GSA office or USDA's Departmental Excess Personal Property Coordinator (DEPPC). Items are usually allocated on a "first come-first serve basis." Since GSA may have several "freezes" on a piece of equipment, it is critical that the paperwork be submitted as soon as possible.

(d) Property requests are submitted by mail or fax on a Standard Form 122, "Transfer Order Excess Personal Property," with a written justification statement explaining how the property will be used for research, educational, technical, or scientific activity or for related programs.

(e) The SF–122 should be forwarded to USDA, OPPM/PMD for approval. As confirmation of approval, the institution's Property Management Officer will receive a stamped copy of the SF–122. If the request is disapproved, it will be returned to the Property Management Officer with an appropriate explanation.

(f) Once the excess personal property is physically received, the institution is required to immediately return a copy of the SF–122, to OPPM/PMD, indicating receipt of requested items. Cancellations should also be reported to OPPM/PMD.

Note: OPPM/PMD shall send an informational copy of all USDA transactions to GSA.

§ 3200.5 Dollar limitation.

There is no dollar limitation on excess personal property obtained under these procedures.

§ 3200.6 Restrictions.

(a) The Department's authorized official will approve the transfer of excess personal property in the following groups for the 1890 Land Grant Institutions (including Tuskegee University), 1994 Land Grant Institutions and the Hispanic-Serving Institutions in support of research, educational, technical, and scientific activities or for related programs.

Eligible Federal supply code groups	Name
12	Fire Control Equipment.
19	Ships, Small Crafts, Pontoons, and Floating Docks.
22	Railway Equipment.
23	Vehicles, Motor Vehicles, Trailers and Cycles.
24	Tractors.
26	Tires and Tubes.
28	Engines, Turbines and Components.
29	Engine Accessories.
30	Mechanical Power Transmission Equipment.
31	Bearings.
32	Woodworking Machinery and Equipment.
34	Metal Working Machinery.
35	Service and Trade Equipment.
36	Special Industry Machinery.
37	Agricultural Machinery and Equipment.
38	Construction, Mining, Excavating, and Highway Maintenance Equipment.
39	Material Handling Equipment.
40	Rope, Cable, Chain, and Fittings.
41	Refrigeration, Air Conditioning and Air Circulating Equipment.
42	Fire Fighting, Rescue, and Safety Equipment.
43	Pumps, Compressors.
44	Furnace, Steam Plant, and Drying.
45	Plumbing, Heating, and Sanitation Equipment; and Nuclear Reactors.
46	Water Purification and Sewage Treatment Equipment.
47	Pipe, Tubing, Hose, and Fittings.
49	Maintenance and Repair Shop Equipment.
51	Hand Tools.
52	Measuring Tools.
53	Hardware and Abrasives.
54	Prefabricated Structures and Scaffolding.
55	Lumber, Millwork, Plywood, and Veneer.
56	Construction and Building Materials.
58	Communication, Detection, and Coherent Radiation Equipment.
59	Electrical and Electronic Equipment Components.
60	Fiber Optics Materials, Components, Assemblies, and Accessories.
61	Electric Wire, and Power and Distribution Equipment.
62	Lighting Fixtures and Lamps.
63	Alarm, Signal, and Security Detection Systems.
65	Medical, Dental, and Veterinary Equipment and Supplies.
66	Instruments and Laboratory Equipment.
67	Photographic Equipment.
69	Training Aids and Devices.
70	General Purpose Automatic Data Processing Equipment (Including Firmware), Software, and Support Equipment.
71	Furniture.
72	Household and Commercial Furnishings and Appliances.
73	Food Preparation and Serving Equipment.
74	Office Machines, Text Processing Systems and Visible Record Equipment.
75	Office Supplies and Devices.
76	Books, Maps, and Other Publications.
77	Musical Instruments, Phonographs, and Home-type Radios.
78	Recreational and Athletic Equipment.
79	Cleaning Equipment and Supplies.
80	Brushes, Paints, Sealers, and Adhesives.
81	Containers, Packaging and Packing Supplies.
83	Textiles, Leather, Furs, Apparel and Shoe Findings, Tents, and Flags.
84	Clothing, Individual Equipment and Insignia.
85	Toiletries.
87	Agricultural Supplies.
88	Live Animals.
91	Fuels, Lubricants, Oils and Waxes.
93	Nonmetallic Fabricated Materials.
94	Nonmetallic Crude Materials.
95	Metal Bars, Sheets, and Shapes.
96	Ores, Minerals and Their Primary Products.
99	Miscellaneous.

Note: Requests for items in FSC Groups other than the above shall be referred to the Director of OPPM for consideration and approval.

(b) Excess personal property may be transferred for the purpose of cannibalization, provided the institution submits a supporting statement which clearly indicates that cannibalizing the requested property for secondary use has greater benefit than utilization of the item in its existing form.

§ 3200.7 Title.

Title to excess personal property obtained under part 3200 will automatically pass to the 1890 Land Grant Institutions (including Tuskegee University), 1994 Land Grant Institutions, and the Hispanic-Serving Institutions once OPPM/PMD receives the SF–122 indicating that the institution has received the property.

§ 3200.8 Costs.

Excess personal property under this law is free of charge. However, the institution must pay all costs associated with packaging and transportation. The institution should specify the method of shipment on the SF–122.

§ 3200.9 Accountability and recordkeeping.

USDA requires that Federal excess personal property received by an eligible institution pursuant to this Part shall be placed into use for a research, educational, technical, or scientific activity or for related purpose within 1 year of receipt of the property and used for such purpose for at least 1 year thereafter. The institution's Property Management Officer must maintain accountable records identifying the property's location, description, utilization and value. The use of excess Federal personal property received under this part is subject to inspection by an authorized representative of USDA at all reasonable times.

§ 3200.10 Disposal.

When the property is no longer needed by the institution, it may be used in support of other Federal projects or sold and the proceeds used for research, educational technical, and scientific activities or for related programs of the recipient institution.

§ 3200.11 Liabilities and losses.

USDA assumes no liability with respect to accidents, bodily injury, illness, or any other damages or loss related to excess personal property transferred under this Part.

PARTS 3201–3299—[RESERVED]

W. R. Ashworth,

Director, Office of Procurement and Property Management.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–ANE–45–AD]

RIN 2120–AA64

Airworthiness Directives; Pratt & Whitney JT8D Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to Pratt & Whitney JT8D series turbofan engines. This proposal would require a one-time visual and eddy current inspection of certain stage 3–4 low pressure compressor (LPC) disks and stage 7–12 high pressure compressor (HPC) disks identified by part number and serial number, for arc burns in tie rod, shielding, and pressure balance holes, and, if necessary, repair of tie rod holes. This proposal is prompted by reports of improper fixturing during the electrolytic cleaning process of certain compressor disks at a certified repair station, Avial, currently Greenwich Air Services Inc., certificate number RA1R445K of Dallas, Texas, that can result in damage to the disks in the form of arc burns. The actions specified by the proposed AD are intended to prevent compressor disk cracking from arc burns in tie rod holes, shielding holes, or pressure balance holes, which could lead to a fracture of a compressor disk, resulting in uncontained release of engine fragments, inflight engine shutdown, and airframe damage.

DATES: Comments must be received by February 23, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–ANE–45–AD, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may also be sent via the Internet using the following address: "9–ad–engineprop@faa.dot.gov". Comments sent via the Internet must contain the docket number in the subject line. Comments may be inspected at this location between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Greenwich Air Services, 9311 Reeves Street, Dallas TX 75235–2095; telephone (214) 956–5310, fax (214) 956–5523. This information may be examined at the FAA, New England Region, Office of the Regional Counsel, 12 New England Executive Park, Burlington, MA.

FOR FURTHER INFORMATION CONTACT: Christopher Spinney, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (781) 238–7175, fax (781) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before

VOL 63 ISS 15 JA 23 1998 UMI

the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–ANE–45–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Regional Counsel, Attention: Rules Docket No. 97–ANE–45–AD, 12 New England Executive Park, Burlington, MA 01803–5299.

Discussion

The Federal Aviation Administration (FAA) received a report of certain low pressure compressor (LPC) and high pressure compressor (HPC) disks, installed on Pratt & Whitney (PW) JT8D series turbofan engines, that were improperly fixtured during the electrolytic cleaning process at a certain repair station. This improper fixturing can lead to damage to compressor disks in the form of arc burns. Arc burns can degrade disk material properties and create a stress concentration that results in premature cracking of a disk and subsequent failure. This condition, if not corrected, could result in compressor disk cracking from arc burns in tie rod holes, shielding holes, or pressure balance holes, which could lead to a fracture of a compressor disk, resulting in uncontained release of engine fragments, inflight engine shutdown, and airframe damage.

A metallurgical laboratory procedure and a new highly sensitive eddy current inspection technique have been developed to identify arc-burn defects. Because the inspections and repair require familiarization with newly developed techniques and require facilities, equipment and personnel outside the scope of a typical repair facility, the FAA has determined that only the facility named in the AD are currently approved to perform the required inspections and repairs. Operators who desire to use another facility must apply for approval using the alternate method of compliance procedure provided in paragraph (d) of the AD.

The FAA has reviewed and approved the technical contents of Greenwich Air Services Technical Instruction (TI) 885 dated, October 20, 1997, that describes procedures for visual and eddy current inspections and repairs for compressor disks which have been exposed to the potential of arc burn.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require, at the next shop visit after the effective date of this AD, a one-time visual and eddy current inspection of compressor disks to detect arc burn damage and if appropriate, repair of damaged area. The actions would be required to be accomplished in accordance with the technical instruction described previously.

There are a total of 1,388 compressor disks exposed to improper fixturing during the electrolytic cleaning process. The FAA estimates that 1,054 of these disks currently remain in service in the worldwide fleet, which represents approximately 210 engines. The FAA also estimates that 840 of the disks affected by the proposed AD are installed in engines installed on aircraft of U.S. registry. It will take approximately 30 work hours to accomplish the proposed actions per disk, and that the average labor rate is $60 per work hour. Required parts would cost approximately $23 per disk. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $1,531,320.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Pratt & Whitney: Docket No. 97–ANE–45–AD.

Applicability: Pratt & Whitney (PW) JT8D–1, –1A, –1B, –7, –7A, –7B, –9, –9A, –11, –15, –15A, –17, –17A, –17R, –17AR, –209, –217, –217A, –217C, and –219 model turbofan engines which have a compressor disk installed identified by part number and serial number in Table 1 of this AD. These engines are installed on but not limited to Boeing 727 and 737 series, and McDonnell Douglas DC–9 and MD80 series aircraft.

Note 1: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent compressor disk cracking from arc burns in tie rod holes, shielding holes, or pressure balance holes, which could lead to a fracture of a compressor disk, resulting in uncontained release of engine fragments,

inflight engine shutdown, and airframe damage, accomplish the following:

(a) At the next shop visit after the effective date of this AD, remove, visually inspect, eddy current inspect, and repair or replace with a serviceable part disks identified by part number and serial number in Table 1 of this AD in accordance with Greenwich Air Services Technical Instruction (TI) 885, dated October 20, 1997.

(b) For the purpose of this AD, a shop visit is defined as an engine removal, where engine maintenance entails separation of pairs of major mating engine flanges or the removal of a disk, hub, or spool regardless of other planned maintenance.

(c) The accomplishment of the inspections and repairs specified in this AD must be performed at Greenwich Air Services Inc., certificate number RA1R445K of Dallas, Texas. Operators wishing to use another facility to perform the required inspections and repairs must apply for an alternate method of compliance in accordance with paragraph (d) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. Operators shall submit their request through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note 2: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the aircraft to a location where the inspection requirements of this AD can be accomplished.

Issued in Burlington, Massachusetts, on January 8, 1998.

James C. Jones,

Assistant Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Office of the Secretary

14 CFR Part 255

[Docket No. OST–97–2881]

RIN 2105–AC65

Computer Reservations System (CRS) Regulations (Part 255)

AGENCY: Office of the Secretary (DOT).

ACTION: Advanced notice of proposed rulemaking; notice extending reply comment period.

SUMMARY: The Department began a rulemaking to determine whether it should continue or modify its existing rules governing airline computer reservations systems (CRSs). On September 10, 1997, the Department published an advance notice of proposed rulemaking asking for comments on that matter. The Department is now extending the due date for reply comments on the advance notice to February 3, 1998, from the current due date, January 23. The Department is acting due to a party's request for an extension based on the complexity of the issues and the large number of comments.

DATES: Comments are due by February 3, 1998.

ADDRESSES: Reply comments must be filed in Room PL–401, Docket OST–97–2881, U.S. Department of Transportation, 400 7th St. SW., Washington , DC 20590. Late filed comments will be considered to the extent possible. To facilitate consideration of comments, each commenter should file six copies of its comments.

FOR FURTHER INFORMATION CONTACT: Thomas Ray, Office of the General Counsel, 400 Seventh St. SW., Washington, DC 20590, (202) 366–4731.

SUPPLEMENTARY INFORMATION: The Department's rules governing CRS

VOL 63 ISS 15 JA 23 1998 UMI

operations—14 CFR part 255—will expire on March 31, 1999, unless the Department readopts them or changes the rules' termination date to a later date. 62 FR 66272, December 18, 1997. We published an advance notice of proposed rulemaking to begin a proceeding for reexamining the rules and determining whether they should be readopted and, if so, whether they should be changed. 62 FR 47606, September 10, 1997. Under our modified schedule, the reply comments are due January 23 (the comments were due December 9). 62 FR 58700, October 30, 1997.

American Airlines, the principal owner of Sabre, the largest system and a major user of every system's services, has asked us to change the due date for reply comments to February 3, 1998 (as requested by our staff, American served its request on every commenter, so that all parties will be aware of its request). American notes that many comments were filed in response to our advance notice, that those comments raised a number of complex issues, and that some parties did not file their comments until well after the due date for comments. American contends that an extension of time for the reply comments is needed to ensure that all interested persons have a reasonable opportunity to review the initial comments and to prepare their reply comments. We intend to complete our rulemaking as soon as reasonably possible, given the impact of computer reservations system practices on airline competition, the public's ability to obtain accurate and complete information on airline services, and the airline and travel agency businesses. We have nonetheless decided to grant the short extension requested by American. Many parties filed comments, and those comments dealt with a number of difficult issues. We are likely to have a better record for preparing a notice of proposed rulemaking if we enable the parties to prepare reply comments that discuss in depth all of the issues. We will therefore extend the due date for reply comments to February 3.

Issued in Washington, D.C. on January 16, 1998.

Nancy E. McFadden,

General Counsel.

BILLING CODE 4810–82–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

Voting by Interested Members of Self-Regulatory Organization Governing Boards and Committees

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rulemaking.

SUMMARY: On May 3, 1996, the Commodity Futures Trading Commission ("Commission") published for comment in the **Federal Register** a proposed new Regulation 1.69 [1] that would implement the statutory directives of Section 5a(a)(17) of the Commodity Exchange Act ("CEA") as it was amended by Section 217 of the Futures Trading Practices Act of 1992 ("FTPA").[2] The Commission received eleven comment letters in response to the proposed rulemaking. Based upon those comments, the Commission has amended its proposed rulemaking and has determined to publish a revised proposed rulemaking for additional public comment.

Proposed Commission Regulation 1.69 would require self-regulatory organizations ("SRO") to adopt rules prohibiting governing board, disciplinary committee, and oversight panel members from deliberating or voting on certain matters where the member had either a relationship with the matter's named party in interest or a financial interest in the matter's outcome. The proposed rulemaking also would amend Commission Regulations 1.41 and 1.63 to make modifications made necessary by proposed Commission Regulation 1.69.

DATES: Comments on the proposed rule and rule amendments must be received by February 23, 1998.

FOR FURTHER INFORMATION CONTACT: David P. Van Wagner, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581; Telephone: (202) 418–5481.

SUPPLEMENTARY INFORMATION:

I. Introduction

Section 217 of the FTPA amended Section 5a(a)(17) of the CEA to require that contract markets "provide for the avoidance of conflict of interest in deliberations by [their] governing board[s] and any disciplinary and oversight committee[s]." [3] On May 3, 1996, the Commission published for public comment in the **Federal Register** a proposed new Regulation 1.69 which required SROs to adopt rules prohibiting governing board, disciplinary committee and oversight panel members from deliberating and voting on certain matters where the member had either a relationship with the matter's named party in interest or a financial interest in the matter's outcome.[4] The Commission also proposed to make related amendments to existing Commission Regulations 1.3, 1.41 and 1.63.

II. Comments Received

The Commission received eleven comment letters in response to its proposed rulemaking. The comment letters were submitted by six futures exchanges (the Chicago Board of Trade ("CBT"), the Chicago Mercantile Exchange ("CME"), the Coffee, Sugar & Cocoa Exchange, Inc. ("CSC"), the Kansas City Board of Trade ("KCBT"), the New York Cotton Exchange ("NYCE"), and the New York Mercantile Exchange ("NYMEX")); two futures clearing organizations (the Board of Trade Clearing Corporation ("BOTCC") and the Commodity Futures Clearing Corporation of New York ("CFCCNY")); two futures trade associations (the Equity Owners' Association of the CME ("EOA") and the Futures Industry Association ("FIA")); and a registered futures association ("RFA") (the National Futures Association ("NFA")).

The Commission has reviewed these comments carefully and has decided to issue for public comment re-proposed versions of Regulation 1.69 and amended Regulations 1.41 and 1.63 with modifications from the originally-proposed versions. The following section of this release analyzes the Commission's rulemaking. Each provision of the Commission's originally-proposed rulemaking is described along with a discussion of comments which were made on that particular provision, an indication of how the provision has been amended in

[1] 61 FR 19869 (May 3, 1996).

[2] Pub. L. No. 102–546, § 217, 106 Stat. 3590 (1992).

[3] For the purposes of this release, the term *committee* generally will be used to include governing boards, disciplinary committees and oversight panels unless otherwise specified. This proposed rulemaking's definitions of governing board, disciplinary committee, oversight panel and SRO are discussed below in Section III.A.

[4] 61 FR 19869 (May 3, 1996). In that same **Federal Register** release, the Commission also published for public comment a proposed new Regulation 156.4 which required contract markets to make more readily available to the public the identity of members of broker associations at their respective exchanges. The Commission adopted Regulation 156.4, with minor modifications, on August 2, 1996. 61 FR 41496 (August 9, 1996).

this proposed rulemaking, and an explanation of the Commission's rationale for amending the provision.[5]

A. Reason for Rulemaking

The Commission notes that in addition to comments on particular provisions, there also were several general comments on the originally-proposed rulemaking. The BOTCC, CBT and CFCCNY each commented that no provision of CEA Section 5a(a)(17) requires that the Commission adopt a conflict of interest regulation other than Section 5a(a)(17)(C)'s requirement that the Commission establish conditions under which committee members required to abstain from voting on significant actions in which they have a substantial financial interest may nevertheless participate in deliberations. The NYCE similarly commented that Regulation 1.69 should be confined to the areas specified by CEA Section 5a(a)(17) and that, instead of a Commission rulemaking, SRO committees should only have to follow the traditional "bad faith" standard when determining conflicts of interest.[6]

The commenters are correct in stating that paragraph (C) of Section 5a(a)(17) is the only provision that requires Commission rulemaking. The other provisions require SRO rules. Such rules, however, must be submitted for Commission review pursuant to either CEA Section 5a(a)(12)(A), in the case of contract markets, and CEA Section 17(j), in the case of registered futures associations. The Commission believes, therefore, that it is appropriate to establish by rulemaking the standards with which such SRO rules must conform.

While proposed Regulation 1.69 would implement the provisions of CEA Section 5a(a)(17), the proposed rulemaking also would give content to the "bad faith" standard traditionally applied to futures exchange governing boards.[7] By establishing specific factors to be considered with respect to barring persons with potential financial or personal interests from deliberating and voting on committee decisions, the Commission believes that proposed Regulation 1.69 would reduce the potential for collateral attack of such committee decisions on the grounds that they were made in "bad faith." The Commission has structured proposed Regulation 1.69 to provide guidance to SROs, consistent with the new provisions of the CEA, on what type of circumstances could be the basis for "bad faith" challenges.

The BOTCC commented that the SROs, not the Commission, should adopt procedures to address conflict of interest situations. The Commission notes that, while proposed Regulation 1.69 would establish minimum standards for conflict of interest restrictions, the SROs would have a large degree of discretion when they formulated their required implementing rules to adopt the procedures that were most compatible with their committees' structures and practices.

B. Enforcement of SRO Implementing Rules

The EOA commented that it believes that recently the SROs have often ignored their written and unwritten standards regarding participation in governance and committee matters. The Commission's proposed rulemaking would address this concern to the extent that it would require SROs to codify their conflict of interest standards consistent with Regulation 1.69. The Commission reminds the SROs that they would be required to enforce any such implementing rules pursuant to Section 5a(a)(8) of the CEA and that SRO enforcement of such rules would be monitored by the Commission as part of its ongoing rule enforcement review program.[8]

C. Other Related Regulatory Provisions

The CBT commented that Regulation 1.69, as originally proposed, was inconsistent with Regulations 1.41(f)[9] and 8.17(a)(1).[10] The CBT did not specify how these provisions were inconsistent with originally-proposed Regulation 1.69. While Regulation 1.69 pertains to some of the same subject matter areas covered by Regulations 1.41(f) and 8.17(a)(1), the Commission believes that proposed Regulation 1.69's requirements would not conflict with any aspect of these provisions. In fact, proposed Regulation 1.69(b)(2)(iii), which lists the types of positions that SROs must review when determining the existence of a conflict of interest, is based upon the position information which contract markets already are required to gather and to provide to the Commission upon the adoption of temporary emergency rules, pursuant to Regulation 1.41(f)(3)(ii). In the case of Regulation 8.17(a)(1), proposed Regulation 1.69 merely would clarify the requirements of that provision by enumerating what constituted a "financial, personal or other direct interest" in a disciplinary committee matter.

III. Proposed Rulemaking

A. Definitions

1. Self-Regulatory Organization

i. *Application to Clearing Organizations*

The Commission originally proposed to apply Regulation 1.69's conflict of interest restrictions to the governing board, disciplinary committees and oversight panels of each SRO. Originally-proposed Regulation 1.69(a)(6)'s definition of SRO included contract markets, clearing organizations and RFAs. While Section 217 of the FTPA specifies that "contract markets" must adopt conflict of interest provisions, the Commission indicated in its originally-proposed rulemaking that it believed that it would be appropriate for Regulation 1.69's conflict of interest restrictions to extend to clearing organizations and RFAs as well. The Commission particularly sought comment on the definition of SRO and whether it would be consistent with the principles endorsed by CEA Section 5a(a)(17) to extend the conflict of interest restrictions to clearing organizations and RFAs.

[5] For ease of reference, this release will henceforth refer to the rulemaking published on May 3, 1996, as the originally-proposed rulemaking. The release will refer to the currently-proposed rulemaking version as the proposed rulemaking.

[6] The governing boards of futures exchanges are legally bound not to act in "bad faith" when taking actions on behalf of an exchange. This "bad faith" standard was first articulated in *Daniel* v. *Board of Trade of the City of Chicago*, 164 F. 2d 815 (7th Cir. 1947), a case arising from CBT emergency actions raising the price limits on various grain futures contracts due to price volatility. The plaintiffs in that case lost money on their grain positions as a result of the CBT's actions and claimed that the CBT's Board members acted "willfully, maliciously, and for their own personal gain" in imposing emergency price limits. *Id.* at 818. In the *Daniel* case, the Court recognized that while exchange boards have a "duty" to address market emergencies, they also have a "relation to the public" which requires that they "act with the utmost objectivity, impartiality, honesty, and good faith." *Id.* at 819–20. In order to prevail in a suit challenging an emergency action, the Court determined that the plaintiff must show "bad faith amounting to fraud," since fraud would imply a board's breach of its public trust. *Id.* The "bad faith" standard governing exchange boards has been consistently followed and further refined by the Commission and the courts.

[7] *See* footnote 6 above.

[8] Should it ever become necessary, the Commission could enforce SRO rules implementing Regulation 1.69. For example, under CEA Section 8c(a)(1), the Commission can "suspend, expel, or otherwise discipline" an SRO committee member for violating an SRO Regulation 1.69-implementing rule should the subject SRO fail to take disciplinary action against such a committee member.

[9] Regulation 1.41(f) establishes procedures for SRO adoption of temporary emergency rules.

[10] Regulation 8.17(a)(1) prohibits a person from serving on a contract market disciplinary committee if "he or any person or firm with which he is affiliated has a financial, personal or other direct interest in the matter under consideration."

VOL 63 ISS 15 JA 23 1998 UMI

The FIA commented that it did not object to Regulation 1.69's requirements being applied to clearing organizations. The BOTCC and CFCCNY commented that CEA Section 5a(a)(17) only applies to contract markets and that, accordingly, Congress was clearly only referring to futures exchanges, not clearing organizations. The BOTCC and CFCCNY also commented that applying conflict of interest restrictions to exchanges alone would be consistent with the different natures of exchange and clearing organization actions. They stated that exchanges can take actions that are specifically designed to have a market impact and, thus, possibly affect the positions of board members (*e.g.*, ordering liquidation trading, changing delivery dates, etc.). The BOTCC and CFCCNY contended that clearing organizations do not generally regulate trading but instead take actions to maintain the financial integrity of the clearing system and, thus, do not take actions that directly affect the positions of particular board members.

The Commission notes that, while CEA Section 5a(a)(17) applies to "contract markets," the provision also specifies that its conflict of interest restrictions shall apply to committees handling certain types of margin changes. Margin levels in the futures industry are established by both contract markets and clearing organizations. The Commission also notes that there have been previous occasions when CEA requirements for contract markets have been applied to clearing organizations. For example, Section 5a(a)(12)(A) of the CEA mandates Commission review of "contract market" rules, while Commission Regulation 1.41, which establishes procedures for Commission review of proposed rules, specifically includes clearing organizations within its definition of contract markets for these purposes. In addition, clearing organizations already are subject to regulatory requirements that are comparable to Regulation 1.69 such as Regulation 1.41(f)'s emergency action provisions and Regulation 1.63's prohibition on committee service by persons with disciplinary histories. Finally, some contract markets have in-house clearing organizations (*e.g.*, CME and NYMEX), while other contract markets are cleared by independent clearing organizations (*e.g.*, CBT and NYCE). Applying Regulation 1.69 to clearing organizations, as well as contract markets, would ensure that there would not be differing treatment of contract markets based on whether or not they had an in-house or independent clearing mechanism. For these reasons, the Commission has determined that it would be appropriate to treat clearing organizations as included in the definition of "contract markets" in CEA Section 5a(a)(17) and to make clearing organizations subject to proposed Regulation 1.69.

ii. *Application to RFAs*

The Commission also has decided to include RFAs within the definition of SRO in order to ensure that their committees would be subject to proposed Regulation 1.69. This would reduce the potential for committee member bias and self-interest in RFA proceedings as well.[11]

2. Governing Board

As originally proposed, Regulation 1.69's definition of governing board included any SRO "board of directors, board of governors, board of managers, or similar body" and any subcommittee thereof, such as an executive committee, that is authorized to take action on behalf of its SRO. The CBT commented that the Commission should confirm that a subcommittee of a governing board when not authorized to act on behalf of an SRO or when formulating recommendations to the board on a matter is neither a "governing board" nor an "oversight panel" under Regulation 1.69. The Commission believes that the recommendations of governing board subcommittees often are adopted in full by governing boards because the boards rely heavily on their subcommittees' recommendations. Accordingly, the Commission has revised the proposed rulemaking's definition of governing board to apply to SRO boards or board subcommittees that are authorized "to take action or to recommend the taking of action" on behalf of an SRO.

3. Disciplinary Committee

As originally proposed, Regulation 1.69 defined an SRO "disciplinary committee" to mean a body that was authorized by an SRO "to conduct disciplinary proceedings, to settle disciplinary charges, to impose sanctions, or to hear appeals thereof."

i. *Issuing Disciplinary Charges*

The CBT commented that the Commission should confirm that Regulation 1.69's disciplinary committee definition does not include committees that issue disciplinary charges. In fact, the Commission believes that disciplinary committee members with conflicts of interest can have a significant influence on the disciplinary process during the charging stage. Accordingly, the Commission has modified proposed Regulation 1.69 to include the issuance of disciplinary charges as one defining characteristic of a disciplinary committee.[12]

ii. *Minor Rule Violations*

The CBT, CME, FIA, NYCE and NYMEX each commented that Regulation 1.69's definition of disciplinary committee should exclude committees that deal with decorum and recordkeeping violations. The Commission agrees that the conflict of interest requirements need not apply to disciplinary committees that handle minor disciplinary matters but only to the extent that such matters are handled in a summary manner. Accordingly, the Commission has revised final Regulation 1.69(a)(1)'s definition of "disciplinary committee" to exclude committees that "summarily impose minor penalties for violating rules regarding decorum, attire, the timely submission of accurate records for clearing or verifying each day's transactions or other similar activities."[13] This revision, which incorporates elements of Commission Regulation 8.27's summary disciplinary provision, is only intended to create an exclusion for committees that handle minor disciplinary matters where it is important to impose sanctions in a prompt manner.

iii. *Committees Versus Committee Members*

In its originally-proposed rulemaking release, the Commission sought particular comment on the aspect of the definition of disciplinary committee under which the conflict of interest restrictions applied to members of disciplinary committees when they deliberated and voted on matters as a body, but did not apply to members of disciplinary committees when they exercised disciplinary powers individually. Thus, the originally-proposed definition did not include persons authorized to take disciplinary actions, such as floor committee members, who dispose of minor disciplinary violations by individually issuing fines or penalties, but did apply in instances when more than one committee member was required to endorse such an action. No commenter addressed this issue.

The Commission has decided to revise proposed Regulation 1.69's disciplinary committee definition so that there would be no distinction between disciplinary matters that were handled by full committees and those handled by individual committee members. Instead, as discussed above, the Commission has determined to incorporate into the definition a functional exclusion for committees that summarily impose minor penalties for decorum, attire and certain recordkeeping violations. Thus, the disciplinary committee definition would apply to any entity with disciplinary authority, whether a single person or a body of persons.

4. Oversight Panel

In the originally-proposed rulemaking, the Commission defined "oversight panel" as an SRO committee authorized to "review, recommend, or establish policies or procedures with respect to the [SRO's] surveillance, compliance, rule enforcement, or disciplinary responsibilities."[14] The CBT and NYCE commented that this definition was too broad and should not include committees which review or recommend policies as such a definition would deter people, inside and outside of the futures industry, from serving on task forces and planning committees that formulate ideas that are helpful to the SROs.

The Commission believes that SRO policies with respect to surveillance, compliance, rule enforcement and disciplinary responsibilities are an important part of the self-regulatory process and that persons who are entrusted with such responsibilities should be free from conflicts of interests.

The CBT and NYCE suggested that the definition of oversight panel be limited to panels that establish self-regulatory policies or procedures because they are the panels that adopt measures on behalf of their SROs. Presumably, the CBT and NYCE suggested excluding panels that review or recommend such policies or procedures because their actions may only be implemented upon adoption by some other authority, such as an SRO's governing board or membership. The Commission believes, however, that often the recommendation of an oversight panel with respect to self-regulatory policies or procedures can be tantamount to the establishment of such policies or procedures because the adopting authority relies on the panel's recommendation. Accordingly, the Commission has determined that the proposed rulemaking's definition of oversight panel should apply to SRO bodies that "recommend or establish" possible self-regulatory policies or procedures for an SRO, while excluding bodies that review such measures on behalf of their SRO.[15]

5. Family Relationship

As further discussed below, originally-proposed Regulation 1.69 prohibited committee members from deliberating and voting on committee matters in which any member of their immediate family was a named party in interest. For these purposes, originally-proposed Regulation 1.69 defined "immediate family" to mean a person's "spouse, parent, stepparent, child, stepchild, sibling, stepbrother, stepsister, or in-law." Although no commenters addressed the originally-proposed definition, the Commission has decided to modify the definition in two respects for this proposed rulemaking.

First, consistent with the terminology used in CEA Section 5a(a)(17), the Commission proposes to use the defined term "family relationship" instead of the originally-proposed "immediate family." Second, the Commission has decided to amend the provision substantively by defining family relationship to mean a committee member's "spouse, former spouse, parent, stepparent, child, stepchild, sibling, stepbrother, stepsister, grandparent, grandchild, uncle, aunt, nephew, niece or in-law." The Commission believes that these levels of familial relations are sufficiently close that they could unduly influence a committee member's decisionmaking. Accordingly, the proposed definition should help to assure that committee decisions would be the result of fair deliberations and would not be tainted by the real or perceived self-interest of committee members.

6. Significant Actions

In the originally-proposed rulemaking, Regulation 1.69's conflict of interest restrictions were applied to SRO committees whenever they considered any "significant action which would not be submitted to the Commission for its prior approval." The originally-proposed definition of that term included, at a minimum, two types of SRO actions: (1) SRO actions or rule changes that addressed emergencies as defined by Commission Regulation 1.41(a)(4) and (2) SRO margin changes that responded to extraordinary market conditions when such conditions were likely to have a substantial effect on prices in any contract traded or cleared at the SRO.

Proposed Regulation 1.69's definition of this term has been modified in several respects to accommodate suggestions made by commenters. In addition, for ease of reference, instead of "significant action which would not be submitted to the Commission for its prior approval," proposed Regulation 1.69 uses the defined term "significant action." The proposed "significant action" definition, though, continues to be limited to SRO actions which are not submitted to the Commission for prior approval.

i. *Scope of Definition*

Four commenters—the CBT, FIA, NYMEX and BOTCC—suggested that the significant action definition not be modified by the term "at a minimum," as originally proposed. The commenters believed that the use of this modifier deprived SROs of notice of what actions would be deemed significant and could potentially subject some committee actions to second-guessing. The Commission agrees that the inclusion of this phrase could lead to distracting collateral attacks on the actions of committees that are not subject to the conflict of interest restrictions. Accordingly, proposed Regulation 1.69(a)(8)'s definition of significant action does not include the "at a minimum" modifier.

ii. *Nonphysical Emergency Rules*

The BOTCC, CBT and FIA commented that CEA Section 5a(a)(17) requires that conflict of interest requirements apply to SRO committees when they consider "any nonphysical emergency rule," while proposed Regulation 1.69's definition included both physical and nonphysical emergency rules. These commenters urged the Commission to adhere to Congress' mandate and to limit the significant action definition to include only nonphysical emergencies. The Commission concurs with the commenters and has revised the proposed definition, which incorporates portions of Regulation 1.41(a)(4)'s definition of emergency, to include committee actions that respond to

[11] In its comment letter, NFA did not object to the inclusion of RFA's in the definition of an SRO. NFA did request, however, that the definition be clarified with respect to the handling of conflict of interests due to a committee member's financial interest in a significant action. As explained in Section III.B.2.i.d. below, the proposed rulemaking has been revised in this regard.

[12] The Commission also has proposed a conforming amendment to Regulation 1.63's definition of disciplinary committee. *See* Section III.E. below for a description of proposed amended Regulation 1.63.

[13] Insofar as such types of rule violations are not dealt with in a summary manner, they would not be excluded under the proposed definition.

[14] *See* originally-proposed Commission Regulation 1.3(tt).

[15] The oversight panel definition would be established by proposed Regulation 1.69(a)(4) and not by Regulation 1.3 as originally proposed.

VOL 63 ISS 15 JA 23 1998 UMI

nonphysical emergencies (*see* Regulations 1.41(a)(4)(i) through (iv) and (vi) through (viii)) and to exclude committee actions that respond to physical emergencies (*see* Regulation 1.41(a)(4)(v)).

iii. *Types of Margin Changes*

The CME commented that Regulation 1.69's significant action definition should include margin changes that are used for regulatory purposes. In addition, the CBT, CME, FIA and NYMEX commented that, instead of margin changes that respond to market conditions that are likely to have a substantial effect on contract prices, the significant action definition should only include margin changes that are likely to have a substantial effect on contract prices. The commenters contended that their suggested approach would more closely conform with CEA Section 5a(a)(17).[16]

The Commission believes that the decisionmaking ability of committee members is most likely to be influenced by their personal interests when they consider actions which could impact them monetarily. Accordingly, the definition of significant action should focus on committee actions which have the most potential for affecting prices in particular contracts. Consistent with that rationale, the Commission has decided to include aspects of both of the above suggestions in its proposed rulemaking. Thus, proposed Regulation 1.69(a)(8)(ii)'s definition of an SRO significant action includes changes in margin levels that: (1) are designed to respond to extraordinary market conditions such as actual or attempted corners, squeezes, congestion, or undue concentrations of positions or (2) are likely to have a substantial effect on prices in any contract traded or cleared at the SRO.

The NYCE suggested that the Commission modify its significant action definition to pertain to margin changes that respond to price changes that are greater than some pre-established, one-day percentage market move. The Commission believes that such an approach could be an acceptable way of defining SRO committee significant actions that should be subject to Regulation 1.69's conflict of interest requirements. The Commission is not prepared, however, to establish a quantifiable industry-wide standard as part of this proposed rulemaking. The Commission believes that it would be difficult to establish such a standard at this time given the wide variety of types of SROs and futures contracts that exist. Instead, the Commission in its proposed rulemaking has adopted a "significant action" definition that would address the requirements explicitly set forth in CEA Section 5a(a)(17), but that, at the same time, would give each SRO the flexibility to adopt implementing measures that would be sensitive to the circumstances of its particular markets.

In its originally-proposed rulemaking, the Commission sought comment on whether there were any other types of SRO actions or rule changes that should be subject to Regulation 1.69's requirement. As examples, the Commission asked whether "changes to a price quote on a price change register, setting modified closing call ranges, or establishing settlement prices" should be included in Regulation 1.69's significant action definition.[17] The CBT, CME and NYMEX opposed classifying price change register revisions as significant actions, while the CBT and CME similarly opposed the inclusion of the establishment of modified closing call ranges and settlement prices. Generally, the commenters felt that subjecting such actions to conflict of interest requirements would be a cumbersome burden for SRO committees that carry out these functions. Accordingly, the Commission has decided not to revise proposed Regulation 1.69's significant action definition in this regard.

B. Self-Regulatory Organization Rules

1. Relationship With a Named Party in Interest

i. *Nature of Relationship*

Originally-proposed Regulation 1.69(b)(1) mandated that SROs implement rules requiring that committee members abstain from deliberating and voting on any matter in which they had a significant relationship with the matter's "named party in interest."[18] Originally-proposed Regulation 1.69(b)(1) listed the types of relationships between a committee member and named party in interest that required abstention, including family, employment, broker association and "significant, ongoing business" relationships. Several commenters suggested ways in which the Commission could clarify the types of relationships that would be the grounds for an abstention.

a. *Clearing Relationships.*—The CME, FIA and NFA commented that SRO committee members should not be required to abstain from committee matters if they use the same clearing member as a matter's named party in interest. The Commission agrees that sharing a clearing member should not, by itself, influence a committee member's decisionmaking. Accordingly, proposed Regulation 1.69(b)(1)(i)(D) explicitly provides that such a relationship shall not require a committee member to abstain from a matter.

The CBT commented that relationships between a clearing firm's employees or principals and the SRO members who are cleared by the firm should not be considered a "significant, ongoing business relationship" under Regulation 1.69(b)(1). The Commission believes that two parties to such a clearing relationship may not always be totally impartial if one party is involved in considering an SRO committee action that directly bears upon the other, especially in instances where a cleared member constitutes a significant portion of a firm's clearing activity. Accordingly, the Commission has decided not to exclude such relationships from proposed Regulation 1.69(b)(1)(i).

b. *Specificity of Relationship Standard.*—The Commission also received two general comments on originally-proposed Regulation 1.69(b)(1) from the CME and NYCE. The CME stated that the provision went too far in specifying the details as to what constituted a significant relationship that required abstention. By contrast, the NYCE suggested that originally-proposed Regulation 1.69(b)(1) was not sufficiently detailed and should include an objective standard to identify disqualifying relationships based upon: (1) the length of the relationship and (2) the amount of monies that are earned by the parties as a result of the relationship.

In formulating proposed Regulation 1.69(b)(1)(i), the Commission has attempted to establish a categorical listing of the types of personal and business relations that have the potential to influence committee members unduly. SROs always would have the discretion, of course, to include any additional disqualifying criteria in their own implementing rules.

[16] CEA Section 5a(a)(17) states that the term "significant action that would not be submitted to the Commission for its prior approval" shall include "any changes in margin levels designed to respond to extraordinary market conditions that are likely to have a substantial affect [sic] on prices in any contract traded on such contract market."

[17] *See* 61 FR 19869, 19872 n. 12.

[18] For these purposes, originally-proposed Commission Regulation 1.69 defined a *named party in interest* as a "party who is identified as the subject of any matter being considered" by an SRO committee. This same definition has been used in this proposed rulemaking as Regulation 1.69(a)(6).

c. *Confidentiality of Proceedings.*—Under originally-proposed Regulation 1.69(b)(1), SROs were required to adopt rules prohibiting committee members from engaging in any type of deliberations or voting on matters where they had a significant relationship with the matter's named party in interest. The CBT noted that CEA Section 5a(a)(17) limits this requirement to "confidential" deliberations and voting. For this proposed rulemaking, the Commission would require that committee members abstain from any type of deliberation and voting on matters where they had a relationship with the named party in interest, whether the deliberation was confidential or non-confidential.

Theoretically, non-confidential committee meetings would permit outsiders to monitor the fairness of a committee's decisionmaking processes. The Commission does not believe, however, that it is likely that there would be an effective outside presence at such committee meetings given the SROs' traditional practice of closing committee meetings to the public. In addition, even open committee meetings would not prevent a committee member's decisionmaking from being influenced by self-interest, especially since the particulars of a committee member's personal interest in a matter might not be known to any outsiders attending committee meetings.

CEA Section 5a(a)(17) states that "at a minimum" the named party in interest conflict of interest restrictions shall apply to the "confidential deliberations and voting" of contract market governing boards, disciplinary committees and oversight panels. Because CEA Section 5a(a)(17) merely sets a minimum baseline as to the application of conflict of interest requirements, the Commission has decided to propose the more prophylactic approach of applying Regulation 1.69(b)(1)'s requirements to all deliberations, whether confidential or not. The Commission notes that this approach also is consistent with the existing conflict of interest requirements of Regulation 8.17(a)(1) which do not distinguish between confidential and non-confidential disciplinary committee proceedings.[19]

d. *Time Frame of Relationship.*—In addition, the Commission wishes to clarify that conflict of interest determinations under proposed Regulation 1.69(b)(1)(i) should be based upon circumstances at the time of a committee's consideration of a matter. Accordingly, if a committee member had some significant business relationship with a matter's named party in interest prior to, but not concurrent with, his or her committee's consideration of the matter, proposed Regulation 1.69(b)(1) would not prohibit the committee member from participating.[20] The Commission believes that this approach is most appropriate for two reasons. First, current relationships clearly have a greater potential influence on committee members' decisionmaking than past relationships. Second, if proposed Regulation 1.69's restrictions were based on past relationships it would vastly expand the administrative burden for SRO compliance with Regulation 1.69 and, thus, potentially could compromise the ability of SRO committees to dispose of matters in an expeditious manner.

e. *Non-Disciplinary Matters.* While the Commission anticipates that proposed Regulation 1.69(b)(1)'s restrictions usually would be applied to disciplinary cases because they always would involve named respondents, the Commission notes that the provision would pertain to any matter handled by an SRO governing board, disciplinary committee or oversight panel in which there was a particular named party in interest. Accordingly, the proposed conflicts restrictions would apply, for example, to such committees whenever they reviewed a membership application or considered some regulatory action with respect to a particular individual, such as directing a person to reduce his or her position in a contract. The Commission invites comment on whether the proposed named party in interest provision should be clarified to pertain to any other type of SRO committee action. For example, should committees be subject to Regulation 1.69(b)(1) when they revise price change registers or certify the late submission of pit cards in response to requests by particular members?

ii. *Disclosure of Relationship*

Originally-proposed Regulation 1.69 did not explicitly require that committee members inform their SRO whether they had a relationship with a matter's named party in interest. In order to help ensure that SROs are able to enforce their Regulation 1.69-implementing rules, proposed Regulation 1.69(b)(1)(ii) would require that SRO committee members disclose to the appropriate SRO staff whether he or she has any one of the relationships listed in Regulation 1.69(b)(1)(i) with respect to a matter's named party in interest.

iii. *Procedure for Determination*

a. *Sources of Information.*—Originally-proposed Regulation 1.69 did not explicitly address how SROs must enforce any rule prohibiting committee members from participating in matters where they had a relationship with the named party in interest. The CSC commented that the relationships enumerated in Regulation 1.69(b)(1), as originally proposed, would not generally be known to SRO staff when they attempted to enforce this prohibition. Accordingly, the CSC requested that the Commission clarify that SROs have no responsibility to discern relationships between committee members and named parties in interest that are not readily available from SRO records.

The Commission recognizes that SROs often do not have knowledge of all possible aspects of the relationships that may exist between a committee's members and named parties in matters being considered by the committee. Accordingly, proposed Commission Regulation 1.69(b)(1)(iii) establishes the SROs' responsibilities in this regard. Under this provision, SROs would be required, at a minimum, to base their conflict of interest determinations upon: (1) information provided by the committee members themselves (proposed Regulation 1.69(b)(1)(iii)(A)), and (2) any other source of information that was "reasonably available" to the SRO (proposed Regulation 1.69(b)(1)(iii)(B)).

Consistent with proposed Regulation 1.69(b)(1)(ii)'s requirement that committee members disclose any relationship with a matter's named party in interest, proposed Regulation 1.69(b)(1)(iii)(A) would require that SROs ascertain from each committee member whether his or her relationship with a matter's named party in interest fell into one of the "conflict of interest" categories listed in proposed Regulation 1.69(b)(1)(i) (A) through (E). Proposed Regulation 1.69 does not prescribe the manner in which SROs must gather this information from committee members. The Commission would expect SROs to engage each committee member directly in this regard, whether through oral questioning, a written questionnaire or some sort of committee member pledge, to determine any possible relationship

[19] *See* footnote 10 above.

[20] In addition, the Commission would view it as an improper circumvention of proposed Regulation 1.69 if a committee member were to drop out of a broker association, as that term is defined by Commission Regulation 156.1, or end a significant, ongoing business relationship simply in order to avoid having to abstain from a committee matter.

VOL 63 ISS 15 JA 23 1998 UMI

with a matter's named party in interest.[21]

Under proposed Regulation 1.69(b)(1)(ii)(B), SROs also would be required to consult any other source of information that was "reasonably available" to them before making a conflict of interest determination. The Commission believes that this standard appropriately accommodates the time and resource constraints that SROs often face when administering SRO committee matters.

b. *Responsibility for Determinations.*—The Commission notes that several commenters objected to originally-proposed Regulation 1.69's requirement that conflict of interest determinations be made by SRO staffs. The BOTCC and CBT commented that CEA Section 5a(a)(17) does not mandate who must make these decisions. The CSC and KCBT also contended that it may be difficult for SRO staff to direct committee members to abstain and that, accordingly, such determinations would be best made by the SRO committee involved.

Based upon these comments, the Commission has decided to revise proposed Regulation 1.69 so that it states only that SROs must make determinations as to the existence of conflicts of interest under Regulation 1.69, but does not identify any particular SRO personnel or committee that must make these determinations. This approach would enable each SRO to allocate the responsibility for these determinations as it saw fit, whether it be to SRO staff, the presiding committee, or some other party. The Commission would expect each SRO, however, to specify in its rules and procedures implementing Regulation 1.69 the person or group of persons who would have these responsibilities.

2. Financial Interest in a Significant Action

i. *Nature of Interest*

As originally proposed, Commission Regulation 1.69 required that SRO committee members abstain from committee deliberations and voting on certain matters in which they "knowingly [had] a direct and substantial financial interest." This restriction would have applied whenever a committee considered significant actions that would not be submitted to the Commission for its prior approval.[22]

In determining a committee member's financial interest in a possible committee action, originally-proposed Regulation 1.69 required SROs to review certain positions held by the member, the member's immediate family, the member's firm and the customers of the member's firm in any contract that could be affected by the committee action. With respect to a committee member's personal positions, originally-proposed Regulation 1.69 specifically required that SROs consider gross positions held in the member's personal accounts, the member's Regulation 1.3(j) controlled accounts, and any accounts in which the member had a significant financial interest. With respect to the positions of the member's immediate family, Regulation 1.69, as originally proposed, required that SROs consider gross positions held in the personal accounts or Regulation 1.3(j) controlled accounts of the member's immediate family. With respect to customer positions, the originally-proposed version of Regulation 1.69 required that SROs consider gross positions held in proprietary accounts at the committee member's firm, net positions held in customer accounts at the member's firm, and gross positions held by any customers who constituted a significant proportion of business for the member's firm.

The Commission received a wide range of comments on the originally-proposed rulemaking's provisions regarding conflicts of interest due to financial interest in a significant action. Subject to the limits mandated by CEA Section 5a(a)(17) with respect to conflict of interest requirements, the Commission has attempted to incorporate into proposed Regulation 1.69 many of the suggestions made by the commenters.

a. *Committee Member Expertise*—The KCBT commented that under the Commission's original proposal, committee members who were actively involved with a contract on a daily basis likely would be the very same committee members who would have to abstain from participating in committee deliberations and voting on significant actions concerning such contracts. Thus, according to the KCBT, these committee members would have no input in deciding whether a significant action was in the best interests of the contract, and consequently such decisions would be left to persons who were less familiar with the contract. The Commission recognizes that this tension is inherent in the conflict of interest requirements imposed by CEA Section 5a(a)(17) and Regulation 1.69. To the extent possible, the Commission has attempted to alleviate this concern in the proposed rulemaking by permitting otherwise conflicted committee members to deliberate on matters when they, among other things, have "unique or special expertise, knowledge or experience in the matter under consideration."[23]

b. *Small Exchanges.*—The KCBT also commented that nearly all committee members at small exchanges have a substantial financial interest in the exchange's primary products. Thus, under originally-proposed Regulation 1.69, a high percentage of committee members at such exchanges would be disqualified from participating in significant actions concerning such contracts. The Commission understands that the requirements of Regulation 1.69 may be difficult for small exchanges to adhere to in this regard. As discussed below, however, proposed Regulation 1.69 would provide each SRO with some flexibility in formulating its implementing rules. Moreover, the Commission believes that the potential for this problem would be greatly reduced if the exchanges ensured that their committees represented a wide diversity of membership interests, including representatives from various trading pits, consistent with the composition requirements of Regulation 1.64.

c. *Position Size.*—As noted, while Commission Regulation 1.69, as originally proposed, required that committee members abstain from deliberating and voting on significant actions when they had a "direct and substantial financial interest" in the outcome of the matter, it did not set any specific standards as to what financial interest or position size warranted a member's abstention. Instead, the Commission originally proposed that each SRO adopt its own standards in this regard as part of its implementing rules and procedures.

[21] The Commission believes that this approach would be consistent with some of the SRO practices already in place to enforce SRO conflict of interest requirements. In the context of disciplinary matters, for example, the CME has each of its disciplinary committee members sign a pledge each year which explains the CME's conflict of interest requirements and requires committee members to withdraw from considering any committee matter that raises a conflict of interest for them. At NYMEX, staff explains the exchange's conflict of interest restrictions before each disciplinary committee meeting and then asks whether there are any disciplinary committee members who believe they could have a conflict in any of the upcoming matters.

[22] The definition of such significant actions is set forth in proposed Regulation 1.69(a)(8) and is discussed above in Section III.A.6.

[23] *See* proposed Commission Regulation 1.69(b)(3)(i)(B). *See also* Section III.B.3. below for a discussion of the conditions under which otherwise conflicted committee members would be permitted to participate in committee matters.

The NYCE commented that Regulation 1.69 should establish some objective threshold in this area based upon the potential financial loss or gain which a committee member could incur as a result of his or her committee's possible significant action. The CBT commented that SROs should have the discretion to decide when a committee member's financial interest in a matter was direct and substantial. The CME contended that the wide disparity in sizes among the exchanges and their contracts would make it difficult for a regulation to specify a particular position size that would constitute a "direct and substantial financial interest."

At the present time, the Commission has decided not to incorporate into proposed Regulation 1.69 any numerical thresholds as to what constitutes a committee member's direct and substantial financial interest in a significant action. Instead, the SROs could include standards in their implementing rules that were appropriate to their markets. Any such criteria should be premised on, among other things, the extent to which a committee member was exposed to market risk, the size of the member's positions, whether or not the positions were market neutral and, with respect to a member's affiliated firm, the potential effect on the firm's capital. In addition, the Commission would expect each SRO to assess the magnitude and probable market impact of the underlying significant action being considered by the SRO committee.

d. *Application to RFAs.*—The NFA commented that RFAs do not consider "significant actions," as that term was defined by originally-proposed Regulation 1.69, and that, accordingly, RFAs should be excluded from Regulation 1.69's conflict of interest requirements with respect to SRO committees that handle significant actions. The Commission agrees that RFA committees do not take such significant actions and, accordingly, has revised proposed Regulation 1.69(a)(7)'s definition of SRO to exclude RFAs from the conflict of interest requirements in those instances.

ii. *Disclosure of Interest*

Under originally-proposed Commission Regulation 1.69, whenever an SRO committee considered a significant action, each member of the committee would have been required to disclose to the SRO's staff any position information that was known or should have been known by the member with respect to the positions listed in proposed Regulation 1.69(b)(2) (*i.e.*, positions held by the member, the member's family, the member's firm and certain customers of the member's firm). For the purposes of this provision, committee members were presumed to have knowledge with respect to certain of these positions.

a. *Presumption of Knowledge.*—The CBT, CME and FIA each commented that this presumption of knowledge provision would force a large number of committee members to abstain voluntarily from matters for fear that they would be presumed to have knowledge of position information. The CBT and CME contended that the provision should not be a part of any conflict of interest requirement because committee members who are not aware of their financial interest in a committee matter cannot be motivated by that interest. The CSC and FIA commented that the provision presumed committee member knowledge of position information that members might not know. Thus, the provision could have the consequence of creating conflicts of interest as it could force committee members to inquire about conflict-creating positions of which they otherwise would be ignorant. Each of these commenters recommended deleting the presumption of knowledge provision.

The Commission has revised proposed Regulation 1.69(b)(2)(ii) so that it does not presume committee member knowledge of any position information. Instead, a committee member would be required, under each SRO's Regulation 1.69-implementing rule, to disclose to the SRO relevant position information that was "known to him or her." A failure to disclose any such information should be considered a violation of the SRO implementing rule. This approach would be consistent with proposed Regulation 1.69(b)(2)(i), which would prohibit committee members from participating in committee decisions where they "knowingly [had] a direct and substantial financial interest in the result of the vote."

iii. *Procedure for Determination*

As originally proposed, Commission Regulation 1.69 mandated procedures for SROs when they determined whether an SRO committee member should abstain from deliberations and voting on a significant action due to a conflict of interest. In ascertaining information relevant to a committee member's possible interest in such an action, the original proposal permitted SRO staff to rely upon:

(1) the most recent large trader reports and clearing records available to the staff;
(2) position information provided to the staff by the committee member; and
(3) any other source of position information which was readily available to the staff.

a. *Review of Positions.*—The BOTCC commented that assembling all of the position information required by originally-proposed Regulation 1.69 would impose significant, time-consuming burdens on SRO staffs. The CME suggested that the information-gathering requirement be limited to information that was reasonably available to the SRO.

The BOTCC, CSC and NYMEX commented that committees which undertake significant actions must act in a swift and decisive manner. They contended that the number of categories of positions to be reviewed by SROs in applying Regulation 1.69 to committees considering significant actions would be so extensive that it would cause substantial delays and, thus, hinder an SRO's ability to respond to emergencies promptly. The CBT recommended that given that some significant actions under originally-proposed Regulation 1.69 also are temporary emergency actions under Regulation 1.41(f),[24] the list of positions to be reviewed under Regulation 1.69 should be modified to follow the position review criteria already required by Regulation 1.41(f)(3)(v) and, thus, avoid creating different position review burdens for

[24] There would be some overlap between the bases for Regulation 1.41 temporary emergency rules and the bases for proposed Regulation 1.69 significant actions. Proposed Regulation 1.69 significant actions would include temporary emergency rules which address: (1) manipulative activity (Regulation 1.41(a)(4)(i)); (2) corners, congestion or undue concentrations of positions (Regulation 1.41(a)(4)(ii)); (3) circumstances which could materially affect the performance of contracts (Regulation 1.41(a)(4)(iii)); (4) any sovereign or exchange action which could have a direct impact on trading at the contract market (Regulation 1.41(a)((4)(iv)); (5) the bankruptcy of a member or a legal action which could affect the ability of a member to perform on its contracts (Regulation 1.41(a)(4)(vi)); (6) any circumstance where a member's condition jeopardizes the safety of customer funds, the contract market or the contract market's members (Regulation 1.41(a)(4)(vii)); and (7) any other unusual, unforeseeable and adverse circumstance for which it is not practicable for a contract market to submit a rule to the Commission for prior review (Regulation 1.41(a)(4)(viii)). Proposed Regulation 1.69 significant actions would diverge from Regulation 1.41 temporary emergency rules, however, by: (1) not including temporary emergency rules which address physical emergencies (Regulation 1.41(a)(4)(v)) and (2) including margin level changes which either respond to extraordinary market conditions or which are likely to have a substantial effect on contract prices.

VOL 63 ISS 15 JA 23 1998 UMI

significant actions and temporary emergency rules.[25]

Consistent with the CBT's suggestion, the Commission has modeled proposed Regulation 1.69(b)(2)(iii) list of positions to be reviewed for conflict of interest determinations after the list of positions that must be reviewed by exchanges when they adopt temporary emergency actions pursuant to Regulation 1.41(f)(3)(v). Accordingly, under proposed Regulation 1.69, whenever an SRO committee handled a significant action, the SRO would be required to consider the following types of positions in determining whether any of the committee's members had a direct and substantial financial interest in the matter:

(1) gross positions at that self-regulatory organization held in each committee member's personal accounts or Regulation 1.31(j) controlled accounts (proposed Regulation 1.69(b)(2)(iii)(A));
(2) gross positions at that self-regulatory organization held in Regulation 1.17(b)(3) proprietary accounts at each committee member's affiliated firm (proposed Regulation 1.69(b)(2)(iii)(B));
(3) gross positions at that self-regulatory organization held in accounts in which a committee member was a Regulation 3.1(a) principal (proposed Regulation 1.69(b)(2)(iii)(C)); and
(4) net positions at that self-regulatory organization held in Regulation 1.17(b)(2) customer accounts at each member's affiliated firm (proposed Regulation 1.69(b)(2)(iii)(D)).[26]

b. *Positions Outside of SRO.*—The CME commented that the list of positions to be reviewed under originally-proposed Regulation 1.69 could be interpreted to include positions at other exchanges, in over-the-counter derivatives and in the cash market. The CME believed that it was inappropriate to require an SRO to undertake the same level of review for positions acquired outside the SRO than for positions acquired at some other SRO. The Commission has revised proposed Regulation 1.69 to address conflicts of interest based upon positions held by an SRO committee member outside of his or her SRO. First, proposed Regulation 1.69(b)(2)(i) would explicitly require committee members to abstain from deliberations and voting on significant actions if the member had a "direct and substantial financial interest" in the matter based upon "exchange or non-exchange positions that reasonably could be expected to be affected by the action."

The Commission believes that any positions held by a committee member that can be impacted by a committee action, whether or not it is held at the member's home SRO, has the potential to influence the member's views on committee matters. Given that proposed Regulation 1.69 is intended to promote fairness and integrity in the SRO committee decisionmaking process, the Commission believes that it would be appropriate to include such positions as the possible basis for a conflict of interest determination.

The Commission also is aware that SROs may not have complete knowledge of their committee members' outside financial interests. To address this situation, proposed Regulation 1.69(b)(2)(iii)(E) states that in reviewing position information in the course of a conflict of interest determination, SROs should include a review of "any other types of positions, whether maintained at that self-regulatory organization or elsewhere, that the self-regulatory organization reasonably expects could be affected by the significant action." By requiring that the SRO itself determine what positions it "reasonably expects could be affected by the significant action," the Commission believes that this provision would provide SROs with the latitude necessary to decide what "outside" financial interests of an SRO committee member to consider when making conflict of interest determinations. Each SRO's responsibilities in this regard would be further circumscribed by only having to base conflict determinations on the limited sources of information specified in proposed Regulation 1.69(b)(2)(iv).[27]

iv. *Bases for Determination*

While the Commission in this proposed rulemaking has not modified the sources of information that SROs should consult when making conflict of interest determinations, proposed Regulation 1.69(b)(2)(iv) now provides that, when making such determinations, an SRO may take "into consideration the exigency of the significant action." The Commission believes that this modification would provide SROs with the flexibility to make conflict decisions in an expeditious manner that would not prevent SRO committees from promptly handling significant actions.[28]

3. Participation in Deliberations

CEA Section 5a(a)(17) recognizes that in some instances a committee member with a conflict in a particular committee matter also might have special knowledge or experience regarding that matter. Accordingly, in a limited number of circumstances, originally-proposed Commission Regulation 1.69 permitted SRO committees to allow a committee member who otherwise would be required to abstain from deliberations and voting on a matter because of a conflict to deliberate but not vote on the matter. This "deliberation exception" was only made applicable to matters in which a committee member had a "direct and substantial financial interest" in the result of a vote on a significant action. Consistent with CEA Section 5a(a)(17), originally-proposed Regulation 1.69's deliberation exception did not apply to matters in which a committee member had a conflict due to his or her relationship with a matter's named party in interest.

In determining whether to permit a "conflicted" committee member to deliberate on a matter, originally-proposed Regulation 1.69 required that the presiding committee consider a number of factors including: (1) Whether the member had special expertise in the matter involved that few or no other members of the committee had; (2) whether the committee's ability to meaningfully deliberate would be adversely affected by the member's non-participation; and (3) whether the member's participation in deliberations would be necessary for the committee to obtain a quorum.[29]

The Commission has decided to retain a "deliberation exception" provision in this proposed rulemaking, but it has modified Regulation 1.69 to simplify the factors that should be considered in making such a determination. The Commission believes that this proposed provision strikes a balance between ensuring that SRO committees make well-informed decisions and minimizing the influence of a committee member's potential bias or self-interest in a matter. In this respect, the Commission has incorporated some of the suggestions made by several of the commenters on Regulation 1.69 as originally proposed.

i. *Diversity of Membership Interests*

The CBT and CSC suggested that the diversity of membership interests represented on a committee should be included as a factor in deciding whether to allow an otherwise conflicted committee member to participate in deliberations. The Commission recognizes that promoting the diversity of SRO committees is an important regulatory goal, as exemplified by Regulation 1.64.[30] The Commission believes, however, that ensuring fair and objective committees, free of the influence of self-interest, is of paramount importance. Accordingly, the Commission does not believe that it would be beneficial to include committee diversity as a factor when making deliberation exception decisions. The Commission also does not believe that it is necessary to amend Regulation 1.64 to accommodate Regulation 1.69's conflict of interest requirements. While Regulation 1.64(b) establishes composition requirements for SRO governing boards, the provision pertains to the "regular voting members" of a board and not to the composition of a board each time that it meets. Thus, for instance, an SRO whose governing board consists of ten percent or more commercial interest directors will not be in violation of Regulation 1.64(b)(1) if, when considering any particular board matter, such directors comprise less than ten percent of the presiding directors because some or all of them are not present for any reason, including abstentions due to conflicts of interest.

ii. *Committee Member Expertise*

The CSC commented that two of the deliberation exception factors listed in originally-proposed Commission Regulation 1.69 seemed to overlap. The CSC commented that a committee with a member with special expertise in a particular subject[31] always would be affected adversely[32] if the member was required to abstain from deliberations on matters involving the subject. In response, the Commission has revised proposed Regulation 1.69(b)(3)(ii)(B) to require that committees in granting a deliberation exception must consider whether the conflicted committee member has "unique or special expertise, knowledge or experience" in the subject matter of the significant action.[33]

iii. *Disclosure of Positions*

The CBT, CSC and NYCE commented that under Regulation 1.69 as originally proposed a committee member with a conflict of interest could participate in deliberations on a matter without disclosing his or her positions, and concomitant biases, to the other committee members. The Commission agrees that the disclosure of a committee member's interest in a matter should help to mitigate any prejudicial influence such member's views could have on other committee members during the course of deliberations.

Proposed Commission Regulation 1.69(b)(3)(iii) would require that, whenever an SRO committee determined whether to grant a deliberation exception to a committee member, the committee must consider all of the position information which served as the basis for the member's conflict of interest in the matter.[34] This requirement would serve two purposes. First, it would ensure that the committee would be fully apprised of the nature of the committee member's conflict when it made its deliberation exception determination. Second, as suggested by the CBT, CSC and NYCE, the provision also would ensure that, should a committee member with a conflict of interest be allowed to deliberate, his or her fellow committee members should be aware of the member's interest in the matter and could appropriately evaluate the views expressed by such member during deliberations.

iv. *Public Member Approval*

In order to promote a "neutral" determination, originally-proposed Regulation 1.69 required that any deliberation exception must be approved by all "public" members of the presiding committee (*i.e.*, committee members who were not members of the SRO) who were present when the committee made such a determination.[35]

The CBT and CME commented that requiring that deliberation exceptions be approved by each public representative on an SRO committee would have the un-democratic effect of giving a single committee member the power to veto another committee member's participation in deliberations. The two exchanges urged the Commission to delete this requirement. Based on these comments, the Commission has decided to delete the provision from proposed Regulation 1.69.

---

[25] Whenever a contract market implements a temporary emergency rule, Regulation 1.41(f)(3) requires that it submit various information to the Commission with respect to the action. Among other things, the exchange must provide the Commission "a summary of any disclosure by a [board member] of his or her positions in any subject contract market, including disclosure of positions held in any personal account, controlled account, other account in which [the member] has an interest, and customer and proprietary accounts at [the member's] affiliated firm."

[26] There would be one minor variation between the lists of positions that must be reviewed in conflict of interest and temporary emergency rule situations. Prior to the adoption of temporary emergency rules, Regulation 1.41(f)(3)(v) requires that exchanges review "gross positions held in any * * * other account [beside personal or controlled accounts] in which the governing board member has an interest." For the purposes of conflict of interest determinations, the Commission has determined, under proposed Regulation 1.69(b)(2)(iii)(C), to limit this aspect of position review to gross positions held in accounts in which a committee member is a Regulation 3.1(a) principal. Thus, the proposed provision includes positions in which committee members would probably have the greatest economic interest.

[27] In this connection, the Commission plans to have its staff determine whether it would be feasible to provide each SRO with access to position information maintained by the Commission with respect to positions held by an SRO's committee members at other SROs.

[28] SRO committees should not abuse this provision by delaying the consideration of significant actions in order to create exigent circumstances which would lessen the SRO's information-gathering responsibilities. The Commission would particularly evaluate the SROs' application of this provision in any rule enforcement review of Regulation 1.69-implementing rules.

[29] The Commission, in its originally-proposed rulemaking, indicated that it believed that, given the factors that must be considered, deliberation exception determinations should be made by the committee involved, rather than SRO staff. For any particular SRO committee matter, the committee members themselves would be in a better position than SRO staff to assess their individual levels of expertise in the matter and their need for input during deliberations from the committee member who otherwise would be required to abstain. The Commission continues to adhere to this view, although no commenters on the originally-proposed rulemaking addressed this issue. Accordingly, proposed Regulation 1.69 specifically confers the responsibility for deliberation exception determinations on the SRO committee involved.

[30] Commission Regulation 1.64 establishes composition standards for certain types of SRO committees, including governing boards. Regulation 1.64 requires that boards meaningfully represent the following general membership interest groups: (1) futures commission merchants; (2) floor traders; (3) floor brokers; (4) participants in a variety of trading pits; and (5) other market users and participants such as banks and pension funds. In addition, Regulation 1.64 requires that at least ten percent of the regular voting members of each SRO board must consist of directors representing commercial interests such as producers, consumers, processors, distributors and merchandisers of commodities underlying the SRO's futures products, and that at least twenty percent of the regular voting members of each board must consist of non-member representatives (*i.e.*, persons who are not members of the SRO and are knowledgeable about either the futures markets or financial regulation).

[31] *See* originally-proposed Commission Regulation 1.69(b)(4)(i)(A).

[32] *See* originally-proposed Commission Regulation 1.69(b)(4)(i)(B).

[33] In applying this proposed provision, a conflicted committee member should not be considered to have "unique or special expertise, knowledge or experience" in a particular subject matter if the member's expertise, knowledge or experience was similar to that of some other non-conflicted member of the same committee.

[34] This information would include not only the position information supplied to the SRO by the committee member (proposed Regulation 1.69(b)(2)(iv)(B)), but also position information garnered by the SRO from large trader reports and clearing records (proposed Regulation 1.69(b)(2)(iv)(A)) and any other sources reasonably available to the SRO (proposed Regulation 1.69(b)(2)(iv)(C)).

[35] This requirement did not apply to SRO governing boards, disciplinary committees or oversight committees which do not have public members. *See* Commission Regulations 1.64(b) and (c) which respectively require governing boards and disciplinary committees in certain circumstances to include non-SRO member representatives.

VOL 63 ISS 15 JA 23 1998 UMI

v. *Abstention Procedures*

Two other commenters asked the Commission to clarify certain aspects of Regulation 1.69's deliberation exception provision. The CSC asked whether a person who was permitted to deliberate but not vote on a matter would be required to leave the committee meeting for any vote on the matter. As part of this proposed rulemaking, the Commission wishes to make clear that a committee member who was required to abstain from any committee matter due to a conflict of interest under proposed Regulation 1.69, whether it be deliberation or voting, must leave the committee meeting prior to such deliberation and/or voting. The Commission believes that even the silent presence of a committee member could influence a committee to the extent that it impeded free and open discourse among the other members of a committee.

vi. *Public Member Conflicts of Interest*

The CBT questioned whether a public representative to an SRO committee who has a possible conflict of interest could participate in determining whether he or she should receive a deliberation exception under Regulation 1.69. The Commission stresses that, under proposed Regulation 1.69, an SRO committee member, whether public or non-public, could not participate in any committee vote on whether he or she should abstain from voting and/or deliberating on a matter due to a conflict of interest.

vii. *Public Interest*

The Commission emphasizes that proposed Regulation 1.69(b)(3)(ii)'s list of circumstances would merely be the factors to be considered by SROs when making deliberation exception decisions and the presence or absence of any one factor should not be dispositive in making such decisions. Consistent with CEA Section 5a(a)(17)(c), SROs ultimately could only permit committee members with conflicts to participate in deliberations if it would be "consistent with the public interest."

4. Documentation of Determination

Whenever an SRO made a conflict of interest determination, originally-proposed Regulation 1.69 required the SRO committee considering the underlying substantive matter to include certain information regarding the determination in the minutes of its meeting. Such a record was required to indicate: (1) the committee members who attended the meeting, (2) the staff member(s) who reviewed the committee members' positions, (3) a listing of the position information reviewed for each committee member, (4) the names of any committee members directed to abstain and the reasons therefor, (5) a description of the procedures followed by the SRO in making an abstention decision, and (6) in those instances when a committee member was granted a deliberation exception, a full description of the views expressed by the member during the committee's deliberations.

i. *Documenting Position Information*

Several commenters responded to the original proposal's documentation requirements. The CBT and CME suggested that the provision be modified to make clear that confidential information, such as position information, need not be disclosed in a committee meeting's minutes. The Commission has revised proposed Regulation 1.69(b)(4) to require that SRO committees "reflect in their minutes or otherwise document" their conflict of interest determinations. With this approach, SRO committees would not be required to disclose position information in their minutes. However, they would have to document any position information and any other information relied upon in making a conflict of interest determination and would be required to retain such information in a manner consistent with Commission Regulation 1.31.

ii. *Views of Conflicted Members*

The CBT commented that the originally-proposed requirement that committee minutes reflect the views expressed by "conflicted" members who were granted deliberation exceptions was counterproductive and would inhibit such members from candidly expressing their opinions and sharing their expertise. The Commission disagrees. The recordation of such committee members' views should help to deter them from offering strictly self-interested opinions to their fellow committee members. The Commission notes, however, that it has attempted to reduce the burden of this provision in this proposed rulemaking by requiring that SROs record only "a *general* description of the views expressed by such member during deliberations." *See* proposed Commission Regulation 1.69(b)(4)(iv) (emphasis added).

iii. *Determination Procedures*

The CME commented that a description of the procedures used in making a conflict of interest determination should only have to be included in a committee's minutes when the procedures vary from the SRO's normal procedures. The Commission has decided to delete this provision in its entirety from proposed Regulation 1.69.

iv. *Relationship With Named Party in Interest*

The Commission stresses that, while many of proposed Regulation 1.69(b)(4)'s requirements would apply only to conflicts of interest where a committee member had a "direct and substantial financial interest" in a significant action, the provision also would pertain to conflicts due to a member's relationship with a matter's named party in interest. Accordingly, in named party in interest conflicts, the presiding committee would be required to record: (1) the names of committee members who participated in deliberation and voting on a matter in which a member abstained due to a conflict of interest (proposed Regulation 1.69(b)(4)(i)) and (2) the names of any committee members who recused themselves voluntarily or who were required to abstain due to a conflict of interest (proposed Regulation 1.69(b)(4)(ii)). The documentation requirements of proposed Regulation 1.69(b)(4) (i) and (ii) would only be appropriate for financial interest conflicts of interests and would not be applicable to named party in interest conflicts.

C. Violations of SRO Rules

Originally-proposed Commission Regulation 1.69(d) made it a violation of Regulation 1.69 for an SRO to permit a committee member to participate in deliberations or voting on a matter if such participation violated any SRO rule implementing the conflict of interest restrictions of Commission Regulation 1.69.

The CBT commented that this provision would not increase any SRO's incentive to comply with Regulation 1.69's standards and that, accordingly, the benefits of the provision did not justify the costs to the Commission of enforcing the provision. The FIA commented that the requirement was redundant and only gave the impression that SROs cannot be entrusted to regulate their own affairs. Both the CBT and FIA recommended that the provision be deleted.

The Commission has decided not to include this provision in proposed Regulation 1.69. The Commission reminds the SROs, however, that they would have the responsibility, under Section 5a(a)(8) of the CEA, to enforce any "bylaws, rules, regulations, and resolutions" implementing proposed Regulation 1.69. The Commission believes that it would be able to monitor adequately the SROs' enforcement of their implementing rules in the ordinary course of its rule enforcement review program.

D. Liability to Other Parties

As originally proposed, Commission Regulation 1.69(e) protected SROs, SRO officials and SRO staffs involved in reviewing committee member positions and making abstention decisions, pursuant to Regulation 1.69, from liability for such actions to any party other than the Commission. The CBT, CSC and FIA each suggested that the Commission revise the wording of this provision so that it more closely conformed with the wording of CEA Section 5a(a)(17). Rather than proposing a regulatory provision in addition to the statutory provision in this regard, the Commission has decided to delete this provision from this proposed rulemaking. The Commission believes that this approach would eliminate any confusion between Regulation 1.69 and CEA Section 5a(a)(17).

E. Amendments to Other Commission Regulations Made Necessary by Final Commission Regulation 1.69

Section 213 of the FTPA amended Section 5a(a)(12)(B) of the CEA to require that the Commission issue regulations establishing "terms and conditions" under which contract markets may take temporary emergency actions without prior Commission approval. Section 5a(a)(12)(B) and Regulation 1.41(f), the Commission's implementing regulation, require that any such temporary emergency action be adopted by a two-thirds vote of a contract market's governing board. In recognition of the fact that governing board members may be required to abstain from deliberations and voting on such actions under contract market rules implementing Regulation 1.69, the Commission, as part of its conflict of interest rulemaking, originally proposed to amend Regulation 1.41(f) to provide that such abstaining board members not be included in determining whether a temporary emergency action has been approved by a two-thirds majority of a governing board.

The CBT in its comment letter requested that the Commission confirm that SROs would be able to include governing board members who abstain from voting on temporary emergency rules, pursuant to a Regulation 1.69-implementing rule, in determining whether the board has a quorum of members necessary for it to conclude business. In this proposed rulemaking, the Commission would revise Regulation 1.41(f)(10) to provide that such abstaining members may be included for quorum purposes.

As indicated in Section III.A.3. above, the Commission also has proposed to revise Commission Regulation 1.63's definition of disciplinary committee so that, like proposed Regulation 1.69's definition of the same term, it would include the issuance of disciplinary charges as a defining characteristic.[36] Regulation 1.63's disciplinary committee definition would include all committees and persons with disciplinary authority and, unlike proposed Regulation 1.69, would not exclude persons who summarily impose penalties for minor rule violations.

F. Conclusion

The Commission believes that proposed Regulation 1.69 and the proposed amendments to Regulations 1.41 and 1.63 would meet the statutory directives of Section 5a(a)(17) of the CEA as it was amended by Section 217 of the FTPA. The proposed rulemaking would establish guidelines and factors to be considered in determining whether an SRO committee member was subject to a conflict of interest which could potentially restrict his or her ability to make fair and impartial decisions in a matter and, thus, warranted abstention from participation in committee deliberations and voting.

IV. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (1988), requires that agencies, in proposing rules, consider the impact of those rules on small businesses. The Commission has previously determined that contract markets are not "small entities" for purposes of the Regulatory Flexibility Act. 47 FR 18618, 18619 (April 30, 1982). Furthermore, the then Chairman of the Commission previously has certified on behalf of the Commission that comparable rules affecting clearing organizations and registered futures associations did not have a significant economic impact on a substantial number of small entities. 51 FR 44866, 44868 (December 12, 1986).

This proposed rulemaking would affect individuals who served on SRO governing boards, disciplinary committees and oversight panels. The Commission believes that this proposed rulemaking would not have a significant economic impact on these SRO committee members. This proposed rulemaking would require these committee members to disclose to their SROs certain information which was known to them at the time that their committees considered certain types of matters. The Commission believes that this requirement would not have any significant economic impact on such members because the information which they would be required to provide should be readily available to them.

Accordingly, the Chairperson, on behalf of the Commission, hereby certifies, pursuant to Section 3(a) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that the action proposed to be taken herein would not have a significant economic impact on a substantial number of small entities.

B. Agency Information Activities

When publishing proposed rules, the Paperwork Reduction Act of 1995 ("PRA") (Pub. L. 104–13 (May 13, 1995)) imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. In compliance with the PRA, the Commission, through this rule proposal, solicits comments to:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including the validity of the methodology and assumptions used; (2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology (*e.g.*, permitting electronic submission of responses).

The Commission has submitted this proposed rule and its associated information collection requirements to the Office of Management and Budget ("OMB"). The burden associated with this entire collection (3038–0022), including this proposed rule, is as follows:

Average burden hours per response—3,547.01
Number of respondents—11,011.00
Frequency of response—On Occasion

[36] Regulation 1.63 requires that persons with certain disciplinary histories be disqualified from serving on, among other things, SRO disciplinary committees.

VOL

ISS
15
JA
23
1998
UMI

The burden associated with this specific proposed rule is as follows:
Average burden hours per response—2.00
Number of respondents—20
Frequency of response—On Occasion

Persons wishing to comment on the information required by this proposed rule should contact the Desk Officer, Commodity Futures Trading Commission, OMB, Room 10201, NEOB, Washington, DC 20503, (202) 395–7340. Copies of the information collection submission to OMB are available from the Commission Clearance Office, 1155 21st Street NW, Washington, DC 20581, (202) 418–5160.

List of Subjects in 17 CFR Part 1

Commodity futures, Contract markets, Clearing organizations, Members of contract market.

In consideration of the foregoing, and based on the authority contained in the Commodity Exchange Act and, in particular, Sections 3, 4b, 5, 5a, 6, 6b, 8, 8a, 9, 17, and 23(b) thereof, 7 U.S.C. 5, 6b, 7, 7a, 8, 13a, 12, 12a, 13, 21 and 26(b), the Commission is proposing to amend Title 17, Chapter I, Part 1 of the Code of Federal Regulations as follows:

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

1. The authority citation for Part 1 would continue to read as follows:

Authority: 7 U.S.C. 2, 2a, 4, 4a, 6, 6a, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6i, 6j, 6k, 6l, 6m, 6n, 6o, 7, 7a, 8, 9, 12, 12a, 12c, 13a, 13a–1, 16, 19, 21, 23, and 24, unless otherwise stated.

2. Section 1.41(f)(10) would be proposed to be added to read as follows:

§ 1.41 Contract market rules; submission of rules to the Commission; exemption of certain rules.

* * * * *

(f) * * *

(10) Governing board members who abstain from voting on a temporary emergency rule pursuant to § 1.69 shall not be counted in determining whether such a rule was approved by the two-thirds vote required by this section. Such members can be counted for the purpose of determining whether a quorum exists.

* * * * *

3. Section 1.63(a)(2) would be proposed to be revised to read as follows:

§ 1.63 Service on self-regulatory organization governing boards or committees by persons with disciplinary histories.

(a) * * *

(2) *Disciplinary committee* means any person or committee of persons, or any subcommittee thereof, that is authorized by a self-regulatory organization to issue disciplinary charges, to conduct disciplinary proceedings, to settle disciplinary charges, to impose disciplinary sanctions, or to hear appeals thereof.

* * * * *

4. Section 1.69 would be proposed to be added to read as follows:

§ 1.69 Voting by interested members of self-regulatory organization governing boards and various committees.

(a) *Definitions.* For purposes of this section:

(1) *Disciplinary committee* means any person or committee of persons, or any subcommittee thereof, that is authorized by a self-regulatory organization to issue disciplinary charges, to conduct disciplinary proceedings, to settle disciplinary charges, to impose disciplinary sanctions, or to hear appeals thereof in cases involving any violation of the rules of the self-regulatory organization except those cases where a single person is authorized to summarily impose minor penalties for violating rules regarding decorum, attire, the timely submission of accurate records for clearing or verifying each day's transactions or other similar activities.

(2) A person's *family relationship* means the person's spouse, former spouse, parent, stepparent, child, stepchild, sibling, stepbrother, stepsister, grandparent, grandchild, uncle, aunt, nephew, niece or in-law.

(3) *Governing board* means a self-regulatory organization's board of directors, board of governors, board of managers, or similar body, or any subcommittee thereof, duly authorized, pursuant to a rule of the self-regulatory organization that has been approved by the Commission or has become effective pursuant to either Section 5a(a)(12)(A) or 17(j) of the Act, to take action or to recommend the taking of action on behalf of the self-regulatory organization.

(4) *Oversight panel* means any panel, or any subcommittee thereof, authorized by a self-regulatory organization to recommend or establish policies or procedures with respect to the self-regulatory organization's surveillance, compliance, rule enforcement, or disciplinary responsibilities.

(5) *Member's affiliated firm* is a firm in which the member is a "principal," as defined in § 3.1(a), or an employee.

(6) *Named party in interest* means a party who is the subject of any matter being considered by a governing board, disciplinary committee, or oversight panel.

(7) *Self-regulatory organization* means a "self-regulatory organization" as defined in § 1.3(ee) and includes a "clearing organization" as defined in § 1.3(d), but excludes registered futures associations for the purposes of paragraph (b)(2) of this section.

(8) *Significant action* includes any of the following types of self-regulatory organization actions or rule changes that can be implemented without the Commission's prior approval:

(i) Any actions or rule changes which address an "emergency" as defined in § 1.41(a)(4) (i) through (iv) and (vi) through (viii); and

(ii) Any changes in margin levels that are designed to respond to extraordinary market conditions such as an actual or attempted corner, squeeze, congestion or undue concentration of positions, or that otherwise are likely to have a substantial effect on prices in any contract traded or cleared at such self-regulatory organization; but does not include any rule not submitted for prior Commission approval because such rule is unrelated to the terms and conditions of any contract traded at such self-regulatory organization.

(b) *Self-regulatory organization rules.* Each self-regulatory organization shall maintain in effect rules that have been submitted to the Commission pursuant to Section 5a(a)(12)(A) of the Act and § 1.41 or, in the case of a registered futures association, pursuant to Section 17(j) of the Act, to address the avoidance of conflicts of interest in the execution of its self-regulatory functions. Such rules must provide for the following:

(1) *Relationship with named party in interest.*—(i) *Nature of relationship.* A member of a self-regulatory organization's governing board, disciplinary committee or oversight panel must abstain from such body's deliberations and voting on any matter involving a named party in interest where such member:

(A) Is the named party in interest;

(B) Is an employer, employee, or fellow employee of the named party in interest;

(C) Is associated with the named party in interest through a "broker association" as defined in § 156.1;

(D) Has any other significant, ongoing business relationship with the named party in interest, not including relationships limited to executing futures or option transactions opposite each other or to clearing futures or option transactions through the same clearing member; or

(E) Has a family relationship with the named party in interest.

(ii) *Disclosure of relationship.* Prior to the consideration of any matter involving a named party in interest, each member of a self-regulatory organization governing board, disciplinary committee or oversight panel must disclose to the appropriate self-regulatory organization staff whether he or she has one of the relationships listed in paragraph (b)(1)(i) of this section with the named party in interest.

(iii) *Procedure for determination.* Each self-regulatory organization must establish procedures for determining whether any member of its governing board, disciplinary committees or oversight committees is subject to a conflicts restriction in any matter involving a named party in interest. Such determinations shall be based upon:

(A) Information provided by the member pursuant to paragraph (b)(1)(ii) of this section; and

(B) Any other source of information that is reasonably available to the self-regulatory organization.

(2) *Financial interest in a significant action*—(i) *Nature of interest.* A member of a self-regulatory organization's governing board, disciplinary committee or oversight panel must abstain from such body's deliberations and voting on any significant action if the member knowingly has a direct and substantial financial interest in the result of the vote based upon either exchange or non-exchange positions that reasonably could be expected to be affected by the action.

(ii) *Disclosure of interest.* Prior to the consideration of any significant action, each member of a self-regulatory organization governing board, disciplinary committee or oversight panel must disclose to the appropriate self-regulatory organization staff the position information referred to in paragraph (b)(2)(iii) of this section that is known to him or her.

(iii) *Procedure for determination.* Each self regulatory organization must establish procedures for determining whether any member of its governing board, disciplinary committees or oversight committees is subject to a conflicts restriction under this section in any significant action. Such determination must include a review of:

(A) Gross positions held at that self-regulatory organization in the member's personal accounts or "controlled accounts," as defined in § 1.3(j);

(B) Gross positions held at that self-regulatory organization in proprietary accounts, as defined in § 1.17(b)(3), at the member's affiliated firm;

(C) Gross positions held at that self-regulatory organization in accounts in which the member is a principal, as defined in § 3.1(a);

(D) Net positions held at that self-regulatory organization in "customer" accounts, as defined in § 1.17(b)(2), at the member's affiliated firm; and

(E) Any other types of positions, whether maintained at that self-regulatory organization or elsewhere, that the self-regulatory organization reasonably expects could be affected by the significant action.

(iv) *Bases for determination.* Taking into consideration the exigency of the significant action, such determinations should be based upon:

(A) The most recent large trader reports and clearing records available to the self-regulatory organization;

(B) Position information provided by the member pursuant to paragraph (b)(2)(ii) of this section; and

(C) Any other source of information that is reasonably available to the self-regulatory organization.

(3) *Participation in deliberations.* (i) Under the rules required by this section, a self-regulatory organization governing board, disciplinary committee or oversight panel may permit a member to participate in deliberations prior to a vote on a significant action for which he or she otherwise would be required to abstain pursuant to paragraph (b)(2) of this section if such participation would be consistent with the public interest and the member recuses himself or herself from voting on such action.

(ii) In making a determination as to whether to permit a member to participate in deliberations on a significant action for which he or she otherwise would be required to abstain, the deliberating body should consider the following factors:

(A) Whether the member's participation in deliberations is necessary for the deliberating body to achieve a quorum in the matter; and

(B) Whether the member has unique or special expertise, knowledge or experience in the matter under consideration.

(iii) Prior to any determination pursuant to paragraph (b)(3)(i) of this section, the deliberating body must fully consider the position information which is the basis for the member's direct and financial interest in the result of a vote on a significant action pursuant to paragraph (b)(2) of this section.

(4) *Documentation of determination.* Self-regulatory organization governing boards, disciplinary committees, and oversight panels must reflect in their minutes or otherwise document that the conflicts determination procedures required by this section have been followed. Such records also must include:

(i) The names of all members who attended the meeting in person or who otherwise were present by electronic means;

(ii) The name of any member who voluntarily recused himself or herself or was required to abstain from deliberations and/or voting on a matter and the reason for the recusal or abstention, if stated;

(iii) Information on the position information that was reviewed for each member; and

(iv) In those instances when a committee member who otherwise would be required to abstain from deliberating and voting on a matter is permitted to deliberate on a significant action, a general description of the views expressed by such member during deliberations.

Issued in Washington, D.C. on January 16, 1998, by the Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351–01–P

INTERNATIONAL TRADE COMMISSION

19 CFR Parts 201 and 207

Proposed Amendments to Rules of Practice and Procedure; Hearing Regarding Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Proposed rule; notice of public hearing.

SUMMARY: On October 23, 1997, the Commission published proposed rules to establish procedures for the conduct of five-year reviews of antidumping and countervailing duty orders and suspension agreements (62 FR 55185). The notice of proposed rulemaking indicated that the Commission would hold a hearing concerning the procedural matters discussed in the notice of proposed rulemaking as well as methodological and analytical issues relating to five-year reviews. The hearing will include panel discussions on topics of significant interest. Interested persons with similar viewpoints are encouraged to consolidate testimony. After reviewing the requests, the Commission will notify participants of panel assignments and time allocations. The Commission will

VOL 63 ISS 15 JA 23 1998 UMI

accommodate as many requests to participate as time permits. For further information concerning hearing procedures and rules of general application, consult Part 201 of the Commission's Rules of Practice and Procedure (19 CFR part 201).

DATES: The hearing will be held on February 26, 1998, beginning at 9:30 a.m. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission no later than ten (10) days after the date of publication of this document and should identify the specific topics the requestor wishes to discuss.

ADDRESSES: The hearing will be held at the U.S. International Trade Commission Building at 500 E Street, SW, Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: Vera Libeau (202–205–3176), Office of Investigations, U.S. International Trade Commission, 500 E Street, SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov or ftp://ftp.usitc.gov).

Issued: January 20, 1998.

By order of the Commission.

Donna R. Koehnke,

Secretary.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

22 CFR Part 228

RIN 0412–AA37

Rules on Source, Origin and Nationality for Commodities and Services Financed by USAID: Miscellaneous Amendments

AGENCY: United States Agency for International Development (USAID), IDCA.

ACTION: Proposed rule.

SUMMARY: USAID proposes to amend its regulation on source, origin and nationality for commodities and services financed by USAID by revising two rules, one on system determinations for commodities and one on ocean transportation eligibility, and clarifying waiver provisions.

The proposal to amend the coverage on systems determinations would allow components of a commodity system to be shipped to a cooperating country without first being shipped to and assembled in an eligible country. This should reduce the cost of these transactions by reducing unnecessary shipments. The proposal to amend the rules on eligibility of transshipments would require that suppliers obtain a determination from USAID that direct service on a U.S. flag vessel is not available before transshipment from a U.S. flag to a non-U.S. flag vessel would be eligible for USAID financing. This will ensure compliance with Cargo Preference requirements that direct U.S. flag service be used when available.

DATES: Comments are due March 24, 1998.

FOR FURTHER INFORMATION CONTACT: Kathleen O'Hara, Office of Procurement, Policy Division (M/OP/P) USAID, Washington, DC 20523–1435. Telephone: (703) 875–1534, facsimile: (703) 875–1243, e-mail address: kohara@usaid.gov.

SUPPLEMENTARY INFORMATION: The regulation at 22 CFR part 228 was published as a final rule September 15, 1996 (61 FR 53615). After operating under the regulation for a year a few areas have been identified that need some additional coverage or clarification. In Section 228.11, USAID proposes to amend the current provision which allows some commodity transactions to be designated as systems and thus be considered a single commodity rather than a number of separate commodities (e.g., a computer system with CPU, monitor and keyboard). Under the current rule, a commodity must be produced in a country included in the authorized Geographic Code prior to shipment to the cooperating country in order to meet eligibility requirements, and the same rule currently applies to a system. It can add considerable expense to a transaction if some components of a system must be shipped to a country in the authorized Geographic Code to be assembled into a system prior to shipment to the cooperating country in order to meet USAID's origin requirement. In many cases where systems determinations are appropriate there is no practical need to assemble the system prior to final installation in the cooperating country. Thus, the proposed rule would allow a system to meet the origin requirement without prior assembly in a country included in the authorized Geographic Code provided the supplier is responsible for assembly in the cooperating country.

The ocean transportation rule in 228.21 is being amended to ensure compliance with cargo preference requirements by limiting the use of transshipments which begin on U.S. flag vessels and move to non-U.S. flag vessels to only those cases where direct carriage on U.S. flag vessels is not available. The proposed rule will require the supplier to obtain a determination from USAID that direct service on a U.S. flag vessel to destination is not available before a U.S.-foreign flag transshipment will be eligible for USAID financing. In addition, section 228.21 is revised to specify where USAID'S policies implementing cargo preference are located.

Editorial clarifications are being made to the waiver provisions in Sections 228.51 and 228.53.

List of Subjects in 22 CFR Part 228

Administrative practice and procedure, Commodity procurement, Grant programs—foreign relations.

Accordingly 22 CFR part 228 is proposed to be amended as follows:

PART 228—[AMENDED]

1. The authority citation continues to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673; 3 CFR 1979 Comp., p. 435.

2. In § 228.11, paragraph (e) is revised as follows:

§ 228.11 Source and origin of commodities.

* * * * *

(e) Systems Determination. When a system consisting of more than one produced commodity is procured as a single, separately priced item, USAID may determine that the system itself shall be considered a produced commodity. When a determination is made to treat a system as a produced commodity, component commodities which originate from other than an authorized source country may be shipped directly to, and the system assembled in, the cooperating country, unless USAID specifically determines that assembly and shipment shall take place in an authorized source country. Transportation costs must still meet the requirements in subpart C of this part in order for them to be eligible for USAID financing. USAID, or the importer in the case of a Commodity Import Program, shall inform the supplier of any system determination.

* * * * *

3. Section 228.21 is amended by adding a sentence at the end of paragraph (a) and revising paragraph (c)(4) as follows:

§ 228.21 Ocean transportation.

(a) * * * USAID's policy on implementation of the Cargo Preference Act is in USAID's Automated Directives System, Chapter 315.

* * * * *

(c) * * *

(4) USAID will finance costs incurred on vessels under flag registry of any Geographic Code 935 country if the costs are part of the total cost on a through bill of lading that is paid to a carrier for initial carriage on a vessel which is eligible in accordance with paragraphs (c)(1), (2) or (3) of this section; *provided that* for shipments originating on a U.S. flag vessel with transshipment to a non-US. flag vessel, the supplier must obtain a determination that direct service on a U.S. flag vessel is not available from USAID's Office of Procurement, Transportation Division, 1300 Pennsylvania Avenue NW., Washington, DC 20523–7900.

4. Section 228.51, paragraph (a) is amended by revising the introductory paragraph and paragraph (a)(1) as follows:

§ 228.51 Commodities.

(a) *Waiver criteria.* Any waiver must be based upon one of the criteria listed in this section. Waivers to Geographic Code 899 or Code 935 which are justified under paragraph (a) (2) or (3) of this section may only be authorized on a case-by-case basis. A waiver may be authorized when:

(1) A commodity required for assistance is of a type that is not produced in or available for purchase in the United States; in addition, for waivers to any country or Geographic code beyond Code 941 and the cooperating country, the commodity is of a type that is not produced in or available for purchase in any country in Code 941 or the cooperating country.

* * * * *

5. Section 228.53 is amended by revising the introductory paragraph and paragraph (a) as follows:

§ 228.53 Suppliers of services—privately owned commercial suppliers and non-profit organizations.

Waiver criteria. Any waiver must be based upon one of the criteria listed in this section. Waivers to Geographic Code 899 or Code 935 which are justified under paragraph (b) or (c) of this section may only be authorized on a case-by-case basis. A waiver may be authorized when:

(a) Services required for assistance are of a type that are not available for purchase in the United States; in addition, for waivers to any country or Geographic Code beyond Code 941 and the cooperating country, the services are of a type that are not available for purchase in any country in Code 941 or the cooperating country.

* * * * *

Dated: January 5, 1998.

Marcus L. Stevenson,

Procurement Executive.

BILLING CODE 6116–71–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 935

[OH–243–FOR]

Ohio Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; public comment period and opportunity for public hearing.

SUMMARY: OSM is announcing receipt of a proposed amendment to the Ohio regulatory program (hereinafter the "Ohio program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment consists of changes to provisions of the Ohio rules pertaining to permitting requirements, bond release, and performance standards. The amendment is intended to revise the Ohio program to be consistent with the corresponding Federal regulations.

DATES: Written comments must be received by 4:00 p.m., [E.D.T.], February 23, 1998. If requested, a public hearing on the proposed amendment will be held on February 17, 1998. Requests to speak at the hearing must be received by 4:00 p.m., [E.D.T.], on February 9, 1998.

ADDRESSES: Written comments and requests to speak at the hearing should be mailed or hand delivered to George Rieger, Field Branch Chief, at the address listed below.

Copies of the Ohio program, the proposed amendment, a listing of any scheduled public hearings, and all written comments received in response to this document will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requester may receive one free copy of the proposed amendment by contacting OSM's Appalachian Regional Coordinating Center.

George Rieger, Field Branch Chief, Appalachian Regional Coordinating Center, Office of Surface Mining Reclamation and Enforcement, 3 Parkway Center, Pittsburgh, PA 15220, Telephone: (412) 937–2153.

Ohio Division of Mines and Reclamation, 1855 Fountain Square Court, Columbus, Ohio 43224, Telephone: (614) 265–1076.

FOR FURTHER INFORMATION CONTACT: George Rieger, Field Branch Chief, Appalachian Regional Coordinating Center, Telephone: (412) 937–2153.

SUPPLEMENTARY INFORMATION:

I. Background on the Ohio Program

On August 16, 1982, the Secretary of the Interior conditionally approved the Ohio program. Background information on the Ohio program, including the Secretary's findings, the disposition of comments, and the conditions of approval can be found in the August 10, 1982, **Federal Register** (42 FR 34688). Subsequent actions concerning the conditions of approval and program amendments can be found at 30 CFR 935.11, 935.12, 935.15, and 935.16.

II. Description of the Proposed Amendment

By letter dated December 30, 1997 (Administrative Record No. OH–2174–05), Ohio submitted a proposed amendment to its program pursuant to SMCRA and in accordance with 30 CFR 732.17(c). The provisions of the Ohio Administrative Code (OAC) that Ohio proposed to amend are: OAC 1501:13–4–05—Permit Application Requirements, OAC 1501:13–4–12—Special Categories of Mining, OAC 1501:13–4–14—Underground Permit Application Requirements, OAC 1501:13–7–05—Release of Performance Bond, and OAC 1501:13–9–04—Performance Standards.

Specifically, Ohio is proposing the following changes. At OAC 1501:13–4–05 and 13–4–14, Ohio is proposing to replace the term "sedimentation pond" with "siltation structure" and to reference the dam classification criteria found in the Natural Resources Conservation Service (NRCS) Technical Release No. 60. AT OAC 1501:13–4–12(E), Ohio is proposing to restrict approximate original contour restoration variances to only steep-slope mining and reclamation operations. At 13–4–12(F)(4)(E), Ohio is proposing to require

VOL
63
ISS
15
JA
23
1998
UMI

that the aggregate total prime farmland acreage not be decreased from that which existed prior to mining. Any water bodies to be constructed during mining and reclamation operations are to be located within the post-reclamation non-prime farmland portions of the permit area. At OAC 1501:13–7–05(A)(2)(a)(iv), Ohio is proposing to require that a notarized statement by the permittee affirming completion of all applicable reclamation requirements be included in a request of approval of reclamation. At OAC 1501:13–9–4, Ohio is proposing to reference the dam and/or emergency spillway hydrologic criteria found in the NRCS Technical Release No. 60. Ohio is also proposing to delete the spillway requirements for impoundments at section (G)(3)(b) as they already appear at section (H)(1)(h).

Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17(h), OSM is seeking comments on whether the proposed amendment satisfies the applicable program approval criteria of 30 CFR 732.15. If the amendment is deemed adequate, it will become part of the Ohio program.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **DATES** or at locations other than the Appalachian Regional Coordinating Center will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to speak at the public hearing should contact the person listed under **FOR FURTHER INFORMATION CONTACT** by 4:00 p.m., [E.D.T.] on February 9, 1998. The location and time of the hearing will be arranged with those persons requesting the hearing. If no one requests an opportunity to speak at the public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak, and who wish to do so, will be heard following those who have been scheduled. The hearing will end after all persons scheduled to speak and persons present in the audience who wish to speak have been heard.

Any disabled individual who has need for a special accommodation to attend a public hearing should contact the individual listed under **FOR FURTHER INFORMATION CONTACT**.

Public Meeting

If only one person requests an opportunity to speak at a hearing, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**. All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under **ADDRESSES**. A written summary of each meeting will be made a part of the Administrative Record.

IV. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12988

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12988 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3509 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*). The State submittal which is the subject of this rule is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

Unfunded Mandates

This rule will not impose a cost of $100 million or more in any given year on any governmental entity or the private sector.

Texas Abandoned Mine Land Reclamation Plan

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; correction.

SUMMARY: OSM is correcting a proposed rule that appeared in the **Federal Register** of December 29, 1997 (62 FR 67592). This document announced receipt of a proposed amendment to the Texas abandoned mine land reclamation plan (hereinafter referred to as the "Texas program") under the Surface Mining Control and Reclamation Act of 1997 (SMCRA).

FOR FURTHER INFORMATION CONTACT:

Michael C. Wolfrom, Director, Tulsa Field Office, Telephone: (918) 581–6430.

In **Federal Register** document 97–33662 beginning on page 67592 in the issue of Monday, December 29, 1997, make the following corrections:

1. On page 67593 in the first column under the heading **SUMMARY**, "acquire" in line 24 should be "acquired."

2. On page 67593 in the first column under the heading **ADDRESSES**, "Texas" in line five of the third paragraph should be "Oklahoma."

3. On page 67593 in the second column under number 1.a. in line two, "Sec. 12,805" should be "Sec. 12.805."

4. On page 67594 in the first column, in line three, the "p" in "paragraph" should be capitalized.

5. On page 67594 in the first column, in line 17, the "i" in "it" should be capitalized.

6. On page 67594 in the third column under number 17 in line 5 of the paragraph, the "c" in "commission" should be capitalized.

7. On page 67595 in the first column in the heading of number 22, "Section 21.820" should be "Section 12.820."

8. On page 67595 in the first column in the paragraph under the heading "Public Hearing," the word "INFORMAITON" in line three should be "INFORMATION."

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[AD–FRL–5951–5]

Federal Plan Requirements for Large Municipal Waste Combustors Constructed on or Before September 20, 1994

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On December 19, 1995, EPA adopted emission guidelines for existing municipal waste combustor (MWC) units. Section 129 of the Act requires States with existing MWC units subject to the guidelines to submit plans to EPA that implement and enforce the emission guidelines. The State plans were due on December 19, 1996. States without MWC units subject to the emission guidelines must submit a negative declaration letter. Following receipt of a State plan, EPA has up to 6 months to approve or disapprove the plan. If a State with existing MWC units does not submit an approvable plan within 2 years after promulgation of the guidelines (i.e., December 19, 1997), the Clean Air Act (ACT) requires EPA to develop, implement, and enforce a Federal plan for MWC units in that State. In this action EPA proposes a Federal plan to implement emission guidelines for MWC units located in States where State plans have not been approved. For most of these States, the Federal plan would be an interim action because when a State plan is approved, the Federal plan will no longer apply to MWC units covered by the State plan. This proposed MWC Federal plan includes the same required elements as a State plan as specified in 40 CFR part 60, subpart B. These elements are: identification of legal authority; identification of mechanisms for implementation; inventory of affected facilities; emission inventory; emission limits; compliance schedules; public hearing requirements; reporting and recordkeeping requirements; and public progress reports. Also discussed in this preamble is Federal plan implementation and delegation of authority.

DATES: *Comments.* Comments on this proposal must be received on or before March 24, 1998.

Public Hearing. A public hearing will be held in Washington, DC if individuals request to speak. In addition, a public hearing will be held in any State with an MWC unit that would be covered by the proposed MWC Federal plan, if individuals request to speak. Requests to speak must be received by February 23, 1998. If requests to speak are received, one or more public hearings will be held. A message regarding the date and location of the public hearing(s) may be accessed by calling (919) 541–5339 after February 23, 1998.

ADDRESSES: *Comments.* Comments on this proposal should be submitted (in duplicate, if possible) to: Air and Radiation Docket and Information Center (MC–6102), Attention Docket No. A–97–45, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460. Comments and data may be filed electronically by following the instructions in section I of **SUPPLEMENTARY INFORMATION** of this preamble.

Public Hearing. If timely requests to speak at a public hearing are received, a public hearing will be held in Washington, DC or in any State with an MWC unit that would be covered by the proposed MWC Federal plan. Persons wishing to present oral testimony should notify Ms. Julie Andresen, Program Review Group, Information Transfer and Program Integration Division (MD–12), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5339 at EPA. A message regarding the date and location of the public hearing(s) may be accessed by calling (919) 541–5339.

Docket. Docket numbers A–89–08, A–90–45, and A–97–45 contain the supporting information for this proposed rule and the supporting information for EPA's promulgation of emission guidelines for existing MWC units. These dockets are available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday, at EPA's Air and Radiation Docket and Information Center (Mail Code 6102), 401 M Street, SW, Washington, DC 20460, or by calling (202) 260–7548. The docket is located at the above address in Room M–1500, Waterside Mall (ground floor, central mall). A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: For information regarding this proposal, contact Ms. Julie Andresen at (919) 541–5339, Program Review Group, Information Transfer and Program Integration Division (MD–12), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711. For technical information, contact Mr. Walt Stevenson at (919) 541–5264, Combustion Group, Emission Standards Division (MD–13), U.S.

VOL 63 ISS 15 JA 23 1998 UMI

Environmental Protection Agency, Research Triangle Park, North Carolina 27711. For information regarding the implementation of this Federal plan, contact the appropriate Regional Office (table 2) as shown in section I of Supplementary Information.

SUPPLEMENTARY INFORMATION:

I. Background of MWC Regulations and Affected Facilities

A. Background of MWC Regulations

On February 11, 1991 (56 FR 5488), EPA promulgated in the **Federal Register** emission guidelines for existing MWC units (40 CFR part 60, subpart Ca) under authority of section 111 of the Act as amended in 1977. On September 20, 1994, EPA proposed revised emission guidelines for MWC units (40 CFR part 60, subpart Cb) under sections 111 and 129 of the Act as amended in 1990. On December 19, 1995, EPA issued final emission guidelines applicable to small and large categories of MWC units.[1] *See* 60 FR 65387. On April 8, 1997, the United States Court of Appeals for the District of Columbia Circuit vacated subpart Cb as it applies to MWC units with an individual capacity to combust less than or equal to 250 tons per day of municipal solid waste (MSW) (small MWC units), and all cement kilns combusting MSW, consistent with their opinion in *Davis County Solid Waste Management and Recovery District* v. *EPA*, 101 F.3d 1395 (D.C. Cir. 1996), amended, 108 F.3d 1454 (D.C. Cir. 1997). As a result, subpart Cb applies only to MWC units with an individual capacity to combust more than 250 tons per day of MSW per unit (large MWC units). On August 25, 1997 EPA published changes to the emission guidelines to address the court decision (62 FR 45116). Those changes went into effect on October 24, 1997.

States with existing large MWC units subject to the emission guidelines were required to submit to EPA a plan that implements and enforces the guidelines within 1 year after promulgation of the guidelines, or by December 19, 1996. The court's order that vacated the applicability of the guidelines to small MWC units and cement kilns did not affect the due date or the required content of State plans for large MWC units. The State plans due date remained December 19, 1996. Section 129(b)(3) of the Act requires EPA to develop, implement, and enforce a Federal plan for large units located in States that have not submitted an approvable plan within 2 years after promulgation of the guidelines, or by December 19, 1997. This action proposes a Federal plan for MWC units that are not covered by a State plan. The elements of the Federal plan are summarized in section II of this preamble.

[1] The small category comprised all MWC units located at facilities with total capacity to combust between 35 mg/day (40 tons per day), and 225 mg/day (250 tons per day) of MSW. The large category comprised all MWC units located at facilities with total capacity to combust greater than 250 tons per day of MSW.

B. MWC Federal Plan and Affected Facilities

This proposed MWC Federal plan would affect all MWC units with a combustion capacity greater than 250 tons per day of municipal solid waste (large MWC units) that commenced construction on or before September 20, 1994 that are located in: (1) Any State for which a State plan has not been approved; (2) any State whose State plan has been approved and subsequently vacated in whole or in part; or (3) any State with an approved State plan that subsequently revises any component of the plan (e.g., the underlying legal authority or enforceable mechanism) such that the State plan is no longer as protective as the emission guidelines. The specific applicability of this plan is described in §§ 62.14100 and 62.14102 of subpart FFF.

This proposed MWC Federal plan would not affect an MWC unit covered by an EPA approved State plan. If a State submits a State plan and that State plan is approved before promulgation of the Federal plan, the promulgated MWC Federal plan would not apply to MWC units covered by that State plan. Furthermore, promulgation of this MWC Federal plan does not preclude a State from submitting a State plan later. If a State submits a State plan after promulgation of the MWC Federal plan, EPA will review and approve or disapprove the plan. Upon approval of the State plan, the Federal plan would no longer apply. The EPA will periodically amend the exclusion table in § 62.14102 of subpart FFF to identify MWC units covered in the approved State plan that are excluded from Federal plan applicability. (See the discussion in *State Submits a State Plan After Large MWC Units Located in the State Are Subject to the Federal Plan—Full Transfer of Authority Through State Plan Approval* in section VI of this preamble.) States are, therefore, encouraged to continue their efforts to develop and submit State plans to EPA for approval.

To clarify which MWC units would and would not be covered, this proposed Federal plan lists in the exclusion table in § 62.14102 of subpart FFF those units, by State, to which the MWC Federal plan would not apply. Only the MWC units listed in that table are excluded from the proposed Federal plan. Large MWC units not listed in the exclusion table would be covered by the Federal plan. For example, if a large MWC is located in a State and the large unit is not either specifically listed in the applicability section of the State plan or covered by a general applicability clause in the State plan, the large MWC unit would be subject to the Federal plan. Also, large MWC units overlooked by a State that submitted a negative declaration letter would be subject to the Federal plan. As stated above, EPA expects additional State plans to be approved prior to promulgation of this rule. The promulgated Federal plan would list in the exclusion table, those additional units in States in which an approved State plan applies.

C. Status of State Plan Submittals

Many States are making significant progress on their State plans and EPA expects many State plans to be submitted in the next few months. Table 1 summarizes the status of State plans and negative declarations. The table is based on information from Regional Offices (A–97–45, II–I–5). The status of State plan submittals as of December 19, 1997 is as follows:

- The EPA has approved the State plans for Oregon and Florida and the MWC units covered in those State plans would not be covered by the proposed MWC Federal plan (The EPA has reviewed and approved the State plan for Illinois. However, the **Federal Register** notice approving the plan has not been published. Therefore, the approval of the Illinois State plan is not reflected elsewhere in this proposal.);
- The EPA has received a negative declaration letter from States listed in section I of table 1 stating that there are no large MWC units in these States; thus EPA is not expecting a State plan to be submitted from these States. However, in the unlikely event that large MWC units are subsequently identified in any of these States, this Federal plan would automatically apply to them;
- The EPA has received a State plan from States listed in section II of table 1 and the State plans currently are being reviewed by EPA. The proposed Federal plan would cover large MWC units in these States, but if these State plans are approved, the promulgated Federal plan would not cover units addressed in the approved State plans.
- The EPA has not received a State plan or a negative declaration letter from the States listed in section III of table 1. The large MWC units in these States would be subject to the proposed MWC Federal plan until a State plan applicable to large MWC units is approved by EPA.

[a] Any large MWC units in these States are covered by the proposed Federal plan.

[b] Status codes.

A=Negative declaration submitted. No State plan is expected. However, in the unlikely event that large MWC units are subsequently identified in any of these States, this Federal plan would automatically apply to them.

B=State plan has been submitted and is being reviewed by EPA. If the plan is approved, MWC units in these States would not be subject to the promulgated Federal plan.

C=State plan or negative declaration submittal has not been received.

While section 129 of the Act specifies that the Federal plan would apply to units in any State that has not submitted an "approvable" plan by December 19, 1997, the proposed language in § 62.14100 refers to units in States for which a State plan has not been "approved." Because this Federal plan will be promulgated in 1998, EPA expects to have approved or disapproved State plans that are submitted by December 19, 1997. Thus, when this Federal plan is promulgated, any "approvable" State plans that were submitted by December 19, 1997, will likely have been "approved."

Regulated Entities. Entities regulated by this action are existing MWC units with capacities to combust greater than 250 tons per day of MSW unless the unit is subject to a section 111(d)/129 State plan that has been approved by EPA. The EPA projects that this proposed MWC Federal plan could initially affect up to 143 MWC units at 59 plants in 23 States. However, many State plans are expected to be approved by the time the Federal plan is promulgated. Based on current expectations, this Federal plan may affect 53 MWC units at 21 plants by June 1998 and 13 MWC units at 4 plants by June 1999. Regulated categories and entities include:

Category	Examples of regulated entities
Industry and Local Government Agencies	Waste-to-energy plants that generate electricity or steam from the combustion of garbage by feeding municipal waste into large furnaces. Incinerators that combust trash but do not recover energy from the waste.

The foregoing table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this MWC Federal plan. For specific applicability criteria, see §§ 62.14100 and 62.14102 of subpart FFF.

Electronic Submittal of Comments. Comments and data may be submitted electronically via electronic mail (E-mail) or on disk. Electronic comments on this proposed rule may be filed via E-mail at most Federal Depository Libraries. E-mail submittals should be sent to A-and-R-Docket@epamail.epa.gov. No confidential business information should be submitted through E-mail. Comments and data also will be accepted on disks in WordPerfect 5.1 or 6.1 file format or ASCII file format. Electronic comments must avoid the use of special characters and any form of encryption. All comments and data for this proposal, whether in paper form or electronic forms, must be identified by docket number A–97–45.

Regional Office Contacts. For information regarding the implementation of the MWC Federal plan, contact the appropriate EPA Regional Office as shown in table 2.

II. Required Elements of the Proposed MWC Federal Plan

Sections 111(d) and 129 of the Act, as amended, 42 U.S.C. 7411(d) and 7429(b)(2), require States to develop and implement State plans for MWC units to implement and enforce the promulgated emission guidelines. Subparts B and Cb of 40 CFR part 60 require States to submit State plans that include specified elements. Because this Federal plan is being proposed in lieu of State plans, it includes the same essential elements: (1) identification of legal authority, (2) identification of mechanisms for implementation, (3) inventory of affected facilities, (4) emission inventory, (5) emission limits, (6) compliance schedules, (7) public hearing requirements, (8) reporting and recordkeeping requirements, and (9) public progress reports. Each State plan element is summarized below as it relates to this proposed MWC Federal plan.

A. Legal Authority and Mechanisms for Implementation

As a required element of a State plan, a State must demonstrate that it has the legal authority to adopt and implement the emission requirements and compliance schedules in the State plan. The State also must identify the enforceable State mechanism for implementing the emission guidelines (e.g., a State rule or other State enforcement mechanism). Section 129(b)(3) of the Act requires EPA to develop a Federal plan for States that do not submit an approvable State plan within 2 years after promulgation of the emission guidelines. By proposing this MWC Federal plan, EPA is fulfilling its obligation under the Act to establish emission limits and other requirements for MWC units in States that have not yet submitted approvable plans. The EPA is proposing a Federal regulation under the legal authority of the Act as the mechanism to implement the emission guidelines. However, as discussed in section VI of this preamble, implementation and enforcement of the Federal plan can be delegated to State and local agencies. Furthermore, when a State plan is approved, the Federal plan will no longer apply to MWC units covered by a State plan.

B. Inventory of Affected MWC Units

As a required element, a State plan must include a complete source inventory of MWC units affected by the emission guidelines. Consistent with the requirement for State plans to include an inventory of MWC units, docket A–97–45 contains an inventory of large MWC units covered by this proposed MWC Federal plan. The inventory is contained in a memorandum entitled "Inventory and Emission Estimates for Large Municipal Waste Combustor Units Covered by the Proposed Federal Section 111(d)/129 Plan" (A–97–45, II–B–1). Item II–B–1 serves both the MWC inventory requirement and the MWC emission inventory requirement, which will be discussed in the following section. The inventory is based on information available to EPA during development of the 1995 emission guidelines and recent information from EPA Regional Offices.

C. Inventory of Emissions

As a required element, a State plan must include an emission inventory for MWC units subject to the emission guidelines. The pollutants to be inventoried include dioxins/furans, cadmium (Cd), lead (Pb), mercury (Hg), particulate matter (PM), hydrogen chloride (HCl), nitrogen oxides (NO_X), carbon monoxide (CO), and sulfur dioxide (SO_2). For this proposal, EPA has estimated the emissions from each MWC unit that would be covered by the Federal plan for all pollutants regulated by the Federal plan. This emission inventory is item II–B–1 in docket A–97–45. Table 3 of this preamble summarizes the results of the inventory for those States that do not have an approved State plan. Pollutant emissions are expressed in megagrams per year (Mg/yr) for most pollutants and grams per year (g/yr) for dioxins. The emission inventory is based on information known about the combustor and uses emission factors contained in "Compilation of Air Pollutant Emission Factors" (AP–42). Refer to the emission estimates memorandum in docket A–97–45 for the complete emissions inventory and details on the calculations.

TABLE 3.—SUMMARY OF CURRENT EMISSIONS FROM LARGE MWC UNITS BY STATE

D. Emission Limits

Emission Limits. As a required element, a State plan must include emission limits. Section 129(b)(2) requires these emission limits to be "at least as protective as" those in the emission guidelines. The emission limits in this proposed MWC Federal plan are the same as those contained in

VOL
63
ISS
15
JA
23
1998
UMI

the emission guidelines (40 CFR part 60, subpart Cb) as amended on August 25, 1997 (62 FR 45116). The emission limits and additional requirements are summarized in section V of this preamble. (See the discussion in *An Approved State Plan Is No Longer As Protective As The Emission Guidelines—Partial Transfer of Authority Through Delegation* in section VI of this preamble for a discussion of State plans that do not include the amended emission limits.)

The emission limits for all pollutants except NO_x can be achieved by the combination of good combustion practices (GCP), post-combustion control by a spray dryer with either an electrostatic precipitator (ESP) or a fabric filter, and supplemented with activated carbon injection. For MWC units requiring NO_x control, the limits can be achieved using selective noncatalytic reduction (SNCR). This combination of controls was determined to represent the Maximum Achievable Control Technology (MACT) under the section 129 guidelines. An MWC owner or operator is free to employ any techniques to comply with the proposed MWC Federal plan, as long as the numerical emission limits for all pollutants are met.

The emission guidelines, as amended on August 25, 1997, apply the emission limits for SO_2, HCl, Pb, and NO_x in two stages. The final guidelines require compliance with the emission limits in the 1995 guidelines by December 19, 2000 and compliance with the four amended emission limits by August 25, 2002. Specifically, the final emission guidelines require compliance with SO_2 and HCl limits of 31 parts per million by volume (ppmv) by December 19, 2000 and 29 ppmv by August 25, 2002. The lead limit is 0.49 milligrams per dry standard cubic meter (mg/dscm) by December 19, 2000, and 0.44 mg/dscm by August 25, 2002. The NO_x limit for one type of MWC, fluidized bed combustors, decreases. The four amended limits were added as a result of a court decision, as described in 62 FR 45116 (August 25, 1997).

This proposed Federal plan addresses the emission limits in 40 CFR part 60, subpart Cb, including the final amended limits for the four pollutants, and would require compliance with all limits by December 19, 2000. The same types of air pollution control technology served as the basis for both the 1995 and the amended limits: spray dryer/fabric filter or ESP, carbon injection, and SNCR for non-refractory combustor types. Large MWC units would need to install these controls by December 19, 2000 to meet the original limits, and as soon as the controls are installed, they will also meet the final, amended limits. Thus, for simplicity, this proposed Federal plan includes only the final, amended emission limits for these four pollutants.

Operator Training and Certification. The emission guidelines require American Society of Mechanical Engineers (ASME) or a comparable State program for operator certification for chief facility operators and shift supervisors, and an EPA or State MWC operator training course for chief facility operators. In States that have not yet submitted State plans or that do not have State operator training and certification programs, ASME certification and the EPA operator training course would be required. However, some States already have submitted to EPA either a partial or a complete State plan allowing State training courses and/or State certification programs. The EPA is reviewing these plans, but has not approved them yet, so the facilities in these States would be covered by this proposed MWC Federal plan until EPA approves the State plan. Because this Federal plan is an interim action until State plans are approved, the Federal plan includes State certification and State training courses if submitted in a State plan. Therefore, this proposed Federal plan would allow ASME or State certification in Connecticut and Maryland. This proposed Federal plan also would allow EPA or State operator training courses in Connecticut. The EPA requests information on whether other States that will be submitting plans in the near future have State certification programs and/or State operator training courses. If States submit this information to EPA before the end of the comment period for this proposal (March 24, 1998), EPA intends to allow State certification and State operator training courses in the promulgated Federal plan for those States.

NO_x Trading. The emission guidelines [§ 60.33b(d)] allow States to establish programs to allow owners or operators of existing MWC units to trade nitrogen oxide emission credits. At this time, no State has submitted such a program for approval as part of their State plan. However, a State could include such a program in a future State plan submittal for approval by the Administrator on a case-by-case basis prior to implementation. Trading programs are not included in the proposed MWC Federal plan for the following reasons: (1) No State has requested such a trading program; (2) these trading programs, if approved by the State, are to be proposed by the State for potential approval by EPA; and (3) at least one State has specifically excluded MWC units from their State trading program. States may still allow an owner or operator to use that State's NO_x trading program to meet the Federal plan emission limits. For example, if a State allows an owner or operator to use that State's NO_x trading program to meet the emission limits rather than retrofit control equipment, then the owner or operator would submit its trading approach to the State for case-by-case approval. Then, the State would follow that State's approved procedures for approving the owner or operator's approach and then the owner or operator would submit the State-approved, source-specific trading approach to EPA for case-by-case approval in time to commence the trading program by the date the final control plan is due for the specific MWC units. (See section II.E for additional discussion on determining the dates for achieving the increments of progress.) Please note that both the owner or operator and the State must act expeditiously in order to ensure that the public and EPA have sufficient time to review the specifics of the proposed trade. In general, EPA supports open market concepts, including trading, especially when they can be harnessed to achieve environmental limits, minimize costs, and EPA can ensure the technical validity and appropriate tracking of the parameters of the trade.

NO_x Emission Averaging. The emission guidelines allow States to allow the owner or operator of an affected facility to implement a NO_x emission averaging plan within an MWC plant with multiple MWC units. (*See* 40 CFR 60.33b(d), subpart Cb.) At this time, no State has submitted such plant-wide emission averaging for approval as part of their State plan, nor have any States approved such averaging as part of the initial compliance report as specified in 40 CFR 60.59b(f) or the annual compliance report specified in 40 CFR 60.59b(g), as applicable. Therefore, no source-specific averaging plans are included in this Federal plan. However, a State could propose a NO_x emission averaging plan in a future State plan submittal for potential approval by EPA prior to implementation. Furthermore, an owner or operator may propose to use plant-wide NO_x emission averaging to meet the Federal plan NO_x emission limits. The proposed NO_x emission averaging plan must be submitted in the initial compliance report specified in 40 CFR 60.59b(f) or annual compliance report specified in 40 CFR 60.39b(g), as applicable, prior to implementation.

E. Compliance Schedules and Increments of Progress

As a required element, a State plan must include compliance schedules for retrofitting controls to comply with the emission guidelines. Because this proposed MWC Federal plan is being implemented in lieu of State plans, its compliance schedule includes the same five increments of progress as required in a State plan. The Federal plan increments of progress are consistent with the State plan requirements in 40 CFR 60.24 of subpart B. These increments of progress are required for compliance schedules that are longer than 12 months. The increments of progress in the Federal plan (and any approved State plan) are the primary mechanism for ensuring progress toward final compliance. Each increment of progress has a specified date for achievement.

This proposed Federal plan includes the five increments of progress and provides three options to establish the increment dates. Under all three options the five increment dates are defined and are enforceable. The Federal plan could function with only one option, but in order to provide maximum flexibility, this proposal includes three options. The EPA requests comments on each of the options and on the desirability of including these multiple options in the final Federal plan. Based on comments received, the final Federal plan will include one, two, or three options. All three options are discussed in more detail following the definitions for the increments of progress as listed below.

1. Increments of Progress

The increments of progress to be measured are: (1) Submitting a final control plan, (2) awarding contracts for control systems or process modifications or orders for purchase of components, (3) beginning on-site construction or installation of the air pollution control device(s) or process changes, (4) completing on-site construction or installation of the air pollution control device(s) or process changes, and (5) final compliance.

The MWC owner or operator is responsible for meeting each of these five increments of progress for each MWC unit no later than the applicable compliance date. The owner or operator must notify EPA as each increment of progress is achieved (or missed). The notification must identify the increment and the date the achieved increment was met (or missed). For an increment achieved late, the notification must identify the increment and the date the increment was ultimately achieved.

The owner or operator must mail the (post-marked) notification to the applicable EPA Regional Office within 10 business days of the increment date defined in the Federal plan. (See table 2 under the "Supplementary Information" section of this document for a list of Regional Offices.) The definition of each increment of progress follows:

Submit a Final Control Plan. To meet this increment, the owner or operator of each MWC unit must submit a plan that describes the air pollution control devices or process changes that will be employed so that each MWC unit complies with the emission limits and other requirements. The plan must include a complete analysis of the applicable regulatory requirements and methods of compliance and selected control technology options available to meet these requirements. (The EPA intends to provide compliance assistance information to MWC owners and operators upon request.) The final control plan also must contain engineering specifications and drawings of all air pollution control equipment planned to be installed and/or descriptions of planned process changes. The owner or operator of an MWC unit will typically use the services of architectural and engineering (A/E) firms to obtain the design drawings and other operational characteristics of air pollution control devices to include in the final control plan. The final control plan must include information of sufficient detail to be used to solicit bids to install the air pollution control devices or initiate the process changes. If an MWC owner or operator plans to close a unit rather than retrofit controls to comply with the Federal plan by the applicable compliance date, a final control plan for that unit is not required. The owner or operator, however, must notify EPA of such a cease operation decision by the date the final control plan is due. The owner or operator must also submit a legally enforceable cease operation agreement documenting the date by which the unit will cease operation if operations cease later than 1 year after promulgation of the Federal plan. (See section IV of this preamble for additional discussion of closed and closing units.)

Award Contract. To award contract means the MWC owner or operator enters into legally binding agreements or contractual obligations that cannot be canceled or modified without substantial financial loss to the owner or operator. The EPA anticipates that the owner or operator may award a number of contracts to complete the retrofit. To meet this increment of progress, the MWC owner or operator must award a contract or contracts to initiate on-site construction, initiate on-site installation of air pollution control devices, and/or incorporate process changes. The owner or operator must mail a copy of the signed contract(s) to EPA within 10 business days of entering the contract(s).

Initiate On-site Construction. To initiate on-site construction, installation of air pollution control devices, or process change means to begin any of the following:

- Installation of an air pollution control device to be used to comply with the final emission limits as outlined in the final control plan;
- Physical preparation necessary for the installation of an air pollution control device to be used to comply with the final emission limits as outlined in the final control plan;
- Alteration of an existing air pollution control device to be used to comply with the final emission limits as outlined in the final control plan;
- Alteration of the municipal waste combustion process to accommodate installation of an air pollution control device to be used to comply with the final emission limits as outlined in the final control plan; or
- Process changes identified in the final control plan being made to meet the emission standards.

Complete On-site Construction. To complete on-site construction means that all necessary air pollution control devices or process changes identified in the final control plan are in place, on site, and ready for operation on the MWC unit. If the owner or operator of an MWC unit is unable to complete on-site construction prior to December 19, 2000 and, therefore ceases an MWC unit's operation and plans to restart it, the owner or operator must notify EPA and enter into a legally enforceable cease operation agreement by the date the final control plan is due. (See section IV of this preamble for additional discussion of closed and closing units.)

Final Compliance. To be in final compliance means to incorporate all process changes or complete retrofit construction as designed in the final control plan and to connect the air pollution control equipment or process changes with the affected facility identified in the final control plan such that if the affected facility is brought on line all necessary process changes or air pollution control equipment are operating as designed. Within 180 days after the date the facility is required to achieve final compliance, the initial performance test must be conducted. On

VOL 63 ISS 15 JA 23 1998 UMI

or after the date the initial performance test is completed or is required to be completed, whichever is earlier, no pollutant may be discharged into the atmosphere from an affected facility in excess of the applicable emission limits.

2. Summary of Three Options for Determining Schedule Increment Dates

The proposed Federal plan includes three options for establishing the increment dates. The compliance schedule for facilities affected by this MWC Federal plan could be established by option 1 (generic compliance schedule proposed by EPA), option 2 (facility-specific schedule consistent with the State plan submitted to EPA by the State), or option 3 (facility-specific schedule submitted to EPA by the owner or operator of the MWC unit or the State). Under all three options the five increment dates would be defined and are enforceable.

In cases where option 2 or 3 has not been exercised, the owner or operator of an affected facility would be subject to option 1 (generic schedule). However, if the State or the MWC owner or operator submits a schedule that EPA approves (option 2 or 3), the owner or operator would be subject to that alternative schedule. Under option 2, States may submit increment schedules to EPA prior to the end of the comment period for this proposal March 24, 1998. Under option 3, an MWC owner or operator or the State may submit a schedule to EPA at the time the final control plan is due under the option 1 generic compliance schedule September 21, 1998. In options 2 and 3, EPA would review the schedules and incorporate them into the Federal plan. Each of the options is discussed in detail below.

Option 1. Generic Compliance Schedule. Option 1 is the generic default alternative. For MWC units covered by the Federal plan where State plans or compliance schedules have not been submitted, EPA is proposing generic compliance schedules and increments of progress. Alone, option 1 could be unnecessarily inflexible and reflects past approaches to regulatory compliance. However, option 1 is necessary to establish a baseline where neither option 2 nor 3 is exercised. Within option 1, the same generic schedule would apply to each MWC unit for all pollutants except dioxin and mercury. The compliance schedule for dioxin and mercury depends on the date of the MWC unit's construction, as described below.

The emission guidelines and section 129(b)(2) allow MWC units to complete retrofits or close no later than December 19, 2000. To be consistent with the emission guidelines, the final compliance date (for all pollutants except mercury and dioxin) in the proposed Federal plan is December 19, 2000. Because many MWC units are expected to retrofit combustion controls, as well as acid gas, PM, mercury, and/or NO_X controls to meet the emission limits (e.g., spray dryer/fabric filter or ESP, carbon injection, and/or SNCR), under this proposal they are given the maximum time (until December 19, 2000) to complete retrofits.

The emission guidelines require MWC units that commenced construction, reconstruction, or modification after June 26, 1987 to achieve compliance with the mercury and dioxin limits within 1 year after State plan approval (or 1 year after a revised construction permit or a revised operating permit is issued, if a permit modification is required, whichever is later). The EPA is, therefore, proposing to require compliance with the mercury and dioxin limits within 1 year after promulgation of the MWC Federal plan (or 1 year after a revised construction permit or a revised operating permit is issued, if a permit modification is required, whichever is later).

The EPA is proposing increments of progress as part of the generic compliance schedule. Tables in subpart FFF show the proposed increments of progress for pre-1987 units (December 19, 2000 schedule for all pollutants) and post-1987 units (1 year schedule for dioxin and mercury, December 19, 2000 schedule for all other pollutants).

While the generic compliance schedule is ambitious, EPA believes it is achievable because MWC owners and operators and States have known that they would need to install controls by December 19, 2000 as a result of the promulgation of the emission guidelines on December 19, 1995. Thus, MWC units already should have been developing their final control plans and should be ready to begin retrofits quickly. Furthermore, EPA believe that the generic compliance schedules are necessary to ensure final compliance by December 19, 2000.

The generic compliance schedule and increments of progress are based on case studies of four MWC plants that either completed or are in the process of completing retrofits of the controls needed to meet the subpart Cb emission limits. The EPA reviewed the retrofit schedules for MWC units at four MWC plants containing 12 MWC units. The retrofit case studies are documented in docket A–97–45 (II–A–1 through II–A–5).

The EPA compared the four retrofits to the increments of progress required by subpart B and determined appropriate time intervals for each increment. To provide maximum flexibility, the first three Federal plan increments are based on the maximum time required by any of the retrofits studied. The fourth increment was established to provide the maximum time to complete retrofits and still meet the final compliance date. The final increment (final compliance by December 19, 2000) is dictated by the Act.

The generic compliance schedule would apply to all MWC units subject to this MWC Federal plan, except those units that are subject to site-specific compliance schedules as submitted under option 2 or 3. If a large MWC unit will not complete construction and achieve final compliance by December 19, 2000, the guidelines allow and this proposed Federal plan would allow the unit to cease operation by December 19, 2000, complete the retrofit while not operating, and comply upon restarting. (See section IV of this preamble for a discussion of closed and closing units.)

Option 2. Site-specific Compliance Schedules Submitted by States. Under option 2, States would submit increment dates as negotiated with MWC owners or operators to EPA before the end of the comment period of this proposal. Following review and approval of these schedules, EPA would add them to the Federal plan. This assures the Federal plan is fully consistent with State plans that are approved after the Federal plan is promulgated. In some cases the State already has negotiated a retrofit schedule with the MWC owner or operator, determined what retrofit schedule is feasible, held public hearings, and considered public comments.

Several States have already submitted compliance schedules to EPA and these site-specific compliance schedules are included in this proposed Federal plan. The following States have submitted compliance schedules as of December 19, 1997: Georgia, New York, New Jersey, Maine, Maryland, Michigan, Minnesota, Pennsylvania, Tennessee, and Virginia. Some schedules have already been reviewed by EPA. Other schedules have not yet been reviewed because of their late arrival. The EPA will review these schedules concurrently with other compliance schedules submitted under this option. The site-specific compliance schedule table in subpart FFF contains the site-specific compliance schedules submitted to EPA. Some MWC units have already met some of their increments of progress.

Option 3. Site-specific Compliance Schedules Submitted by MWC Owners or Operators or the State. The third option for determining the compliance dates is for the MWC owner or operator or the State to submit a site-specific date for achieving increments 2, 3, and 4 to EPA for approval. The dates for increment 1 (submitting a final control plan) and increment 5 (achieving final compliance) would be the same as option 1. As documented in the retrofit studies (docket A–97–45), the date for achieving the first increment (September 21, 1998) reflects the maximum time required by any of the retrofits studied. The final increment compliance date (December 19, 2000) is dictated by the Act.

The EPA recognizes that flexibility may be needed for the award contract date, the start construction date, and the finish construction date given facility-specific retrofit considerations and constraints. Therefore, under option 3, EPA is requesting facility-specific compliance schedules from MWC owners or operators or the State.

The State or the MWC owner or operator (preferably after consulting with the State) would submit alternative dates for increments 2, 3, and 4 to EPA on September 21, 1998, at the time the final control plan is due. The MWC owner or operator would submit a copy of the compliance schedule to both EPA and the State. The EPA would review the schedule and coordinate with the owner or operator and the State. Following EPA approval, EPA would add the schedule to the site-specific compliance schedule table in subpart FFF as a technical amendment.

In summary, the proposed MWC Federal plan includes three options for defining the five increment dates. The EPA believes including all three options in the Federal plan maximizes flexibility and increases regulatory efficiency. The EPA specifically requests comments on each of the options provided in this proposal, as well as comments on the desirability of including only a subset of the options in the final Federal plan.

F. Record of Public Hearings

As a required element of a State plan, a State must include opportunity for public participation in developing, adopting, and implementing the State plan. For this MWC Federal plan, a public hearing will be held in Washington, DC, if individuals request to speak. In addition, a public hearing will be held in any State with an MWC unit covered by the proposed MWC Federal plan, if individuals request to speak. (See the Dates section of this preamble.) The hearing record will appear in docket A–97–45. A hearing would be held in Washington, DC because most of the MWC units affected by the Federal plan are located in the eastern United States and Washington, DC is easily accessible. Written public comments also are solicited. (See the Addresses section of this document.) The EPA will review and consider the oral and written comments in developing the final Federal plan.

G. Testing, Monitoring, Recordkeeping, and Reporting

As a required element, a State plan must include the test methods listed in 40 CFR 60.58b of subpart Eb and the recordkeeping and reporting requirements listed in 40 CFR 60.59b of subpart Eb. The proposed MWC Federal plan includes the same provisions.

H. Progress Reports

As a required element of a State plan, a State must submit to EPA annual reports on progress in the implementation of the emission guidelines. Emissions data would be reported to the Aerometric Emissions Information Retrieval System Facility Subsystem as specified in 40 CFR part 60, appendix D. If a State has been delegated authority to implement and enforce the proposed Federal plan, the State would submit annual progress reports to EPA, as required by 40 CFR 60.25(e) of subpart B. These reports can be combined with the State Implementation Plan report required by 40 CFR 51.32 of subpart Q, in order to avoid duplicative reporting. Each progress report should include compliance status, enforcement actions, increments of progress, identification of sources that have ceased operation or started operation, updated emission inventory and compliance information, and copies of technical reports on any performance testing and monitoring. For MWC units in States where authority has not been delegated, EPA intends to prepare annual progress reports.

III. Proposed Amendments to General Provisions of 40 CFR Part 62

The proposed Federal plan would be added as a new subpart to 40 CFR part 62. Part 62 currently contains approvals and promulgations of State plans developed under section 111(d) of the Act. The MWC Federal plan is developed under both sections 111(d) and 129 of the Act. This proposal would amend the general provisions (subpart A) of part 62 to specify that Federal plans are contained in part 62. It would also amend the introductory text in § 62.02 to refer to section 129, as applicable, in addition to section 111(d). This is necessary because MWC State plans that are approved and published in part 62, as well as the proposed Federal plan, are developed to meet the requirements of both sections 111(d) and 129 of the Act.

IV. Implications for Closed Units, Units That Plan To Close, and Units That Plan To De-Rate

The emission guidelines (40 CFR part 60, subpart Cb) require MWC units to comply with the emission limits or close within 3 years following approval of a State plan, but no later than December 19, 2000. Units subject to the Federal plan would also be required to comply or close by December 19, 2000. The Federal plan, consistent with the emission guidelines, would further require that if the owner or operator of a large MWC unit is planning to cease operation of the unit, the owner or operator must either cease operation of the unit within 1 year of promulgation of this Federal plan or submit a "closure agreement" (i.e., a cease operation agreement) that defines the date operation will cease. Cease operation agreements must be legally enforceable.

This section describes how this Federal plan addresses various categories of closed MWC units and de-rated MWC units, including:

- Dismantled MWC units;
- MWC units that have ceased operation;
- MWC units that will cease operation within 1 year of Federal plan promulgation;
- MWC units that will cease operation later than 1 year after Federal plan promulgation;
- MWC units that will cease operation and plan to restart after December 19, 2000; and
- MWC units that will de-rate (reduce capacity).

A. Dismantled Units

Units that are partially or fully dismantled are not required to be included in the MWC unit inventory that is an element of a State plan or this Federal plan. MWC units are partially or fully dismantled if they have been physically altered so they cannot operate. Dismantled units cannot be restarted without extensive work; and if they were restarted, they would be considered a new unit and would be subject to the subpart Eb new source performance standard (NSPS) rather than to the State or Federal plan for existing units.

B. Units That Have Ceased Operation

MWC units that are known to have ceased operation already (but are not known to be dismantled) are included in the inventory element of this proposed Federal plan. Such units must

VOL 63 ISS 15 JA 23 1998 UMI

also be identified in any State plans submitted to EPA. If the owner or operator of these inactive MWC units plans to restart these units before December 19, 2000, the units would be required to achieve the same compliance schedule required for other MWC units and final compliance would be achieved for all pollutants no later than December 19, 2000. In order to assure compliance by the required date, the owner or operator of units that have ceased operation, but who plans to restart the units before December 19, 2000, must submit a final control plan and the units must comply with the five increments of progress on the same generic schedule as other MWC units subject to this Federal plan. (See section II.E for a discussion of compliance schedules and increments of progress.)

If inactive MWC units will not be restarted until after December 19, 2000, a control plan would not be needed. However, the proposed Federal plan specifies that any units that have ceased operation and are planned to be restarted after December 19, 2000, must complete retrofit and comply with the emission limits and operational requirements immediately upon restarting. Performance testing to demonstrate compliance would be required within 180 days after restarting. The dates for increments of progress that lead to final compliance (e.g., awarding contracts, initiating on-site construction, completing on-site construction) would not need to be specified for units that have ceased operation and plan to restart after December 19, 2000, because these activities would occur before restart while the units are closed and have no emissions. If a unit was operated after December 19, 2000 without complying, it would be a violation of the Federal plan.

C. Units That Will Cease Operation Within 1 Year of Federal Plan Promulgation

The owner or operator of currently operating MWC units subject to this Federal plan who will cease operation of the units rather than comply with the emission limits would be required to notify EPA at the time that final control plans are due. The owner operator would specify whether the MWC units will cease operation within 1 year or at a later date. If the owner or operator notifies EPA that the MWC units will cease operation within 1 year of promulgation of this Federal plan, the owner or operator would not be required to enter into a cease operation agreement. However, if the owner or operator does not cease operation of the units by the date 1 year after promulgation, it would be a violation of the Federal plan.

D. Units That Will Cease Operation Later Than 1 Year After Federal Plan Promulgation

The owner or operator of an MWC unit that will cease operations more than 1 year after promulgation of the Federal plan would be required to notify EPA at the time the final control plan is due that the owner or operator will cease operation of the unit. The owner or operator of such an MWC unit also would need to enter into a legally enforceable cease operation agreement with EPA by the date the final control plan is due. The cease operation agreement would include the date that operation will cease. The owner or operator of an affected MWC unit that is ceasing operation more than 1 year after promulgation of this Federal plan would also submit data for dioxin/furan emission tests by the date 1 year after promulgation of this Federal plan per § 62.14109 of the proposed Federal plan rule. This requirement is consistent with subpart Cb. The cease operation agreement ensures that the MWC unit will cease operation by an agreed-upon enforceable date. In all cases, this date would be no later than December 19, 2000.

E. Units That Will Cease Operation and Plan to Restart After December 19, 2000

MWC units covered by this Federal plan that will cease operation can be restarted after December 19, 2000 if the units achieve compliance upon restarting. The proposed Federal plan allows for MWC units that cease operation by December 19, 2000 and then restart as part of their retrofit schedule, because it may not be feasible for the owner or operator of every MWC unit at every MWC plant to complete every unit's retrofit by December 19, 2000. Some owners or operators will wish to stagger retrofit of their units to maintain service. For example, an MWC plant owner or operator may complete retrofits on two of three MWC units before December 19, 2000 and those two units could remain in operation. The owner or operator could cease operation of the third unit on December 19, 2000 and complete the unit's retrofit prior to restarting. (Performance testing on the third unit would be conducted within 180 days of restarting the retrofitted MWC unit.)

If the owner or operator of MWC units covered by this Federal plan wishes to include ceasing operations as part of the retrofit schedule, the owner or operator would be required to notify EPA at the time the final control plan is due. The owner or operator would also enter into a cease operation agreement if the unit ceases operation later than 1 year after Federal plan promulgation as described in section IV.D. The proposed Federal plan specifies that when an MWC unit restarts after December 19, 2000, it must comply with the Federal plan emission limits and operational requirements upon restarting. There would be no need to establish and meet specific dates for the remaining increments of progress (i.e., awarding contracts, initiating on-site construction, completing on-site construction, and final compliance) because these increments would be completed while the unit is closed and there are no emissions. The proposed Federal plan specifies that the unit must achieve final compliance with the Federal plan emission limits and operating requirements as soon as it is restarted. The performance test to demonstrate compliance would be required within 180 days after restarting.

F. Units That Plan To De-rate

The proposed Federal plan would allow the owner or operator of an MWC unit to de-rate the capacity of an MWC unit to below 250 tons per day. Therefore, the MWC unit would be no longer be subject to the MWC Federal plan. De-rating means a permanent change that physically reduces the capacity of the MWC unit to less than 250 tons per day of MSW. (De-rating cannot be a permit provision, but must be a permanent physical restriction). The owner or operator that plans to de-rate an MWC unit would de-rate the unit on the same schedule and increments that the MWC unit would have had to follow if it were to be retrofit to meet the emission limits. For example, the owner or operator of an MWC unit that commenced construction before June 1987 that is subject to the proposed generic compliance schedule would need to submit a plan describing the specific physical changes and schedule for accomplishing the de-rating on the date the final control plan is due. The owner or operator would need to award a contract for the physical changes to the units to accomplish the de-rating by the date MWC units are required to award contracts for retrofit of air pollution control equipment. The owner or operator would need to initiate on-site construction and complete on-site construction to accomplish the de-rating by the dates for these increments specified in the proposed generic compliance schedule. Once the MWC unit physically is unable to combust more than 250 tons per day, it would no longer subject to the MWC Federal plan.

V. Summary of Federal Plan Emission Limits and Requirements

The proposed MWC Federal plan (40 CFR part 62, subpart FFF), which will implement the emission guidelines, includes emission limits, operating practice requirements, operator training and certification requirements, and compliance and performance testing requirements. These emission limits and requirements are the same as those in the emission guidelines (40 CFR part 60, subpart Cb), as amended. Table 4 summarizes the requirements of the Federal plan rule (40 CFR part 62, subpart FFF).

TABLE 4.—SUMMARY OF FEDERAL PLAN REQUIREMENTS FOR EXISTING MWCs[a]

Applicability:
The Federal plan would apply to existing MWC units with capacities to combust greater than 250 tons per day of municipal solid waste unless the unit is subject to a section 111(d)/129 State plan that has been approved by EPA.

Unit size (MSW combustion capacity)	Requirement
> 250 tons per day (referred to as a large MWC unit)	Subject to provisions listed below.

Good Combustion Practices:
- A site-specific operator training manual would be required to be developed and made available for MWC personnel.
- The EPA or a State MWC operator training course would be required to be completed by the MWC chief facility operator, shift supervisors, and control room operators.
- The ASME (or State-equivalent) provisional and full operator certification would be required to be obtained by the MWC chief facility operator (mandatory), shift supervisors (mandatory), and control room operators (optional).
- The MWC load level would be required to be measured and not to exceed 110 percent of the maximum load level measured during the most recent dioxin/furan performance test.
- The maximum PM control device inlet flue gas temperature would be required to be measured and not to exceed the temperature 17°C above the maximum temperature measured during the most recent dioxin/furan performance test.
- The CO level would be required to be measured using a CEMS, and the concentration in the flue gas would be required not to exceed the following:

MWC type	CO level	Averaging time
Modular starved-air and excess-air	50 ppmv	4-hour.
Mass burn waterwall and refractory	100 ppmv	4-hour.
Mass burn rotary refractory	100 ppmv	24-hour.
Fluidized-bed combustion	100 ppmv	4-hour.
Pulverized coal/RDF mixed fuel-fired	150 ppmv	4-hour.
Spreader stoker coal/RDF mixed fuel-fired	200 ppmv	24-hour.
RDF stoker	200 ppmv	24-hour.
Mass burn rotary waterwall	250 ppmv	24-hour.

MWC Organic Emissions (measured as total mass dioxins/furans):
- Dioxins/furans (performance test by EPA Reference Method 23)

MWC units utilizing an ESP-based air pollution control system	60 ng/dscm total mass (mandatory) or 15 ng/dscm total mass (optional to qualify for less frequent testing).[b]
MWC units utilizing a nonESP-based air pollution control system	30 ng/dscm total mass (mandatory) or 15 ng/dscm total mass (optional to qualify for less frequent testing).[b]

- Basis for dioxin/furan limits GCP and SD/ESP or GCP and SD/FF, as specified above.

MWC Metal Emissions:
- PM (performance test by EPA Reference Method 5)
  27 mg/dscm (0.012 gr/dscf).
- Opacity (performance test by EPA Reference Method 9).
  10 percent (6-minute average).
- Cd (performance test by EPA Reference Method 29).
  0.040 mg/dscm (18 gr/million dscf).
- Pb (performance test by EPA Reference Method 29).
  0.44 mg/dscm (200 gr/million dscf).
- Hg (performance test by EPA Reference Method 29).
  0.080 mg/dscm (35 gr/million dscf) or 85-percent reduction in Hg emissions.
- Basis for PM, opacity, Cd, Pb, and Hg limits GCP and SD/ESP/CI or GCP and SD/FF/CI.

MWC Acid Gas Emissions:
- SO_2 (performance test by CEMS).
  29 ppmv or 80-percent reduction in SO_2 emissions.
- HCl (performance test by EPA Reference Method 26).
  29 ppmv or 95-percent reduction in HCl emissions.
- Basis for SO_2 and HCl limits.
  See basis for MWC metals.

Nitrogen Oxides Emissions:
- NO_X (performance test by CEMS):

Mass burn waterwall	205 ppmv.
Mass burn rotary waterwall	250 ppmv.
Refuse-derived fuel combustor	250 ppmv.
Fluidized bed combustor	180 ppmv.
Mass burn refractory	No NO_X control requirement.

VOL 63 ISS 15 JA 23 1998 UMI

• Basis for NO_X limits:	
MWC units except refractory	SNCR.
Refractory MWC units	No NO_X control requirement.
Fugitive Ash Emissions:	
• Fugitive Emissions (performance test by EPA Reference Method 22). Visible emissions 5 percent of the time from ash transfer systems except for maintenance and repair activities.	
• Basis for fugitive emission limit	Wet ash handling or enclosed ash handling.
Performance Testing and Monitoring Requirements:	
• Reporting frequency	Annual (semiannual if violation).
• Load, flue gas temperature	Continuous monitoring, 4-hour block arithmetic average.
• CO	CEMS, 4-hour block or 24-hour daily arithmetic average, as applicable.
• Dioxins/furans, PM, Cd, Pb, HCl, and Hg	Annual stack test.
• Opacity	COMS (6-minute average) and annual stack test.
• SO_2	CEMS, 24-hour daily geometric mean.
Fugitive ash emissions	Annual test
• NO_X	CEMS, 24-hour daily arithmetic average.
Compliance Schedule: See Section II.E of this preamble.	

[a] All concentration levels in the table are converted to 7 percent O_2, dry basis.
[b] Although not part of the dioxin/furan limit, the dioxin/furan total mass limits of 30 ng/dscm and 60 ng/dscm are equal to about 0.3 to 0.8 ng/dscm TEQ and 0.7 to 1.4 ng/dscm TEQ, respectively. The optional reduced testing limit of 15 ng/dscm total mass is equal to about 0.1 to 0.3 ng/dscm TEQ.

VI. Implementation of Federal Plan and Delegation

The EPA is required to promulgate emission guidelines that are applicable to existing solid waste incineration sources under sections 111(d) and 129 of the Act. However, the emission guidelines are not enforceable until EPA approves a State plan or promulgates a Federal Plan. In cases where a State has not submitted an approvable plan, the EPA must promulgate a MWC Federal plan for sources in the State as a "stop-gap" measure to implement the emission guidelines.

Congress has determined that the primary responsibility for air pollution control rests with State and local agencies. *See* the Act 101(a)(3). Sections 111 and 129 of the Act also intend for the States to take the primary responsibility for ensuring that emission reduction targets are met. The daily administration of a comprehensive air pollution control initiative, such as this MWC Federal plan, cannot be easily accomplished by EPA. Unnecessary Federal intrusion would inevitably result if EPA were to assume the primary burden of enforcing the MWC Federal plan. Accordingly, the EPA has designed the MWC Federal plan to facilitate the transfer of authority from EPA to State and local agencies. For example, the EPA has encouraged States to help determine compliance schedules and to provide operator training and certification requirements for this MWC Federal plan. The EPA has encouraged States to participate in the development of the MWC Federal plan to facilitate the transfer of implementation responsibility.

There are four mechanisms for transferring implementation responsibility to State and local agencies: (1) If EPA approves a State plan submitted to EPA after the Federal plan is promulgated, the State would automatically have authority to enforce and implement the State plan upon EPA approval; (2) if a State does not submit a State plan and does not have a State rule, EPA can use general delegation authority to delegate to State agencies authority to perform certain implementation responsibilities for this Federal plan to the extent allowed by State law; (3) if a State does not submit a State plan but adopts a State rule that is identical to, or as protective as, this Federal plan, then EPA can delegate implementation responsibilities to the State, and (4) if a State plan is modified such that it is no longer as protective as the emission guidelines, then EPA may delegate a portion of the Federal plan. Each of these different options is described in more detail below.

A. State Submits a State Plan After Large MWC Units Located in the State Are Subject to the Federal Plan—Full Transfer of Authority Through State Plan Approval

Even after an MWC unit in a particular State becomes subject to the Federal plan, the State or a local agency may still adopt and submit to EPA for approval a State plan (i.e., a State plan containing a State rule or other enforceable mechanism, inventories, records of public hearings, and all other required elements of a State plan). The EPA will determine if the State plan is as protective as the emission guidelines. If EPA determines that the State plan is as protective as the emission guidelines, EPA will approve the State plan. Upon approval of the State plan, the Federal plan will no longer apply to MWC units covered by the State plan and the State will implement and enforce the State plan in lieu of the Federal plan. (The EPA will periodically amend the Federal plan to identify MWC units that are covered in the approved State plan and, therefore, are not subject to the Federal plan.) Making the State plan effective immediately upon approval expedites a State's assumption of responsibility for implementing the 1995 emission guidelines through the State plan mechanism as intended by Congress. However, if EPA determines that the State plan is not as protective as the guidelines, EPA cannot approve the State plan.

B. State Takes Delegation of the Federal Plan (No State Plan or State Rule)—Partial Transfer of Authority Through Delegation

The State may assume implementation responsibilities even if there is no State plan or State rule in effect. To the extent authorized by State law, the EPA believes it is advantageous for State agencies to agree to undertake, on the EPA's behalf, administrative and substantive roles in implementing the Federal plan. These roles could include: procedural and engineering review of certain permit applications, administration and oversight of compliance reporting and recordkeeping requirements, conduct of source inspections, and preparation of draft notices of violation. The EPA would retain responsibility for bringing enforcement actions against sources violating Federal plan provisions, as well as the authority to terminate, modify, or revoke permits. A Memorandum of Agreement between the appropriate EPA Regional Office and the air pollution control officer or executive officer of the responsible State agency would be used to transfer partial authority. The EPA would announce the terms of the partial delegation in a **Federal Register** notice, and would inform affected sources.

C. State Adopts a State Rule and Does Not Submit a State Plan—Full Transfer of Authority Through Delegation

A State may adopt a State rule that is identical to, or as protective as, the MWC Federal plan. The State can then be delegated authority to enforce the State rule, which serves to implement the Federal plan. Such a State can be delegated authority without submitting a full State plan (i.e., without a plan containing an inventory of emissions, public hearings, and all of the other State plan elements) because these elements would be included in the Federal plan that is being delegated to the State. The EPA would evaluate the State rule and, if it is identical to or as protective as the Federal plan, EPA will delegate authority to the State to implement the Federal plan by implementing and enforcing the approved State rule.

To assure timely transfer of implementation authority to States, it is desirable that each State (in which MWC units subject to the MWC Federal plan are located) quickly adopt a State rule that is identical to, or as protective as, the MWC Federal plan. If a State adopts an essentially indistinguishable rule, the EPA intends to delegate full implementation responsibilities to that State immediately following State adoption. The EPA would publish a notice of this delegation of the MWC Federal plan in the **Federal Register** and would, in conjunction with the State, make efforts to ensure that affected sources are aware that a State has assumed responsibility for implementing the MWC Federal plan.

In the event that the State fails to implement its own State rule or subsequently amends the State rule so that it is not as protective as the MWC Federal plan, the EPA will resume direct enforcement of the affected provisions of the MWC Federal plan and withdraw the delegation in whole or in part, as appropriate.

D. An Approved State Plan Is No Longer as Protective as the Emission Guidelines—Partial Transfer of Authority Through Delegation

The EPA could also delegate portions of the Federal Plan to a State under certain circumstances. An example would be a State with an approved State Plan that contains the 1995 emission limits. A State plan must incorporate the revised emission limits by 1 year after promulgation of the amendments. If a State plan does not incorporate the amended emission limits by August 25, 1998 (1 year after the promulgation of the amendments to the emission guidelines), then the State plan would no longer be as protective as the emission guidelines. Rather than withdrawing its approval of the entire State plan, the EPA could (to the extent authorized by State law) delegate that portion of the Federal Plan containing the revised emission limits (from the August 25, 1997 amendments) to the State. The State would retain responsibilities for all implementation and enforcement.

VII. Title V Operating Permits

All MWC sources subject to this MWC Federal plan must obtain a title V permit. Title V permits issued to sources subject to this MWC Federal plan must include all applicable requirements of this plan. Permitting authorities will enforce these requirements.

VIII. Units Subject to This Federal Plan and New Source Performance Standards

This section describes the relationship between the Federal plan and the three NSPS in terms of applicability and emission limits. The MWC emission guidelines apply and this proposed Federal plan would apply to MWC units larger than 250 tons per day in combustion capacity that commenced construction before September 20, 1994. There are also three new source performance standards (NSPS) that apply to MWC units.

The first NSPS for MWC units, 40 CFR part 60 subpart E, was promulgated in 1971. It applies to incinerators charging more than 45 Mg per day (50 tons per day) of MSW that were constructed or modified after August 17, 1971. Subpart E units that combust greater than 225 mg per day (250 tons per day) could also be subject to the Federal plan. The only pollutant regulated by subpart E is PM, and the PM limit is higher than the limit in the proposed Federal plan. Thus, MWC units complying with the Federal plan PM limit would also comply with the subpart E NSPS emission limit for PM.

The second NSPS, subpart Ea, was promulgated on February 11, 1991 and revised on December 19, 1995. This NSPS applies to MWC units with capacities to combust greater than 250 tons per day, that:

- Commenced construction after December 20, 1989 and on or before September 20, 1994; or
- Commenced modification or reconstruction after December 20, 1989 and on or before June 19, 1996. ("Modification" and "reconstruction" are defined in 40 CFR part 60, subpart A.)

MWC units that started construction between December 20, 1989 and September 20, 1994 could be subject to both this proposed Federal plan (or an approved State plan) and the subpart Ea NSPS. MWC units must comply with the more stringent emission limit. The emission limits in the subpart Ea NSPS are as stringent or more stringent than the Federal plan (limits for the same pollutants) except for the PM and SO_2 limits. The PM and SO_2 limits in this Federal plan are slightly more stringent, but could be met using the same controls. Also this Federal plan has limits for three metals and fugitive ash that are not regulated by subpart Ea. Units already complying with subpart Ea also should be meeting the Federal plan emission limits, but will need to verify that they are indeed in compliance with the slightly more stringent PM, SO_2, and metals limits contained in the Federal plan.

The third NSPS, subpart Eb, applies to MWC units that:

(1) Commence construction after September 20, 1994, or

(2) Commence modification or reconstruction after June 19,1996. There is no overlap between the proposed Federal plan and the subpart Eb NSPS sources would not be subject to both rules. The emission limits in subpart Eb are as stringent or more stringent than the proposed Federal plan.

IX. Administrative Requirements

This section addresses the following administrative requirements: Docket, Paperwork Reduction Act, Executive Order 12866, Unfunded Mandates Reform Act, and Regulatory Flexibility Act. Many of these administrative requirements were addressed in the preamble to the 1995 emission guidelines (60 FR 65404–65413). Since today's proposed rule merely would implement the emission guidelines promulgated on December 19, 1995 (40 CFR part 60, subpart Cb) as they apply to large MWC units and does not impose any new requirements, many of the

VOL 63 ISS 15 JA 23 1998 UMI

following administrative requirements refer to the administrative requirements in the preamble to the 1995 rule.

A. Docket

As discussed above, a docket has been prepared for this action pursuant to the procedural requirements of section 307(d) of the Act, 42 U.S.C. 7607(d). Docket numbers A–89–08 and A–90–45 contain the supporting information for the December 19, 1995 promulgated emission guidelines. Because this proposed rule implements the emission guidelines, these same dockets also contain the supporting information for this proposed rule. Additional supporting information for this proposed rule is contained in docket number A–97–45.

B. Paperwork Reduction Act

The information collection requirements in this proposed rule will be submitted for approval to the Office of Management and Budget (OMB) under the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (ICR No. 1847.01) and a copy may be obtained from Sandy Farmer, OPPE Regulatory Information Division; U.S. Environmental Protection Agency (2137), 401 M St., S.W., Washington, DC 20460 or by calling (202) 260–2740.

The information required by the Federal plan would be used by the Agency to ensure that the MWC Federal plan requirements are implemented and are complied with on a continuous basis. Required records and reports are necessary for EPA to identify MWC units that may not be in compliance with the MWC Federal plan requirements. Based on reported information, EPA would decide which units should be inspected and what records or processes should be inspected. The records that owners and operators of units maintain would indicate to EPA whether MWC personnel are operating and maintaining control equipment properly.

Because the MWC Federal plan is an interim action, EPA is presenting a range of estimated burden. The maximum burden reflects a worst-case scenario in which no additional State plans are approved within 3 years of the Federal plan promulgation. The minimum estimate reflects a more likely scenario in which all remaining State plans are in place at some point within 3 years following promulgation of the MWC Federal plan.

Based on a 1995 MWC inventory and recent information from EPA Regional Offices, this Federal plan is projected to affect a maximum of 143 MWC units at 59 plants in 23 States. A number of additional State plans will be approved by the time the Federal plan is promulgated, or within the year following promulgation. When a State plan is approved, the Federal plan no longer applies to MWC units covered in that State plan. Thus, the rule will more likely affect about 53 units at 21 plants as of June 1998 and 13 units at 4 plants as of June 1999. The burden has been estimated under both scenarios and is presented as a range.

The maximum estimated average annual burden for industry for the first 3 years after the implementation of the Federal plan would be 40,132 hours annually at a cost of $15,463,317 (including $1,561,654 in labor costs) per year to meet the monitoring, recordkeeping, and reporting requirements. The maximum estimated average annual burden, over the first 3 years, for the Agency would be 7,254 hours at a cost of $327,844 (including travel expenses) per year.

The minimum estimated average annual burden for industry for the first 3 years after the implementation of the Federal plan would be 2,677 hours annually at a cost of $1,285,000 (including $104,185 in labor costs) per year to meet the monitoring, recordkeeping and reporting requirements. The minimum estimated average annual burden for the first 3 years for the Agency would be 827 hours at a cost of $36,000 (including travel expenses) per year. The minimum burden is calculated for affected facilities in 5 States for the first year. The minimum burden is reduced to affected facilities in two States for the second year and no states are affected in the third year.

Burden means total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR part 15.

C. Executive Order 12866

Under Executive Order 12866 (58 FR 51735, October 4, 1993), EPA must determine whether the regulatory action is "significant" and, therefore, subject to OMB review and the requirements of the Executive Order. The EPA and OMB determined that this regulatory action is "not significant" under Executive Order 12866. The proposed Federal plan would simply implement the 1995 guidelines and does not result in any additional control requirements or impose any additional costs above those previously considered during promulgation of the 1995 emission guidelines. The EPA considered the 1995 emission guidelines and standards to be significant and the rules were reviewed by OMB in 1995 (*see* 60 FR 65405).

D. Unfunded Mandates Act

Under section 202 of the Unfunded Mandates Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a statement to accompany any rule where the estimated costs to State, local, or tribal governments, or to the private sector will be $100 million or more in any 1 year. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly impacted by the rule. An unfunded mandates statement was prepared and published in the 1995 promulgation notice (*see* 60 FR 65405 to 65412).

The EPA has determined that the proposed Federal plan does not include any new Federal mandates or additional requirements above those previously considered during promulgation of the 1995 emission guidelines. Therefore, the requirements of the Unfunded Mandates Act do not apply to this proposed rule.

E. Regulatory Flexibility Act (RFA)

Section 605 of the RFA requires Federal agencies to give special consideration to the impacts of regulations on small entities, which are defined as small businesses, small organizations, and small governments. During the 1995 rulemaking, EPA estimated that few, if any, small entities would be affected by the promulgated guidelines and standards, and therefore, a regulatory flexibility analysis was not required (*see* 60 FR 65413). This proposed Federal plan would not establish any new requirements; therefore, pursuant to the provisions of 5 U.S.C. 605(b), EPA certifies that this Federal plan will not have a significant impact on a substantial number of small entities, and a regulatory flexibility analysis is not required.

List of Subjects in 40 CFR Part 62

Environmental protection, Air pollution control, Reporting and recordkeeping requirements, Incorporation by reference.

Dated: January 14, 1997.

Carol M. Browner,

Administrator.

For reasons set out in the preamble, title 40, chapter I, of the Code of Federal Regulations is proposed to be amended as follows:

PART 62—[AMENDED]

1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Amend § 62.02 by revising paragraph (a) and adding paragraph (g) to read as follows:

§ 62.02 Introduction.

(a) This part sets forth the Administrator's approval and disapproval of State plans for the control of pollutants and facilities under section 111(d), and section 129 as applicable, of the Act, and the Administrator's promulgation of such plans or portions of plans thereof. Approval of a plan or any portion of a plan is based on a determination by the Administrator that it meets the requirements of section 111(d), and section 129 as applicable, of the Act and provisions of part 60 of this chapter.

* * * * *

(g) Substitute plans promulgated by the Administrator for States that do not have approved plans are contained in separate subparts that appear after the subparts for States. These Federal plans include sections identifying the applicability of the plan, emission limits, compliance schedules, recordkeeping and reporting, performance testing, and monitoring requirements.

3. Amend subpart A by adding § 62.13.

§ 62.13 Federal plans.

The Federal plans apply to owners and operators of affected facilities that are not covered by an approved State plan, are located in any State for which a State plan has not been approved, or are located in any State whose State plan has been vacated in whole or in part. Affected facilities are defined in each Federal plan.

(a) The Federal plan for municipal waste combustors is contained in subpart FFF of this part.

(b) Landfills Federal plan. [Reserved]

(c) Medical waste incinerator Federal plan. [Reserved]

4. Amend part 62 by adding and by reserving subparts DDD and EEE as follows:

Subpart DDD—[Reserved]

Subpart EEE—[Reserved]

5. Amend part 62 by adding subpart FFF consisting of §§ 62.14100 through 62.14109 to read as follows:

Subpart FFF—Federal Plan Requirements for Large Municipal Waste Combustors Constructed on or Before September 20, 1994

Sec.

62.14100 Scope.
62.14101 Definitions.
62.14102 Affected facilities.
62.14103 Emission limits for municipal waste combustor metals, acid gases, organics, and nitrogen oxides.
62.14104 Requirements for municipal waste combustor operating practices.
62.14105 Requirements for municipal waste combustor operator training and certification.
62.14106 Emission limits for municipal waste combustor fugitive ash emissions.
62.14107 Emission limits for air curtain incinerators.
62.14108 Compliance schedules.
62.14109 Reporting and recordkeeping, and compliance and performance testing.

Table 6 of Subpart FFF—Site-specific Compliance Schedules and Increments of Progress

Subpart FFF—Federal Plan Requirements for Large Municipal Waste Combustors Constructed on or Before September 20, 1994

§ 62.14100 Scope.

This subpart contains emission requirements and compliance schedules for the control of pollutants from certain municipal waste combustors in accordance with section 111(d) and section 129 of the Clean Air Act and 40 CFR part 60, subpart B. This municipal waste combustor Federal plan applies to each affected facility as defined in § 62.14102 that is not covered by a currently approved State plan.

§ 62.14101 Definitions.

Terms used but not defined in this subpart have the meaning given to them in the Clean Air Act and 40 CFR part 60, subparts A, B, and Eb.

Contract means a legally binding agreement or obligation that cannot be canceled or modified without substantial financial loss.

De-rate means to make a permanent physical change to the municipal waste combustor unit that reduces the maximum combustion capacity of the unit to less than or equal to 250 tons per day of municipal solid waste. A permit restriction or a change in operation does not qualify as de-rating. (See the procedures specified in 40 CFR 60.58b(j) of subpart Eb for calculating municipal waste combustor unit capacity.)

Municipal waste combustor plant means one or more affected facilities (as defined in § 62.14102) at the same location.

Protectorate means American Samoa, the Commonwealth of Puerto Rico, the District of Columbia, Guam, the Northern Mariana Islands, and the Virgin Islands.

State means any of the 50 United States and the protectorates of the United States.

State plan means a plan submitted pursuant to section 111(d) and section 129(b)(2) of the Clean Air Act and 40 CFR part 60, subpart B that implements and enforces 40 CFR part 60, subpart Cb.

§ 62.14102 Affected facilities.

(a) The affected facility to which this subpart applies is each municipal waste combustor unit with a capacity to combust greater than 250 tons per day of municipal solid waste for which construction was commenced on or before September 20, 1994, in all States and protectorates except for the affected facilities listed in table 1 of this subpart. Notwithstanding the exclusions in table 1 of this subpart applies to affected facilities in any State that does not have a State plan currently approved.

(b) A municipal waste combustor unit regulated by an EPA approved State plan is not regulated by this subpart.

(c) Any municipal waste combustor unit that has the capacity to combust more than 250 tons per day of municipal solid waste and is subject to a Federally enforceable permit limiting the maximum amount of municipal solid waste that may be combusted in the unit to less than or equal to 11 tons per day is not subject to this subpart if the owner or operator:

(1) Notifies the EPA Administrator of an exemption claim;

VOL
63
ISS
15
JA
23
1998
UMI

(2) Provides a copy of the Federally enforceable permit that limits the firing of municipal solid waste to less than 11 tons per day; and

(3) Keeps records of the amount of municipal solid waste fired on a daily basis.

(d) Physical or operational changes made to an existing municipal waste combustor unit primarily for the purpose of complying with the emission requirements of this subpart are not considered in determining whether the unit is a modified or reconstructed facility under 40 CFR part 60, subpart Ea or subpart Eb.

(e) A qualifying small power production facility, as defined in section 3(17)(C) of the Federal Power Act (16 U.S.C. 796(17)(C)), that burns homogeneous waste (such as automotive tires or used oil, but not including refuse-derived fuel) for the production of electric energy is not subject to this subpart if the owner or operator of the facility notifies the EPA Administrator of this exemption and provides data documenting that the facility qualifies for this exemption.

(f) A qualifying cogeneration facility, as defined in section 3(18)(B) of the Federal Power Act (16 U.S.C. 796(18)(B)), that burns homogeneous waste (such as automotive tires or used oil, but not including refuse-derived fuel) for the production of electric energy and steam or forms of useful energy (such as heat) that are used for industrial, commercial, heating, or cooling purposes, is not subject to this subpart if the owner or operator of the facility notifies the EPA Administrator of this exemption and provides data documenting that the facility qualifies for this exemption.

(g) Any unit combusting a single-item waste stream of tires is not subject to this subpart if the owner or operator of the unit:

(1) Notifies the EPA Administrator of an exemption claim; and

(2) Provides data documenting that the unit qualifies for this exemption.

(h) Any unit required to have a permit under section 3005 of the Solid Waste Disposal Act is not subject to this subpart.

(i) Any materials recovery facility (including primary or secondary smelters) that combusts waste for the primary purpose of recovering metals is not subject to this subpart.

(j) Any cofired combustor, as defined under 40 CFR 60.51b of subpart Eb that meets the capacity specifications in paragraph (a) of this section is not subject to this subpart if the owner or operator of the cofired combustor:

(1) Notifies the EPA Administrator of an exemption claim;

(2) Provides a copy of the Federally enforceable permit (specified in the definition of cofired combustor in this section); and

(3) Keeps a record on a calendar quarter basis of the weight of municipal solid waste combusted at the cofired combustor and the weight of all other fuels combusted at the cofired combustor.

(k) Air curtain incinerators, as defined under 40 CFR 60.51b of subpart Eb, that meet the capacity specifications in paragraph (a) of this section, and that combust a fuel stream composed of 100 percent yard waste are exempt from all provisions of this subpart except the opacity standard under § 62.14107, and the testing procedures and the reporting and recordkeeping provisions under § 62.14109.

(l) Air curtain incinerators that meet the capacity specifications in paragraph (a) of this section and that combust municipal solid waste other than yard waste are subject to all provisions of this subpart.

(m) Pyrolysis/combustion units that are an integrated part of a plastics/rubber recycling unit (as defined in 40 CFR 60.51b of subpart Eb) are not subject to this subpart if the owner or operator of the plastics/rubber recycling unit keeps records of the weight of plastics, rubber, and/or rubber tires processed on a calendar quarter basis; the weight of chemical plant feedstocks and petroleum refinery feedstocks produced and marketed on a calendar quarter basis; and the name and address of the purchaser of the feedstocks. The combustion of gasoline, diesel fuel, jet fuel, fuel oils, residual oil, refinery gas, petroleum coke, liquified petroleum gas, propane, or butane produced by chemical plants or petroleum refineries that use feedstocks produced by plastics/rubber recycling units are not subject to this subpart.

(n) Cement kilns firing municipal solid waste are not subject to this subpart.

§ 62.14103 Emission limits for municipal waste combustor metals, acid gases, organics, and nitrogen oxides.

(a) The emission limits for municipal waste combustor metals are specified in paragraphs (a)(1) through (a)(3) of this section.

(1) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain: particulate matter in excess of 27 milligrams per dry standard cubic meter, corrected to 7 percent oxygen; and opacity in excess of 10 percent (6-minute average).

(2) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain: cadmium in excess of 0.040 milligrams per dry standard cubic meter, corrected to 7 percent oxygen; and lead in excess of 0.44 milligrams per dry standard cubic meter, corrected to 7 percent oxygen.

(3) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain mercury in excess of 0.080 milligrams per dry standard cubic meter or 15 percent of the potential mercury emission concentration (85-percent reduction by weight), corrected to 7 percent oxygen, whichever is less stringent.

(b) The emission limits for municipal waste combustor acid gases, expressed as sulfur dioxide and hydrogen chloride, are specified in paragraphs (b)(1) and (b)(2) of this section.

(1) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain sulfur dioxide in excess of 29 parts per million by volume or 25 percent of the potential sulfur dioxide emission concentration (75-percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent. Compliance with this emission limit is based on a 24-hour daily geometric mean.

(2) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain hydrogen chloride in excess of 29 parts per million by volume or 5 percent of the potential hydrogen chloride emission concentration (95-percent reduction by weight or volume), corrected to 7 percent oxygen (dry basis), whichever is less stringent.

(c) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain municipal waste combustor organics, expressed as total mass dioxins/furans, in excess of the emission limits specified in either paragraph (c)(1) or (c)(2) of this section, as applicable.

(1) The emission limit for affected facilities that employ an electrostatic precipitator-based emission control system is 60 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(2) The emission limit for affected facilities that do not employ an electrostatic precipitator-based emission control system is 30 nanograms per dry standard cubic meter (total mass), corrected to 7 percent oxygen.

(d) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain nitrogen oxides in excess of the emission limits listed in table 2 of this subpart for affected facilities. Table 2 of this subpart provides emission limits for the nitrogen oxides concentration level for each type of affected facility.

§ 62.14104 Requirements for municipal waste combustor operating practices.

(a) The owner or operator of an affected facility must not cause to be discharged into the atmosphere from that affected facility any gases that contain carbon monoxide in excess of the emission limits listed in table 3 of this subpart. Table 3 provides emission limits for the carbon monoxide concentration level for each type of affected facility.

(b) The owner or operator of an affected facility must comply with the municipal waste combustor operating practice requirements listed in 40 CFR 60.53b (b) and (c).

§ 62.14105 Requirements for municipal waste combustor operator training and certification.

The owner or operator of an affected facility must comply with the municipal waste combustor operator training and certification requirements listed in paragraphs (a) through (g) of this section. For affected facilities, compliance with the municipal waste combustor operator training and certification requirements specified under paragraphs (a) through (d), and (g) of this section must be no later than 12 months after the effective date of this subpart.

(a) Each chief facility operator and shift supervisor must obtain and maintain a current provisional operator certification from either the American Society of Mechanical Engineers [QRO–1–1994 (incorporated by reference—see 40 CFR 60.17(h)(1) of subpart A)] or a State certification program in Connecticut and Maryland (if the affected facility is located in the respective State).

(b) Each chief facility operator and shift supervisor must have completed full certification or must have scheduled a full certification exam with either the American Society of Mechanical Engineers [QRO–1–1994 (incorporated by reference—see 40 CFR 60.17(h)(1) of subpart A)] or a State certification program in Connecticut and Maryland (if the affected facility is located in the respective State).

(c) The owner or operator of an affected facility must not allow the facility to be operated at any time unless one of the following persons is on duty at the affected facility: A fully certified chief facility operator; a provisionally certified chief facility operator who is scheduled to take the full certification exam no later than 12 months after the effective date of this subpart; a fully certified shift supervisor; or a provisionally certified shift supervisor who is scheduled to take the full certification exam no later than 12 months after the effective date of this subpart. If one of the persons listed in this paragraph must leave the affected facility during their operating shift, a provisionally certified control room operator who is onsite at the affected facility may fulfill the requirement in this paragraph.

(d)(1) Each chief facility operator, shift supervisor, and control room operator at an affected facility must complete the EPA municipal waste combustor operator training course or the State municipal waste combustor operator training course in Connecticut (if the affected facility is located in Connecticut).

(2) The requirement specified in this paragraph does not apply to chief facility operators, shift supervisors, and control room operators who have obtained full certification from the American Society of Mechanical Engineers on or before the effective date of this subpart. The owner or operator of an affected facility may request that the EPA Administrator waive the requirement specified in this paragraph for chief facility operators, shift supervisors, and control room operators who have obtained provisional certification from the American Society of Mechanical Engineers on or before the effective date of this subpart.

(e) The owner or operator of an affected facility must develop and update on a yearly basis a site-specific operating manual that must, at a minimum, address the elements of municipal waste combustor unit operation specified in paragraphs (e)(1) through (e)(11) of this section.

(1) A summary of the applicable standards under this subpart;

(2) A description of basic combustion theory applicable to a municipal waste combustor unit;

(3) Procedures for receiving, handling, and feeding municipal solid waste;

(4) Procedures for municipal waste combustor unit startup, shutdown, and malfunction;

(5) Procedures for maintaining proper combustion air supply levels;

(6) Procedures for operating the municipal waste combustor unit within the standards established under this subpart;

(7) Procedures for responding to periodic upset or off-specification conditions;

(8) Procedures for minimizing particulate matter carryover;

(9) Procedures for handling ash;

(10) Procedures for monitoring municipal waste combustor unit emissions; and

(11) Reporting and recordkeeping procedures.

(f) The owner or operator of an affected facility must establish a training program to review the operating manual according to the schedule specified in paragraphs (f)(1) and (f)(2) of this section with each person who has responsibilities affecting the operation of an affected facility including, but not limited to, chief facility operators, shift supervisors, control room operators, ash handlers, maintenance personnel, and crane/load handlers.

(1) Each person specified in paragraph (f) of this section must undergo initial training no later than the date specified in paragraph (f)(1)(i) or (f)(1)(ii) of this section, whichever is later.

(i) The date prior to the day the person assumes responsibilities affecting municipal waste combustor unit operation; or

(ii) The date 12 months after the effective date of this subpart.

(2) Annually, following the initial review required by paragraph (f)(1) of this section.

(g) The operating manual required by paragraph (e) of this section must be kept in a readily accessible location for each person required to undergo training under paragraph (f) of this section. The operating manual and records of training must be available for inspection by the EPA or its delegated enforcement agency upon request.

§ 62.14106 Emission limits for municipal waste combustor fugitive ash emissions.

(a) The owner or operator of an affected facility must not cause to be discharged to the atmosphere from that affected facility visible emissions of combustion ash from an ash conveying system (including conveyor transfer points) in excess of 5 percent of the observation period (*i.e.*, 9 minutes per 3-hour period), as determined by EPA Reference Method 22 observations as specified in 40 CFR 60.58b(k) of subpart

VOL 63 ISS 15 JA 23 1998 UMI

Eb, except as provided in paragraphs (b) and (c) of this section.

(b) The emission limit specified in paragraph (a) of this section does not cover visible emissions discharged inside buildings or enclosures of ash conveying systems; however, the emission limit specified in paragraph (a) of this section does cover visible emissions discharged to the atmosphere from buildings or enclosures of ash conveying systems.

(c) The provisions specified in paragraph (a) of this section do not apply during maintenance and repair of ash conveying systems.

§ 62.14107 Emission limits for air curtain incinerators.

The owner or operator of an air curtain incinerator with the capacity to combust greater than 250 tons per day of municipal solid waste and that combusts a fuel feed stream composed of 100 percent yard waste and no other municipal solid waste materials must not (at any time) cause to be discharged into the atmosphere from that incinerator any gases that exhibit greater than 10-percent opacity (6-minute average), except that an opacity level of up to 35 percent (6-minute average) is permitted during startup periods during the first 30 minutes of operation of the unit.

§ 62.14108 Compliance schedules.

(a) The owner or operator of an affected facility must achieve the increments of progress specified in paragraphs (a)(1) through (a)(5) to retrofit air pollution control devices to meet the emission limits of this subpart. As specified in 40 CFR part 60, subpart B, the compliance schedules and increments of progress apply to each owner or operator of an affected facility who is taking longer than 1 year after [date of publication of the final rule] to comply with the emission limits specified in this subpart.

(1) Submit a final control plan according to the requirements of § 62.14109(g).

(2) Award contract(s): Award contract(s) to initiate on-site construction, initiate on-site installation of emission control equipment, or incorporate process changes. The owner or operator must submit a signed copy of the contract(s) awarded according to the requirements of § 62.14109(h).

(3) Initiate on-site construction: Initiate on-site construction, initiate on-site installation of emission control equipment, or initiate process changes needed to meet the emission limits as outlined in the final control plan.

(4) Complete on-site construction: Complete on-site construction and installation of emission control equipment or complete process changes.

(5) Achieve final compliance: Incorporate all process changes or complete retrofit construction as designed in the final control plan and connect the air pollution control equipment or process changes with the affected facility identified in the final control plan such that if the affected facility is brought on line, all necessary process changes or air pollution control equipment are operating fully. Within 180 days after the date the affected facility is required to achieve final compliance, the initial performance test must be conducted. On and after the date the initial performance test is completed or is required to be completed, whichever is earlier, no pollutant may be discharged into the atmosphere from the affected facility in excess of the emission limits of this subpart.

(b) The owner or operator of an affected facility must achieve the increments of progress specified in paragraphs (a)(1) through (a)(5) of this section according to the schedule specified in paragraphs (b)(1) through (b)(4) of this section, except as provided in paragraphs (c), (d), and (e) of this section.

(1) The owner or operator of an affected facility that commenced construction, modification, or reconstruction on or before June 26, 1987 and will take longer than 1 year after [date of publication of final rule] (or 1 year after a revised construction permit or a revised operating permit is issued, if a permit modification is required) to comply with the emission limits of this subpart must achieve the increments of progress according to the schedule in table 4 of this subpart, except for those affected facilities specified in paragraphs (b)(3) and (b)(4) of this section.

(2) The owner or operator of an affected facility that began construction, modification, or reconstruction after June 26, 1987 must achieve the increments of progress according to the schedule in table 5 of this subpart to comply with the emission limits of this subpart, except for those affected facilities specified in paragraphs (b)(3) and (b)(4) of this section.

(3) The owner or operator of each specified affected facility in table 6 of this subpart must achieve the increments of progress according to the schedule in table 6 of this subpart.

(4) For affected facilities that are subject to the schedule requirements of paragraph (b)(1) or (b)(2) of this section, the owner or operator (or the State air pollution control authority) may submit for approval alternative dates for achieving increments 2, 3, and 4. The owner or operator that is submitting these alternative dates must meet the reporting requirements of § 62.14109(l).

(c) The owner or operator of an affected facility that has ceased operation but will reopen prior to the applicable final compliance date specified in paragraphs (b)(1) through (b)(4) of this section must meet the same compliance dates and increments of progress specified in paragraphs (b)(1) through (b)(4) of this section.

(d) The owner or operator of an affected facility that has ceased or ceases operation of an affected facility and restarts the affected facility after the compliance dates specified in paragraphs (b)(1) through (b)(4) of this section must comply with the emission limits, requirements for combustor operating practices, and operator training and certification requirements of this subpart upon the date the affected facility restarts. The initial performance tests required by § 62.14109(c) must be conducted within 180 days after the date the unit restarts.

(e) The owner or operator of an affected facility that will be de-rated prior to the applicable final compliance date instead of complying with the emission limits of this subpart must meet the same increments of progress and achieve the de-rating by the final compliance date (specified in paragraphs (b)(1) through (b)(4) of this section) that would be applicable to the affected facility if it did not de-rate. The owner or operator of an affected facility that will be de-rated must meet the reporting requirements of § 62.14109(j). After de-rating is accomplished, the municipal waste combustor affected facility is no longer subject to this subpart.

§ 62.14109 Reporting and recordkeeping and compliance and performance testing.

(a) The owner or operator of an affected facility must comply with the reporting and recordkeeping provisions listed in 40 CFR 60.59b, except as provided in paragraphs (a)(1) through (a)(3) of this section.

(1) The siting requirements under 40 CFR 60.59b(a), (b)(5), and (d)(11) and the notification of construction requirements under 40 CFR 60.59b (b) and (c) do not apply.

(2) 40 CFR 60.54b and 60.56b of Subpart Eb do not apply to this subpart (see §§ 62.14105 and 62.14107 of this subpart).

(b) The owner or operator of an affected facility must comply with the compliance and performance testing methods and procedures listed in 40 CFR 60.58b of Subpart Eb, except as provided in paragraphs (c) and (d) of this section.

(c) The initial performance test must be completed within 180 days after the date of final compliance specified in § 62.14108, rather than the date for the initial performance test specified in 40 CFR 60.58b of Subpart Eb.

(d) The owner or operator of an affected facility may follow the alternative performance testing schedule for dioxin/furan emissions specified in 40 CFR 60.58b(g)(5)(iii) if all performance tests for all affected facilities at the MWC plant over a 2-year period indicate that dioxin/furan emissions are less than or equal to 15 nanograms per dry standard cubic meter total mass, corrected to 7 percent oxygen (instead of 7 nanograms specified in § 60.58b(g)(5)(iii) of Subpart Eb).

(e) The owner or operator of an affected facility that is taking longer than 1 year after [date of publication of the final rule] to comply with the emission limits of this subpart must submit notification to the EPA Regional Office within 10 business days of completing each increment. Each notification must indicate which increment of progress specified in § 62.14108 (a)(1) through (a)(5) has been achieved. The notification must be signed by the owner or operator of the affected facility.

(f) The owner or operator of an affected facility that is taking longer than 1 year after [date of publication of the final rule] to comply with the emission limits of this subpart who fails to meet any increment of progress specified in § 62.14108 (a)(1) through (a)(5) according to the applicable schedule in § 62.14108 must submit notification to the EPA Regional Office within 10 business days of the applicable date in § 62.14108 that the owner or operator failed to meet the increment.

(g) The owner or operator of an affected facility that is taking longer than 1 year after [date of publication of the final rule] to comply with the emission limits of this subpart must submit a final control plan by the date specified in § 62.14108(b) with the notification required by § 62.14109(e). The final control plan must, at a minimum, include the items in paragraphs (g)(1) through (g)(4) of this section.

(1) A complete analysis of the applicable regulatory requirements and methods of compliance and selected control technology options available to meet the requirements.

(2) A description of the air pollution control devices or process changes that will be employed for each unit to comply with the emission limits and other requirements of this subpart.

(3) Engineering specifications and drawings of the air pollution control equipment and/or process changes that will be employed to comply with the emission limits and other requirements of this subpart.

(4) The same information that will be used to solicit bids to install the air pollution control devices or initiate the process changes.

(h) The owner or operator of an affected facility that is taking longer than 1 year after [date of publication of the final rule] to comply with the emission limits of this subpart must submit a signed copy of the contract or contracts awarded according to the requirements of § 62.14108(a)(2) with the notification required by § 62.14109(e).

(i) The owner or operator of an affected facility that plans to cease operation of an affected facility on or before December 19, 2000 rather than comply with the emission limits of this subpart by the applicable compliance date specified in § 62.14108 must submit a notification by the date specified for the final control plan according to the schedule specified in paragraphs § 62.14108 (b)(1) through (b)(4), as applicable. (Affected facilities that cease operation on or before December 19, 2000 rather than comply with the emission limits of this subpart by the compliance date specified in § 62.14108 are not required to submit a final control plan.) The notification must state the date by which the affected facility will cease operation. If the cease operation date is later than 1 year after [date of publication of the final rule], the owner or operator must enter into a legally binding closure agreement with EPA by the date the final control plan is due. The agreement must specify the date by which operation will cease.

(j) The owner or operator of an affected facility that plans to de-rate the affected facility on or before December 19, 2000 rather than comply with the emission limits of this subpart by the compliance date specified in § 62.14108 must submit a final control plan as required by paragraph (g) of this section and submit notification of increments of progress as required by paragraphs (e) and (f) of this section and § 62.14108(e) of this subpart.

(1) The final control plan must contain the information in paragraphs (j)(1)(i) through (j)(1)(iv) of this section rather than the information in paragraph (g)(1) through (g)(4) of this section.

(i) A description of the physical changes that will be made to accomplish the de-rating.

(ii) Calculations of the current maximum combustion capacity and the planned maximum combustion capacity after the de-rating. (See the procedures specified in 40 CFR 60.58b(j) of Subpart Eb for calculating municipal waste combustor unit capacity.)

(iii) Engineering specifications and drawings of the physical changes that will be made to accomplish the de-rating.

(iv) The same information that will be used to solicit bids to initiate the physical changes.

(2) The owner or operator must submit a signed copy of the contract or contracts awarded to initiate the de-rating with the notification required by paragraph (e) of this section.

(k) The owner or operator of an affected facility that is ceasing operation more than 1 year following [date of publication of the final rule] must submit performance test results by the date 1 year after the [date of publication of the final rule] for dioxin/furan emissions conducted during or after 1990 for each affected facility. The performance test shall be conducted according to the procedure in paragraph (b) of this section.

(l) The owner or operator (or the State air pollution control authority) that is submitting alternative dates for increments 2, 3, and 4 according to § 62.14108(b)(4) must submit the alternative dates by the date specified for the final control plan according to the schedule specified in paragraphs § 62.14108 (b)(1) and (b)(2), as applicable. The owner or operator must also submit the alternative dates to the State.

Tables to Subpart FFF

TABLE 1 OF SUBPART FFF—MUNICIPAL WASTE COMBUSTOR UNITS (MWC UNITS) EXCLUDED FROM SUBPART FFF

State	MWC units
Oregon	MWC units at the following MWC sites: (a) Ogden Martin Systems, Marion County Oregon. (b) Coos County, Coos Bay, Oregon.
Florida	All affected facilities, as defined in § 62.14102, located in Florida.

VOL 63 ISS 15 JA 23 1998 UMI

TABLE 2 OF SUBPART FFF—NITROGEN OXIDES REQUIREMENTS FOR AFFECTED FACILITIES

Municipal waste combustor technology	Nitrogen oxides emission limit (parts per million by volume)[a]
Mass burn waterwall	205.
Mass burn rotary waterwall	250.
Refuse-derived fuel combustor	250.
Fluidized bed combustor	180.
Mass burn refractory combustors	No limit.

[a] Corrected to 7 percent oxygen, dry basis.

TABLE 3 OF SUBPART FFF—MUNICIPAL WASTE COMBUSTOR OPERATING REQUIREMENTS

Municipal waste combustor technology	Carbon monoxide emissions level (parts per million by volume)[a]	Averaging time (hrs)[b]
Mass burn waterwall	100	4
Mass burn refractory	100	4
Mass burn rotary refractory	100	24
Mass burn rotary waterwall	250	24
Modular starved air	50	4
Modular excess air	50	4
Refuse-derived fuel stoker	200	24
Bubbling fluidized bed combustor	100	4
Circulating fluidized bed combustor	100	4
Pulverized coal/refuse-derived fuel mixed fuel-fired combustor	150	4
Spreader stoker coal/refuse-derived fuel mixed fuel-fired combustor	200	24

[a] Measured at the combustor outlet in conjunction with a measurement of oxygen concentration, corrected to 7 percent oxygen, dry basis. Calculated as an arithmetic average.
[b] Averaging times are 4-hour or 24-hour block averages.

TABLE 4 OF SUBPART FFF—GENERIC COMPLIANCE SCHEDULE AND INCREMENTS OF PROGRESS (PRE-1987)[a, b]

Affected facilities	Submit final control plan Increment 1	Award contracts Increment 2	Begin on-site construction Increment 3	Complete on-site construction Increment 4	Final compliance Increment 5
Affected facilities that commenced construction, modification, or reconstruction on or before June 26, 1987 (All pollutants).	[Insert date 240 days after publication in the **Federal Register**].	[Insert date 480 days after publication in the **Federal Register**].	[Insert date 660 days after publication in the **Federal Register**].	11/19/00	12/19/00

[a] Table 4 or 5 of this subpart applies to MWC units subject to the Federal plan except those with site-specific compliance schedules shown in Table 6 of this subpart.
[b] As an alternative to this schedule, the owner or operator may close the affected facility by December 19, 2000, complete the retrofit while the affected facility is closed, and achieve final compliance upon restarting. See §§ 62.14108(c), 62.14108(d), and 62.14109(i) of this subpart.

TABLE 5 OF SUBPART FFF—GENERIC COMPLIANCE SCHEDULES AND INCREMENTS OF PROGRESS (POST-1987)[a, b]

Affected facilities	Submit final control plan Increment 1	Award contracts Increment 2	Begin on-site construction Increment 3	Complete on-site construction Increment 4	Final compliance Increment 5
Affected facilities that commenced construction modification, or reconstruction after June 26, 1987:					
1. Emission limits for Hg, dioxin/furan.	NA[c]	NA[c]	NA[c]	NA[c]	1 year after promulgation of this subpart or 1 year after permit issuance.[d]

TABLE 5 OF SUBPART FFF—GENERIC COMPLIANCE SCHEDULES AND INCREMENTS OF PROGRESS (POST-1987)[a, b]—Continued

Affected facilities	Submit final control plan Increment 1	Award contracts Increment 2	Begin on-site construction Increment 3	Complete on-site construction Increment 4	Final compliance Increment 5
2. Emission limits for SO_2, HCl, PM, Pb, Cd, opacity CO, NO_X.	[Insert date 240 days after publication in the FEDERAL REGISTER].	[Insert date 480 days after publication in the FEDERAL REGISTER].	[Insert date 660 days after publication in the FEDERAL REGISTER].	11/19/00	12/19/00.

[a] Table 4 or 5 of this subpart applies to MWC units subject to the Federal plan except those with site-specific compliance schedules shown in Table 6 of this subpart.
[b] As an alternative to this schedule, the unit may close by December 19, 2000, complete retrofit while closed, and achieve final compliance upon restarting. See §§ 62.14108(c), 62.14108(d), and 62.14109(i) of this subpart.
[c] Because final compliance is achieved in 1 year, no increments of progress are required.
[d] Permit issuance is issuance of a revised construction permit or revised operating permit, if a permit modification is required to retrofit controls.

TABLE 6 OF SUBPART FFF—SITE-SPECIFIC COMPLIANCE SCHEDULES AND INCREMENTS OF PROGRESS

Affected facilities at the following MWC sites	City, State	Submit final control plan Increment 1	Award contracts Increment 2	Begin construction Increment 3	Complete on-site compliance Increment 4	Final compliance Increment 5
Group A						
Savannah Energy Systems Co.	Savannah, Georgia.	NA	NA	NA	12/31/97	02/28/98.
Nashville Thermal Transfer Corp.	Nashville, Tennessee.	NA	NA	NA	05/01/99	07/01/99.
Group B[a]						
All large MWC units.	Maine	10/01/98	01/01/99	07/01/99	09/01/00	12/19/00.
Baltimore Resco	Baltimore, Maryland.	NA	NA	04/01/98	09/01/00	12/19/00.
Hennepin Energy Resource Corp.	Minneapolis, Minnesota.	NA	NA	NA	NA	04/30/98.
United Power Association.	Elk River, Minnesota.	NA	NA	12/30/99	06/30/99	12/19/00.

Huntington Resource Recovery Facility.	East Northport, New York.	10/01/99	10/15/99	03/15/00	07/15/00	08/01/00.
Babylon Resource Recovery Facility.	West Babylon, New York.	09/15/99	10/15/99	2/15/00	07/01/00	07/1[illegible]/00.

VOL 63 ISS 15 JA 23 1998 UMI

TABLE 6 OF SUBPART FFF—SITE-SPECIFIC COMPLIANCE SCHEDULES AND INCREMENTS OF PROGRESS—Continued

Affected facilities at the following MWC sites	City, State	Submit final control plan Increment 1	Award contracts Increment 2	Begin construction Increment 3	Complete on-site compliance Increment 4	Final compliance Increment 5
Hempstead Resource Recovery Facility.	Westbury, New York.	05/09/98	TBD[e]	TBD[e]	TBD[e]	12/19/00.
Whellabrator Falls; Harrisburg Authority; American Ref-Fuel; Lancaster Resource Energy; Monteney Energy Resource of Montgomery County; York County Solid Waste and Refuse Authority.	Pennsylvania	3 months after issuance of FESOP[f] [or Federal plan promulgation].	3 months after issuance of FESOP[f] [or Federal plan promulgation].	18 months after issuance of FESOP[f] [or Federal plan promulgation].	30 months after issuance of FESOP[f] [or Federal plan promulgation].	12/19/00.[g]
I–95 Energy/Resource Recovery Facility.	Lorton, Virginia	06/01/98	08/01/98	12/01/98	10/01/99	11/01/99.
Alexandria/ Arlington Resource Recovery Facility.	Alexandria, Virginia.	06/01/98	08/01/98	12/01/98	10/01/99	11/01/99.

NA=not applicable; increment already met.
TBD=to be determined.

[a] The schedules from Group B have not been reviewed by EPA due to their recent arrival. They will be examined for acceptability at the same time as those received during the comment period of this proposal. All schedules contained in the final Federal plan will be reviewed and approved by EPA.

[b] For mercury and dioxins, combustors that commenced construction after June 26, 1987, must comply by 09/01/99 or within 12 months of issuance of permit to install, whichever is later.

[Note: 09/01/99 date may be modified to 1 year after Federal plan promulgation].

[c] Applies only to NO_x emission limits. Other pollutants would follow Federal plan generic schedule.

[d] Because final compliance is achieved in 1 year, no increments of progress are required.

[e] The facility will propose these increments in the control plan to be submitted on 05/09/98.

[f] Pennsylvania is implementing their State plan through Federally Enforceable State Operating Permits (FESOP).

[g] Pennsylvania proposes 08/26/02 final compliance date for supplemental emission limits in 40 CFR 60, subpart Cb promulgated August 25, 1997. For mercury and dioxins, 1 year after State plan approval [or Federal plan promulgation] or 1 year after issuance of a revised permit if a permit modification is required.

[FR Doc. 98–1521 Filed 1–22–98; 8:45 am]
BILLING CODE 6560–50–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

41 CFR Parts 51–5, 51–6, 51–8, 51–9, and 51–10

Miscellaneous Amendments to Committee Regulations

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed rule.

SUMMARY: The Committee is proposing to make changes to its regulations to clarify them and improve the efficiency of operation of the Committee's Javits-Wagner-O'Day (JWOD) Program. The Committee is also proposing to make changes in its regulations to correct its mailing address after a recent office move.

DATES: Submit comments on or before March 24, 1998.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302.

FOR FURTHER INFORMATION CONTACT: G. John Heyer (703) 603–0665. Copies of this notice will be made available on request in computer diskette format.

SUPPLEMENTARY INFORMATION: The Committee is proposing to amend 41 CFR 51–5.2 to add a new paragraph (e) to its mandatory source requirement. The new paragraph will require Government contracting activities which have bundled JWOD services into larger contract requirements to require their prime contractors to contract with the JWOD nonprofit agencies for performance of those services. The provision would place the same obligation on Government contracting activities and their prime contractors if the Committee added a bundled service to the Procurement List after the bundling occurred. A similar regulatory provision for JWOD commodities appears at 41 CFR 51–5.2(c).

The Committee is also proposing a set of regulatory revisions to create a provision (new 41 CFR 51–6.14) for addition of replacement services to the Procurement List, similar to the provision at 41 CFR 51–6.13 on replacement commodities. This new provision is a response to service relocations which are part of current Government downsizing initiatives.

Lastly, the Committee is proposing to amend those provisions of its regulations which state its mailing address, as the address changed in November 1997. The provisions appear in the Committee's Freedom of Information Act, Privacy Act, and nondiscrimination regulations at 41 CFR parts 51–8, 51–9, and 51–10 respectively.

Regulatory Flexibility Act

I certify that this proposed revision of the Committee regulations will not have a significant economic impact on a substantial number of small entities because the revision clarifies program policies and does not essentially change the impact of the regulations on small entities.

Paperwork Reduction Act

The Paperwork Reduction Act does not apply to this proposed rule because it contains no new information collection or recordkeeping requirements as defined in that Act and its regulations.

Executive Order No. 12866

The Committee has been exempted from the regulatory review requirements of the Executive Order by the Office of Information and Regulatory Affairs. Additionally, the proposed rule is not a significant regulatory action as defined in the Executive Order.

List of Subjects

41 CFR Parts 51–5 and 51–6

Government procurement, Individuals with disabilities.

41 CFR Part 51–8

Freedom of information.

41 CFR Part 51–9

Privacy.

41 CFR Part 51–10

Administrative practice and procedure, Civil rights, Equal employment opportunity, Federal buildings and facilities, Individuals with disabilities.

For the reasons set out in the preamble, parts 51–5, 51–6, 51–8, 51–9 and 51–10 of Title 41, Chapter 51 of the Code of Federal Regulations are proposed to be amended as follows:

1. The authority citation for parts 51–5 and 51–6 continues to read as follows:

Authority: 41 U.S.C. 46–48c.

PART 51–5—CONTRACTING REQUIREMENTS

2. Add new paragraph (e) to § 51–5.2 to read as follows:

§ 51–5.2 Mandatory source requirement.

* * * * *

(e) Contracting activities procuring services which have included within them services on the Procurement List shall require their contractors for the larger service requirement to procure the included Procurement List services from nonprofit agencies designated by the Committee.

3. Revise the first sentence of paragraph (b) of § 51–5.3 to read as follows:

§ 51–5.3 Scope of requirement.

* * * * *

(b) For services, where an agency and location or geographic area are listed on the Procurement List, only the service for the location or geographic area listed must be procured from the nonprofit agency, except as provided in § 51–6.14 of this chapter. * * *

* * * * *

PART 51–6—PROCUREMENT PROCEDURES

4. Redesignate § 51–6.14 as § 51–6.15.

5. Add new § 51–6.14 to read as follows:

§ 51–6.14 Replacement services.

If a service is on the Procurement List to meet the needs of a Government entity at a specific location and the entity moves to another location, the service at the new location is automatically considered to be on the Procurement List if a qualified nonprofit agency is available to provide the service at the new location, unless the service at that location is already being provided by another contractor. If the service at the new location is being provided by another contractor, the service will not be on the Procurement List unless the Committee adds it as prescribed in part 51–2 of this chapter. If another Government entity moves into the old location, the service at that location will remain on the Procurement List to meet the needs of the new Government entity.

PART 51–8—PUBLIC AVAILABILITY OF AGENCY MATERIALS

6. The authority citation for Part 51–8 continues to read as follows:

Authority: 5 U.S.C. 552.

§§ 51–8.4 and 51–8.5 [Amended]

7. Remove the words "Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461" and add, in their place, the words "Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302" in the following places:

a. Section 51–8.4; and

b. Section 51–8.5(a).

PART 51–9—PRIVACY ACT RULES

8. The authority citation for Part 51–9 continues to read as follows:

Authority: 5 U.S.C. 552a.

§§ 51–9.401 and 51–9.405 [Amended]

Remove the words "Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461" and add, in their place, the words "Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302" in the following places:

a. Section 51–9.401(a); and

b. Section 51–9.405(a).

PART 51–10—ENFORCEMENT OF NONDISCRIMINATION ON THE BASIS OF HANDICAP IN PROGRAMS OR ACTIVITIES CONDUCTED BY THE COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

10. The authority citation for part 51–10 continues to read as follows:

Authority: 29 U.S.C. 794.

§ 51–10.170 [Amended]

11. In § 51–10.170, remove the words "Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461" and add, in their place, the words "Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302" in paragraph (c).

Dated: January 20, 1998.

Beverly L. Milkman,

Executive Director.

Bureau of Land Management

43 CFR Part 2360

RIN 1004–AC79

[WO–130–1820–00 24 1A]

National Petroleum Reserve, Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rule; withdrawal.

SUMMARY: The Bureau of Land Management (BLM) is withdrawing a rule that proposed removing sections of 43 CFR part 2360. The proposal was published in the **Federal Register** on October 23, 1996, and would have removed all of part 2360 except for provisions dealing with use authorizations. BLM had proposed to remove the regulations because we thought they were repetitive of statutory language or obsolete.

FOR FURTHER INFORMATION CONTACT: Frank Bruno, Regulatory Affairs Group (WO–630), Bureau of Land Management, Mail Stop 401LS, 1849 "C" Street, N.W., Washington, DC 20240; telephone (202) 452–0352 (Commercial or FTS).

SUPPLEMENTARY INFORMATION: BLM published the proposed rule on October 23, 1996, at 61 FR 54977–54978. The comment period closed on November 22, 1996, and we received only one public comment letter. Because of the National Petroleum Reserve-Alaska Environmental Impact Statement planning project that is currently underway, BLM decided to withdraw the proposed rule, and will take no further action on the proposal.

Dated: January 15, 1998.

RIN 0648–AK56

Fisheries Off West Coast States and in the Western Pacific; Western Pacific Pelagic Fisheries; Control Date

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking; consideration of a control date.

SUMMARY: This notice announces that persons who, after November 13, 1997, enter the pelagic longline fishery in American Samoa will not necessarily be assured of eligibility for continuing participation in the fishery if, in the future, the Western Pacific Fishery Management Council (Council) prepares and NMFS approves a program limiting entry or effort. This notice also announces that vessels greater than 50 ft (15.2 m) in length that are registered for use with Federal general longline permits after November 13, 1997, would not be assured of being allowed to use longline gear to fish for pelagic management unit species within 100 nautical miles (nm) from the coast lines of American Samoa. This notice does not commit the Council to limit effort, nor does it prevent any other date from being selected for eligibility to participate in the fishery. The Council also may use other criteria to limit fishing effort associated with the proposed area closure around American Samoa.

DATES: Comments must be submitted by February 23, 1998.

ADDRESSES: Submit comments to the Western Pacific Fishery Management Council, 1164 Bishop Street, Suite 1400, Honolulu, HI 92813.

FOR FURTHER INFORMATION CONTACT: Ms. Kitty Simonds, Executive Director, Western Pacific Fishery Management Council, (909) 522–8220, or Mr. Alvin Katekaru, Fishery Management Specialist, Pacific Islands Area Office, NMFS (808) 973–2985.

SUPPLEMENTARY INFORMATION: The pelagic fishery in American Samoa is undergoing rapid change. Prior to 1995 it was largely a troll-based fishery. In late 1995 four vessels known locally as "alia" catamarans (about 30 ft (9.1 m) long powered by small gas outboard engines) began to fish for albacore using monofilament longline gear. During 1995, this artisanal-scale fishing operation landed 54,902 lb (24.903 metric tons (mt)) of albacore, a 97–percent increase in landings over the previous year. In 1996, 13 alias participated in the fishery and landed 232,721 lb (105.56 mt) of albacore. The number of longline vessels registered for the fishery increased to 32 in 1997, including four vessels ranging in length from 65 to 109 ft (19.8 to 33.2 m). In 1996, a total of 99,990 hooks were set in the fishery. By the third quarter of 1997, a total of 175,081 hooks had been set in the fishery.

In June 1997, fishermen in American Samoa formed a small boat working group to discuss possible management approaches to prevent destabilization and overcapitalization in the fishery. At the 94th meeting held in November 1997, after consulting with the group, Council members from American Samoa presented the Council with two recommendations: (1) Establish a "control date" (potential cut-off date) for permit eligibility if the Council decides to develop a limited entry program and (2) prepare a regulatory amendment under the framework process of the Fishery Management Plan for Pelagic Species Fisheries in the Western Pacific Region to establish a 100–nm area around American Samoa closed to longline fishing by vessels longer than 50 ft (15.2 m) that were not already in the fishery. Vessels greater than 50 ft (15.2 m) in length registered with a general longline permit after the control date would not be allowed to continue to fish within the closed area. The Council approved the establishment of a control date (November 13, 1997) for a limited entry program and directed staff to prepare a regulatory amendment to establish a 100–nm area closed to longline fishing.

This decision by the Council rescinds the earlier control date for this fishery of January 1, 1991, published in the **Federal Register** on March 28, 1991 (56 FR 1289).

The Council believes that there is a risk of speculative entry into the fishery while the Council further evaluates the potential benefits and costs of limited entry alternatives and the proposed regulatory amendment for area closure, including enforcement concerns. The control date is designed to discourage speculative entry during this period of analysis. The control date does not commit the Council or NMFS to any particular management regime or criteria for entry into the American Samoa longline fishery. Fishermen are not guaranteed future participation in this fishery, regardless of their entry date or level of participation before or after the control date. The Council may choose a different control date or it may choose a management regime that does not involve a control date. Other criteria, such as documentation of commercial landings and sales, may be used to determine eligibility for participation in the fishery. At its 95th meeting in April 1998, the Council may also consider prohibiting other U.S. pelagic non-longline fishing vessels (purse-seiners, trollers, and pole-and-line bait boats) greater than 50 ft (15.2 m) from fishing within 100–nm of the land masses of American Samoa. The Council also may choose to take no further action to control entry or access to the fishery or to establish a closed longline fishing area.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: January 14, 1998.

Rolland A. Schmitten,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Research Service

Notice of Intent To Grant Exclusive License; Correction Notice

AGENCY: Agricultural Research Service, USDA.

ACTION: Correction to Notice of intent to grant exclusive license.

SUMMARY: In notice document published in the issue of Wednesday, December 31, 1997 (62 FR 68248), the location of the grantee (Integrated BioControl Systems, Inc.) was omitted. In addition, the publication date of the FR Notice of Availability was erroneous. This notice corrects the exclusive grant license information to Serial No. 08/863,261 as follows:

On page 68248, in the first column, first paragraph of the USDA notice, include the location of Aurora, Indiana, for Integrated BioControl Systems, Inc. The **Federal Register** publication date for the Notice of Availability for Serial No. 08/404,779 was specified as May 27, 1997. The date should be changed to May 27, 1995.

Dated: January 15, 1998.

DEPARTMENT OF AGRICULTURE

Forest Service

Threemile Area Timber Sales and Other Projects, Colville National Forest, Pend Oreille County, Washington

AGENCY: Forest Service, USDA.

ACTION: Cancellation of an environmental impact statement.

SUMMARY: On January 18, 1990, a Notice of Intent (NOI) to prepare an environmental impact statement (EIS) for the Threemile Area Timber Sales and Other Projects on the Sullivan Lake Ranger District of the Colville National Forest was published in the **Federal Register** (55 FR 1687). A Notice of Availability for the draft EIS was published in the **Federal Register** on August 14, 1992 (57 FR 36647). The comment period on the draft EIS ended October 1, 1992. Forest Service has decided to cancel the environmental analysis process. There will be no final EIS for this project at this time. The NOI is hereby rescinded.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this cancellation to Connie Smith, Environmental Coordinator, Colville National Forest, 765 South Main, Colville, Washington 99114 or telephone 509–684–7185.

Dated: January 8, 1998.

Bureau of Land Management

[ID918–1610–00–UCRB]

Interior Columbia Basin Ecosystem Management Project, States of Oregon, Washington, Idaho, Montana, Wyoming, Utah, and Nevada and the Northern, Intermountain, and Pacific Northwest Regions

AGENCIES: Forest Service, USDA; Bureau of Land Management, USDI.

ACTION: Notice of extension of comment period for draft environmental impact statements (EISs).

SUMMARY: On June 12, 1997, the Forest Service and the Bureau of Land Management published a notice of availability of two draft EISs in the **Federal Register** (62 FR 32076). That notice stated that a 120-day comment period was provided for the Eastside Draft EIS and for the Upper Columbia River Basin Draft EIS. On September 5, 1997, a second notice (62 FR 46941) extended the comment period to February 6, 1998. This notice is to inform interested parties that the comment period has been extended again to provide for public review of, and comment on, an economic and social report prepared in response to a requirement of the Department of the Interior and Related Agencies Appropriations Act of 1998.

DATES: Comments on the two draft EISs and on the economic and social report must now be submitted or postmarked no later than April 6, 1998.

ADDRESSES: Copies of the economic and social report will be mailed in mid-February to everyone on the mailing list for the Eastside and Upper Columbia River Basin Draft EISs. Interested parties not on the mailing list can obtain a copy from ICBEMP, 112 E. Poplar Street, Walla Walla, WA 99362 or by calling (509) 522–4030 or from ICBEMP, 304 N. 8th Street, Room 250, Boise, ID 83702 or by calling (208) 334–1770, ext. 120. The economic and social report will also be available via the internet (http://www.icbemp.gov).

Comments on the Eastside draft EIS, including the economic and social report, should be submitted in writing to ICBEMP, 112 East Poplar Street, P.O. Box 2076, Walla Walla, WA 99362. Comments on the Upper Columbia River Basin draft EIS, including the economic and social report, should be submitted in writing to ICBEMP, 304 N. 8th Street, Room 250, Boise, ID 83702. If your comments are in regard to both draft EISs, they may be sent to either office. Comments may also be made electronically by accessing the Project home page (http://www.icbemp.gov), where a comment form is available. If you have already submitted your comments, you may now submit more comments on the draft EISs, including your comments regarding the economic and social report.

FOR FURTHER INFORMATION CONTACT: EIS Team Leader Jeff Walter, 304 N. 8th Street, Room 250, Boise, ID 83702, telephone (208) 334–1770 or EIS Deputy Team Leader Cathy Humphrey, 112 East Poplar Street, P.O. Box 2076, Walla Walla, WA 99362, telephone (509) 522–4030.

SUPPLEMENTARY INFORMATION: In Section 323 of the Department of the Interior and Related Agencies Appropriations Act of 1998 Pub. L. 105–83), the United States Congress directed the following: "Using all research information

VOL
63
ISS
15

1998
UMI

available from the area encompassed by the Project, the Secretaries [of Agriculture and the Interior], to the extent practicable, shall analyze the economic and social conditions, and culture and customs, of the communities at the sub-basin level within the Project area and the impacts the alternatives in the draft EISs will have on those communities. This analysis shall be published on a schedule that will allow a reasonable period of time for public comment thereon prior to the close of the comment periods on the draft EISs. The analysis, together with the response * * * to the public comment, shall be incorporated in the final EISs and * * * subsequent decisions related thereto."

The required analysis has been prepared. It is a report on the existing economic and social conditions at the community level within the Interior Columbia Basin Ecosystem Management Project area and, to the extent practicable, an analysis of the effects of the alternatives described in the draft EISs upon communities. This report will be distributed to the public by mid-February, providing approximately seven weeks for review and comment before the comment period closes April 6, 1998.

Dated: January 16, 1998.

Martha Hahn,

Director, Bureau of Land Management.

Dated: January 16, 1998.

Jack Blackwell,

Regional Forester, U.S. Forest Service.

BILLING CODE 4310–11–M, 4310–GG–M

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds to the Procurement List services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: February 23, 1998.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On October 3 and November 28, 1997, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (62 FR 51827 and 63314) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.

2. The action will not have a severe economic impact on current contractors for the services.

3. The action will result in authorizing small entities to furnish the services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Accordingly, the following services are hereby added to the Procurement List:

Grounds/Garage Maintenance

Veterans Affairs Medical Center, 1601 Perdido Street, New Orleans, Louisiana

Janitorial/Custodial

Naval Command Control & Ocean Surveillance Center, East Coast Division Complex (trailers/laboratories), Charleston, South Carolina

Operation of Postal Service Center, Luke Air Force Base, Arizona.

This action does not affect current contracts awarded prior to the effective date of this addition or options that may be exercised under those contracts.

Beverly L. Milkman,

Executive Director.

BILLING CODE 6353–01–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to and Deletions from Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete commodities previously furnished by such agencies.

COMMENTS MUST BE RECEIVED ON OR BEFORE: February 23, 1998.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Gateway 3, Suite 310, 1215 Jefferson Davis Highway, Arlington, Virginia 22202–4302.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities and services.

3. The action will result in authorizing small entities to furnish the commodities and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities and services proposed for addition to the Procurement List. Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodities and services have been proposed for addition to Procurement List for production by the nonprofit agencies listed:

Commodities

Pen, Executive, Twist Retractable

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Rhode Island Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Rhode Island Advisory Committee to the Commission will convene at 9:00 a.m. and adjourn at 5:30 p.m. on Monday, February 9, 1998, at the Providence Public Library, North Meeting Room, 225 Washington Street, Providence, Rhode Island 02903. The purpose of the meeting is to hold a consultation to gather information for its project, "An Examination of the Impact of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 on Legal Immigrants in Rhode Island." The Committee has invited community representatives and immigrant rights organizations, State and local officials, and the State congressional delegation to brief the Committee on this topic.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Robert Lee, 401–863–1693, or Ki-Taek Chun, Director of the Eastern Regional Office, 202–376–7533 (TDD 202–376–8116). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, January 16, 1998.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Nishan Keval; In the Matter of: Nishan Keval, 2511 Sullivan Drive, Auburn, California 95603; Order Denying Permission To Apply for or Use Export Licenses

On September 25, 1995, Nishan Keval (Keval) was convicted in the United States District Court for the Southern District of California of violating the International Emergency Economic Powers Act (50 U.S.C.A. §§ 1701–1706 (1991 & Supp. 1997)) (IEEPA). Keval was convicted of knowingly and willfully exporting and causing to be exported from the United States to The Netherlands, for transshipment to the People's Republic of Libya, petrochemical-related equipment.

Section 11(h) of the Export Administration Act of 1979, as amended (50 U.S.C.A. app. § § 2401–2420 (1991 & Supp. 1997)) (the Act),[1] provides that, at the discretion of the Secretary of

[1] The Act expired on August 20, 1994. Executive Order 12924 (3 CFR 1994 Comp. 917 (1995)), extended by Presidential Notices of August 15, 1995 (3 CFR, 1995 Comp. 501 (1996)), August 14, 1996 (3 CFR 1996 Comp. 298 (1997)), and August 13, 1997 (62 FR 43629, August 15, 1997) continued the Export Administration Regulations in effect under IEEPA.

VOL 63 ISS 15 JA 23 1998 UMI

Commerce,[2] no person convicted of violating IEEPA, or certain other provisions of the United States code, shall be eligible to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act or the Export Administration Regulations (currently codified at 15 CFR parts 730–774 (1997)), (the Regulations), for a period of up to 10 years from the date of the conviction. In addition, any license issued pursuant to the Act in which such a person had any interest at the time of conviction may be revoked.

Pursuant to Sections 766.25 and 750.8(a) of the Regulations, upon notification that a person has been convicted of violating IEEPA, the Director, Office of Exporter Services, in consultation with the Director, Office of Export Enforcement, shall determine whether to deny that person permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act and the Regulations, and shall also determine whether to revoke any license previously issued to such a person.

Having received notice of Keval's conviction for violating IEEPA and following consultations with the Acting Director, Office of Export Enforcement, I have decided to deny Keval permission to apply for or use any license, including any License Exception, issued pursuant to, or provided by, the Act and the Regulations, for a period of eight years from the date of his conviction. The eight-year period ends on September 25, 2003. I have also decided to revoke all licenses issued pursuant to the Act in which Keval had an interest at the time of his conviction.

Accordingly, it is hereby ordered:

I. Until September 25, 2003, Nishan Keval, 2511 Sullivan Drive, Auburn, California 95603, may not, directly or indirectly, participate in any way, in any transaction involving any commodity, software or technology (hereinafter collectively referred to as "item") exported or to be exported from the United States, that is subject to the Regulations, or in any other activity subject to the Regulations, including but not limited to:

A. Applying for, obtaining, or using any license, License Exception, or export control document;

B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of, forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations; or

C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the Regulations, or in any other activity subject to the Regulations.

II. No person may directly or indirectly, do any of the following:

A. Export or reexport to or on behalf of the denied person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the denied person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the denied person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the denied person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and that is owned, possessed or controlled by the denied person, or service any item, of whatever origin, that is owned, possessed or controlled by the denied person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

III. After notice and opportunity for comment as provided in Section 766.23 of the Regulations, any person, firm, corporation, or business organization related to Keval by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

IV. This Order does not prohibit any export, reexport, or other transaction subject to the Regulations, where the only items involved that are subject to the Regulations are the foreign-producted direct product of U.S.-origin technology.

V. This Order is effective immediately and shall remain in effect until September 25, 2003.

VI. A copy of this Order shall be delivered to Keval. This Order shall be published in the **Federal Register**.

Dated: January 9, 1998.

Eileen M. Albanese,

Director, Office of Exporter Services.

Stainless Steel Bar from India: Preliminary Results of New Shipper Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results of New Shipper Antidumping Duty Administrative Review: Stainless Steel Bar from India.

SUMMARY: In response to requests from M/s Panchmahal Steels, Ltd. and Ferro Alloys Corporation Limited, the Department of Commerce is conducting a new shipper administrative review of the antidumping duty order on stainless steel bar from India. This review covers M/s Panchmahal Steels, Limited's and Ferro Alloys Corporation Limited's sales of the subject merchandise to the United States during the period February 1, 1996 through January 31, 1997.

We have preliminarily determined that M/s Panchmahal Steels, Ltd.'s sales have been made below normal value and that Ferro Alloys Corporation Limited's sales have not been made below normal value. If these preliminary results are adopted in our final results of new shipper administrative review, we will instruct the U.S. Customs Service to assess antidumping duties equal to the difference between the export price and the normal value.

Interested parties are invited to comment on these preliminary results. Parties who submit argument are requested to submit with the argument (1) a statement of the issue and (2) a brief summary of the argument.

EFFECTIVE DATE: January 23, 1998.

FOR FURTHER INFORMATION CONTACT: Craig Matney or Zak Smith, Office 1, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington D.C. 20230; telephone (202) 482–0588 or (202) 482–1279, respectively.

Applicable Statute

Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act of 1930 ("the Act") by the Uruguay Round Agreements Act.

SUPPLEMENTARY INFORMATION:

Background

On February 24 and February 27, 1997, the Department of Commerce ("the Department") received requests from respondents to conduct a new shipper administrative review of the antidumping duty order on stainless steel bar from India produced by M/s Panchmahal Steels, Ltd. ("Panchmahal") and Ferro Alloys Corporation Limited ("Facor"), respectively. The Department published in the **Federal Register**, on March 28, 1997, a notice of initiation of a new shipper administrative review of Panchmahal and Facor covering the period August 1, 1996, through January 31, 1997 (62 FR 14886). On September 17, 1997, the Department published in the **Federal Register** a notice of extension of time limit for this new shipper administrative review (62 FR 48811). This notice extended the time for completion of these preliminary results to no later than January 14, 1998.

Scope of Review

Imports covered by this review are shipments of stainless steel bar ("SSB"). SSB means articles of stainless steel in straight lengths that have been either hot-rolled, forged, turned, cold-drawn, cold-rolled or otherwise cold-finished, or ground, having a uniform solid cross section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles, hexagons, octagons, or other convex polygons. SSB includes cold-finished SSBs that are turned or ground in straight lengths, whether produced from hot-rolled bar or from straightened and cut rod or wire, and reinforcing bars that have indentations, ribs, grooves, or other deformations produced during the rolling process.

Except as specified above, the term does not include stainless steel semi-finished products, cut length flat-rolled products (*i.e.*, cut length rolled products which if less than 4.75 mm in thickness have a width measuring at least 10 times the thickness, or if 4.75 mm or more in thickness having a width which exceeds 150 mm and measures at least twice the thickness), wire (*i.e.*, cold-formed products in coils, of any uniform solid cross section along their whole length, which do not conform to the definition of flat-rolled products), and angles, shapes and sections.

The SSB subject to these orders is currently classifiable under subheadings 7222.10.0005, 7222.10.0050, 7222.20.0005, 7222.20.0045, 7222.20.0075, and 7222.30.0000 of the Harmonized Tariff Schedule of the United States ("HTSUS"). Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this order is dispositive.

Period of Review

This review covers two manufacturers/exporters, Panchmahal and Facor, and the period February 1, 1996 through January 31, 1997. The initiation notice incorrectly stated the period of review as August 1, 1996 through January 31, 1997.

Date of Sale

The Department's April 21, 1997, questionnaire instructed respondents to use the invoice date as date of sale. It further instructed respondent to contact the Department if the exporter believed that there was another situation present that would make using the date of invoice inappropriate. Facor made a written submission to the Department on June 9, 1997, claiming that the purchase order date was the appropriate date of sale, because that is the date on which the material terms of sale are set. On June 12, 1997, the Department agreed that Facor may report its sales to the United States based on purchase order date.

Petitioners objected to the Department's date of sale decision. Petitioners claimed that our decision in *Wire Rod from India* (62 FR 38976, July 21, 1997) allows only two exceptions (*i.e.*, sales made on the basis of long-term contracts and sales made with a long lag time) to the rule of using invoice date as date of sale, and that Facor did not meet either one. We conducted a further analysis of the information on the record and concluded that the purchase order date is the appropriate date of sale because the material terms of sale were set at this time and no material changes occurred between the purchase order date and the invoice date (*see*, Memorandum to Richard W. Moreland from Susan Kuhbach, November 14, 1997).

United States Price

In calculating the price to the United States, we used export price ("EP"), in accordance with section 772(a) of the Act, because the subject merchandise was sold directly to the first unaffiliated purchaser in the United States prior to importation into the United States and constructed export price was not otherwise indicated.

We calculated EP based on either the CIF or cost and freight ("CFR") price to the United States. In accordance with section 772(c)(2) of the Act, we made deductions for foreign inland freight and international freight.

Panchmahal claimed an upward adjustment to EP for a "duty drawback" program. In the preliminary results of the first administrative review of this order, we analyzed the functioning of this duty drawback program and found that it did not meet the Department's criteria for an upward adjustment to EP (*see*, 62 FR 10540 at 10541, March 7, 1997). We maintained our position in the final results (*see*, 62 FR 37030, July 10, 1997). We have reexamined the program in regard to Panchmahal, and have found no reason to deviate from our previous decision. As stated in *Certain Welded Carbon Standard Steel Pipes and Tubes from India* (62 FR 47632 at 47635, September 10, 1997), "we determine whether an adjustment to U.S. price for a respondent's claimed duty drawback is appropriate when the respondent can demonstrate that it meets both parts of our two-part test. There must be: (1) A sufficient link between the import duty and the rebate, and (2) a sufficient amount of raw materials imported and used in the production of the final exported product." Because Panchmahal did not demonstrate a sufficient link between the import duty and the rebate, we have not made an adjustment to EP.

Normal Value

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating NV, we compared respondent's volume of home market sales of the foreign like product to the volume of U.S. sales of the subject merchandise, in accordance with section 773(a) of the Act. Because the aggregate volume of home market sales of the foreign like product was greater than five percent of the aggregate volume of U.S. sales of the subject merchandise, we determined that the home market provides a viable basis for calculating NV. Therefore, in accordance with section 773(a)(1)(B)(i) of the Act, we based NV on the prices

VOL 63 ISS 15 JA 23 1998 UMI

at which the foreign like product was first sold to unaffiliated customers for consumption in the exporting country, in the usual commercial quantities and in the ordinary course of trade.

Level of Trade

In accordance with section 773(a)(1)(B) of the Act, to the extent practicable, we determine NV based on sales in the comparison market at the same level of trade ("LOT") as the EP or CEP transaction. The NV LOT is that of the starting-price sales in the comparison market or, when NV is based on constructed value, that of the sales from which we derive selling, general and administrative expenses and profit. For EP, the U.S. LOT is also the level of the starting-price sale, which is usually from exporter to importer. For CEP, it is the level of the constructed sale from the exporter to the importer.

To determine whether NV sales are at a different LOT than EP or CEP, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. If the comparison-market sales are at a different LOT, and the difference affects price comparability, as manifested in a pattern of consistent price differences between the sales on which NV is based and comparison-market sales at the LOT of the export transaction, we make an LOT adjustment under section 773(a)(7)(A) of the Act. Finally, for CEP sales, if the NV level is more remote from the factory than the CEP level and there is no basis for determining whether the difference in the levels between NV and CEP affects price comparability, we adjust NV under section 773(a)(7)(B) of the Act (the CEP offset provision). *See, Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate from South Africa*, 62 FR 61731 (November 19, 1997).

In implementing these principles in this review, we reviewed information from each respondent regarding the marketing stage involved in the reported home market and U.S. sales, including a description of the selling activities performed by the respondents for each channel of distribution. Pursuant to section 773(a)(1)(B)(i) of the Act and the SAA at 827, in identifying levels of trade for EP and home market sales we considered the selling functions reflected in the starting prices before any adjustments. We expect that, if claimed levels of trade are the same, the functions and activities of the seller should be similar. Conversely, if a party claims that levels of trade are different for different groups of sales, the functions and activities of the seller should be dissimilar.

Based on an analysis of the selling functions, class of customers, and level of selling expenses, we found that the marketing process in both the home market and the United States were not substantially dissimilar for either Panchmahal or Facor. Therefore, we have preliminarily found that sales in both markets are at the same LOT and consequently no LOT adjustment is warranted.

Cost of Production Analysis

Based on a cost allegation presented by petitioners, the Department found reasonable grounds to believe or suspect that sales by Facor in the home market were made at the prices below their respective costs of production ("COPs"). As a result, the Department initiated an investigation to determine whether Facor made home market sales during the POR at prices below its COP, within the meaning of section 773(b) of the Act.

We conducted the COP analysis described below.

A. Calculation of COP

In accordance with section 773(b)(3) of the Act, we calculated the weighted-average COP, by model, based on the sum of the cost of materials, fabrication, selling, general and administrative expenses, and packing costs.

B. Results of the COP Test

Pursuant to section 773(b)(2)(C), where less than 20 percent of a respondent's sales of a given product were made at prices below the COP, we did not disregard any below-cost sales of that product because we determined that the below-cost sales were not made in "substantial quantities." Where 20 percent or more of Facor's sales of a given product were made at prices below the COP, we disregarded the below-cost sales because such sales were found to be made within an extended period of time in "substantial quantities" in accordance with sections 773(b)(2)(B) and (C) of the Act. Moreover, based on comparisons of price to weighted-average COPs for the POR, we determined that the below-cost sales of the product were at prices which would not permit recovery of all costs within a reasonable period of time, in accordance with section 773(b)(2)(D) of the Act.

We found that Facor made home market sales at below COP prices within an extended period of time in substantial quantities. Further, we found that these sales prices did not permit for the recovery of costs within a reasonable period of time. We therefore excluded these sales from our analysis in accordance with section 773(b)(1) of the Act.

Preliminary Results of the Review

As a result of our comparison of EP and NV, we preliminarily determine the following weighted-average dumping margins:

Manufacturer/exporter	Period	Margin (percent)
Panchmahal	2/1/96–1/31/97	0.69
Facor	2/1/96–1/31/97	

Parties to the proceeding may request disclosure within five days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the publication of this notice, or the first workday thereafter. Interested parties may submit case briefs within 30 days of the date of publication of this notice. Rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than 37 days after the date of publication of this notice. The Department will issue the final results of this administrative review, which will include the results of its analysis of issues raised in any such comments, within 90 days of issuance of these preliminary results.

Upon completion of this new shipper administrative review, the Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between EP and NV may vary from the percentages stated above. We have calculated an importer-specific duty assessment rate based on the ratio of the total amount of AD duties calculated for the examined sales made during the POR to the total value of subject merchandise entered during the POR. In order to estimate the entered value, we subtracted international movement expenses (*e.g.*, international freight) from the gross sales value. This rate will be assessed uniformly on all entries made during the POR. The Department will issue appraisement instructions directly to the Customs Service.

The following deposit requirement will be effective upon publication of the final results of this new shipper antidumping duty administrative review for all shipments of stainless steel bar from India entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed companies will be the rates established in the final results of this review; (2) if the exporter is not a firm covered in this review, but was covered in a previous review or the original less-than-fair-value ("LTFV") investigation, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a previous review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers and/or exporters of this merchandise, shall be 12.45 percent, the "all others" rate established in the LTFV investigation (59 FR 66915, December 28, 1994).

These requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(h).

Dated: January 13, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

International Trade Administration

[C–427–805]

Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From France; Notice of Court Decision and Suspension of Liquidation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On December 18, 1997, in *Usinor Sacilor* v. *United States*, Consol. Court No. 93-04–00230, a lawsuit challenging the Department of Commerce's final affirmative countervailing duty determination of certain hot-rolled lead and bismuth carbon steel products from France, the Court of International Trade affirmed the Department of Commerce's remand determination and entered a judgment order. As a result, the final net subsidy rate for all programs for Usinor Sacilor has decreased from 23.11% to 12.51% *ad valorem*, and the "country-wide" rate has decreased from 23.11% to 12.51% *ad valorem*.

Consistent with the decision of the Court of Appeals for the Federal Circuit in *Timken Co.* v. *United States*, 893 F.2d 337 (Fed. Cir. 1990), the Department of Commerce will direct the Customs Service to change the cash deposit rates being used in connection with the suspension of liquidation of the subject merchandise once there is a "conclusive" decision in this case.

EFFECTIVE DATE: January 23, 1998.

FOR FURTHER INFORMATION CONTACT: Cindee Thirumulai, Office 1, Group 1, AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., N.W., Washington D.C. 20230, telephone: (202) 482–4087.

SUPPLEMENTARY INFORMATION:

Background

On January 27, 1993, the Department of Commerce (the "Department" or "Commerce") published notice of its final affirmative countervailing duty determination of certain hot-rolled lead and bismuth carbon steel products from France. *Final Affirmative Countervailing Duty Determination; Certain Hot-rolled Lead and Bismuth Carbon Steel Products from France*, 58 FR 6221 (Jan. 27, 1993). In that determination, the Department set forth its finding of a final net subsidy rate of 23.14% *ad valorem* for Usinor Sacilor and 23.14% *ad valorem* for the "country-wide" rate. On March 22, 1993, the Department published a countervailing duty order correcting ministerial errors and instructing the Customs Service to collect cash deposits at the rate of 23.11% *ad valorem* for Usinor Sacilor and 23.11% *ad valorem* for the "country-wide" rate, on entries of the subject merchandise entered or withdrawn from warehouse for consumption on or after that date. 58 FR 15326.

Following publication of the Department's countervailing duty order, petitioners and respondents filed lawsuits with the Court of International Trade ("CIT") challenging the Department's final determination.

In its first decision in this case, *Usinor Sacilor v. United States*, 893 F. Supp. 1112 (CIT 1995), the CIT rejected the Department's reliance on IRS tables showing industry-specific average useful life of assets in determining an allocation period of 15 years. In a subsequent remand determination, the Department calculated a company-specific allocation period for Usinor Sacilor based on the average useful life of non-renewable physical assets, and the CIT affirmed it. *Usinor Sacilor* v. *United States*, 955 F. Supp. 1481 (1997).

In a later decision, *Usinor Sacilor* v. *United States*, 966 F. Supp. 1242 (1997), the CIT remanded the case to the Department on the issue of the appropriate sales denominator and instructed the Department to adjust its countervailing duty rates to reflect the fact that the subsidies at issue benefitted Usinor Sacilor's worldwide production rather than just Usinor Sacilor's domestic production. In its ensuing remand determination, dated July 28, 1997, the Department followed the CIT's instructions and adjusted the countervailing duty rates. On December 18, 1997, in *Usinor Sacilor* v. *United States*, Consol. Court No. 93–04–00230, Slip Op. 97–177, the CIT affirmed the Department's remand determination and entered a judgment order.

As a result of the remands in this case, the net subsidy rate for all programs for Usinor Sacilor has decreased from 23.11% to 12.51% *ad valorem*, and the "country-wide" rate has decreased from 23.11% to 12.51% *ad valorem*.

Suspension of Liquidation

In its decision in *Timken Co.* v. *United States*, 893 F.2d 337 (Fed. Cir. 1990) ("*Timken*"), the Court of Appeals for the Federal Circuit ("CAFC") held that the Department must publish notice of a decision of the CIT or the CAFC which is not "in harmony" with the

VOL 63 ISS 15 JA 23 1998 UMI

Department's determination. Publication of this notice fulfills that obligation. The CAFC also held that the Department must suspend liquidation of the subject merchandise until there is a "conclusive" decision in the case. Therefore, pursuant to *Timken*, Commerce must suspend liquidation pending the expiration of the period to appeal the CIT's December 18, 1997 ruling or, if that ruling is appealed, pending a final decision by the CAFC. However, because entries of the subject merchandise already are being suspended pursuant to the countervailing duty order in effect, the Department need not order the Customs Service to suspend liquidation. Further, consistent with *Timken*, the Department will order the Customs Service to change the relevant cash deposit rates in the event that the CIT's ruling is not appealed or the CAFC issues a final decision affirming the CIT's ruling.

Dated: January 13, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

International Trade Administration

[Docket No. 971202287–7287–01]

Special American Business Internship Training Program (SABIT)

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice announces availability of funds for the Special American Business Internship Training Program (SABIT), for training business executives (also referred to as "interns") from Russia. The Department of Commerce, International Trade Administration (ITA) established the SABIT program in September 1990 to assist the former Soviet Union's transition to a market economy. Since that time, SABIT has been matching business executives and scientists from the New Independent States of the former Soviet Union (NIS) with U.S. firms which provide them with three to six months of hands-on training in a U.S. market economy.

Under the SABIT program, qualified U.S. firms will receive funds through a cooperative agreement with ITA to help defray the cost of hosting interns. ITA will interview and recommend eligible interns to participating companies. *Interns must come from Russia and be citizens of the Russian Federation.* The U.S. firms will be expected to provide the interns with a hands-on, non-academic, executive training program designed to maximize their exposure to management or commercially-oriented scientific operations. At the end of the training program, interns must return to Russia. All interns will be selected from a pre-screened group of qualified mid-level managers; nominations from outside of this group will not be accepted.

DATES: The closing date for applications is March 31, 1998. An original and two copies of the application (Standard Form 424 (Rev. 4–92) and supplemental material) are to be sent to the address designated in the Application Kit and postmarked by the closing date. Applications will be considered on a "rolling" basis as they are received, subject to the availability of funds. If available funds are depleted prior to the closing date, a notice to that effect will be published in the **Federal Register**. Processing of complete applications takes approximately two to three months. Competitive Application kits will be available from ITA starting on January 23, 1998.

ADDRESSES: To obtain a copy of the Application Kit please E-mail: sabitapply@usita.gov (please state which format, *e.g.* WordPerfect® 6.1), telephone (202) 482–0073, facsimile (202) 482–2443 (these are not toll free numbers), or send a written request with two self-addressed mailing labels to "Application Request" The SABIT Program, HCHB Room 3319, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC, 20230.

FOR FURTHER INFORMATION CONTACT: Liesel Duhon, Director, SABIT Program, U.S. Department of Commerce, phone—(202) 482–0073, facsimile—(202) 482–2443. These are not toll free numbers. Only one copy of the Application Kit will be provided to each organization requesting it, but it may be reproduced by the requester.

SUPPLEMENTARY INFORMATION: SABIT exposes Russian business managers and scientific managers to a completely new way of thinking in which demand, consumer satisfaction, and profits drive production. Senior-level interns visiting the U.S. for internship programs with public or private sector companies will be exposed to an environment which will provide them with practical knowledge for transforming their countries' enterprises and economies to the free market. The program provides first-hand, eye-opening experience to managers and scientists which cannot be duplicated by American managers traveling to their territories.

Business Executives

SABIT assists economic restructuring in Russia by providing top-level business managers with practical training in American methods of innovation and management in such areas as strategic planning, financing, production, distribution, marketing, accounting, wholesaling, and labor relations. This first-hand experience in the U.S. economy enables interns to become leaders in establishing and operating a market economy in Russia, and creates a unique opportunity for U.S. firms to familiarize key executives from Russia with their products and services.

Scientist Managers

SABIT provides opportunities for gifted scientists to apply their skills to peaceful research and development in the civilian sector, in areas such as defense conversion, medical research, and the environment, and exposes them to the role of scientific research in a market economy where applicability of research relates to business success. Sponsoring firms in the U.S. scientific community also benefit from exchanging information and ideas, and different approaches to new technologies.

Funding Availability

Pursuant to section 632(a) of the Foreign Assistance Act of 1961, as amended (the "Act") funding for the program will be provided by the United States Agency for International Development (A.I.D). ITA will award financial assistance and administer the program pursuant to the authority contained in section 635(b) of the Act and other applicable grant rules. The estimated amount of financial assistance available for the program is $175,000. Additional funding is anticipated at a future date in 1998. Funding Instrument and Project Duration: Federal assistance will be awarded pursuant to a cooperative agreement between ITA and the recipient firm. All internships are three months; however, ITA reserves the right to allow an intern to stay for a shorter period of time (no less than one month) if the U.S. company agrees and the intern demonstrates a need for a shorter internship based on his or her management responsibilities. ITA will reimburse companies for the round trip international travel of each intern from the intern's home city in Russia to the U.S. internship site, upon submission to ITA of the paid travel invoice, payment receipt, or other evidence of payment

and the form SF–270, "Request for Advance or Reimbursement." Travel under the program is subject to the Fly America Act. ITA will reimburse companies for up to $500 per month housing subsidy. Recipient firms provide $30 per day directly to interns. ITA will reimburse recipient firms for this stipend of $30 per day per intern for up to three months as well as the actual price of the monthly housing, up to $500 per month, upon submission by company of an end-of-internship report and form SF–270. If the Russian Government pays for the international airline travel, recipients will not be eligible for reimbursement for airtravel. In general, each award will have a cap of $5,000 per intern for total cost of airline travel, housing subsidy and stipend. ITA reserves the right to allow an award to exceed this amount in cases of unusually high costs, such as airfare from remote regions of Russia. However, the total payment cannot exceed the award amount. There are no specific matching requirements for the awards. Host firms, however, are expected to bear the costs beyond those covered by the award, including: visa fees, additional housing costs beyond the $500 housing subsidy per month, insurance, any food and incidentals costs beyond $30 per day, any training-related travel within the U.S., and provision of the hands-on training for the interns.

U.S. firms wishing to utilize SABIT in order to be matched with an intern without applying for financial assistance may do so. Such firms will be responsible for all costs, including travel expenses, related to sponsoring the intern. However, prior to acceptance as a SABIT intern, work plans and candidates must be approved by the SABIT Program. Furthermore, program training will be monitored by SABIT staff and evaluated upon completion of training.

Eligibility

Eligible applicants for the SABIT program will include any for profit or non-profit U.S. corporation, association, organization or other public or private entity. Agencies or divisions of the federal government are not eligible.

Evaluation Criteria

Consideration for financial assistance will be given to those SABIT proposals which:

(1). Demonstrate a commitment to the intent and goals of the program to provide practical, on-the-job, non-academic, non-classroom, training: in the case of manager interns, an appropriate management training experience, or, in the case of scientific managers, a practical, commercially-oriented scientific training experience.

(2). Respond to the priority needs of senior business managers and scientists in Russia, as determined by ITA.

(3). Host firms must be solidly committed to interns' return to Russia upon completion of the internships.

(4). Present a realistic work plan describing in detail the training program to be provided to the SABIT intern(s). Work plans must include the following:

(a). Whether Applicant is applying to host managers or scientific managers, or both (and the number of each); (b). the duration of the internship. As noted above, ITA reserves the right to allow an intern with very senior management responsibilities to stay for a shorter period (minimum of one month) if the U.S. company agrees and the intern demonstrates a compelling need for a shorter internship based on his or her management responsibilities; (c). the location(s) of the internship; (d). the name, address, and telephone number of the designated internship coordinator; (e). name(s) of division(s) in which the intern(s) will be placed; (f). the individual(s) in the U.S. company under whose supervision the intern will train; (g). the proposed internship training activities. The components of the training activities must be described in as much detail as possible, preferably on a week-by-week basis. The description of the training activities should include an accounting of what the intern's(s') duties and responsibilities will be during the training; (h). the anticipated housing arrangements to be provided for the intern(s). Note that housing arrangements should be suitable for mid- and senior-level professionals, and that each intern must be provided with a private room.

(5). Include a brief objectives section indicating why the Applicant wishes to provide an internship to a manager(s) or scientist(s) from Russia, and how the proposed internship would further the purpose of the SABIT program as described above.

(6). Provide a general description of the profile of the intern(s) the Applicant would like to host, including: educational background; occupational/professional background (including number of years and areas of experience); size and nature of organization at which the intern(s) is/are presently employed; preference for the region of Russia where the intern(s) is/are employed; and whether Applicant is open to sponsoring interns from a variety of Russian regions.

(7). Indicate whether Applicant organization operates in one or more of the following business sectors: (a). Agribusiness (including food processing and distribution, and agricultural equipment), (b). Defense conversion, (c). Energy, (d). Environment (including environmental clean-up), (e). Financial services (including banking and accounting), (f). Housing, construction and infrastructure, (g). Medical equipment, supplies, pharmaceuticals, and health care management, (h). Product standards and quality control, (i). Telecommunications, and (j). Transportation. Applicant proposal must provide an explanation including description and extent of involvement in the sector(s). While Applicants involved in any industry sector may apply to the program, priority consideration is given to those operating in the above sectors.

Evaluation criteria 1–6 will be weighted equally. ITA does not guarantee that it will match Applicant with the profile provided to SABIT.

Selection Procedures

Each application will receive an independent, objective review by one or more three or four-member ITA review panels qualified to evaluate applications submitted under the program. Applications will be evaluated on a competitive, "rolling" basis as they are received in accordance with the selection evaluation set forth above. Awards will be made to those applications which successfully meet the selection criteria. If funds are not available for all those applications which successfully meet the criteria, awards will be made to the first applications received which successfully do so. ITA review panel(s) reserve(s) the right to reject any application; to limit the number of interns per applicant; to waive informalities and minor irregularities in applications received; and to consider other than competitive procedures to distribute assistance under this program and in accordance with the law. ITA review panel(s) reserve(s) the right to make awards based on diversity of U.S. geographic and organization size. Recipients may be eligible, pursuant to approval of an amendment of an active award, to host additional interns under the program. ITA reserves the right to evaluate applicants based on past performance. The Director of the SABIT Program is the final selecting official for each award.

Additional Information

Applicants must submit: (1) Evidence of adequate financial resources of Applicant organization to cover the costs involved in providing an

VOL
63
ISS
15
JA
23
1998
UMI

internship(s). As evidence of such resources, Applicant should submit financial statements audited by an outside organization or an annual report including such statements. If these are not available, a letter should be provided from the Applicant's bank or outside accountant attesting to the financial capability of the firm to undertake the scope of work involved in training an intern under the SABIT program. (2) Evidence of a satisfactory record of performance in grants, contracts and/or cooperative agreements with the Federal Government, if applicable. (Applicants who are or have been deficient in current or recent performance in their grants, contracts, and/or cooperative agreements with the Federal Government shall be presumed to be unable to meet this requirement). (3) A statement that the Applicant will provide medical insurance coverage for interns during their internships. Recipients will be required to submit proof of the interns' medical insurance coverage to the Federal Program Officer, before the interns' arrivals. The insurance coverage must include an accident and comprehensive medical insurance program as well as coverage for accidental death, emergency medical evacuation, and repatriation.

Other Requirements

All applicants are advised of the following:

1. No award of Federal funds shall be made to an Applicant who has an outstanding delinquent Federal debt until either the delinquent account is paid in full, a negotiated repayment schedule is established and at least one payment is received, or other arrangements satisfactory to the Department of Commerce (DOC) are made.

2. A false statement on the application is grounds for denial or termination of funds and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

3. Recipients and subrecipients are subject to all Federal laws and Federal and Departmental regulations, policies and procedures applicable to financial assistance awards.

4. Participating companies will be required to comply with all relevant U.S. tax and export regulations. Export controls may relate not only to licensing of products for export, but also to technical data transfer.

5. Applications under this program are not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs."

6. If applicants incur any costs prior to an award being made, they do solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal or written assurance that may have been received, there is no obligation on the part of DOC to cover pre-award costs.

7. Past performance: Unsatisfactory performance by an applicant under prior Federal awards may result in an application not being considered for funding.

8. No obligation for future funding: If an application is selected for funding, DOC has no obligation to provide any additional future funding in connection with that award. Renewal of an award to increase funding or extend the period of performance is at the total discretion of DOC.

9. Primary Applicant Certifications: All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying," and the following explanations are hereby provided:

(a) Nonprocurement Debarment and Suspension: Prospective participants (as defined at 15 CFR part 26, Section 105) are subject to 15 CFR part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form prescribed above applies.

(b) Drug Free Workplace: Grantees (as defined at 15 CFR part 26, Section 605) are subject to 15 CFR part 26, Subpart F, "Government wide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies.

(c) Anti-Lobbying: Funds provided under the SABIT program may not be used for lobbying activities. Persons (as defined at 15 CFR part 28, Section 105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000, or the single family maximum mortgage limit for affected programs, whichever is greater.

(d) Anti-Lobbying Disclosures: Any applicant that has paid or will pay for lobbying in connection with this award using any funds must submit an SF–LLL, "Disclosure of Lobbying Activities," as required under 15 CFR part 28, Appendix B.

10. Lower Tier Certifications: Recipients shall require applicants/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying" and disclosure form, SF–LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to DOC. SF–LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

11. Indirect Costs: Indirect costs are not allowed under the SABIT program.

12. Applicants are hereby notified that any equipment or products authorized to be purchased with funding provided under this program must be American-made to the maximum extent feasible.

13. The following statutes apply to this program: Chapter 11 of Part I of the Foreign Assistance Act of 1961, as amended, including section 498A (b), regarding ineligibility for assistance; provisions in annual Foreign Operations, Export Financing, and Related Programs Appropriations Act, including the following provisions contained in Public Law 103–87: Use of American Resources (Section 559 of the Foreign Operation, Export Financing, and Related Programs Appropriations Act, 1995, Pub. L. 103–87); Impact on Jobs in the United States (Section 545 of the Foreign Operation, Export Financing, and Related Programs Appropriations Act, 1995, Pub. L. 103–87); Bumpers Amendment (Section 513(b) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Pub. L. 103–87); Lautenberg Amendment (Section 513(b) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Pub. L. 103–87); and Section 660(a) of the Foreign Assistance Act of 1961, as amended.

14. *Audit Requirements:* The DOC Office of Inspector General has authority under the Inspector General Act of 1978, as amended, to conduct an audit of any DOC award at any time.

15. *Payments.* As required by the Debt Collections Improvement Act of 1996, all Federal payments to award recipients pursuant to this announcement will be made by electronic funds transfer.

16. The collection of information is approved by the Office of Management and Budget, OMB Control Number 0625–0225. Public reporting for this collection of information is estimated to be three hours per response, including the time for reviewing instructions, and completing and reviewing the collection of information. All responses to this collection of information are voluntary, and will be provided confidentially to the extent allowed under the Freedom of Information Act. Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Reports Clearance Officer, International Trade Administration, Department of Commerce, Room 4001, 14th and Constitution Ave., N.W., Washington, D.C. 20230.

Dated: January 20, 1998.

Liesel C. Duhon,

Director, SABIT Program.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 010898A]

Notice of Workshop

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: Notice is hereby given that NMFS will sponsor a workshop for the members of its Individual Fishing Quota (IFQ) Advisory Panels and of the National Research Council (NRC) Committee to Study IFQs. The workshop will be held in New Orleans, Louisiana and will be open for public observation.

DATES: The workshop will begin at 9:30 a.m. on January 24, 1998 and will end at 5 p.m. on January 25, 1998.

ADDRESSES: The workshop will be held at Le Pavillon Hotel, 833 Poydras Street, New Orleans, Louisiana; telephone: 800–535–9095.

FOR FURTHER INFORMATION CONTACT: Amy Gautam, NMFS, Office of Science and Technology; telephone: (301)713–2328.

SUPPLEMENTARY INFORMATION: In the reauthorization of the Magnuson-Stevens Act (Act), Congress required the NRC to provide a report with recommendations on a national policy for implementing IFQs by October 1, 1998. The Act also required the formation of NMFS Advisory Panels to provide support to the NRC committee and to NMFS in their respective roles of preparing and evaluating the IFQ study. The workshop is intended to initiate a dialogue between IFQ Advisory Panel and NRC committee members related to key questions the NRC has developed. Issues discussed will include initial allocation criteria, restrictions on transferability of quota shares, enforcement and monitoring requirements, and long-term implications of implementing IFQs relative to other management regimes. Members of the public are invited to observe the proceedings, but will not be allowed to participate.

Dated: January 16, 1998.

Lamar Trott

Acting Director, Office of Science and Technology, National Marine Fisheries Service.

COMMODITY FUTURES TRADING COMMISSION

Applications of the Minneapolis Grain Exchange for Designation as a Contract Market in On-Peak Mid-Continent Area Power Pool (MAPP) Electricity Futures and Options and in Off-Peak MAPP Electricity Futures and Options

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract Market Rule Change.

SUMMARY: The Minneapolis Grain Exchange (MGE or Exchange) has applied for designation as a contract market in on-peak mid-continent area power pool (MAPP) electricity futures and option contracts and off-peak MAPP electricity futures and option contracts. The Acting Director of the Division of Economic Analysis (Division) of the Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposals for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purpose of the Commodity Exchange Act.

DATES: Comments must be received on or before February 23, 1998.

ADDRESSES: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, NW Washington, DC 20581. In addition, comments may be sent by facsimile transmission to facsimile number (202) 418–5521, or by electronic mail to secretary@cftc.gov. Reference should be made to the MGE mid-continent area power pool (MAPP) electricity futures and options.

FOR FURTHER INFORMATION CONTACT: Please contact Joseph Storer of the Division of Economic Analysis, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, 20581, telephone (202) 418–5282. Facsimile number: (202) 418–5527. Electronic mail: jstorer@cftc.gov.

SUPPLEMENTARY INFORMATION: Copies of the terms and conditions will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 418–5100.

Other materials submitted by the MGE in support of the applications for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Act Compliance Staff of the Office of Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views, or arguments on the proposed terms and conditions, or with respect to other materials submitted by the MGE, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, Three Lafayette Centre, 21st Street NW, Washington, DC 20581 by the specified date.

Issued in Washington, DC, on January 15, 1998.

John R. Mielke,

Acting Director.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Notice of Opportunity To Administer the President's Student Service Awards

AGENCY: Corporation for National and Community Service.

ACTION: Notice of opportunity to administer the President's Student Service Awards.

SUMMARY: The Corporation for National Service (the Corporation) seeks an organization or collaboration of organizations that is capable of administering the President's Student Service Awards program. Public or private nonprofit organizations are eligible to apply. The non-monetary awards will recognize students and other school-aged youth who serve in their communities across the country. This recognition program will help make citizen service a common expectation among elementary, secondary, and college students throughout America.

Students and other school-aged youth who receive the President's Student Service Award may render service to their communities through a service-learning program sponsored by a school, college, or university, through a program sponsored by a community-based organization, or through their own initiative as individual community service volunteers. For students age 12 or older, a criterion will be performing service of 100 hours or more within a one-year period.

The President's Student Service Awards program does not involve Federal financial assistance to the organization or organizations selected to administer the program. The selected organization or collaboration of organizations is expected to raise or provide any up-front costs that are required, with future operation of the program conducted on a self-sustaining basis as described in this Notice.

The selected organization or organizations will furnish the necessary personnel, materials, services and facilities to administer the program, including purchase and/or production of all award materials; distribution of award materials; promotion; self-evaluation, quarterly and annual budget and demographic reports; and other administrative duties that will be determined in a Memorandum of Agreement and subsequent annual plans. The selected organization or organizations will be expected to provide input regarding program design, implementation, and promotion, and will also be expected to coordinate as necessary with other organizations or entities engaged in the promotion of service.

DATES: All proposals must be received by the Corporation at the address set out below by 3:30 p.m. (E.S.T.) February 20, 1998.

ADDRESSES: Proposals shall be submitted to the Corporation at the following address: Corporation for National Service, Attn: Dr. Marilyn Smith, 1201 New York Avenue NW, Washington, D.C. 20525.

FOR FURTHER INFORMATION CONTACT: For further information, contact the Corporation for National Service, Dr. Marilyn Smith at (202) 606–5000, ext. 209. This notice may be requested in an alternative format for the visually impaired. The Corporation's T.D.D. number is (202) 565–2799.

SUPPLEMENTARY INFORMATION:

Background

The Corporation is a Federal government corporation that encourages Americans of all ages and backgrounds to engage in service to the community. This service is to address the nation's educational, public safety, environmental and other human needs to achieve direct and demonstrable results. In doing so, the Corporation fosters civic responsibility, strengthens the ties that bind us together as a people, and provides educational opportunity for those who make a substantial commitment to service. This year, over one million students will participate in Corporation-supported Learn and Serve America service-learning programs, in which service projects are integrated into the curriculum of schools, institutions of higher education, and community youth programs.

The Corporation has authority, under the National and Community Service Act of 1990, as amended, 42 U.S.C. 12653(n), 12653b and under Executive Order 12819 (October 28, 1992), to make Presidential awards to young individuals who provide significant service to their communities. Under this authority, the Corporation implemented the President's Youth Service Awards program from 1992 through 1994. The President's Youth Service Awards, co-sponsored by the Points of Light Foundation and carried out by the American Institute for Public Service, provided non-monetary recognition awards to young people engaged in voluntary service to the community. Through this notice, the Corporation seeks an organization or collaboration of organizations to implement a successor program to the President's Youth Service Awards.

Purpose and Design of the President's Student Service Awards

The purpose of the President's Student Service Awards is to recognize outstanding service and service-learning performed by students and other school-aged youth across the country, from elementary school through higher education, and to assist in making service a common expectation of all young Americans.

Earlier this year, the conveners of the Presidents' Summit in Philadelphia, including President Clinton, former Presidents Bush, Carter, and Ford, and General Colin Powell, declared: "We have a special obligation to America's children to see that all young Americans have:

1. Caring adults in their lives, as parents, mentors, tutors, coaches;
2. Safe places with structured activities in which to learn and grow;
3. A healthy start and healthy future;
4. An effective education that equips them with marketable skills; and
5. An opportunity to give back to their communities through their own service."

The fifth goal has been specified to include, among other aims for the year 2000, two million additional young people engaging in at least 100 hours of service each year. In many instances, such service may be focused on providing the other four conditions for success to children and youth lacking them.

Appropriate recognition can be a critical factor in encouraging students and school-aged youth to render that measure of service. There are a number of existing programs that recognize outstanding service by young people, including: National Service Scholarships administered by the Corporation for National Service; the Yoshiyama Award for Exemplary Service to the Community administered by the Hitachi Foundation; the J.C. Penney Golden Rule Award; the Jefferson Awards administered by the American Institute for Public Service; the Prudential Spirit of Community Awards; and the Do Something Brick Awards.

The Corporation anticipates that the President's Student Service Awards will be based on principles and procedures for implementation in communities as agreed upon in a Memorandum of Agreement between the Corporation and the selected organization or organizations. Potential awarding organizations in each community may include: schools, state and local education agencies, colleges and universities, youth-serving organizations, faith-based organizations, state commissions on national and community service; public and nonprofit organizations, profit-making businesses, labor unions, civic or service clubs, or neighborhood associations. Awarding organizations will certify that an individual has served at least 100 hours, over a year's period, in efforts designed to have a significant impact on meeting the needs of local communities. Individuals under the age of 12 who perform outstanding service may be eligible for recognition even if they do not meet the minimum requirement of 100 hours.

The types of service recognized could include: activities connected with service-learning courses or programs or service requirements in a school district, school, class, or institution of higher education; volunteer work with community or youth organizations; service through churches, synagogues, or other faith-based organizations; involvement in service-oriented school organizations; individual efforts to help others and improve a local community; and programs in which older young people tutor, mentor, coach, or otherwise serve younger people. The broad-based nature of this program, similar to the President's Physical Fitness Award program, is intended to include the largest possible number of students who make a substantial commitment to service.

Each award winner will receive a token of recognition (for example, a pin and a certificate) from the President. The award will involve no monetary benefit to the awardee. Any nominal fee set to cover the costs of production and distribution of awards will be paid by the local awarding organization or other sources, not by the award winner. Any fees will be subject to the approval of the Corporation.

The award program may also include additional recognition for some awardees, such as attendance at recognition events sponsored by the Corporation, the selected organization or organizations, other organizations including the Points of Light Foundation and, potentially, the White House. Other levels of recognition for service that goes substantially beyond the 100-hour criterion may be developed. Local communities will also be encouraged to establish their own recognition events or processes. The Corporation will provide the names of award winners to Governors, Mayors, the media, and other individuals interested in recognizing these individuals.

Requirements of the Memorandum of Agreement

The Corporation anticipates entering into a Memorandum of Agreement with the selected organization or organizations by April 1, 1998, with an expected project period between April 1, 1998 and September 30, 1999. It is likely that the Memorandum of Agreement will include an option to renew on an annual basis for up to five years, after which the Corporation may conduct a new competition for an organization to administer the program.

The organization or organizations selected under this notice will: (1) complete a final program design and implementation plan for approval by the Corporation; (2) publicize the program to local communities, schools, colleges, universities, and other educational institutions, and to civic, non-profit, youth-serving, and other interested organizations throughout the country; (3) distribute the awards to recipients; (4) respond to inquiries from all parties related to these awards; (5) manage the program in a manner to assure it is self-financing and sustainable; (6) collaborate with other service-promoting organizations to encourage youth service throughout the country; and (6) comply with reporting and other requirements of the Memorandum of Agreement.

Finances

The primary intent of the President's Student Service Awards is to promote and improve citizen service by our Nation's youth. It is not intended to be a profit-making activity. The selected organization or collaboration of organizations assumes full financial responsibility for the program. This includes award inventory, staffing, and facilities.

The Memorandum of Agreement will specify the fees or charges that may be set in this program, including a Corporation-approved "charge for services" representing a fixed percentage of the net difference between the program's total revenue and total expenses. The amount of the "charge for services" approved by the Corporation will be determined based upon compliance with the terms of the Memorandum of Agreement and other relevant considerations. Unless otherwise approved by the Corporation, any annual revenues in excess of costs are to be used to support the next year's President's Student Service Award program.

The selected organization will account for all costs and revenues associated with the operation of the program according to the standards stated in the Memorandum of Agreement. The selected organization's performance under the Memorandum of Agreement will also be subject to oversight review and evaluation, including financial audit, by the Corporation's Chief Executive Officer, Inspector General, or their designees. The Corporation and its Inspector General will have access to any documents and records of the selected organization that are deemed necessary to carry out these oversight, evaluation, or audit activities.

Selection Criteria

All eligible interested parties must submit a proposal of no more than 30 pages, double-spaced. Selection will be based on the following criteria, in descending order of importance:

1. Experience of the organization or organizations, and demonstrated capacity, to administer a national awards program of this size and magnitude, including the ability to disseminate information widely and quickly. This includes the key individuals who will carry out the projects, and the facilities and resources, including computer-based telecommunication devices, available to the organization or organizations. This also includes the organization or organizations' capability to develop and administer an annual budget and to collect and manage funds.
2. Proposed plan for administering the President's Student Service Award program, including financial aspects such as defraying the costs of start-up, award materials, promotion, distribution, and program management.
3. Background concerning the organization or organizations' nonprofit or public status, history, mission, size in terms of budget and personnel, and familiarity with national and community service.

Dated: January 16, 1998.

Thomas L. Bryant,

Acting General Counsel, Corporation for National Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

Long-Range Air Power Panel Meeting

AGENCY: Under Secretary of Defense, Acquisition and Technology.

ACTION: Notice.

VOL
63
ISS
15
JA
23
1998
UMI

SUMMARY: This notice sets forth the schedule and summary agenda for the meeting of the Long-Range Air Power Panel on February 2 and 3, 1998. In accordance with Section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended [5 U.S.C. App. II, (1982)], it has been determined that this Long-Range Air Power Panel meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public from 0800–1800, February 2 and 3, 1998 in order for the Panel to discuss classified material.

DATES: February 2 and 3, 1998.

ADDRESSES: The Tank, 1801 N. Beauregard Street, Alexandria, VA

SUPPLEMENTARY INFORMATION: The Long-Range Air Power Panel (LRAP) was established October 8, 1997 in accordance with section 8131 of the Defense Appropriations Act, 1998. The mission of the Long-Range Air Power Panel is to provide the President and Congress a report containing its conclusions and recommendations concerning the appropriate B–2 bomber force and specifically its recommendation on whether additional funds for the B–2 should be used for continued low-rate production of the B–2 or for upgrades to improve deployability, survivability, and maintainability.

PROPOSED SCHEDULE AND AGENDA: The Panel will meet in closed session from 0800–1800 on February 2 and 3, 1998 in the Tank at the Institute for Defense Analyses Bldg. 1801 Beauregard Street, Alexandria VA. During the closed session on both days, DoD staff and contractor personnel will present the panel with briefings and status updates of current U.S. long-range air power capabilities, employment strategies and force structure plans for the future.

The determination to close the meeting is based on the consideration that it is expected that discussion will involve classified matters of national security concern throughout.

FOR FURTHER INFORMATION CONTACT:

Please contact Colonel Vic Saltsman at (703) 695–3165.

Dated: January 16, 1998.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Submarine of the Future

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Defense Science Board Task Force on Submarine of the Future will meet in closed session on February 3, 1998 at TRW, Fairfax, Virginia. In order for the Task Force to obtain time sensitive classified briefing, critical to the understanding of the issues, this meeting is scheduled on short notice.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will assess the nation's need for attack submarines in the 21st century.

In accordance with Section 10(d) of the Federal Advisory Committee Act, P.L. No. 92–463, as amended (5 U.S.C. App. II, (1994)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1994), and that accordingly this meeting will be closed to the public.

Dated: January 16, 1998.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Satellite Reconnaissance

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Defense Science Board Task Force on Open Systems will meet in closed session on February 23–24, 1998 at Strategic Analysis, Inc., 4001 N. Fairfax Drive, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will examine the benefits of, criteria for, and obstacles to the application of an open systems approach to weapon systems, and make recommendations on revisions to DoD policy, practice, or investment strategies that are required to obtain maximum benefit from adopting open systems. The Task Force will examine application to new defense programs, to those that have already made substantial investments in a design, and to those that are already fielded, across the spectrum of weapon systems, not just those heavily dependent on advanced computers and electronics.

In accordance with Section 10(d) of the Federal Advisory Committee Act, P.L. No. 92–463, as amended (5 U.S.C. App. II, (1994)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. § 552b(c)(1) (1994), and that accordingly this meeting will be closed to the public.

Dated: January 16, 1998.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

DEPARTMENT OF DEFENSE

Department of the Navy

Privacy Act of 1974; System of Records Notice

AGENCY: Department of the Navy, DoD.

ACTION: Notice to Amend a Record System.

SUMMARY: The Department of the Navy proposes to amend a system of records notice in its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The amendment will be effective on February 23, 1998, unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to the Department of the Navy, PA/FOIA Policy Branch, Chief of Naval Operations (N09B30), 2000 Navy Pentagon, Washington, DC 20350–2000.

FOR FURTHER INFORMATION CONTACT: Mrs. Doris Lama at (202) 685–6545 or DSN 325–6545.

SUPPLEMENTARY INFORMATION: The Department of the Navy's record system notices for records systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The Department of the Navy proposes to amend a system of records notice in its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. The changes to the system of records are not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of new or altered systems report. The record system being amended is set forth below, as amended, published in its entirety.

Dated: January 16, 1998.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

N05520–5

SYSTEM NAME:

Personnel Security Program Management Records System *(April 16, 1997, 62 FR 18590).*

CHANGES:

* * * * *

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

In line four, after the word 'require' add 'or may in the future require' and in line 10, delete the words 'whose duties require a USCG security clearance'.

* * * * *

N05520–5

SYSTEM NAME:

Personnel Security Program Management Records System.

SYSTEM LOCATION:

Department of the Navy Central Adjudication Facility, Washington Navy Yard, Building 176, Room 308, Washington, DC 20388–5389.

System computer facility: Defense Investigative Service (DIS), Personnel Investigations Center, 911 Eldridge Landing Road, Linthicum, MD 21090–2902.

Record documentation: Naval Criminal Investigative Service (NCIS), Washington Navy Yard, Building 111, Records Management Division, 901 M Street, SE, Washington, DC 20388–5380.

Decentralized segments: The security office of command to which the individual is assigned; Headquarters, Naval Security Group Command, 9800 Savage Road, Fort George G. Meade, MD 20755–6585; Office of Naval Intelligence, National Maritime Intelligence Center, ATTN: ONI-OCB3, 4251 Suitland Road, Washington, DC 20395–5720; and, Headquarters, Naval Criminal Investigative Service, Washington Navy Yard, Building 111, 901 M Street, SE, Washington, DC 20388–5380.

Additionally, duplicate portions of records may be held by the Chief of Naval Personnel (Pers-81), Washington, DC 20370–5000, Office of Civilian Personnel Management, 800 N. Quincy Street, Arlington, VA 22203–1998; Naval Reserve Personnel Center, New Orleans, LA 70149–7800; Headquarters, U.S. Marine Corps (Code MIF), 2 Navy Annex, Washington, DC 20380–0001; and, the security office at the local activity to which the individual is assigned. Official mailing addresses are published as an appendix to the Navy's compilation of system of record notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Department of the Navy military personnel and civilian employees and certain 'affiliated employees' whose duties require or may in the future require a DON security clearance or assignment to sensitive positions and aliens being processed for access to National Security information. Also included are DON adjudicative actions for all U.S. Coast Guard (USCG) military personnel and those USCG civilian employees having access to sensitive compartmented information only. Individuals adjudicated as a result of interservice and interagency support agreements. 'Affiliated employees' include contractors, consultants, nonappropriated fund employees, USO personnel and Red-Cross volunteers and staff.

CATEGORIES OF RECORDS IN THE SYSTEM:

Navy Joint Adjudicative and Clearance System (NJACS), the automated portion of this system, contains records that include an individual's name, Social Security Number, date and place of birth, citizenship status and the unit identification code (UIC) of the individual's assignment. Other data elements track the individual's status in the clearance adjudication process and records the final determination. Data files may also include duty-assignment designations and sensitivity levels, as well as specific access such as cryptographic information access or participation in the Personnel Reliability Program.

The documentation system includes information pertaining to the investigation, inquiry, or its adjudication by clearance authority to include: (1) Chronology of the investigation, inquiry, and/or adjudication; (2) all recommendations regarding future status of subject; (3) decisions of security/loyalty review boards and Defense Office of Hearings and Appeals (DOHA); (4) final actions/determinations made regarding subject; and (5) security clearance, access authorizations, or security determination; index tracings that contain aliases and names of subject as reflected in Defense Clearance and Investigations Index (DCII) under system notice V5-02; security termination; notification of denial, suspension, or revocation of clearance or access; classified nondisclosure agreements created from 1987 to early 1992 and managed by DON CAF; and other documentation related to the adjudication decision.

At local command security offices information includes tickler copies of requests for clearance and access; records of access, reports of disqualifying/derogatory information; records of clearance of individual personnel as well as accreditation of personnel for access to classified information requiring special access authorizations; nondisclosure agreements, associated briefings and debriefing statements; and other related records supporting the Personnel Security Program.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, Departmental Regulations; 5 U.S.C. 7311; 10 U.S.C. 5013; and E.O. 9397 (SSN); E.O. 10450, Security Requirements for Government Employees, in particular sections 2, 3, 4, 5, 6, 7, 8, 9, and 14; 12958, Classified National Security Information; 12968, Access to Classified Information; DoD Regulation 5200.2-R, Personnel Security Program Regulation; and OPNAV Instruction 5510.1H, Department of Navy Information and Personnel Security Program Regulation.

PURPOSE(S):

To provide a comprehensive system to manage information required to adjudicate and document the eligibility of DON military, civilian, and certain affiliated employees for access to classified information and assignment to sensitive positions. These records are also used to make determinations of suitability for promotion, employment, or assignments.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the White House to obtain approval of the President of the United States regarding certain military personnel officer actions as provided for in DoD Instruction 1320.4.

VOL 63 ISS 15 JA 23 1998 UMI

To the Immigration and Naturalization Service for use in alien admission and naturalization inquiries for purposes of determining access to National Security information.

The 'Blanket Routine Uses' that appear at the beginning of the Navy's compilation of systems notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on paper records in file folders, audio or audiovisual tapes, micro-imaging; CD-ROM; optical digital data disk; computers; magnetic tapes, disks, and drums; and computer output products.

RETRIEVABILITY:

By name, dossier number, Social Security Number, and date and place of birth.

SAFEGUARDS:

Buildings employ alarms, security guards, and/or rooms are security controlled areas accessible only to authorized persons. DON CAF primary system paper and microfilm records are maintained in General Service Administration approved security containers and/or are stored in security controlled areas accessible only to authorized persons. Locally generated paper security records and/or copies of investigative reports are stored in a vault, safe, or steel file cabinet having at least a lock bar and approved three-position, dial type combination padlock, or in similarly protected containers or area. Electronically and optically stored records are maintained in 'fail-safe' system software with password protected access. Records are accessible only to authorized persons with a need-to-know who are properly screened, cleared, and trained.

Files transferred to NCIS Records Management Division for storage are monitored and stored on open shelves and filing cabinets located in secure areas accessible to only authorized personnel.

RETENTION AND DISPOSAL:

Investigative/adjudicative records on non-DoD persons who are considered for affiliation with DoD are destroyed after 1 year if affiliation is not completed.

Investigative/DON CAF adjudicative records of a routine nature are retained in the active file until final adjudicative decision is made; then retired to NCIS Records Management Division and retained for 15 years after last action reflected in the file, except that files that contain significant derogatory information and/or resulted in adverse action(s) against the individual are destroyed after 25 years. Administrative papers not included in the case file are destroyed 1 year after closure or when no longer needed, whichever is later. Records determined to be of historical value, of wide spread value or Congressional interest are permanent. They will be retained for 25 years after the date of last action reflected in the file and then permanently transferred to the National Archives. Classified nondisclosure agreements if maintained separately from the individual's official personnel folder will be destroyed when 70 years old. If maintained in the individual's personnel folder, the disposition for the official personnel file applies. Locally stored case file paper or automated access records are destroyed when employee/service member is separated or departs the command, except for access determinations not recorded in official personnel folders. They are destroyed 2 years after the person departs the command. However, once affiliation is terminated, acquiring and adding material to the file is prohibited unless affiliation is renewed. The automated NJACS maintains records on persons as long as they continue to be employed by or affiliated with the DON. NJACS computer data records are purged two years after an individual terminates DON employment or affiliation. General and flag officer data records are maintained until the individual's death. Destruction of records will be by shredding, burning, or pulping for paper records; burning for microform records and magnetic erasing for computerized records. Optical digital data and CD-ROM records are destroyed as required by NAVSO P-5239-26, 'Remanence Security Guidebook' of September 1993.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Department of the Navy Central Adjudication Facility, Washington Navy Yard Building 111, 716 Sicard Street SE, Washington, DC 20388–5389.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether this system of records contains information about themselves should address written inquiries to the Director, Department of the Navy Central Adjudication Facility, Washington Navy Yard, Building 111, 716 Sicard Street SE, Washington, DC 20388–5389 or to the Commanding Officer/Director of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

Individuals requesting personal records must properly establish their identity to the satisfaction of the Director, Navy Central Adjudication Facility or the Commanding Officer/ Director of the local command, as appropriate. This can be accomplished by providing an unsworn declaration subscribed to be true that states 'I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct'. Individual should also provide their full name, aliases, date and place of birth, Social Security Number, or other information verifiable from the records in the written request.

Individuals should mark the letter and envelope containing the request 'Privacy Act Request'.

Proposed amendments to the information must be directed to the agency which conducted the investigation.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Department of the Navy Central Adjudication Facility, Washington Navy Yard, Building 111, 716 Sicard Street SE, Washington, DC 20388–5389 or the Commanding Officer/Director of the activity in question. Official mailing addresses are published as an appendix to the Navy's compilation of systems of records notices.

Individuals requesting personal records must properly establish their identity to the satisfaction of the Director, Navy Central Adjudication Facility or the Commanding Officer/ Director of the local command, as appropriate. This can be accomplished by providing an unsworn declaration subscribed to be true that states 'I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct'. Individual should also provide their full name, aliases, date and place of birth, Social Security Number, or other information verifiable from the records in the written request.

Individuals should mark the letter and envelope containing the request 'Privacy Act Request'.

Proposed amendments to the information must be directed to the agency which conducted the investigation.

Attorneys or other persons acting on behalf of an individual must provide a written authorization from that individual for their representative to act on their behalf.

CONTESTING RECORD PROCEDURES:

The Navy's rules for accessing records, and for contesting contents and appealing initial agency determinations are published in Secretary of the Navy Instruction 5211.5; 32 CFR part 701; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information in this system comes from the cognizant security manager or other official sponsoring the security clearance/ determination for the subject and from information provided by other sources, e,g., personnel security investigations, personal financial records, military service records and the subject.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

Information specifically authorized to be classified under E.O. 12958, as implemented by DoD 5200.1-R, may be exempt pursuant to 5 U.S.C. 552a(k)(1).

Investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for federal civilian employment, military service, federal contracts, or access to classified information may be exempt pursuant to 5 U.S.C. 552a(k)(5), but only to the extent that such material would reveal the identity of a confidential source.

An exemption rule for this system has been promulgated in accordance with the requirements of 5 U.S.C. 553(b)(1), (2) and (3), (c) and (e) and published in 32 CFR part 701, subpart G. For additional information, contact the system manager.

[FR Doc. 98–1579 Filed 1–23–98; 8:45 am]

BILLING CODE 5000–04–F

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Privacy Act; Systems of Records

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Annual Notice of Systems of Records.

SUMMARY: The Board is publishing a description of the six systems of records it maintains under the Privacy Act of 1974, 5 U.S.C. 552a, as amended. Minor changes and corrections have been made in the description of each system of records.

FOR FURTHER INFORMATION CONTACT: General Counsel, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901, (202) 208–6387.

SUPPLEMENTARY INFORMATION: The Board currently maintains six systems of records under the Privacy Act. Each system is described below.

DNFSB–1

SYSTEM NAME:

Personnel Security Files.

SECURITY CLASSIFICATION:

Unclassified materials.

SYSTEM LOCATION:

Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and applicants for employment with DNFSB and DNFSB contractors; consultants; other individuals requiring access to classified materials and facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Personnel security folders and requests for security clearances, Forms SF 86, 86A, 87, 312, and DOE Forms 5631.18, 5631.29, 5631.20, and 5631.21. In addition, records containing the following information:

(1) Security clearance request information;

(2) Records of security education and foreign travel;

(3) Records of any security infractions;

(4) Names of individuals visiting DNFSB; and

(5) Employee identification files (including photographs) maintained for access purposes.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Defense Authorization Act, Fiscal Year 1989 (amended the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) by adding new Chapter 21—Defense Nuclear Facilities Safety Board).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

DNFSB—to determine which individuals should have access to classified material and to be able to transfer clearances to other facilities for visitor control purposes.

DOE—to determine eligibility for security clearances.

Other Federal and State agencies—to determine eligibility for security clearances.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records, magnetic disk, and computer printouts.

RETRIEVABILITY:

By name and social security number.

SAFEGUARDS:

Access is limited to employees having a need to know. Records are stored in locked file cabinets in a controlled access area in accordance with Board directives and Federal guidelines.

RETENTION AND DISPOSAL:

Records retention and disposal authorities are contained in the "General Records Schedules" published by National Archives and Records Administration, Washington, DC. Records within DNFSB are destroyed by shredding or burning, as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901. Attention: Facilities and Security Management Specialist.

NOTIFICATION PROCEDURE:

Requests by an individual to determine if DNFSB–1 contains information about him/her should be directed to the Privacy Act Officer, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901. Required identifying information: Complete name, social security number, and date of birth.

RECORD ACCESS PROCEDURE:

Same as Notification procedure above, except individual must show official photo identification, such as driver's license, passport, or government identification before viewing records.

CONTESTING RECORD PROCEDURE:

Same as Record Access procedure.

RECORD SOURCE CATEGORIES:

Subject individuals, Questionnaire for Sensitive Positions (SF–86), agency files, official visitor logs, OPM Investigators, and DOE Personnel Security Branch.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

DNFSB–2

SYSTEM NAME:

Administrative and Travel Files.

VOL 63 ISS 15 JA 23 1998 UMI

SYSTEM CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and applicants for employment with DNFSB, including DNFSB contractors and consultants.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records containing the following information:

(1) Time and attendance;

(2) Payroll actions, financial transactions, and deduction information requests;

(3) Authorizations for overtime and night differential;

(4) Credit cards and telephone calling cards issued to individuals and information pertaining to the use of such cards;

(5) Destination, itinerary, mode and purpose of travel;

(6) Date(s) of travel and all expenses;

(7) Passport number;

(8) Requests for advance of funds and vouchers, both TDY and local, with receipts;

(9) Travel authorizations;

(10) Employee relocation records;

(11) Name, home address, home telephone number, social security number and birth date;

(12) Employee parking permits;

(13) Employee public transit subsidy applications and vouchers; and

(14) Traveler profiles.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Defense Authorization Act, Fiscal Year 1989 (Amended the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) by adding new Chapter 21—Defense Nuclear Facilities Safety Board).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Treasury Department—To collect withheld taxes, print payroll checks, and issue savings bonds:

Internal Revenue Service—To process Federal income tax.

State and Local Governments—To process state and local income tax.

Office of Personnel Management—Retirement records and benefits.

Social Security Administration—Social Security records and benefits.

Department of Labor—To process Workmen's Compensation claims.

Department of Defense—Military Retired Pay Offices—To adjust Military retirement.

Financial Institutions—To credit accounts for deposits and/or allotments made through payroll deductions.

Health Insurance Carriers—To process insurance claims.

General Accounting Office—Audit—To verify accuracy and legality of disbursement.

Veterans Administration—To evaluate veteran's benefits to which the individual may be entitled.

States' Departments of Employment Security—To determine entitlement to unemployment compensation or other state benefits.

Travel Agencies—To process travel itineraries.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OR RECORDS IN THE SYSTEM:

STORAGE:

Paper records, magnetic disk, and computer printouts.

RETRIEVABILITY:

By name and social security number.

SAFEGUARDS:

Access is limited to employees having a need to know. Records are stored in locked file cabinets in a controlled access area in accordance with Board directives and Federal guidelines.

RETENTION AND DISPOSAL:

Records retention and disposal authorities are contained in the "General Records Schedules" published by National Archives and Records Administration, Washington, DC. Records within DNFSB are destroyed by shredding or burning, as appropriate.

SYSTEM MANAGER(S) AND ADDRESS:

Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901, Attention: Director of Finance and Administration.

NOTIFICATION PROCEDURE:

Requests by an individual to determine if DNFSB–2 contains information about him/her should be directed to the Privacy Act Officer, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901. Required identifying information: Complete name, social security number, and date of birth.

RECORDS ACCESS PROCEDURE:

Same as Notification procedures above, except individual must show official photo identification, such as driver's license, passport, or government identification before viewing records.

CONTESTING RECORD PROCEDURE:

Same as Record Access procedure.

RECORD SOURCE CATEGORIES:

Subject individuals, timekeepers, official personnel records, GSA for accounting and payroll, OPM for official personnel records, IRS and State officials for withholding and tax information, and travel agency contract.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

DNFSB–3

SYSTEM NAME:

Drug Testing Program Records—DNFSB.

SYSTEM CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Primary System: Division of Human Resources, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901. Duplicate Systems: Duplicate systems may exist, in whole or in part, at contractor testing laboratories and collection/evaluation facilities.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

DNFSB employees and applicants for employment with the DNFSB.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain information regarding results of the drug testing program; requests for and results of initial, confirmatory and follow-up testing, if appropriate; additional information supplied by DNFSB employees or employment applicants in challenge to positive test results; information supplied by individuals concerning alleged drug abuse by Board employees; and written statements or medical evaluations of attending physicians and/or information regarding prescription of nonprescription drugs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(1) Executive Order 12564; September 15, 1986.

(2) Section 503 of the Supplemental Appropriations Act of 1987, Pub. L. 100–71, 101 Stat. 391, 468–471, codified at 5 U.S.C. 7301 note (1987).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Information in these records may be used by the DNFSB management:

(1) To identify substance abusers within the agency;

(2) To initiate counseling and rehabilitation program;

(3) To take personnel actions;

(4) To taken personnel security actions; and

(5) For statistical purposes.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on paper in file folders. Additionally, records used for initiating a random drug test are maintained on the Random Employee Selection Automation System. This is a stand-alone system resident on a desktop computer and is password-protected.

RETRIEVABILITY:

Records maintained in file folders are indexed and accessed by name and social security number. Records maintained for random drug testing are accessed by using a computer data base which contains employees' names, social security numbers, and job titles. Employees are then selected from the available pool by the computer, and a list is given to the Drug Program Coordinator of employees and alternates selected for drug testing.

SAFEGUARDS:

Access to and use of these records is limited to those persons whose official duties require such access, with records maintained and used with the highest regard for personal privacy. Records in the Division of Human Resources are stored in an approved security container under the immediate control of the Director, Division of Human Resources, or designee. Records in laboratory/collection/evaluation facilities will be stored under appropriate security measures so that access is limited and controlled.

RETENTION AND DISPOSAL:

(1) Test results, whether negative or positive, and other drug screening records filed in the Division of Human Resources will be retained and retrieved as indicated under the Retrievability category. When an individual terminates employment with the DNFSB, negative test results will be destroyed by shredding, or by other approved disposal methods. Positive test results will be maintained through the conclusion of any administrative or judicial proceedings, at which time they will be destroyed by shredding, or by other approved disposal methods.

(2) Test results, whether negative or positive, on file in contractor testing laboratories, ordinarily will be maintained for a minimum of two years in the laboratories. Upon instructions provided by the Division of Human Resources, the results will be transferred to the Division of Human Resources when the contract is terminated or whenever an individual, previously subjected to urinalysis by the laboratory, terminates employment with the DNFSB. Records received from the laboratories by the Division of Human Resources will be incorporated into other records in the system, or if the individual has terminated, those records reflecting negative test results will be destroyed by shredding, or by other approved disposal methods. Positive test results will be maintained through the conclusion of any administrative or judicial proceedings, at which time they will be destroyed by shredding, or by other approval disposal methods.

(3) Negative specimens will be destroyed according to laboratory/contractor procedures.

(4) Positive specimens will be maintained through the conclusion of administrative or judicial proceedings, at which time they will be destroyed according to laboratory/contractor procedures.

SYSTEM MANAGER(S) AND ADDRESS:

Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901, Attention: Director of Human Resources.

NOTIFICATION PROCEDURE:

Requests by an individual to determine if DNFSB–3 contains information about him/her should be directed to Director of Human Resources, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901. Required identifying information: Complete name, social security number, and date of birth.

RECORD ACCESS PROCEDURE:

Same as Notification procedures above, except individual must show official photo identification, such as driver's license, passport, or government identification before viewing records.

CONTESTING RECORD PROCEDURE:

Same as Notification procedure above.

RECORD SOURCE CATEGORIES:

DNFSB employees and employment applicants who have been identified for drug testing, who have been tested, or who have admitted abusing drugs prior to being tested; physicians making statements regarding medical evaluations and/or authorized prescriptions for drugs; individuals providing information concerning alleged drug abuse by Board employees; DNFSB contractors for processing, including but not limited to, specimen collection, laboratories for analysis, and medical evaluations; and DNFSB staff administering the drug testing program to ensure the achievement of a drug-free workplace.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(k)(5), the Board has exempted portions of this system of records from 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(C), (H), (I), and (f). The exemption is invoked for information in the system of records which would disclose the identity of a person who has supplied information on drug abuse by a Board employee.

DNFSB–4

SYSTEM NAME:

Personnel Files.

SYSTEM CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Defense Nuclear Facilities Safety Board, 635 Indiana Avenue, NW, Suite 700, Washington, DC 20004–2901.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and applicants for employment with the DNFSB, including DNFSB consultants.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records containing the following information:

(1) Name, social security number, sex, date of birth, home address, home telephone number, grade level, and occupational code;

(2) Official Personnel Folders (SF–66), Service Record Cards (SF–7), SF–171s, and resumes;

(3) Records on suggestions, awards, and bonuses;

(4) Training requests, authorization data, and training course evaluations;

(5) Employee appraisals, appeals, grievances, and complaints;

(6) Employee disciplinary actions;

(7) Employee retirement records;

(8) Records on employment transfer; and

(9) Applications for employment with the DNFSB.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Defense Authorization Act, Fiscal Year 1989 (amended the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) by adding new Chapter 21—Defense Nuclear Facilities Safety Board).

BILLING CODE 3670–01

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Proposed collection; comment request.

SUMMARY: The Deputy Chief Information Officer, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before March 24, 1998.

ADDRESSES: Written comments and requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, S.W., Room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department, (2) will this information be processed and used in a timely manner, (3) is the estimate of burden accurate, (4) how might the Department enhance the quality, utility, and clarity of the information to be collected, and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: January 16, 1998.

Gloria Parker,

Deputy Chief Information Officer, Office of the Chief Information Officer.

Office of Postsecondary Education

Type of Review: Revision.

Title: Income Contingent Repayment Plan Consent to Disclosure of Tax Information.

Frequency: Once every five years.

Affected Public: Individuals or households.

Annual Reporting and Recordkeeping Hour Burden:

Responses: 300,000.

Burden Hours: 75,000.

Abstract: This form is the means by which a defaulted student loan borrower (and, if married, the borrower's spouse), choosing to repay under the Income Contingent Repayment Plan, provides written consent to the disclosure of certain tax return information by the Internal Revenue Service to the Department of Education and its agents for the purpose of calculating the borrower's monthly repayment amount.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER98–421–000]

Cinergy Services, Inc.; Notice of Issuance of Order

January 16, 1998.

Cinergy Services, Inc. (Cinergy Services) is the service company for Cinergy Corporation (Cinergy). Cinergy Services, on behalf of Cinergy's special purpose trading venture, CinCap IV, LLC (CinCap), filed an application for authorization to engage in the wholesale sale of electric power at market-based rates, and for certain waivers and authorizations. In particular, CinCap requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liabilities by CinCap. On January 15, 1998, the Commission issued an Order Accepting For Filing Proposed Market-Based Rates (Order), in the above-docketed proceeding.

The Commission's January 15, 1998 Order granted the request for blanket approval under Part 34, subject to the conditions found in Ordering Paragraphs (C), (D), and (F):

(C) Within 30 days of the date of issuance of this order, any person desiring to be heard or to protest the Commission's blanket approval of issuances of securities or assumptions of liabilities by CinCap should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214.

(D) Absent a request to be heard within the period set forth in Ordering Paragraph (C) above, CinCap is hereby authorized to issue securities and assume obligations and liabilities as guarantor, indorser, surety or otherwise in respect of any security of another person; provided that such issue or assumption is for some lawful object within the corporate purposes of CinCap, compatible with the public interest, and reasonably necessary or appropriate for such purposes.

(F) The Commission reserves the right to modify this order to require a further showing that neither public nor private interests will be adversely affected by continued Commission approval of CinCap's issuances of securities or assumptions of liabilities * * * .

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is February 17, 1998.

Copies of the full text of the Order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–178–000]

K N Interstate Gas Transmission Company; Notice of Application

January 16, 1998.

Take notice that on January 9, 1998, K N Interstate Gas Transmission Company (K N Interstate), P.O. Box 281304, Lakewood, Colorado 80228–8304, filed an application pursuant to Section 7(c) of the Natural Gas Act and part 157 of the Commission's Regulations for a certificate of public convenience and necessity to operate certain natural gas pipeline facilities under Section 7(c) of the Natural Gas Act that were constructed under Section 311 of the Natural Gas Policy Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, K N Interstate seeks authority to operate 34.4 miles of pipeline in Johnson and Miami Counties, Kansas and Jackson and Cass Counties, Missouri under section 7(c) of the Natural Gas Act. These facilities had been constructed and operated solely for the purpose of providing transportation services under Section 311 of the Natural Gas Policy Act. K N Interstate states that the authority it requests will allow it to provide open access transportation pursuant to its Part 284, Subpart G blanket certificate which will maximize the use of the subject facilities.

Any person desiring to participate in the hearing process or to make any protest with reference to said application should on or before February 6, 1998, file with the Federal Energy Regulatory Commission, 888 1st Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. The Commission's rules require that protestors provide copies of their protests to the party or parties directly involved. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

A person obtaining intervenor status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by every one of the intervenors. An intervenor can file for rehearing of any Commission order and can petition for court review of any such order. However, an intervenor must submit copies of comments or any other filing it makes with the Commission to every other intervenor in the proceeding, as well as 14 copies with the Commission.

A person does not have to intervene, however, in order to have comments considered. A person, instead, may submit two copies of comments to the Secretary of the Commission. Commenters will be placed on the Commission's environmental mailing list, will receive copies of environmental documents and will be able to participate in meetings associated with the Commission's environmental review process. Commenters will not be required to serve copies of filed documents on all other parties. However, commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek rehearing or appeal the Commission's final order to a federal court.

The Commission will consider all comments and concerns equally, whether filed by commenters or those requesting intervenor status.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for K N Interstate to appear or be represented at the hearing.

David P. Boergers,

Acting Secretary.

Millennium Power Partners, L.P.; Notice of Issuance of Order

January 16, 1998.

Millennium Power Partners, L.P. (Millennium) filed an application for authorization to engage in wholesale power sales at market-based rates, and for certain waivers and authorizations. In particular, Millennium requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liabilities by Millennium. On January 15, 1998, the Commission issued an Order Accepting For Filing Proposed Market-Based Rates (Order), in the above-docketed proceeding.

The Commission's January 15, 1998 Order granted the request for blanket approval under Part 34, subject to the conditions found in Ordering Paragraphs (C), (D), and (F):

(C) Within 30 days of the date of issuance of this order, any person desiring to be heard or to protest the Commission's blanket approval of issuances of securities or assumptions of liabilities by Millennium should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214.

(D) Absent a request to be heard within the period set forth in Ordering Paragraph (C) above, Millennium is hereby authorized to issue securities and assume obligations and liabilities as guarantor, indorser, surety or otherwise in respect of any security of another person; provided that such issue or assumption is for some lawful object within the corporate purposes of Millennium, compatible with the public interest, and reasonably necessary or appropriate for such purposes.

(F) The Commission reserves the right to modify this order to require a further showing that neither public nor private interests will be adversely affected by continued Commission approval of Millennium's issuances of securities or assumptions of liabilities. * * *

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is February 17, 1998.

Copies of the full text of the Order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426.

[Docket No. CP98–179–000]

Mississippi River Transmission Corporation; Notice of Request Under Blanket Authorization

January 16, 1998.

Take notice that on January 12, 1998, Mississippi River Transmission Corporation (MRT), 1600 Smith Street, Houston, Texas 77002, filed in Docket No. CP98–179–000 a request pursuant to Sections 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.211) for authorization to construct and operate facilities in Jefferson County, Arkansas under MRT's blanket certificate issued in Docket No. CP82–489–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

MRT proposes to construct and operate a 2-inch delivery tap and rural extension meter station to serve Arkla's rural distribution system. MRT states that the total estimated volumes to be delivered to these facilities are 14,600 MMBtu annually and 40MMBtu on a peak day. The total estimated cost of the facilities is $5,503, and Arkla will reimburse MRT all of the actual construction costs.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–175–000]

Southern Natural Gas Company; Notice of Request Under Blanket Authorization

January 16, 1998.

Take notice that on January 8, 1998, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP98–175–000 a request pursuant to Sections 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for authorization to abandon certain farm tap measurement facilities in Mississippi, Louisiana and Alabama, under Southern's blanket certificate issued in Docket No. CP82–406–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Southern states that it constructed farm tap facilities to sell and deliver natural gas at the King's Gin Farm Tap on its Vicksburg Lines in Warren County, Mississippi under a May 27, 1952 agreement with King's Gin Company, Incorporated. Southern constructed farm tap facilities at the Miller Farm Tap on its Vicksburg Lines in Warren County, Mississippi under a June 14, 1963 agreement with the City of Vicksburg. Southern constructed farm tap facilities at the Priddy Farm Tap to serve Joe Priddy and Sons on its North Main Lines in Sharkey County, Mississippi under a May 14, 1962 agreement and assigned to Travelers Insurance Companies on August 29, 1985. Southern constructed farm tap facilities at the Black Belt-Dairymen Farm Tap on its South Main Line in Hale County, Alabama under a December 1, 1952 agreement with Black Belt Dairies, Incorporated. Southern constructed farm tap facilities at the Leon Farm Tap to serve Ruth Robinson Leon at its Toca Compressor Station in St. Bernard Parish, Louisiana under a sales agreement dated June 20, 1952. Southern constructed farm tap facilities at the Gaddis Farm Tap on its South Meridian Line in Lauderdale County, Mississippi under a February 23, 1968 agreement with Mississippi Valley Gas Company. Southern constructed farm tap facilities at the Witman Farm Tap to serve M.J. Witman on its South Main Lines in Bibb County, Alabama under a February 6, 1951 agreement and assigned to Asa M. Marshall on November 22, 1982. Southern constructed farm tap facilities at the J.D. Behrens Farm Tap on its Montgomery-Columbus Line in Elmore County, Alabama under a March 24, 1951 agreement with John Skinner and assigned to John D. Behrens, Jr. on November 6, 1977.

Southern has not provided natural gas service at any of these locations for over five years. Accordingly, Southern requests authorization to abandon the King's Gin, Miller, Priddy, Black Belt-Dairymen, Leon, Gaddis, Witman, and J.D. Behrens Farm Taps. Abandonment of these farm tap facilities will decrease maintenance costs for Southern.

Southern states that the abandonment of facilities will not result in any termination of currently provided service. Southern states that its existing tariff does not prohibit this activity and that there is sufficient capacity to accommodate the proposed changes without detriment or disadvantage to its other customers.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

David P. Boergers,

Acting Secretary.

Comment date: February 14, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. Metropolitan Edison Company

[Docket No. DR98–28–000]

Take notice that on December 29, 1997, Metropolitan Edison Company filed a request for approval of changes in depreciation rates for accounting purposes pursuant to Section 302 of the Federal Power Act. These changes will be implemented by the Company on January 1, 1998.

Comment date: February 14, 1998, in accordance with Standard Paragraph E at the end of this notice.

3. Central Power and Light Company

[Docket No. DR98–32–000]

Take notice that on December 30, 1997, Central Power and Light Company filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. Central Power and Light Company states that the proposed depreciation rates were approved for retail purposes by the Public Utility Commission of Texas as of May 1996. Central Power and Light Company requests that the Commission allow the proposed depreciation rates to become effective retroactively to May 1996.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

4. Public Service Company of Oklahoma

[Docket No. DR98–33–000]

Take notice that on December 30, 1997, the Public Service Company of Oklahoma filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. The Public Service Company of Oklahoma states that the proposed new depreciation rates were approved for retail purposes by the Oklahoma Corporation Commission on October 15, 1997. The Public Service Company of Oklahoma requests that the Commission allow the proposed depreciation rates to become effective June 1997.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Western Resources, Inc.

[Docket No. DR98–34–000]

Take notice that on December 30, 1997, Western Resources, Inc., an affiliate of Kansas Gas & Electric Company filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. Western Resources, Inc., requests that the Commission allow the proposed depreciation rates to become effective February 1997.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Canal Electric Company

[Docket No. DR98–35–000]

Take notice that on December 30, 1997, the Canal Electric Company filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. The Canal Electric Company requests that the Commission allow the proposed depreciation rates to become effective January 1, 1995.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Connecticut Light and Power Company

[Docket No. DR98–36–000]

Take notice that on December 30, 1997, Connecticut Light and Power Company, filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. Connecticut Light and Power Company states that the proposed depreciation rates were approved for retail purposes by the Connecticut Department of Public Utility Control on July 1, 1996. Connecticut Light and Power Company requests that the Commission allow the proposed depreciation rates to become effective July 1, 1996.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Oklahoma Gas and Electric Company

[Docket No. DR98–37–000]

Take notice that on December 30, 1997, Oklahoma Gas and Electric Company, filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. Oklahoma Gas and Electric Company requests that the Commission allow the proposed depreciation rates to become effective on January 1, 1997.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Central Illinois Public Service Company

[Docket No. EL98–1–001]

Take notice that on November 3, 1997, Central Illinois Public Service Company tendered for filing its compliance filing in the above-referenced docket.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Boston Edison Company

[Docket No. ER98–522–001]

Take notice that on December 30, 1997, Boston Edison Company tendered for filing its compliance filing in the above-referenced docket.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Arizona Public Service Company

[Docket No. ER98–1128–000]

Take notice that on December 18, 1997, Arizona Public Service Company (APS), tendered for filing an Amendment No. 1 (Amendment) to Service Schedule A (Schedule) of the Power Service Agreement between APS and Citizens Utilities Company (Citizens).

Copies of this filing have been served upon Citizens and the Arizona Corporation Commission.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Orange and Rockland Utilities, Inc.

[Docket No. ER98–1129–000]

Take notice that on December 18, 1997, Orange and Rockland Utilities,

VOL 63 ISS 15 JA 23 1998 UMI

Inc. (Orange and Rockland), filed a Service Agreement between Orange and Rockland and US Gen Power Services, L.P. (Customer). This Service Agreement specifies that the Customer has agreed to the rates, terms and conditions of Orange and Rockland Open Access Transmission Tariff filed on July 9, 1996 in Docket No. OA96–210–000.

Orange and Rockland requests waiver of the Commission's sixty-day notice requirements and an effective date of December 2, 1997, for the Service Agreement. Orange and Rockland has served copies of the filing on The New York State Public Service Commission and on the Customer.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. PacifiCorp

[Docket No. ER98–1130–000]

Take notice that on December 18, 1997, PacifiCorp, tendered for filing in accordance with 18 CFR Part 35 of the Commission's Rules and Regulations, a Notice of Termination of Service Agreements for transmission service under PacifiCorp's FERC Electric Tariff, First Revised Volume No. 11.

Copies of this filing were supplied to Delhi Energy Services, Inc., the Washington Utilities and Transportation Commission and the Public Utility Commission of Oregon.

A copy of this filing may be obtained from PacifiCorp's Regulatory Administration Department's Bulletin Board System through a personal computer by calling (503) 464–6122 (9600 baud, 8 bits, no parity, 1 stop bit).

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Southwestern Public Service

[Docket No. ER98–1131–000 Company]

Take notice that on December 18, 1997, Southwestern Public Service Company, tendered for filing an amendment to Exhibit D of the Agreement for Wholesale Full Requirements Electric Power Service for Farmers' Electric Cooperative, Inc. (FEC), Central Valley Electric Cooperative, Inc. (CVEC), Roosevelt County Electric Cooperative, Inc. (RCEC), and Lea County Electric Cooperative, Inc., (LCEC).

Comment date: Janaury 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Duquesne Light Company

[Docket No. ER98–1132–000]

Take notice that December 18, 1997, Duquesne Light Company (DLC), filed a Service Agreement dated December 8, 1997, with DTE Energy Trading under DLC's Open Access Transmission Tariff (Tariff). The Service Agreement adds DTE Energy Trading as a customer under the Tariff. DLC requests an effective date of December 8, 1997, for the Service Agreement.

Comment date: Janaury 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. The Dayton Power and Light Company

[Docket No. ER98–1133–000]

Take notice that on December 18, 1997, The Dayton Power and Light Company (Dayton), submitted service agreements establishing DTE Energy Trading, Inc., ProLiance Energy L.L.C., as a customer under the terms of Dayton's Market-Based Sales Tariff.

Dayton requests an effective date of one day subsequent to this filing for the service agreements. Accordingly, Dayton requests waiver of the Commission's notice requirements. Copies of the filing were served upon DTE Energy Trading, Inc., ProLiance Energy L.L.C., and the Public Utilities Commission of Ohio.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. Louisville Gas and Electric Company

[Docket No. ER98–1134–000]

Take notice that on December 18, 1997, Louisville Gas and Electric Company, tendered for filing copies of a service agreement between Louisville Gas and Electric Company and CMS Marketing, Services & Trading under Rate GSS.

Comment date: Janaury 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. Idaho Power Company

[Docket No. ER98–1135–000]

Take notice that on December 18, 1997, Idaho Power Company (IPC), tendered for filing with the Federal Energy Regulatory Commission Service Agreements under Idaho Power Company FERC Electric Tariff No. 5, Open Access Transmission Tariff, between Idaho Power Company and SCANA Energy Marketing.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. Public Service Electric and Gas Company

[Docket No. ER98–1136–000]

Take notice that on December 18, 1997, Public Service Electric and Gas Company (PSE&G), of Newark, New Jersey, tendered for filing an agreement for the sale of capacity and energy to Constellation Power Source, Inc. (Constellation), pursuant to the PSE&G Wholesale Power Market Based Sales Tariff, presently on file with the Commission.

PSE&G further requests waiver of the Commission's Regulations such that the agreement can be made effective as of November 19, 1997.

Copies of the filing have been served upon Constellation and the New Jersey Board of Public Utilities.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Public Service Electric and Gas Company

[Docket No. ER98–1137–000]

Take notice that on December 18, 1997, Public Service Electric and Gas Company (PSE&G), of Newark, New Jersey, tendered for filing an agreement for the sale of capacity and energy to Southern Energy Trading and Marketing, Inc. (SETM), pursuant to the PSE&G Wholesale Power Market Based Sales Tariff, presently on file with the Commission.

PSE&G further requests waiver of the Commission's Regulations such that the agreement can be made effective as of November 19, 1997.

Copies of the filing have been served upon SETM and the New Jersey Board of Public Utilities.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Deseret Generation & Transmission Co-Operative

[Docket No. ER98–1138–000]

Take notice that on December 17, 1997, Deseret Generation and Transmission Co-operative (Deseret), tendered for filing Revised Sheet Nos. 65–66, 150, 157, and 167 of its FERC Electric Tariff, Original Volume No. 2, which reflect Deseret's change of address. Deseret asks the Commission to set an effective date for the filing of December 22, 1997. Copies of the filing were served upon Deseret's FERC Electric Tariff, Original Volume No. 2 customers.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

22. Deseret Generation & Transmission Co-Operative

[Docket No. ER98–1139–000]

Take notice that on December 17, 1997, Deseret Generation & Transmission Co-operative, tendered for filing an executed umbrella non-firm point-to-point service agreement with Williams Energy Services Company under its open access transmission tariff. Deseret requests a waiver of the Commission's notice requirements for an effective date of December 17, 1997. Deseret's open access transmission tariff is currently on file with the Commission in Docket No. OA97–487–000. Williams Energy Services Company has been provided a copy of this filing.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

23. New England Power Pool

[Docket No. ER98–1140–000]

Take notice that on December 18, 1997, the New England Power Pool (NEPOOL or Pool), Executive Committee filed a request for termination of membership in NEPOOL, with an effective date of January 1, 1998, of Wheeled Electric Power Company (Wheeled Electric). Such termination is pursuant to the terms of the NEPOOL Agreement dated September 1, 1971, as amended, and previously signed by Wheeled Electric. The New England Power Pool Agreement, as amended (the NEPOOL Agreement), has been designated NEPOOL FPC No. 2.

The Executive Committee states that termination of Wheeled Electric with an effective date of January 1, 1998, would relieve Wheeled Electric, at its request, of the obligations and responsibilities of Pool membership and would not change the NEPOOL Agreement in any manner, other than to remove Wheeled Electric from membership in the Pool. Wheeled Electric owns no generation or transmission facilities in the New England Control Area.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

24. Washington Water Power

[Docket No. ER98–1141–000]

Take notice that on December 19, 1997, Washington Water Power, tendered for filing with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13, an executed Service Agreement under WWP's FERC Electric Tariff First Revised Volume No. 9, with Engage Energy US, L.P. (Superseding an Unexecuted Service Agreement previously assigned as Service Agreement No. 65 under FERC Docket No. ER97–1252–000 for Coastal Electric Services Company, now doing business as Engage Energy US, L.P.). WWP requests waiver of the prior notice requirement and requests an effective date of December 1, 1997.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

25. Consolidated Edison Company of New York, Inc.

[Docket No. ER98–1203–000]

Take notice that on December 24, 1997, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a Supplement to its Rate Schedule, Con Edison Rate Schedule FERC No. 2, a facilities agreement with Central Hudson Gas and Electric Corporation (CH). The Supplement provides for a decrease in the monthly carrying charges. Con Edison has requested that this decrease take effect as of October 1, 1997.

Con Edison states that a copy of this filing has been served by mail upon CH.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

26. Consolidated Edison Company Of New York, Inc.

[Docket No. ER98–1212–000]

Take Notice that on December 24, 1997, Consolidated Edison Company of New York, Inc. (Con Edison), tendered for filing a Supplement to its Rate Schedule FERC 117, an agreement to provide transmission and interconnection service to Long Island Lighting Company (LILCO). The Supplement provides for an increase in the annual fixed rate carrying charges. Con Edison has requested that this increase take effect as of November 1, 1997.

Con Edison states that a copy of this filing has been served by mail upon LILCO.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

27. New York State Electric & Gas Corporation

[Docket No. ER98–1267–000]

Take notice that on December 31, 1997, New York State Electric & Gas Corporation (NYSEG), tendered for filing a Clarification with the transmission services provided under Niagara Mohawk Power Corporations FERC Rate Schedule No. 165 and New York State Electric & Gas Corporation's FERC Rate Schedule No. 115.

NYSEG requests waiver of the Commission's sixty-day notice requirements and an effective date of November 27, 1997, for the Clarification. NYSEG has served copies of the filing on The New York State Public Service Commission and on the Customers.

Comment date: January 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

28. Public Service Company of New Mexico

[Docket No. ER98–1285–000]

Take notice that, on December 18, 1997, Public Service Company of New Mexico (PNM), submitted tariff sheets under its open access transmission service tariff (tariff), incorporating provisions for rights of first refusal for tariff and pre-tariff transmission service and bundled service customers. Copies of PNM's filing have been posted and are available for inspection in PNM's office in Albuquerque, New Mexico. This filing is also available in the Open Access Tariff Filings directory of the FERC Electric Power Data Bulletin Board.

Comment date: Janaury 29, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–100–000]

Algonquin Gas Transmission Company; Notice of Intent To Prepare an Environmental Assessment for the Proposed ANP Bellingham Lateral Project and Request for Comments on Environmental Issues

January 16, 1998.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the construction and operation of the facilities, about 1.1 miles of 14-inch-diameter pipeline, a new meter station and appurtenant facilities, proposed in the ANP Bellingham Lateral Project.[1] This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

Summary of the Proposed Project

Algonquin Gas Transmission Company (Algonquin) proposes to expand the capacity of its facilities in Massachusetts to transport an additional 110,000 dekatherms per day of natural gas to the planned American National Power Bellingham Power Company (ANP) plant. Algonquin seeks authority to construct and operate:

- 1.1 miles of 14-inch-diameter pipeline in the town of Bellingham, Massachusetts;
- A new meter station at the planned ANP power plant in Bellingham; and
- A tap and valving in Bellingham.

ANP would construct a 580 megawatt power plant in the town of Bellingham. ANP would construct about 200 feet of nonjurisdictional pipeline to connect the meter station with the power plant and appurtenant facilities.

The location of the project facilities is shown in appendix 1.[2] If you are interested in obtaining procedural information, please write to the Secretary of the Commission.

Land Requirements for Construction

Construction of the proposed facilities would require about 9.43 acres of land. Following construction, about 4.12 acres would be maintained as permanent pipeline right-of-way. The remaining 5.31 acres of land would be restored and allowed to revert to its former use.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us to discover and address concerns the public may have about proposals. We call this "scoping." The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this Notice of Intent, the Commission requests public comments on the scope of the issues it will address in the EA. All comments received are considered during the preparation of the EA. State and local government representatives are encouraged to notify their constituents of this proposed action and encourage them to comment on their areas of concern.

The EA will discuss impacts that could occur as a result of the construction and operation of the proposed project under these general headings:

- Geology and soils;
- Water resources, fisheries, and wetlands;
- Vegetation and wildlife;
- Land use;
- Cultural resources;
- Air quality and noise;
- Endangered and threatened species;
- Public safety; and
- Hazardous waste.

We will also evaluate possible alternatives to the proposed project or portions of the project, and make recommendations on how to lessen or avoid impacts on the various resource areas.

Our independent analysis of the issues will be in the EA. Depending on the comments received during the scoping process, the EA may be published and mailed to Federal, state, and local agencies, public interest groups, interested individuals, affected landowners, newspapers, libraries, and the Commission's official service list for this proceeding. A comment period will be allotted for review if the EA is published. We will consider all comments on the EA before we make our recommendations to the Commission.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the proposed facilities and the environmental information provided by Algonquin. This preliminary list of issues may be changed based on your comments and our analysis.

- Potential effect on the Charles River during crossing by directional drilling.
- Potential effect on two water supply wells close to the proposed lateral.
- Potential effect on two archeological sites.

Also, we have made a preliminary decision to not address the impacts of the nonjurisdictional facilities. We will briefly describe their location and status in the EA.

Public Participation

You can make a difference by sending a letter addressing your specific comments or concerns about the project. You should focus on the potential environmental effects of the proposal, alternatives to the proposal (including alternative routes), and measures to avoid or lessen environmental impact. The more specific your comments, the more useful they will be. Please follow the instructions below to ensure that your comments are received and properly recorded:

- Send *two* copies of your letter to: Secretary, Federal Energy Regulatory Commission, 888 First St., N.E., Room 1A, Washington, DC 20426;
- Label *one* copy of the comments for the attention of the Environmental Review and Compliance Branch, PR–11.2;
- Reference Docket No. CP98–100–000; and
- Mail your comments so that they will be received in Washington, DC on or before February 17, 1998.

If you are interested in obtaining procedural information please write to the Secretary of the Commission.

Becoming an Intervenor

In addition to involvement in the EA scoping process, you may want to become an official party to the proceeding or become an "intervenor." Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 2).

The date for filing timely motions to intervene in this proceeding has passed. Therefore, parties now seeking to file late interventions must show good cause, as required by section 385.214(b)(3), why this time limitation should be waived. Environmental issues have been viewed as good cause for late intervention.

You do not need intervenor status to have your comments considered.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

[1] Algonquin Gas Transmission Company's application was filed with the Commission under Section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.

[2] The appendices referenced in this notice are not being printed in the **Federal Register**. Copies are available from the Commission's Public Reference and Files Maintenance Branch, 888 First Street, N.E., Washington, D.C. 20426, or call (202) 208–1371. Copies of the appendices were sent to all those receiving this notice in the mail.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5952–2]

Agency Information Collection Activities Up for Renewal; Identification, Listing and Rulemaking Petitions Information Collection Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Identification, Listing and Rulemaking Petitions ICR Number 1189.05. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before March 24, 1998.

ADDRESSES: Commenters must send an original and two copies of their comments referencing docket number F–98–ILIP–FFFFF to: RCRA Docket Information Center, Office of Solid Waste (5305G), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, SW, Washington, DC 20460. Hand deliveries of comments should be made to the Arlington, VA, address below. Comments may also be submitted electronically through the Internet to: rcradocket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F–98–ILIP–FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

Commenters should not submit electronically any confidential business information (CBI). An original and two copies of CBI must be submitted under separate cover to: RCRA CBI Document Control Officer, Office of Solid Waste (5305W), U.S. EPA, 401 M Street, SW, Washington, DC 20460.

Public comments and supporting materials are available for viewing in the RCRA Information Center (RIC), located at Crystal Gateway I, First Floor, 1235 Jefferson Davis Highway, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m., Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling (703) 603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $0.15/page. The index and some supporting materials are available electronically.

The ICR is available on the Internet. Follow these instructions to access the information electronically:

WWW: http://www.epa.gov/epaoswer/osw/hazwaste.htm#id
FTP: ftp.epa.gov
Login: anonymous
Password: your Internet address
Files are located in /pub/epaoswer

The official record for this action will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into paper form and place them in the official record, which will also include all comments submitted directly in writing.

EPA responses to comments, whether the comments are written or electronic, will be in a notice in the "Federal Register." EPA will not immediately reply to commenters electronically other than to seek clarification of electronic comments that may be garbled in transmission or during conversion to paper form, as discussed above.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at (800) 424–9346 or TDD (800) 553–7672 (hearing impaired). In the Washington, DC, metropolitan area, call (703) 412–9810 or TDD (703) 412–3323.

For more detailed information on specific aspects of this rulemaking, contact Jim Kent, Office of Solid Waste 5304W, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, 703–308–0461, Kent.Jim@EPAMail.EPA.Gov.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are rulemaking petitioners under 40 CFR 260.20(b), 260.21 and 260.22; owners or operators of enclosed flame combustion devices requesting a variance under 40 CFR 260.30–33; generating facilities seeking a hazardous waste exclusion for certain types of wastes under 40 CFR 261.3 and 261.4; and generators and treatment, storage and disposal facilities requesting exemptions from listing as F037 and F038 wastes under 40 CFR 261.31(b)(2)(ii).

Title: Identification, Listing, and Rulemaking Petitions ICR Number 1189.05, expires June 30, 1998.

Abstract: Under 40 CFR 260.20(b), all rulemaking petitioners must submit basic information with their demonstrations, including name, address, and statement of interest in the proposed action. Under section 260.21, all petitioners for equivalent testing or analytical methods must include specific information in their petitions and demonstrate to the satisfaction of the Administrator that the proposed method is equal to or superior to the corresponding method in terms of its sensitivity, accuracy, and reproducibility. Under section 260.22, petitions to amend part 261 to exclude a waste produced at a particular facility (more simply, to delist a waste) must meet extensive informational requirements. When a petition is submitted, the Agency reviews materials, deliberates, publishes its tentative decision in the **Federal Register**, and requests public comment. EPA also may hold informal public hearings (if requested by an interested person or at the discretion of the Administrator) to hear oral comments on its tentative decision. After evaluating all comments, EPA publishes its final decision in the **Federal Register**.

40 CFR 260.30, 260.31, and 260.33 comprise the standards, criteria, and procedures for variances from

VOL 63 ISS 15 JA 23 1998 UMI

classification as a solid waste for three types of materials, materials that are collected speculatively without sufficient amounts being recycled; materials that are reclaimed and then reused within the original primary production process in which they were generated; and materials which have been reclaimed, but must be reclaimed further before the materials are completely recovered. This variance is available to owners or operators of enclosed flame combustion devices.

40 CFR 261.33 and 261.4 contain provisions that allow generators to obtain a hazardous waste exclusion for certain types of wastes. Facilities applying for these exclusions must either submit supporting information or keep detailed records. Under section 261.3(a)(2)(iv), generators may obtain a hazardous waste exclusion for wastewater mixtures subject to Clean Water Act regulation. Under section 261.3(c)(2)(ii)(C), generators may obtain an exclusion for certain non-wastewater residues resulting from high metals recovery processing (HTMR) or K061, K062 and F006 waste. In addition, under section 261.4(b)(6), generators of chromium-containing waste may obtain a hazardous waste exclusion under certain conditions.

Also addressed under this section is the shipment of samples between generators and laboratories for the purpose of testing to determine its characteristics or composition. Sample handlers who are not subject to DOT or USPS shipping requirements must comply with the information requirements of section 261.4(d)(2).

When intended for treatability studies, hazardous waste otherwise subject to regulation under Subtitle C of RCRA is exempted from these regulations, provided that the requirements in section 261.4(e)-(f) are met, including the following information requests: initial notification, recordkeeping, reporting, and final notification. In addition, generators and collectors of treatability study samples also may request quantity limit increases and time extensions, as specified in section 261.4(e)(3).

40 CFR 261.31(b)(2)(ii) governs procedures and informational requirements for generators and treatment, storage and disposal facilities to obtain exemptions from listing as F037 and F038 wastes. Also under this section are regulations promulgated in 1990 under section 261.35(b) and (c) governing procedures and information requirements for the cleaning or replacement of all process equipment that may have come into contact with chlorophenolic formulations or constituents thereof, including, but not limited to, treatment cylinders, sumps, tanks, piping systems, drip pads, fork lifts, and trams.

EPA anticipates that some data provided by respondents will be claimed as Confidential Business Information (CBI). Respondents may make a business confidentiality claim by marking the appropriate data as CBI. Respondents may not withhold information from the Agency because they believe it is confidential. Information so designated will be disclosed by EPA only to the extent set forth in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9, and in 48 CFR Chapter 15.

EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; *e.g.*, permitting electronic submission of responses.

Burden Statement: Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The average annual burden imposed is approximately 57 hours per respondent. The average number of responses for each respondent is 1. The estimated number of likely respondents is 330.

Dated: January 14, 1998

David Bussard,

Director, Hazardous Waste Identification Division.

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–5488–3]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared January 5, 1998 through January 9, 1998 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 11, 1997 (62 FR 16154).

Draft EISs

ERP No. D–FHW–B59000–RI Rating EC2, Newport Marine Facilities Project, To Develop the Marine Mode of the Intermodal Gateway Transportation Center, Selected siting in various locations within the City of Newport, Towns of Middletown and Portsmouth, Funding, COE Section 404 Permit and US Coast Guard Permit, Aquidreck Island, RI.

Summary: EPA requested that additional information be provided with respect to water quality, contaminated sediments and eelgrass to fully disclose the environmental impacts of the proposed project.

ERP No. D–NOA–B39035–MA Rating LO, New Bedford Harbor Environment Restoration Plan, Implementation, Acushnet River, Buzzards Bay, MA.

Summary: EPA endorsed the 12 alternatives selected for near term implementation toward restoration of the New Bedford Harbor. EPA also explained that it does not support activities that would increase or alter the spacial extent of PCB contamination as a result of resuspension and that the agency will continue to work to ensure that none of the restoration work will interfere with or delay the ongoing Superfund work in the harbor.

Final EISs

ERP No. F–AFS–L65286–OR, Summit Fire Recovery Forest Restoration Project, Implementation, Malheur National Forest, Long Creek Ranger District, Grant County, OR.

Summary: Review of the final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–FAA–B51025–NH, Manchester (New Hampshire) Airport Master Plan Update, Improvements to Airside and Landside Facilities, Airport Layout Plan, Permits and Approvals, Manchester, NH.

Summary: EPA continues to have concerns regarding wetlands, air quality, and alternative modes of transportation.

ERP No. F–FHW–C40136–NY, Stutson Street BIN–3317120 Over Genesee River (PIN 4751.05.121), from the Interchange of the Lake Ontario State Parkway and Latta Road to Lake Shore Boulevard, COE Section 10 and 404 Permit, and Coast Guard Bridge Permits, in the City of Rochester, Town of Greece and Irondequoit, Monroe County, NY.

Summary: EPA had no objection to the action as proposed.

ERP No. FS–FHW–B40029–VT, Burlington Southern Connector, I–189 to Battery Street, Additional Information, Funding, Burlington, Chittenden County, VA.

Summary: EPA continues to express concerns regarding wetland, water and air quality and superfund issues. EPA requested that these issues be clarified in the Record of Decision.

Dated: January 20, 1998.

B. Katherine Biggs,

Director, NEPA Compliance Division, Office of Federal Activities.

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–00230; FRL–5766–1]

Notice of Availability of FY 1998 Multimedia Environmental Justice Through Pollution Prevention Grant Funds

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA is soliciting grant proposals under the Environmental Justice Through Pollution Prevention (EJP2) grant program. EPA anticipates that as much as $4 million will be available in Fiscal Year (FY) 1998. The purpose of this program is to support pollution prevention approaches that address environmental justice concerns in affected communities. The grant funds will support: (1) Local environmental, environmental justice, and community grassroots organizations, including religious and civic organizations, as well as tribal governments that promote environmental justice using pollution prevention as the preferred approach; (2) national and regional organizations working in partnership with local organizations, or tribal governments to promote environmental justice using pollution prevention approaches; (3) state and local governments; and (4) academic institutions.

DATES: All applications must be received by EPA's contractor, Eastern Research Group (ERG), located in Arlington, VA, by April 20, 1998. No applications will be accepted after this date.

FOR FURTHER INFORMATION CONTACT: To obtain copies of the EJP2 grant program guidance and application package, or to obtain more information regarding the EJP2 grant program, please contact Louise Little at (703) 841–0483. A complete electronic copy of the EJP2 grant program guidance and application package is also available on the EPA Home Page on the Internet. The Internet address is: http:/www.epa.gov/opptintr/ejp2.

SUPPLEMENTARY INFORMATION:

I. Scope and Purpose of the EJP2 Grant Program

The purpose of the FY 1998 EJP2 grant program is to support the use of pollution prevention approaches to address the environmental problems of minority communities and/or low-income communities and Federally recognized tribes. This grant program is designed to fund projects that have a

VOL 63 ISS 15 JA 23 1998 UMI

direct impact on affected communities. Funds awarded must be used to support pollution prevention programs in minority and/or low-income communities. The Agency strongly encourages cooperative efforts between communities, businesses, industry, and government to address common pollution prevention goals. Projects funded under this grant may involve public education, training, demonstration projects, collaborative public-private partnerships, or innovative approaches to develop, evaluate, and demonstrate non-regulatory strategies and technologies. Grants will be awarded to national organizations for projects to assess the results of previous and ongoing EJP2 grants and related information and to develop tools for bringing pollution prevention approaches to bear on the problems of environmental justice communities.

II. Definition of Environmental Justice and Pollution Prevention

Environmental justice is defined by EPA as the fair treatment of people of all races, cultures, and incomes with respect to the development, implementation, and enforcement of environmental laws, regulations, programs, and policies. Fair treatment means that no racial, ethnic, or socio-economic group should bear a disproportionate share of the negative environmental consequences resulting from the operation of industrial, municipal, and commercial enterprises, and from the execution of Federal, state, local, and tribal programs and policies.

The Pollution Prevention Act of 1990 establishes a hierarchy of environmental preferences. These practices include, in order of preference:

- Pollution prevention/source reduction
- Recycling
- Treatment
- Disposal

Pollution prevention means source reduction; it includes any practice that reduces or eliminates any pollutant at the source of generation prior to recycling, treatment, or disposal. Pollution prevention also includes practices that reduce or eliminate the creation of pollutants through:

- Increased efficiency in the use of raw materials, energy, water, or other resources
- Protection of natural resources by conservation

This grant program is focused on implementing practices at the top of the hierarchy—pollution prevention/source reduction—to bring about better environmental protection.

III. Eligibility

Any affected, nonprofit community organizations with section 501(c)(3) or section 501(c)(4)[1] Internal Revenue Service tax status or Federally recognized tribal organizations may submit an application upon the publication of this solicitation. A nonprofit organization is defined as any corporation, trust, association, cooperative, or other organizations that:

(1) Is operated primarily for scientific, educational, service, charitable, or similar purposes in the public interest.

(2) Is not organized primarily for profit.

(3) Uses its net proceeds to maintain, improve, and/or expand its operations.

State and local governments and academic institutions are also eligible. Organizations must be incorporated by April 20, 1998, to be eligible to receive funds. Private businesses, Federal agencies, and individuals are ineligible for this grant. Organizations excluded from applying directly, as well as those inexperienced in grant writing, are encouraged to develop partnerships and prepare joint proposals with eligible national, regional, or local organizations.

No applicant can receive two grants for the same project at one time. EPA will consider only one proposal for a given project. Applicants may submit more than one application; however, applications must be for separate and distinct projects.

Organizations seeking funds from the EJP2 grant program can request up to $100,000 for local projects, and up to $250,000 for projects that involve multiple communities located in more than one of the 10 EPA Regions, or projects that are national in scope. In accordance with 40 CFR parts 23 and 30, EPA no longer requires cost sharing or matching under this grant program.

Dated: January 15, 1998.

William H. Sanders,

Director, Office of Pollution Prevention and Toxics.

[FR Doc. 98–1643 Filed 1–23–98; 8:45 am]

BILLING CODE 6560–50–F

[1] As a result of the Lobbying Disclosure Act of 1995, EPA (and other Federal agencies) may not award grants to nonprofit, section 501(c)(4) organizations that engage in lobbying activities. This restriction applies to any lobbying activities of a secton 501(c)(4) organization without distinguishing between lobbying funded by Federal money and lobbying funded by other sources.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5951–9]

Clean Air Act Advisory Committee: Accident Prevention Subcommittee Conference Call Meeting—February 3, 1998, 2–4 p.m.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The Clean Air Act section 112(r) required EPA to publish regulations to prevent accidental releases of chemicals and to reduce the severity of those releases that do occur. On June 20, 1996, EPA published the final rule for risk management programs to address prevention of accidental releases.

The Accident Prevention Subcommittee was created in September 1996 to advise EPA's Chemical Emergency Preparedness and Prevention Office (CEPPO) on these chemical accident prevention issues.

DATES: The Accident Prevention Subcommittee of the Clean Air Act Advisory Committee will hold a public meeting on February 3, 1998 from 2 p.m. to 4 p.m. Eastern Standard Time.

ADDRESSES: The meeting will be held in the Washington Information Center #12 South, in EPA Headquarters, 401 M St., NW, Washington DC 20460. Members of the public are welcome to attend in person. The Accident Prevention Subcommittee will call into the meeting by teleconference. Due to the limited teleconference lines, there will not be additional lines for the public to call in.

FOR FURTHER INFORMATION CONTACT: Members of the public desiring additional information about this meeting, should contact Karen Shanahan, Designated Federal Official, US EPA (5101), 401 M. St., SW, Washington DC 20460, via the Internet at: shanahan.karen@epamail.epa.gov., by telephone at (202) 260–2711 or FAX at (202) 260–1686.

SUPPLEMENTARY INFORMATION:

Agenda

I. Opening Remarks—Jim Makris
II. Discussion of options for making RMP data available through RMP*Info™ (Security Study)
III. Comments from the public

Members of the public who wish to make a brief oral presentation in person in Washington DC to the Subcommittee at the February 3 meeting, must contact Karen Shanahan in writing (by letter, fax, or email—see previously stated information) no later than 12 noon, January 27, 1998, in order to be included on the agenda. Written comments may be submitted to the Accident Prevention Subcommittee up through the date of the meeting. Please address such material to Karen Shanahan at the above address.

The Accident Prevention Subcommittee expects that public statements presented at its meetings will not be repetitive or previously submitted oral or written statements. In general, for teleconference call meetings, opportunities for oral comment will be limited to no more than three minutes per speaker and no more than fifteen minutes total. Written comments (twelve copies) received sufficiently prior to a meeting date (one week prior to a meeting or teleconference), may be mailed to the Subcommittee prior to its meeting.

Additional information on the Accident Prevention Subcommittee is available on the Internet at: http://www.epa.gov/swercepp/rmp-wg.html

If you would like to automatically receive future information on the Accident Prevention Subcommittee by email, please send an email to Karen Shanahan at: shanahan.karen@epamail.epa.gov requesting to be put on the email list for these groups. Please include your name, address and phone number.

Dated: January 20, 1998.

Karen Shanahan,

Designated Federal Official.

Endocrine Disruptors; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: EPA is announcing the seventh meeting the Endocrine Disruptors Screening and Testing Advisory Committee (EDSTAC), a committee established under the provisions of the Federal Advisory Committee Act (FACA) to advise EPA on a strategy for screening chemicals and pesticides for their potential to disrupt endocrine function in humans and wildlife.

DATES: The EDSTAC Plenary meeting will begin on Tuesday, February 3, 1998 at 9 a.m. and end at 4 p.m. The meeting on Wednesday, February 4, 1998, will begin at 8:30 a.m. and end at 4 p.m.

ADDRESSES: The meeting will be held at The Madison Hotel located at 11777 15th Street, NW., Washington, D.C. The telephone number is (202) 862–1600.

FOR FURTHER INFORMATION CONTACT: For technical information about the EDSTAC contact Dr. Anthony Maciorowski (telephone: (202) 260–3048; e-mail: maciorowski.tony@epamail.epa.gov) or Mr. Gary Timm (telephone (202) 260–1859; e-mail: timm.gary@epamail.epa.gov) at EPA. To obtain additional information please contact the contractor assisting EPA with meeting facilitation and logistics: Ms. Tutti Otteson, The Keystone Center, P.O. Box 8606, Keystone, CO 80435; telephone: (970) 468–5822; fax (970) 262–0152; e-mail totteson@keystone.org.

SUPPLEMENTARY INFORMATION: The tentative agenda for the February 3–4, 1998 plenary meeting includes status reports from the Screening and Testing and Priority Setting workgroups. This plenary will not include a public comment session.

Self-Certification of Product Chemistry Data; Notice of Availability of PR Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA is announcing the availability of PR Notice 98–1, entitled "Self-Certification of Product Chemistry Data." This PR Notice describes the Agency's policy on self-certification of certain product chemistry data of manufacturing-use products and end-use products produced by a non-integrated formulation system. Products eligible for self-certification are formulated from registered sources. This program is voluntary and is intended to streamline, simplify, and accelerate the registration of pesticides while protecting public health and the environment.

ADDRESSES: The PR Notice is available from, by mail: Sami Malak, Technical Review Branch, Registration Division (7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. The public record, including all public comments, as well as a summary of the Agency review of comments are filed in OPP's Docket Office under docket control number "OPP–00461," located in Room 1132 of the Public Information and Records Integrity Branch, Information Resources and Services Division (7506C). The OPP's Docket Office is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Sami Malak; at the address given above. Office location and telephone number: Room 256, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 308–9365; by FAX (703) 308–9382; by e-mail: malak.sami@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Availability:

Internet

Electronic copies of this document and the various support documents are available from the EPA Home Page at the **Federal Register**--Environmental Documents entry for this document under "Laws and Regulations" (http://www.epa.gov/fedrgstr/).

Fax on Demand

Using a faxphone call 202–401–0527 and select item 6106 for a copy of the PR Notice.

Under the self-certification program, applicants will submit a one-page summary of the product's physical/chemical properties, a self-certification statement, and a Good Laboratory Practice Standards statement (GLP), but will no longer be required to submit the supporting data for those studies. However, registrants must retain in their possession studies conducted in substantial conformity with Agency regulations and must submit such studies if requested by EPA. The requirements pertaining to the physical/chemical properties for chemical (conventional) pesticides are outlined in the table in 40 CFR 158.190, OPPTS Test Guidelines Series 830, Product Properties (EPA publication 712–C–96–310, 8/96), Series 880, Biochemical Test Guidelines, and Series 885, Microbial Pesticides Test Guidelines. It should be noted that OPPTS Test Guidelines, Series 830 supersedes the Pesticide

VOL

1998
UMI

Assessment Guidelines, Subdivision-D, Product Chemistry for chemical pesticides, and Series 880 and 885 superseded Pesticide Assessment Guidelines, Subdivision M.

The PR Notice was revised to reflect public comments received by the Agency on the draft PR Notice. 62 FR 5228, February 4, 1997 (FRL–5575–3). Generally, revisions included:

(a) Some modifications to the summary form and instructions.

(b) Conversion to the new OPPTS Test Guidelines, Series 830 guideline reference numbers.

(c) Clarification of the GLP requirements.

(d) Revisions to the self-certification statement.

Phosphoric Acid; Toxic Chemical Release Reporting; Community Right-to-Know

AGENCY: Environmental Protection Agency (EPA).

ACTION: Denial of petition.

SUMMARY: EPA is denying a petition to delete phosphoric acid from the reporting requirements under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and section 6607 of the Pollution Prevention Act of 1990 (PPA). This action is based on EPA's conclusion that phosphoric acid does not meet the deletion criteria of EPCRA section 313(d)(3). Specifically, EPA is denying this petition because EPA's review of the petition and available information resulted in the conclusion that phosphoric acid meets the listing criterion in EPCRA section 313(d)(2)(C) in that the phosphates that result from the neutralization of phosphoric acid may cause algal blooms. Algal blooms result in deoxygenation of the water and other effects that may ultimately lead to a number of serious adverse effects on ecosystems, including fish kills and changes in the composition of animal and plant life.

FOR FURTHER INFORMATION CONTACT: Daniel R. Bushman, Petitions Coordinator, 202-260-3882, e-mail: bushman.daniel@epamail.epa.gov, for specific information on this document, or for more information on EPCRA section 313, the Emergency Planning and Community Right-to-Know Hotline, Environmental Protection Agency, Mail Code 5101, 401 M St., SW., Washington, DC 20460, Toll free: 1-800-535-0202, in Virginia and Alaska: 703-412-9877 or Toll free TDD: 1-800-553-7672.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Statutory Authority

This action is taken under sections 313(d) and (e)(1) of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA), 42 U.S.C. 11023. EPCRA is also referred to as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA) (Pub. L. 99-499).

B. Background

Section 313 of EPCRA requires certain facilities that manufacture, process, or otherwise use listed toxic chemicals in amounts above reporting threshold levels, to report their environmental releases of such chemicals annually. Beginning with the 1991 reporting year, such facilities must also report pollution prevention and recycling data for such chemicals, pursuant to section 6607 of the Pollution Prevention Act (42 U.S.C. 13106). Section 313 established an initial list of toxic chemicals that was comprised of more than 300 chemicals and 20 chemical categories. Phosphoric acid (PA) was included in the initial list of chemicals and chemical categories. Section 313(d) authorizes EPA to add chemicals to or delete chemicals from the list, and sets forth criteria for these actions. Under section 313(e)(1), any person may petition EPA to add chemicals to or delete chemicals from the list. EPA has added and deleted chemicals from the original statutory list. Pursuant to EPCRA section 313(e)(1), EPA must respond to petitions within 180 days either by initiating a rulemaking or by publishing an explanation of why the petition has been denied.

EPCRA section 313(d)(2) states that a chemical may be listed if any of the listing criteria are met. Therefore, in order to add a chemical, EPA must demonstrate that at least one criterion is met, but does not need to examine whether all other criteria are also met. Conversely, in order to remove a chemical from the list, EPA must demonstrate that none of the criteria are met.

EPA issued a statement of petition policy and guidance in the **Federal Register** of February 4, 1987 (52 FR 3479), to provide guidance regarding the recommended content and format for petitions. On May 23, 1991 (56 FR 23703), EPA issued a statement of policy and guidance regarding the recommended content of petitions to delete individual members of the section 313 metal compound categories. EPA has issued a statement clarifying its interpretation of the section 313(d)(2) and (3) criteria for adding and deleting chemicals from the section 313 toxic chemical list (59 FR 61432; November 30, 1994) (FRL-4922-2).

II. Description of Petition

On November 9, 1990, The Fertilizer Institute (TFI) petitioned the Agency to delist PA from the list of toxic chemicals subject to reporting under section 313 of EPCRA (Ref. 1). The TFI petition was very similar to a petition that Ecolab, Inc. submitted on December 14, 1989, requesting EPA to delete PA from the EPCRA section 313 list of toxic chemicals (Ref. 2). During the final days of the review on this first petition, Ecolab, Inc. withdrew the petition. Nevertheless, EPA issued a notice in the **Federal Register** of June 25, 1990 (55 FR 25876), describing its technical review and evaluation of the petition. As part of the notice, the Agency stated that it would have denied the petition and noted that its concern for PA is due to PA's contribution to eutrophication, which results from phosphate loading in the environment. In that notice, the Agency also requested public comment on the creation of an EPCRA section 313 phosphates category that would include PA. Although EPA is not proposing to add a phosphates category at this time, it intends to propose such a category in a separate rulemaking at a later date. Because it believes that the comments received in response to the earlier notice and EPA's responses to those comments provide information relevant to the listing of PA under EPCRA section 313, it addresses those comments in Unit V. of this document.

The petition submitted by TFI was reviewed to identify the issues that differed from the Ecolab petition. The assertions that TFI addressed in its subsequent petition were: (1) PA does not meet the statutory criteria of section 313 of EPCRA; (2) the vast majority of PA releases are by sources not covered by the requirements of EPCRA section 313 at that time and therefore, the environmental effects attributed to phosphate loading caused by PA are not

effects for which the manufacturers subject to section 313 reporting should be held accountable; and (3) EPA in its exposure assessment used "flawed assumptions" and "inaccurate data" in the course of the review.

These issues are addressed in Units IV., V., and VI. of this document. EPA's technical assessment remains basically unchanged since the original review of the Ecolab petition; the previous review is summarized in the following unit.

III. EPA's Technical Review of Phosphoric Acid

A. Toxicity Evaluation

1. *Human health.* In the physiological pH range of 6 to 9, PA dissociates to phosphate ions which predominately exist as a combination of $H_2PO_4^-$ and HPO_4^{-2}. Phosphate is readily absorbed from the gastrointestinal tract. Phosphate levels in the blood of higher animals are regulated by the parathyroid gland and are strongly tied to calcium ion regulation in the body. No information was found in the available literature regarding the absorption of PA from the lungs or skin (Ref. 3).

EPA's hazard assessment resulted in the following conclusions:

a. *Acute effects.* PA may cause irritation and corrosive effects as do many other acids. PA is weaker than the other strong mineral acids. The Poison Index states that "[PA] causes irritation of eyes, skin, and the respiratory tract. When ingested it can produce nausea, vomiting, abdominal pain, bloody diarrhea, acidosis, shock and irritation or burns of the oropharyngeal mucosa, esophagus and stomach." As with other corrosive or caustic materials, the extent of damage is generally determined by the acidity of the solution and duration of contact. PA, however, is not expected to exist beyond facility site boundaries at a pH that will cause these effects (Ref. 3).

b. *Chronic effects.* PA has been shown to cause nephrocalcinosis in rats when administered at relatively high concentrations in the diet (Ref. 3). PA cannot be reasonably anticipated to cause heritable genetic effects in humans (Ref. 4). No information was found in the available literature with which to evaluate the potential of PA to cause carcinogenic effects. PA cannot be reasonably anticipated to cause developmental or reproductive toxicity in humans. No information was found in the available literature with which to evaluate the potential of PA to cause neurotoxic effects (Ref. 3).

2. *Environmental toxicity.* PA, which is a source of phosphates, can reasonably be anticipated to cause significant adverse effects on the environment. PA, as well as other phosphates have the potential to cause increased algal growth leading to eutrophication in the aquatic environment (Ref. 5). Eutrophication may result when nutrients, especially phosphates, enter into an aquatic ecosystem in the presence of sunlight and nitrogen. The phosphate ion is a plant nutrient and it can be a major limiting factor for plant growth in freshwater environments. In excess, PA can cause extreme algal blooms. Toxic effects result from oxygen depletion as the algae die and decay. Toxic effects have also been related to the release of decay products or direct excretion of toxic substances from sources such as blue-green algae. In addition, phosphates in aquatic environments may encourage the growth of introduced plants to the detriment of native plants and thereby change plant distribution.

Laboratory studies indicate that eutrophication may occur at phosphate concentrations as low as 50 parts per billion (ppb) in lakes. The resulting oxygen depletion and toxic decay products (e.g., hydrogen sulfide) kill many invertebrates and fish (Ref. 5).

Although green algae are more sensitive to growth stimulation by phosphates in fresh water, blue-green algal blooms are also stimulated by phosphates and may cause greater damage. At least three species of blue-green algae are known to excrete toxins. Secretions by cyanobacteria of dialyzable metabolites have inhibited the growth of other species of algae and may result in algal monoculture. When algal blooms of these toxic species occur in a reservoir, lake, slough, or pond, the cells and toxins can become sufficiently concentrated to cause illness or death in invertebrates and vertebrates. Major losses have been reported for cattle, sheep, hogs, birds (domestic and wild) and fishes, minor losses for dogs, horses, small wild animals, amphibians, and invertebrates (Ref. 5).

In addition to eutrophication effects, PA exhibits low toxicity to freshwater organisms where typical toxicity values are greater than 100 milligrams per liter (mg/L) (Ref. 5). Due to the existing pH restrictions under the Clean Water Act (CWA), releases of PA to surface waters are not anticipated to lead to problematic pH excursions. Under the CWA, parameters such as pH may be subject to both technology-based and water quality-based limitations. The technology-based limitations are either derived from nationally applicable effluent guidelines or pretreatment standards (many of which limit pH to a range of 6.0 to 9.0) or are based on: (1) The permit writer's "Best Professional Judgement" if there is no applicable guideline for a direct discharger, or (2) local pretreatment requirements. Water quality-based limitations generally would be established to ensure that applicable water quality standards are attained and maintained. Dischargers are typically subject to monitoring provisions under which permittees are to report discharges of controlled parameters.

B. Release and Exposure

EPA does not believe that consideration of release or exposure information is necessary in determining whether to keep PA on the list of EPCRA section 313 toxic chemicals. In 1994, EPA clarified its policy on the use of exposure assessments in listing decisions under EPCRA section 313(d)(2) and (3) (November 30, 1994, 59 FR 61432). As part of this clarification, EPA stated that, under the criterion of section 313(d)(2)(C), exposure considerations are not appropriate

> . . . for chemicals that are highly ecotoxic or induce well-established adverse environmental effects. For chemicals which induce well-established serious adverse effects, e.g., chlorofluorocarbons, which cause stratospheric ozone depletion, EPA believes that an exposure assessment is unnecessary. EPA believes that these chemicals typically do not affect solely one or two species but rather cause changes across a whole ecosystem. EPA believes that these effects are sufficiently serious because of the scope of their impact and the well-documented evidence supporting the adverse effects. (November 30, 1994, 59 FR 61432).

Eutrophication due to phosphate loading is a well-established serious adverse effect that induces a number of changes to ecosystems, including fish kills and changes in the composition of animal and plant life. Therefore, an exposure assessment is not necessary in order to determine that phosphates, including PA, meet the listing criterion of EPCRA section 313(d)(2)(C). During its review of Ecolab's earlier petition, however, EPA conducted an exposure assessment for PA. Thus, for informational purposes only, the Agency is setting forth the results of this exposure assessment below.

PA will dissociate in water to hydrogen and phosphate ions (Refs. 6 and 7). Further reactions by abiotic processes are not expected to reduce the amount of PA released to the environment (Ref. 7). PA can be expected to enter the phosphorus cycle and become available as a nutrient in both aquatic and terrestrial settings. In aquatic settings, algae are able to .

VOL 63 ISS 15 JA 23 1998 UMI

bioconcentrate low levels of phosphorus. The phosphorus cycle tends to lose phosphorus to soil and bottom sediments. Phosphorus binds to soil so its movement through soil is very slow. Ultimately, phosphorus moves from land to the sea and is deposited in bottom sediments (Ref. 7).

The exposure assessment conducted for EPA's original review of PA was based upon information from the 1987 TRI data base, which listed 1,173 facilities that discharged some amount of PA (Ref. 7). From this EPA identified 150 facilities from which PA is released to the environment in significant quantities. Of these, 46 facilities reported releases to surface waters and 52 facilities reported releases to the atmosphere. The exposure assessment concentrated on releases to water to address environmental toxicity concerns. It is important to note that this assessment only analyzed PA releases, the phosphates that are released as a result of neutralization of PA at a facility are not currently reported to the TRI. Although the currently reported PA releases do indicate which facilities are releasing phosphates, they do not reflect the full magnitude of the actual phosphate loading from facility releases. Therefore, the exposure assessment did not provide a complete picture of the significance of phosphate loading as a result of releases of phosphoric acid and phosphates from facilities that report under EPCRA section 313.

Aquatic exposure to PA was calculated by determining the stream flow at each facility. Surface water concentrations, under low flow conditions, from discharges during manufacture of PA ranged from 8.76 to 72,123 ppb. Surface water concentrations from discharges during processing and use ranged, under low flow conditions, from 0.62 to 337,262 ppb.

Facilities that routinely discharge PA to surface waters must comply with the CWA requirements. Under EPCRA section 313, by neutralizing their releases, facilities are technically releasing phosphates rather than PA to water and thus can report a release of zero. Even with neutralization of the PA, for the 1995 reporting year, TRI facilities still reported over 20 million pounds of releases of PA to surface waters from the more than 2,200 Form R reports filed. As stated above, these facilities are releasing additional phosphates to surface waters from the neutralization of PA, which are not currently captured under EPCRA section 313, but are the basis for concern for facilities that release PA.

C. Summary of Technical Review

PA is acutely toxic to human tissue with effects ranging from irritation to acidosis and burns. The extent of the damage is dependant on the acidity of the PA solution and duration of exposure. There, however, are no acute human health effects expected to result from exposure to PA at an acidity that can reasonably be anticipated to exist in the environment under normal release conditions. Therefore, PA cannot reasonably be anticipated to cause ". . . significant adverse acute human health effects at concentration levels that are reasonably likely to exist beyond facility site boundaries as a result of continuous, or frequently recurring, releases."

In terms of chronic health effects, the available data indicate that PA cannot reasonably be anticipated to cause cancer, heritable genetic effects, neurotoxicity, developmental or reproductive toxicity, or other chronic health effects with the exception of nephrocalcinosis when PA is administered at relatively high concentrations in the diet.

PA can reasonably be anticipated to cause significant adverse effects on the environment. PA has been demonstrated to cause environmental toxicity by its contribution to phosphate loading in the environment, which can lead to eutrophication. Eutrophication takes place in oceans, rivers, lakes, and estuaries and results when nutrients, such as phosphates, enter into an aquatic ecosystem, well supplied with sunlight and nitrogen, and stimulate excessive algal growth. EPA believes that eutrophication due to phosphate loading is a well-established serious adverse effect that induces a number of changes to ecosystems including fish kills and changes in the composition of animal and plant life.

IV. Technical Issues Addressed by The Fertilizer Institute

TFI's petition to delist PA focused, among other things, on environmental exposure to PA from EPCRA section 313 covered facilities. Specifically, TFI argued that industrial releases of PA have no significant link to eutrophication of the nation's surface waters. EPA believes that the adverse effects associated with phosphates, including phosphoric acid, are well-established effects that cause changes across a whole ecosystem. Further, as stated in Unit III.B. of this document, EPA believes that the effects induced by phosphates are of such sufficient seriousness that factoring exposure considerations into the listing decision is not warranted because of the scope of their impact and the well-documented evidence supporting the adverse effects. Although information on exposure is not being used in today's action to support the determination that phosphoric acid and phosphates meet the section 313(d)(2)(C) criteria, TFI's comments do pertain to information presented by EPA in the June 25, 1990 (55 FR 25876) **Federal Register** notice and, thus, will be addressed.

TFI claims that the exposure assessment portion of the technical review of Ecolab's petition was flawed. TFI's main claims are: (1) EPA's exposure modeling of releases of PA to surface waters did not sufficiently account for the fate of much of the phosphate which TFI claims would be consumed by plant and/or animal life or would be bound and thus not contribute to the concentration; (2) the modeling incorrectly calculated phosphate concentration rather than phosphorus concentration; and (3) improper receiving streams were used in the models. EPA believes that there is not expected to be any significant abiotic removal of PA after discharge into streams. PA will dissociate to hydrogen and phosphate ions when released to water. In this state there are four possible removal mechanisms: volatilization, photolysis, hydrolysis, and adsorption to sludge and sediments. Phosphate is non-volatile, therefore there will be no removal via this mechanism. Phosphate ions also will not undergo hydrolysis or photolysis. Inorganic phosphate will not adsorb to stream sediments. The only way for a phosphate ion to be able to sorb is for it first to be transformed by other processes. These transformations, however, do not limit the availability of phosphate ions to algae for several reasons. Inorganic phosphate ion is most rapidly taken up by algae, but organic and complexed phosphate can also be readily utilized by most species, particularly those with alkaline phosphatase activity. The transformed phosphate complex that is sorbed to sediments can be released back to the epilimnion by biota in the sediments, and by anaerobic conditions in the water. Lastly, algae are able to effectively utilize phosphorus from the sediments. In conclusion, phosphate ions are capable of several chemical reactions in the environment, but very few of these reactions limit its biological availability (Refs. 3, 6, and 7).

While TFI is correct that phosphate ions will be removed from surface water by organisms, this is precisely the basis for the concern over surface water releases. Uptake of and utilization of phosphate by algae is the primary concern, since it can lead to eutrophication. While removal of phosphate ions by heterotrophic organisms could theoretically be significant, in reality it accounts for only a minor amount of removal because there is a far larger biomass of algae, and bacteria are poor competitors under carbon limiting conditions.

TFI claims that the background levels of phosphorus are above the level of concern at each of the receiving streams examined by EPA. TFI did not provide data to support this blanket statement nor did TFI describe the type of phosphorous measurement it was examining.

EPA agrees that the exposure evaluation report details the phosphate concentrations in analyzed receiving streams, whereas the concern concentration is expressed in terms of total phosphorous. Phosphate amounts are 3.07 times the phosphorous atom in the ion. Therefore, the concern concentration could be expressed as 153.5 ppb of phosphate (converted from concentration of concern of 50 ppb total phosphorous). Comparing this value to the exposure concentrations shows that 27 of the 46 surface water dischargers analyzed exceeded the concern concentration, rather than the 30 referred to in the exposure assessment. This does not alter the significance of the releases.

TFI claims that EPA used incorrect flow data for one facility in its exposure modeling. A reexamination of the river flow data, which is contained in EPA's Industrial Facilities Discharge file, showed that the original flow values used by EPA were correct. This file, which uses U.S. Geological Survey data, is maintained by EPA's Office of Water.

For a second facility, TFI claims that EPA identified and used an incorrect receiving stream. A reexamination of the information available to EPA at the time of the initial assessment confirmed the original estimated discharge site. Further inquiry substantiated the claim that surface water discharges go to the receiving waters identified by TFI. Nevertheless, the discrepancy in the flow data of the streams is of a magnitude that would not substantially affect the estimated concentrations of phosphate. Thus, the reexamination of the exposure data based on the comments by TFI has had little effect on the final concentration numbers generated in the review conducted in response to the Ecolab petition.

V. Public Comment

In the notice issuing the results of EPA's technical review and evaluation of the Ecolab petition to delete PA (June 25, 1990, 55 FR 25876), the Agency requested public comment on the creation of a phosphates category. In 1990, EPA received 12 comments on the creation of this category, 2 of which were in favor of the creation and 10 of which were opposed to it. Although EPA is not proposing to add a phosphates category at this time, because PA is a source of phosphates, EPA believes that the comments received and EPA's responses to those comments provide information relevant to the listing of PA under EPCRA section 313. Therefore, EPA is including the comments and responses to the issue of the addition of a phosphates category in this document. EPA intends to propose the creation of a phosphates category at a later date.

The majority of the commenters contended that eutrophication is an indirect toxic effect and that a phosphates category should not be listed under section 313 because phosphates do not exhibit direct toxicity. They asserted that Congress intended that the section 313 list of toxic chemicals include only chemicals that induce direct toxicity, and that Congress did not intend the list to include chemicals which are only indirectly toxic.

EPA disagrees with these commenters. The EPCRA section 313(d)(2) listing criteria each state that EPA may list a chemical that it determines "is known to cause or can reasonably be anticipated to cause" the relevant adverse human health or environmental effect. It further provides that "[a] determination under this paragraph shall be based on generally accepted scientific principles." Ultimately, the crux of the issue commenters raise lies in interpreting the phrase "cause or can reasonably be anticipated to cause," which Congress chose not to define. In arguing that EPA lacks the statutory authority to base its listing decisions on "indirect toxicity," the commenters would have the Agency adopt an artificially narrow view of causation that would require a single-step path between exposure to the toxic chemical and the effect. Such a mechanistic approach confuses the mode or mechanism of the chemical's action (i.e., the chain of causation) with the fundamental question of whether, regardless of the number of intervening steps, there is a natural and continuous line, unbroken by any intervening causes, between exposure to the chemical and the toxic effect. By contrast, EPA believes that Congress granted the Agency broad discretion in making listing decisions and directed EPA to rely on generally accepted scientific principles in making determinations to implement this section of EPCRA.

It is a generally accepted scientific principle that causality need not be linear, i.e., a one-step process. e.g., Proposed Guidelines for Ecological Risk Assessment, 61 FR 47552, September 9, 1996; Proposed Guidelines for Carcinogen Risk Assessment, 61 FR 17960, April 23, 1996. For purposes of EPCRA section 313, the distinction between direct and indirect effects is technically an artificial one. Whether the toxic effect is caused directly by a chemical through a one-step process, or indirectly by a degradatjon product of the chemical, a second chemical that is created through chemical reactions involving the first chemical, or some other mechanism, the toxic effect still occurs as a result of exposure to the chemical. It makes no difference to the affected organism whether the toxic agent was a result of chemical degradation or chemical reactions. Fundamentally, EPCRA section 313 is concerned with adverse effects on humans and the environment, not the chain of causation by which such effects occur. In fact, this type of "indirect" toxicity is not unlike the effects of certain nonlinear carcinogens. Some carcinogens induce cancer through a two step mechanism in which the chemical causes an intervening pathological change, and this pathological change is the direct cause of the cancer, but this does not mean that the chemical is not known or reasonably anticipated to cause cancer. It is therefore reasonable for EPA to consider such effects in light of the broad statutory purpose to inform the public about releases to the environment. Were EPA to exclude indirect effects from consideration, it would dilute the purpose of the statute by precluding public access to information about chemicals that cause a wide range of adverse health and environmental effects.

In prior petition decisions, EPA has considered other types of significant adverse effects on the environment that result from the releases of chemicals. For example, the addition of seven chlorofluorocarbons (CFCs) and halons (August 3, 1990, 55 FR 31594) and the denial of petitions on volatile organic compounds (VOCs), specifically, the ethylene and propylene petition (January 27, 1989, 54 FR 4072) and the cyclohexane petition (March 15, 1989, 54 FR 10668) all concerned adverse effects on the environment.

Some commenters do not believe that it is probable that eutrophication will

VOL 63 ISS 15 JA 23 1998 UMI

occur and believe that if it does occur it is not necessarily tied to phosphate releases.

Although a number of nutrients in addition to phosphorus (as phosphates) are required for eutrophication to occur, in many cases phosphorus levels are the limiting factor. Phosphorus (as phosphate) is the most critical nutrient in controlling the growth of blue-green algal species. There is no indication in the literature that the connection between phosphates and algal blooms and fish kills is tenuous.

A number of communities have experienced problems with eutrophication that is a result of phosphate loading. For example, in the Chowan River in North Carolina significant algal blooms have occurred in 1987, 1989, and 1990 (Ref. 8).

Many commenters believe that a phosphates category should not be added because releases of phosphates from industrial facilities subject to section 313 reporting requirements are an insignificant part of total phosphates released to the environment.

Nationwide, approximately two to three percent of all releases of phosphates to the environment are from industrial facilities that are required to report under EPCRA section 313. However, discharges from industrial facilities can contribute significantly to the levels of phosphates in a receiving stream. There are cases in which the major contributor of phosphates to a stream or river is an industrial facility that is covered by EPCRA section 313. Whether EPCRA section 313 covered facilities are a significant source of a toxic chemical in the environment compared to other sources does not change the fact that a toxic chemical that meets the listing criteria of EPCRA section 313 is being released to the environment and adding to the overall amount of the chemical in the environment.

Many commenters believe that a phosphates category should not be added to the section 313 list because information on phosphate releases are captured by the National Pollutant Discharge Elimination System (NPDES).

Not all industries required to report under EPCRA section 313 are required to have NPDES permits. Moreover, even if an individual discharger is regulated and has monitoring data related to its releases of PA, this information is not readily available to the public, as it would be if the discharger were required to comply with EPCRA section 313. Rather, the public would have to resort to the more cumbersome Freedom of Information Act process to obtain the information. Thus, contrary to commenters suggestions, listing phosphates on TRI would provide useful, easily accessible information to the public.

VI. Explanation of Denial of Petition

EPA believes that the types of deleterious changes that PA effects in aquatic ecosystems meet the listing criteria under EPCRA section 313(d)(2). As stated in the Conference Report accompanying EPCRA, 99-962, October 3, 1986, Joint Explanatory Statement of the Committee of Conference (p. 295):

> In determining what constitutes a significant adverse effect on the environment...the Administrator should consider the extent to which the toxic chemical causes or can reasonably be anticipated to cause any of the following adverse reactions, even if restricted to the immediate vicinity adjacent to the site:
>
> (1) Gradual or sudden changes in the composition of animal life or plant life, including fungal or microbial organisms in an area.
>
> (2) Abnormal number of deaths of organisms (e.g., fish kills).
>
> (3) Reduction of the reproductive success or the vigor of a species.
>
> (4) Reduction in agricultural productivity, whether crops or livestock.
>
> (5) Alterations in the behavior or distribution of a species.
>
> (6) Long lasting or irreversible contamination of components of the physical environment, especially in the case of ground water, and surface water and soil resources that have limited self-cleansing capability.

The effect of phosphates, including PA, on the environment is to induce a number of changes to the environment specified above, particularly fish kills and changes in the composition of animal and plant life in an area.

EPA has serious concerns for the contribution of PA to phosphate loading in the environment and its potential eutrophic effects. EPA believes that the adverse effects associated with phosphates, including phosphoric acid, are well-established effects that cause changes across a whole ecosystem. Further, EPA believes that the effects induced by phosphates, including PA, are of such sufficient seriousness that additional exposure considerations are not warranted because of the scope of the impact of the effects and the well-documented evidence supporting the adverse effects. This determination is consistent with EPA's stated policy on the use of exposure assessments in EPCRA section 313 listing and delisting decisions (59 FR 61432, November 30, 1994). Therefore, EPA is denying TFI's petition to delete PA from the EPCRA section 313 list of toxic chemicals because EPA has determined that PA meets the listing criteria of EPCRA section 313(d)(2)(C).

The Agency believes that the most efficient manner to address its concerns for phosphates is by the formation of a phosphates category. However, at this time, EPA is not proposing to create a phosphates category under EPCRA section 313. EPA intends to propose the creation of such a category as a separate rulemaking at a later date.

BILLING CODE 6560–50–F

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5952–1]

Proposed Cost Recovery Settlement Under Section 122(h)(1) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as Amended, 42 U.S.C. 9622(h)(1), Hadley Street Drum Site, St. Louis, Missouri

AGENCY: Environmental Protection Agency (EAP).

ACTION: Notice of proposed cost recovery settlement under section 122(h)(1) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9662(h)(1), Hadley Street Drum Site, St. Louis, Missouri.

SUMMARY: The United States Environmental Protection Agency (EPA) is proposing to enter into a cost recovery administrative settlement to resolve claims under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9622(h)(1). This settlement is intended to resolve the liability of Hadley Street Real Estate Company, Inc. ("Hadley Street Real Estate") for the response costs incurred by the EPA in overseeing a removal action conducted by Hadley Street Real Estate at the Hadley Street Drum Superfund Site, St. Louis, Missouri. The proposed settlement was signed by the Environmental Protection Agency (EPA) on October 8, 1997. Because EPA's total response costs did not exceed $500,000, the Attorney General's concurrence is not required for this settlement.

DATES: Written comments must be provided on or before February 23, 1998.

ADDRESSES: Comments should be addressed to Daniel J. Shiel, Office of Regional Counsel, United States Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101 and should refer to: *In the matter of Hadley Street, Real Estate Company, Inc.*, EPA Docket NO. VII–98–F–0001.

The proposed administrative settlement may be examined in person at the United States Environmental Protection Agency, Region VII, 726 Minnesota Avenue, Kansas City, Kansas 66101. To request a copy by mail please refer to the matter name and docket number set forth above and enclose a check in the amount of $3.75 (25 cents per page for reproduction costs), payable to the United States Environmental Protection Agency.

SUPPLEMENTARY INFORMATION: The proposed administrative settlement concerns the Hadley Street Drum Superfund Site in St. Louis, Missouri. On July 24, 1992, EPA issued a CERCLA 106(a) Unilateral Administrative Order ("the Order") to Respondent requiring it to conduct removal actions at the Site. This administrative action was captioned *In the matter of Hadley Street Drum Site*, EPA Docket NO. VII–92–F–0024. The Hadley Street Drum Site included properties located at 1515 and 1531–1541 Hadley Street, St. Louis, Missouri. Hadley Street Real Estate owned a portion of the Site at the time EPA issued the UAO. Hadley Street Real Estate conducted the removal actions ordered by EPA on its property and EPA conducted the necessary removal actions on the other portion of the Site.

Hadley Street Real Estate did not agree to reimburse EPA's costs of overseeing the removal action. By letter dated October 12, 1995, EPA mailed Respondent an Itemized Cost Summary with a demand that Respondent pay EPA $31,806.21 in response costs. This led to submittal of information on behalf of Hadley Street Real Estate supporting its claim of inability to pay the full amount of EPA's costs. Hadley Street Real Estate ultimately offered to pay $5,000 of EPA's costs. EPA Region VII reviewed the information submitted by Hadley Street Real Estate and concluded that it could not pay more than the $5,000 offered in settlement.

Dated: December 15, 1997.

Dennis Grams,

Regional Administrator.

Sunshine Act Meeting; Farm Credit Administration Board; Special Meeting

AGENCY: Farm Credit Administration.

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the forthcoming special meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The special meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on January 27, 1998, from 9:00 a.m. until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: Floyd Fithian, Secretary to the Farm Credit Administration Board, (703) 883–4025, TDD (703) 883–4444.

ADDRESSES: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts of this meeting will be closed to the public. In order to increase the accessibility to Board meetings, persons requiring assistance should make arrangements in advance. The matters to be considered at the meeting are:

Open Session

A. Approval of Minutes
B. New Business
  Regulation
  General Financing Agreements [12 CFR Part 614] (Final)

** Closed Session*

C. Report
  OGC Litigation Report
  * Session closed-exempt pursuant to 5 U.S.C. 552b(c)(10).

BILLING CODE 6705–01–P

FEDERAL COMMUNICATIONS COMMISSION

[DA 98–37]

Wireless Telecommunications Bureau Responds to Questions About the Local Multipoint Distribution Service Auction

Released: January 9, 1998.

Over the past weeks, the Wireless Telecommunications Bureau ("Bureau") has received numerous inquiries concerning the auction rules and eligibility requirements for the Local Multipoint Distribution Service ("LMDS") auction scheduled to commence on February 18, 1998. In this Public Notice, the staff provides guidance on a range of issues involving the rules for the LMDS auction.

The service and auction rules pertaining to LMDS are found in parts 1 and 101 of the Commission's rules (Title 47 of the Code of Federal Regulations). The Commission's rules governing eligibility for bidding credits were established to ensure that small businesses, rural telephone companies, and businesses owned by members of minority groups and/or women (collectively referred to as "designated entities" or "DEs") are provided meaningful opportunities to compete in the provision of LMDS. These rules are primarily addressed in the *LMDS Second Report and Order*, the *LMDS Order on Reconsideration*, and the *LMDS Second Order on Reconsideration*. Additional auction information is provided to potential bidders in a comprehensive Bidder Information Package. This package contains guidelines regarding pre-auction procedures, the auction event, and post-auction procedures. (Interested parties can order an LMDS Bidder Information Package by calling (888) 225–5322, Option #2. Applicants are entitled to one free LMDS Bidder Information Package; additional copies cost $16 each.) The Bureau will release a public notice setting forth minimum opening bids for the LMDS auction prior to the FCC Form 175 short form filing deadline.

Many of the inquiries the Bureau has received are based on the inquiring parties' specific circumstances. The Bureau has recast the most frequently asked questions in more general terms in order to provide guidance to a larger group of interested parties. Potential applicants should understand that the advice and rule interpretations provided in this Public Notice constitute informal staff opinion, not official Commission decisions or rulings.

I. General Ownership Issues

Q: When disclosing ownership information on the FCC Form 175, should applicants report all entities that hold a five percent or greater voting (control) interest or other economic interest?

A: In previous services (*e.g.*, broadband PCS), the Commission specifically required that applicants report all entities that held interests in the applicant of five percent or more that also held or were applying for CMRS or PMRS licenses. For LMDS, applicants must comply with the general reporting rule set forth in Part 1 of the Commission's rules, which is less specific about which entities must be identified. By identifying on Attachment A to their FCC Forms 175 all entities holding five percent or greater interests in the applicant that also hold or are applying for CMRS or PMRS licenses, applicants will assist themselves in identifying entities with which they must avoid contact pursuant to the anti-collusion rule. Applicants should be aware that at the long-form application stage, they will be subject to the reporting requirements contained in the newly adopted Part 1 ownership disclosure rule.

Q: Can new non-controlling investors be added after the FCC Form 175 is filed and throughout the auction?

A: New non-controlling investors can be added after the FCC Form 175 is filed and throughout the duration of the auction, provided their addition does not result in a change of control of the applicant. An applicant should amend its FCC Form 175 within 10 business days of any change, and should provide notice of the change by letter addressed to Kathleen O'Brien Ham, Chief, Auctions and Industry Analysis Division, Wireless Telecommunications Bureau, 2025 M Street, N.W., Suite 5202, Washington, D.C. 20554, with a copy filed with the Office of the Secretary, 1919 M Street, N.W., Washington, D.C. 20554.

Q: When an applicant is a consortium, can only one member of the consortium conduct bidding during the auction? What if a member of a consortium decides to withdraw during the auction?

A: A consortium is defined as "a conglomerate organization formed as a joint venture between or among mutually independent business firms, each of which individually satisfies the definition of a very small business, small business or entrepreneur." Where an applicant is a consortium, the gross revenues of its members are not aggregated. The definition of consortium does not prohibit one member from placing the bids for the consortium as a whole.

Because each member of a consortium must individually satisfy the definition of a very small business, small business, or entrepreneur at the FCC Form 175 filing deadline, members may withdraw during the course of the auction, or afterward, without endangering the treatment of the consortium. The withdrawal of a member would merely change the composition of the consortium, and should be reflected in a filing with the Commission. On the other hand, adding a new member to a consortium after the FCC Form 175 filing deadline will not be permitted because the filing deadline is the cut-off date for determinations of whether applicants meet the definitions of very small business, small business, or entrepreneur.

II. Foreign Ownership Issues

Q: How much foreign ownership of a licensee is permissible? Can LMDS applicants seek more than 25 percent indirect foreign ownership?

A: Section 310(a) of the Communications Act of 1934, as amended ("Communications Act"), prohibits granting any wireless license to a foreign government or a representative thereof. Section 310(b) of the Communications Act imposes restrictions on the foreign ownership of common carrier, broadcast, and aeronautical licensees. Under this section, the Commission may not grant a common carrier wireless license to an alien, the representative of an alien, any corporation organized under the laws of any foreign government, or any corporation of which more than 20 percent is owned by foreign entities. Section 310(b)(4) imposes additional restrictions on the foreign ownership of the parent corporation of a common carrier licensee, specifically that no common carrier license shall be granted to or held by "any corporation directly or indirectly controlled by any other corporation of which more than one-fourth of the capital stock is owned of record or voted by aliens * * * or by any corporation organized under the laws of a foreign country . . . if the Commission finds that the public interest will be served by the refusal or revocation of such license." Under the *Foreign Participation Order*, the Commission recently liberalized its rules for determining when refusal or revocation would serve the public interest. The final rules set forth in the *Foreign Participation Order* will not become effective before February 9, 1998. Any applicant that is controlled by a corporation with more than 25 percent foreign ownership, or which seeks to exceed that limit, must inform the Commission in a separate petition for declaratory ruling. The Commission will accept petitions for declaratory ruling immediately, but will not necessarily rule on them prior to the auction start date. Because applicants must certify on their short form applications that they are in compliance with the foreign ownership provisions of Section 310 of the Communications Act, applicants filing petitions for declaratory rulings must reference their pending petitions in their short form applications. Applicants seeking foreign investment should familiarize themselves with the *Foreign Participation Order*, particularly Section III.D. That order is available from the Commission's web site at <http://www.fcc.gov/ib/wto.html>.

III. Bidding Credits and Eligibility Issues

Q: What constitutes gross revenues as described in 47 CFR 101.1112?

A: Gross revenues include all income received by an entity, whether earned or passive, before any deductions are made for the costs of doing business, as evidenced by audited financial statements for the preceding three years. If an entity was not in existence for the entire preceding three years, gross revenues shall be evidenced by audited financial statements of the entity's predecessor-in-interest, or if there is no identifiable predecessor-in-interest, unaudited financial statements certified by the applicant as accurate. The Commission will evaluate applicants' gross revenues as they are reflected in financial statements prepared in accordance with generally accepted accounting principles.

Q: Now that the auction has been rescheduled for February 18, 1998, will the Commission require applicants to provide audited financial statements for 1997?

A: Applicants must furnish evidence of their gross revenues based upon their most recently-completed audited financial statements. Thus, if audited financial statements for calendar year 1997 have not been fully prepared by the FCC Form 175 filing deadline of January 20, 1998, audited statements for the years 1994, 1995, and 1996 will suffice.

Q: Are the gross revenues of an applicant's affiliates counted in determining that applicant's eligibility for a bidding credit?

A: Yes. An applicant must aggregate the gross revenues of all affiliates, as defined in 47 CFR 101.1112(h), in order to determine its bidding credit eligibility.

Q: When determining eligibility for bidding credits, will the gross revenues of individuals who are affiliates be included in determining the bidder's gross revenues? Is there a conceivable instance when an individual's gross revenues will affect an applicant's eligibility for a bidding credit?

A: This issue has been raised on reconsideration in another proceeding and the Bureau refrains from directly addressing it at this point. However, the Bureau notes that for LMDS, the Commission did not adopt a rule that attributes personal net worth for purposes of determining eligibility. Personal net worth has been defined as "the market value of all assets (real and personal, tangible and intangible) owned by an individual, less all liabilities (including personal guarantees) owed by the individual in his individual capacity or as a joint obligor." In other services (*i.e.*, broadband PCS), the Commission eliminated a personal net worth test, concluding that "the affiliation rules make the personal net worth rules largely unnecessary since most wealthy individuals are likely to have their wealth closely tied to ownership of another business."

Q: Is there a minimum equity requirement for controlling small business principals?

A: No. However, the Bureau cautions that the absence of equity in the hands of controlling small business principals could raise questions about whether the applicant itself qualifies as a *bona fide* small business. For instance, if a single party holds *de jure* control, as evidenced by ownership of 50.1 percent of the voting stock, this party must also hold *de facto* control in order to be considered a controlling principal. If no single party has *de jure* control of the applicant, *de facto* control factors will determine who controls the applicant. By way of comparison, in broadband PCS, controlling principals were required to hold at least 15 percent of the applicant's total equity under one particular business structure.

Q: Does the bidding credit schedule adopted in the Commission's Part 1 Proceeding apply to LMDS?

A: No. LMDS has a specific bidding credit rule that is not affected by the Part 1 rule changes.

IV. Anti-Collusion Rule Issues

Q: What conduct constitutes a violation of the Commission's anti-collusion rule?

A: After the deadline for submission of the FCC Form 175, applicants may not discuss the substance of their bids or bidding strategies with other bidders that have applied to bid in the same geographic license areas, with the exception of those with which they have entered into agreements identified on the FCC Form 175. The term "applicant" includes the entity that submits an application for auction participation, owners of five percent or more of that entity, and all officers and directors of that entity. (*But see* part 1 at ¶ 164 (which changes the attribution level of the anti-collusion rule to 10 percent; however, this rule does not apply to the LMDS auction. The new part 1 rules, with the exception of rules pertaining to post-auction payment and long-form application obligations, will apply only to auctions commencing after the new rules' effective date)). The rule also prohibits the transfer of indirect information which affects, or could affect, bids or bidding strategy. All bidding arrangements must be disclosed on an applicant's short form application. Auction applicants who have applied for licenses in the same geographic areas, and who are also licensees or applicants for licenses in the same or competing services, must affirmatively avoid all communications with each other that affect, or have the potential to affect, their bids or bidding strategy. This does not mean that all business negotiations between bidders for the same markets are prohibited; however, the Bureau recommends that bidders for the same markets exercise caution when engaging in such discussions.

Q: Do public statements such as "we want to win 10 million pops" or "we want to win top markets" or "we have $5 million to spend" constitute disclosures of bids or bidding strategy?

A: Public statements can give rise to collusion concerns. This has occurred in the antitrust context, where certain public statements can support other evidence which tends to indicate the existence of a conspiracy. The Bureau therefore urges bidders for common markets to exercise caution when making public statements about their bids or bidding strategies.

Q: If an applicant files an FCC Form 175 prior to the filing deadline of January 20, 1998, may this applicant speak with other potential applicants during the time between its filing and the deadline? In other words, at what

VOL 63 ISS 15 JA 23 1998 UMI

point are two parties considered to be competing for the same market?

A: An FCC Form 175 is considered officially filed upon the filing deadline, regardless of whether it was actually filed one day or one month prior to the deadline. Changes to electronically filed applications can be made any time prior to the filing deadline on January 20, 1998, and applicants cannot view each others' electronically filed applications prior to that deadline. Thus, parties are not considered to be competing for the same market until the window for submitting applications closes at 5:30 p.m., ET, on January 20, 1998.

Q: Can an individual act as the authorized bidder and place bids for two or more applicants who are competing for one or more of the same markets? What if different individuals who are employed by the same organization place bids for applicants in competing markets?

A: A violation of the anti-collusion rule could occur if an individual acts as the authorized bidder for two or more competing applicants, and conveys information concerning the substance of bids or bidding strategies between the bidders he/she is authorized to represent in the auction. Also, if the authorized bidders are different individuals employed by the same organization, a violation could similarly occur. In such instances, the Bureau strongly encourages applicants to certify on their application that precautionary steps (*e.g.*, establishing a "Chinese wall") have been taken to prevent communication between authorized bidders and that applicants and their bidding agents will comply with the anti-collusion rule.

V. Technical Issues

Q: In bands where Mobile Satellite Service ("MSS") feeder links are permitted, is uplink transmission (subscriber end) allowed if there is no MSS licensee operating?

A: No. The interference analyses conducted indicated that subscribers' transceivers potentially are major interferers to MSS feeder link earth station satellite receivers because of the elevation angles many will be employing. The satellites to be deployed in these MSS systems will be orbiting in different planes over the United States. Therefore, there is the potential for them to become aligned with the beam of a subscriber transceiver at any location in the United States. To review those analyses, see the Report of the LMDS/FSS 28 GHz Band Negotiated Rulemaking Committee, CC Docket No. 92–297 (September 23, 1994).

Q: What are the deadlines for 31 GHz incumbents to vacate the 31 GHz middle band?

A: Incumbent 31 GHz licensees were provided 75 days after the effective date of the LMDS service rules to request modification of their licenses to relocate to the outer two 75 megahertz blocks of the 31 GHz band. Failure to do so means that such incumbent operations become secondary to LMDS operations in the middle band. This means that LMDS operators are not required to protect these incumbent operations from interference, nor are the incumbent operations permitted to cause interference to LMDS systems. Of course, these incumbents can relocate to other bands or other transmission media at any time.

VI. Miscellaneous

Q: Will the Commission inform applicants of the minimum opening bid for each BTA license prior to the FCC Form 175 filing deadline of January 20, 1998?

A: Yes. The Bureau released a Public Notice on October 17, 1997, seeking comment on minimum opening bid proposals. Comments were due on November 5, 1997, with reply comments due on November 10, 1997. A subsequent Public Notice extended the reply comment deadline to December 1, 1997. Prior to January 20, 1998, the Bureau will release a public notice setting forth a minimum opening bid for each license.

Q: What is the Commission's calculation to convert ILEC access lines to pops for purposes of the 10 percent in-region calculation?

A: The Commission has not developed a calculation to convert access lines to pops. The ILEC should determine the geographic area that it serves and then use census data for determining the population of that area.

Q: What are the consequences if an applicant fails to complete properly the FCC Form 175?

A: An applicant is solely responsible for the true, accurate, and complete submission of its FCC Form 175, and incomplete or inaccurate FCC Forms 175 may be rejected or required to be refiled. The Commission checks FCC Forms 175 for deficiencies that would affect their initial acceptability, and will act to apprise applicants of deficiencies after initial review. Applicants are then given an opportunity to cure such deficiencies. Once a corrected application is resubmitted, however, no major amendments can occur. This would include, for example, changes to bidding credits.

Q: Does the must-carry rule apply to LMDS for license holders who wish to provide television service?

A: No. According to the Communications Act, the must-carry rule applies only to cable operators. Cable operators are defined as persons who provide cable service to subscribers, and cable service is defined as one-way transmission of video or other programming by means of a set of closed transmission paths. As a two-way wireless service, LMDS is not subject to must-carry requirements.

Q: Will the bidding software be supported by Windows 95?

A: While the auction software has been known to work with Windows 95, Microsoft has not yet affirmed supportability. Until Microsoft makes that determination, use of the auction software with Windows 95 is solely at the bidder's own risk.

Q: Will the Commission provide applicants a list of proposed and licensed MSS feeder link earth station sites?

A: Yes. The list is attached to this Public Notice as Attachment A.

Q: Is the Commission considering the authorization of any other two-way video services in the near future?

A: Yes. Bidders should be aware that the Commission's Mass Media Bureau is conducting a proceeding in which additional spectrum for the Multipoint Distribution Service ("MDS") is being discussed. Comments in that proceeding were due December 9, 1997, and reply comments are due January 8, 1998.

Bidders should also be aware that the 39 GHz band has the potential for point-to-multipoint service.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection(s) Approved by Office of Management and Budget

January 16, 1998.

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collection(s) pursuant to the Paperwork Reduction Act of 1995, Pub. L. 96–511. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. Not withstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Questions concerning the OMB control numbers and expiration dates should be directed to Judy Boley, Federal Communications Commission, (202) 418–0214.

Federal Communications Commission

OMB Control No.: 3060–0812.

Expiration Date: 06/30/1998.

Title: Assessment and Collection of Regulatory Fees for Fiscal Year 1997—MD Docket No. 96–186.

Form No.: N/A.

Estimated Annual Burden: 635,738 responses; 317,869 total annual hours; 0.5 hours per respondent.

Description: This information is required to: (1) facilitate the statutory provisions that non-profit entities be exempt from payment of regulatory fees, and (2) facilitate the FCC's ability to audit regulatory fee payment compliance in the Commercial Mobile Radio Services (CMRS) industry.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than February 17, 1998.

A. Federal Reserve Bank of Minneapolis (Karen L. Grandstrand, Vice President) 90 Hennepin Avenue, P.O. Box 291, Minneapolis, Minnesota 55480-0291:

1. Dakota Bancshares, Inc., Mendota Heights, Minnesota; to acquire 81 percent of the voting shares of Olivia Bancorporation, Inc., Olivia, Minnesota, and thereby indirectly acquire American State Bank of Olivia, Olivia, Minnesota.

Board of Governors of the Federal Reserve System, January 20, 1998.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

TIME AND DATE: 10:00 a.m., Wednesday, January 28, 1998.

PLACE: Marriner S. Eccles Federal Reserve Board Building, 20th and C Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any matters carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Joseph R. Coyne, Assistant to the Board; 202–452–3204.

SUPPLEMENTARY INFORMATION: You may call 202–452–3206 beginning at approximately 5 p.m. two business days before the meeting for a recorded announcement of bank and bank holding company applications scheduled for the meeting; or you may contact the Board's Web site at http://www.bog.frb.fed.us for an electronic announcement that not only lists applications, but also indicates procedural and other information about the meeting.

Dated: January 21, 1998.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 98–1730 Filed 1–21–98; 12:22 pm]

BILLING CODE 6210–01–P

FEDERAL TRADE COMMISSION

Cigarette Testing; Extension of Deadline for Submission of Public Comments

AGENCY: Federal Trade Commission.

ACTION: Extension of deadline for submission of comments on proposed

VOL 63 ISS 15 JA 23 1998 UMI

revisions to the Federal Trade Commission methodology for determining tar, nicotine, and carbon monoxide yields of cigarettes, and on a proposed format for disclosing the resulting ratings in advertising.

SUMMARY: The Federal Trade Commission ("FTC" or "Commission") is extending until February 4, 1998 the deadline for filing comments on its proposed revisions to the testing method used to determine the tar, nicotine, and carbon monoxide ratings of cigarettes, and on two possible formats for disclosure of those test results.

FOR FURTHER INFORMATION CONTACT: Shira D. Modell, Division of Advertising Practices, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580, (202) 326–3116.

SUPPLEMENTARY INFORMATION: On September 9, 1997, the Commission issued a notice proposing changes to the methodology currently used to determine cigarette ratings for tar, nicotine, and carbon monoxide. *See* 62 FR 48,158 (Sept. 12, 1997). The proposed methodology would produce tar, nicotine, and carbon monoxide yields using both the current testing parameters and more intensive smoking conditions, thus producing a range of potential yields for each cigarette. The Commission requested comment on those proposed changes to the testing methodology, and on the feasibility of generating the upper tier of tar, nicotine, and carbon monoxide ratings through mathematical formulas, rather than actual testing on a smoking machine. The Commission also placed on the public record two different legends that could be used in advertising to disclose the ratings and sought comment on the usefulness and feasibility of these potential disclosure formats. Finally, comment was requested on alternative approaches that were considered but not proposed by the Commission. The deadline for submission of the requested comments was November 17, 1997.

On October 29, 1997, the Commission announced that, pursuant to requests submitted by, among others, the Food and Drug Administration and the four largest cigarette manufacturers, it had decided to extend the filing deadline until January 20, 1998. *See* 62 FR 58,972 (Oct. 31, 1997).

The Commission has now received a request for further extension of the filing deadline from Prospect Associates, which serves as the Coordinating Center for the National Cancer Institute's Project ASSIST (American Stop Smoking Intervention Study). The Coordinating Center and the 17 states that ASSIST funds seek this extension so they can incorporate into their comment newly available data relevant to the issues raised by the Commission's proposal, including new data from smoking machine tests conducted pursuant to a methodology promulgated by Massachusetts.

In light of the significance of the issues addressed by the Commission's September 1997 proposal, the deadline for submitting comments on that proposal is hereby extended until February 4, 1998.

By direction of the Commission.

Donald S. Clark,

Secretary.

[FR Doc. 98–1650 Filed 1–22–98; 8:45 am]

BILLING CODE 6750–01–M

FEDERAL TRADE COMMISSION

Revised Jurisdictional Thresholds for Section 8 of the Clayton Act

AGENCY: Federal Trade Commission.

ACTION: Notice.

SUMMARY: The Federal Trade Commission announces the revised thresholds for interlocking directorates required by the 1900 amendment of section 8 of the Clayton Act. Section 8 prohibits, with certain exceptions, one person from serving as a director or officer of two competing corporations if two thresholds are met. Competitor corporations are covered by section 8 if each one has capital, surplus, and undivided profits aggregating more than $10,000,000, with the exception that no corporation is covered if the competitive sales of either corporation are less than $1,000,000. Section 8(a)(5) requires the Federal Trade Commission to revise those thresholds annually, based on the change in gross national product. The new thresholds, which take effect immediately, are $14,730,000 for section 8(a)(1), and $1,473,000 for section 8(a)(2)(A).

EFFECTIVE DATE: January 23, 1998.

FOR FURTHER INFORMATION CONTACT: James Mongoven, Bureau of Competition, Office of Policy and Evaluation, (202) 326–2879.

(Authority: 15 U.S.C. 19(a)(5))

By direction of the Commission, Commissioner Azcuenaga not participating.

Donald S. Clark,

Secretary.

[FR Doc. 98–1648 Filed 1–22–98; 8:45 am]

BILLING CODE 6750–01–M

FEDERAL TRADE COMMISSION

Report of the Tar, Nicotine, and Carbon Monoxide of the Smoke of 1249 Varieties of Domestic Cigarettes For the Year 1995

ACTION: Notice.

SUMMARY: The Federal Trade Commission publishes the Report of the Tar, Nicotine, and Carbon Monoxide of the Smoke of 1249 Varieties of Domestic Cigarettes.

DATES: January 23, 1998.

ADDRESSES: Copies of the report are available from the FTC's World Wide Web site at: *http:www.ftc.gov* and from the FTC's Public Reference Branch, Room 130, 6th St. and Pennsylvania Ave., NW., Washington, DC 20580. (202) 326–3222.

FOR FURTHER INFORMATION CONTACT: Tonya Esposito, Legal Assistant, Federal Trade Commission, Bureau of Consumer Protection, 6th St. and Pennsylvania Ave., NW., Washington, DC 20580. Telephone (202) 326–3247.

SUPPLEMENTARY INFORMATION: These are the most recent test results of the tar, nicotine, and carbon monoxide yields of the smoke of domestic cigarettes reported by the FTC. This Report contains data on 1249 varieties of cigarettes manufactured and sold in the United States in 1995. The Tobacco Institute Testing Laboratory (TITL), a private laboratory operated by the cigarette industry, conducted the tar, nicotine, and carbon monoxide testing for the widely-available domestic cigarette varieties. This testing was conducted under the review of a representative of the FTC through periodic unannounced inspections. TITL provided the results to the respective cigarette companies. The companies provided the data generated by TITL regarding their own brands to the FTC in response to compulsory process issued by the Commission. Cigarette smoke from generic, private label, and not-widely-available cigarettes was not tested by TITL, but was tested by the cigarette companies and the test results were provided to the FTC in response to compulsory process.
